

This file belongs to the article “Wedge order and the character-forming rules of Neo-Assyrian cuneiform” by Jonathan Taylor in [Scribal Worlds: Scholarship and classification in cuneiform cultures](#), edited by Eduardo A. Escobar, Kiersten Neumann, and C. Jay Crisostomo, London: UCL Press, 2026.

These drawings are genericised sketches of signs designed to convey multiple observed instances clearly, not to be accurate copies of specific examples. Neither the exact number of wedges in an array nor the nuances of wedge placement seem to be significant for wedge order. The author has nevertheless attempted to document orders in several arrangements for signs where variation occurs. Images of all sources used may be found at the [British Museum Collection Online](#) resource.

In the wedge order column, “B)” indicates Babylonian script forms. “a), b), c)” etc. serve to allow variant forms to be referenced. They are applied arbitrarily for the convenience of this piece of research only. For the purposes of this study, any future sign list detailing variants should assign sigla systematically rather than continue the ones used here. Numbers indicate the order of wedge placement. When a number is repeated, this indicates uncertainty as to the relative order of those wedges. In the sources column, “B)” introduces a section listing tablets in Babylonian script. All such tablets are listed in italics. When variants are recorded in the wedge order column, the same sigla are used in the sources column. The number in brackets refers to the frequency of this order detected in that tablet.
