# Foreword

The present series of publications, Royal Inscriptions of the Neo-Assyrian Period (RINAP), is intended to present up-to-date editions of the royal inscriptions of a number of Neo-Assyrian rulers. It is modeled on the publications of the now-defunct Royal Inscriptions of Mesopotamia (RIM) series and carries on where the RIMA (Royal Inscriptions of Mesopotamia, Assyrian Periods) publications ended. The RIM Project was initiated by A. Kirk Grayson at the University of Toronto in 1979 and over the years received extensive support from the Social Sciences and Humanities Research Council of Canada, the University of Toronto, and private individuals, in particular Laurence Shiff. In all, it produced ten volumes in its various sub-series. Grayson retired from the University of Toronto in 2000 and a few years later found it necessary to cease scholarly pursuits due to personal and family illnesses. At that time, he handed over responsibility for the work of the project to me, formerly the assistant director and at times acting director of the RIM Project. When I took up a position at the University of Pennsylvania in 2006 and the last RIM volume (RIME 1 by Douglas R. Frayne) appeared in early 2008, the RIM Project officially ceased to exist. Work on several further volumes of inscriptions of Assyrian and Babylonian rulers had already begun during the time of the RIM Project and Grayson passed on responsibility for the materials and manuscripts to me. In 2007, I initiated the current project in order to continue the task of making the official inscriptions of the several important Neo-Assyrian rulers available in modern, scholarly editions. While the volumes in the new series resemble the format of the RIM volumes in most matters, the RINAP volumes include indices of proper names, and editions of the texts are also available online, in connection with the Cuneiform Digital Library Initiative (CDLI) and the Open Richly Annotated Cuneiform Corpus Initiative (Oracc).

Five volumes have already appeared in this series: RINAP 1, comprising the inscriptions of Tiglath-pileser III and Shalmaneser V (begun by Hayim Tadmor and completed by Shigeo Yamada); RINAP 3/1–2, comprising the inscriptions of Sennacherib (begun by A. Kirk Grayson and completed by his collaborator Jamie Novotny); RINAP 4, comprising the inscriptions of Esarhaddon (by Erle Leichty, with a contribution by Grant Frame); and RINAP 5/1, comprising many of the inscriptions of Ashurbanipal (by Jamie Novotny and Joshua Jeffers). The remainder of the royal inscriptions of Ashurbanipal and those of his successors Aššur-etel-ilāni and Sîn-šarra-iškun will be presented in two forthcoming volumes (RINAP 5/2 and 5/3) by Joshua Jeffers and Jamie Novotny. The present volume (RINAP 2) provides editions of the inscriptions of Sargon II and has been completed by myself, with the collaboration of Andreas Fuchs for text nos. 82 (Nineveh Prism) and 117 (Najafabad Stele).

The National Endowment for the Humanities awarded the RINAP Project research grants in 2008, 2010, 2012, 2015, and 2017, as well as supplementary funds in 2019, to help carry out its work and my sincere thanks must be expressed to it. My appreciation must also be extended to the University of Pennsylvania and to the University of Pennsylvania Museum of Archaeology and Anthropology, where the project is based, for their constant support. Additional funding for the preparation of RINAP 2 was provided by the University of Pennsylvania Research Foundation and the School of Arts and Sciences of the University of Pennsylvania, as well as by the Alexander von Humboldt Foundation (through the establishment of the Alexander von Humboldt Professorship for Ancient History of the Near and Middle East in 2015) and Ludwig-Maximilians-Universität München (Historisches Seminar – Abteilung Alte Geschichte). I am grateful to Karen Radner for providing additional financial support for the project.

# Preface

When A. Kirk Grayson asked me in the late 1980s to undertake the preparation of the volume of royal inscriptions of Sargon II for the Royal Inscriptions of Mesopotamia (RIM) Project, I never thought that it would take as long as it has. The delay was largely caused by three matters: the need to deal with other editorial and administrative duties related to the RIM Project, the unexpected end of the RIM Project due to funding difficulties in the early 2000s, and, most importantly, the problems preparing satisfactory editions of some of the major texts of Sargon due to the loss of the original inscriptions and the unreliability of the available sources of information on those inscriptions. After I moved from the University of Toronto to the University of Pennsylvania in 2006, I was encouraged by Erle Leichty to revive the project, or at least the section dealing with Neo-Assyrian royal inscriptions. With the support of the National Endowment for the Humanities, in 2008 I founded the Royal Inscriptions of the Neo-Assyrian Period (RINAP) Project and since that time have directed the preparation and publication of five volumes. Work on the Sargon volume continued during all of this time, although with numerous gaps as other duties and projects took priority. Two of the inscriptions presented in this volume — the Nineveh Prism and the Najafabad Stele (text nos. 82 and 117) — are the result of collaboration between the author and Andreas Fuchs (Eberhard Karls Universität Tübingen), and the author's appreciation for all his work must be stressed. Fuchs had already published an edition of the former text about twenty years ago (SAAS 8) and the edition of the latter text presented here is the result of extensive discussion and deliberation between the two of us.

Work on the present corpus of texts necessitated extensive travel for collation of previously published inscriptions and for examination of unpublished material. The author wishes to thank the various museums and museum authorities that have cooperated in the preparation of this book. In particular, he would like to thank the directors, keepers, curators, and assistants of the Louvre Museum (Paris), the Oriental Institute of the University of Chicago (Chicago), the British Museum (London), the Institut de France (Paris), the Royal Ontario Museum (Toronto), the Vorderasiatisches Museum (Berlin), and the National Museum in Tehran. Specifically, the author expresses his gratitude to Béatrice André-Salvini, John Brinkman, John Curtis, Andrew Dix, Walter Farber, Liane Jakob-Rost, Ed Keal, John Larsen, Joachim Marzahn, Kiersten Neumann, Susanne Paulus, Bill Pratt, Clemens Reichel, Jonathan Taylor, Ariane Thomas, Christopher Walker, and Michel Zink. These colleagues, and their staff, have been extremely helpful and have extended to me every courtesy and assistance.

As usual with a volume in this series, numerous individuals aided in the production of the volume in some way. Since the preparation of this book has spanned more than three decades, it is impossible to name everyone who has contributed to RINAP 2 and thus any omissions are unintentional. While the author has collated most of the texts himself, other scholars have kindly collated some texts, provided information on pieces, or aided in some way. These include Amitai Baruchi-Unna, Stephen Batiuk, Giovanni Bergamini, Eleazar Birnbaum, S. Borowski, Jean-Marie Durand, Jeanette Fincke, Kirk Grayson, Joshua Jeffers, Enrique Jiménez, Jacob Lauinger, Erle Leichty, Gianni Marchesi, Nicolò Marchetti, Michael Müller-Karpe, Jamie Novotny, Karen Radner, Julian Reade, Johannes Renger, Michael Roaf, Marcel Sigrist, Greta Van Buylaere, Chikako Watanabe, Frauke Weiershäuser, Manfred Weippert, and Joan Goodnick Westenholz. During my various periods of working in museums and collections outside of Toronto and Philadelphia, I received much gracious hospitality from numerous friends and colleagues. During a sabbatical in 2013–2014 spent in Oxford working on the manuscript, the author received much kind fellowship and support from Tim and Kathy Clayden, Jacob Dahl, Stephanie Dalley, and Frances Reynolds and Philip Binns, as well as the fellows of Wolfson College. My thanks must also to Richard Beal and JoAnne Scurlock for hospitality during a stay in Chicago, and to Denise Bolton, Jamie Novotny, Karen Radner, Michael Roaf, Walther Sallaberger, and Frans van Koppen during stays in Munich.

In Toronto, during the RIM years, several individuals contributed to the technical and editorial preparation of the volume and they deserve credit for performing at times tedious and time-consuming tasks. In particular, the author offers his gratitude to Amy Barron, Hope Grau, Diane Kriger, and Jill Ruby. For the Philadelphia stages of production, the author would like to thank various colleagues and students: Katy Blanchard, Tegan Bunsu, Michael Chapin, Ann Guinan, Andrew Knapp, Daniel Patterson, Irene Sibbing Plantholt, Steve Tinney, Richard Zettler, and Ilona Zsolnay. Last, but by no means least, special thanks must be given to Joshua Jeffers and Steve Tinney in Philadelphia and to Giulia Lentini, Nathan Morello, and Jamie Novotny in Munich for help in numerous ways, in particular for undertaking the arduous task of preparing the final, camera-ready manuscript and the fully lemmatized and searchable online version for the texts.

The penultimate manuscript of RINAP 2 was read by Ariel Bagg, Nicholas Postgate, and Martin Worthington, each of whom made numerous useful comments, corrections, and improvements. Their time, care, and generosity are greatly appreciated. Any and all errors of commission and omission are, of course, the responsibility of the author.

Since the Editor-in-Chief of the RINAP series is also the author of this volume, Karen Radner, a member of the editorial board, kindly assumed the role of Editor-in-Chief for the volume.

The author's appreciation goes out to the University of Pennsylvania, the University of Pennsylvania Museum of Archaeology and Anthropology, the National Endowment for the Humanities, the Social Sciences and Humanities Research Council of Canada, the University of Toronto, the Alexander von Humboldt Foundation, and the Ludwig-Maximilians-Universität München, as well as to several private individuals, in particular Laurence Shiff and Malcolm Horsnell, for both financial and material support in support of the work of the RIM and/or RINAP Projects and thus the preparation of this volume.

Finally, the author wishes to express his gratitude to his numerous teachers of Akkadian and Sumerian over the years as a student at the University of Toronto and the University of Chicago: R.D. Biggs, J.A. Brinkman, M. Civil†, I.J. Gelb†, G.B. Gragg, A.K. Grayson, H. Hunger, S. Parpola, E. Reiner†, J. Renger, M. Rowton†, and R.F.G. Sweet. He hopes that nothing in this volume will make them regret their encouragement, support, and advice during his training.

# Editorial Notes

The volumes in the RINAP series are modeled upon the publications of the now-defunct Royal Inscriptions of Mesopotamia (RIM) Project, with a few modifications, in particular the addition of indices of proper names. Like the RIM volumes, the volumes in this series are not intended to provide analytical or synthetic studies, but rather to provide basic text editions that can serve as the foundations for such studies. Thus, extensive discussions of the contents of the texts are not presented, and the core of each volume is the edition of the relevant texts.

In this volume, the order of the texts is based for the most part upon the following two criteria:

- (1) The city at which the structure dealt with in the building or dedicatory portion of the text was located. If that information is not preserved on the text, the provenance of the inscribed object is the determining factor.
- (2) The type of object upon which the inscription is written (prism, cylinder, tablet, etc.).

Following the practice of the RIM series, inscriptions that cannot be assigned definitely to a particular ruler are given text numbers beginning at 1001. Certain other inscriptions that provide information relevant for establishing royal names and titles (e.g., “servant seals”) and any composed in the name of another member of the royal family (e.g., royal wives) have been given numbers that begin at 2001.

In the volumes of the RINAP series, the term “exemplar” is employed to designate a single inscription found on one object. The term “text” is employed to refer to an inscription that existed in antiquity and that may be represented by a number of more or less duplicate exemplars. In these editions exemplars of one text are edited together as a “master text,” with a single transliteration and translation. Variants to the “master text” are provided either on page (major variants) or at the back of the volume (minor variants).

Each text edition is normally supplied with a brief introduction containing general information. This is followed by a catalogue containing basic information about all exemplars. This includes museum and excavation numbers (the symbol + is added between fragments that belong to the same object), provenance, lines preserved, and indication of whether or not the inscription has been collated (c = collated with the original, (c) = partially collated with the original, p = collated by means of a photograph, (p) = partially collated from a photograph; and n = not collated). The next section is normally a commentary containing further technical information and notes. The bibliography then follows. Items are arranged chronologically, earliest to latest, with notes in parentheses after each bibliographic entry. These notes indicate the exemplars with which the item is concerned and the nature of the publication, using the following key words: photo, copy, edition, translation, study, and provenance. Certain standard reference works (e.g., the various volumes of “Keilschriftbibliographie” and “Register Assyriologie” published in *Orientalia* and *Archiv für Orientforschung* respectively; Borger, HKL 1–3; AHW; CAD; and Seux, ERAS) are not normally cited, although they were essential in the collecting and editing of these texts. While the bibliographies should contain all major relevant items, they are not necessarily totally exhaustive; a vast amount of scattered literature exists on many of the inscriptions edited in this volume and much of this literature is of only limited scholarly interest.

As noted earlier, a distinction is made between major and minor variants to a “master text”; the major variants are placed at the bottom of the page and the minor variants at the back of the book. In brief, major variants are essentially non-orthographic in nature, while minor variants are orthographic variations. Orthographic variants of proper names may at times be significant and thus on occasion these will also appear on the page as major variants. Complete transliterations of all exemplars in the style of musical scores are found in the pdf on Oracc at <http://oracc.museum.upenn.edu/rinap/scores/> and thus any reader who finds the notes on variants insufficient for his/her needs may check the full reading of any exemplar (the pdfs of the scores for previous RINAP volumes are also now available on Oracc). Such scores, however, are not normally

given for bricks and seal inscriptions. Objects whose attribution to a particular text is not entirely certain are given exemplar numbers that are followed by an asterisk (\*); for example, IM 18627 is regarded as text no. 41 ex. 3\*, since it is uncertain that it is an exemplar of that text. Moreover, these exemplars are listed in separate catalogues (Likely Additional Exemplars), beneath the main catalogue.

Several photographs are included in this volume. These are intended to show a few of the object types upon which Sargon's inscriptions were written and to aid the reader in understanding the current state of preservation of some of the inscriptions.

As is the normal practice for transliterating cuneiform inscriptions, lower case Roman is used for Sumerian and lower case italics for Akkadian; logograms in Akkadian texts appear in capitals. The system of sign values in Borger, *Mesopotamisches Zeichenlexikon* (MZ), is generally followed. A number of inscriptions use at times Babylonian sign forms in a text written mainly with Assyrian sign forms and vice versa; this has not been indicated in the editions. As in previous volumes, certain variant sign forms are not specifically indicated in the transliterations. For example, no attempt is normally made to indicate when a sign taken to be DUB was actually written with a standard UM form (and vice versa); the same generally holds true for reading such signs as EZEN/SAR, GAB/TAḤ, and DUL/DU<sub>6</sub>. Italics in the English translation indicate either an uncertain translation or a word in the original language. In general, the rendering of geographical names follows the *Répertoire Géographique des Textes Cunéiformes* (Rép. Géogr.) and personal names follows *The Prosopography of the Neo-Assyrian Empire* (PNA); however, the names of Babylonian rulers follow the spelling used in RIMB 2.

There are several differences between the RIM and RINAP styles. Among these, the most notable is that all partially preserved or damaged signs, regardless of how they are broken, now appear between half brackets (‘ and ’). Thus, no partially preserved sign has square brackets ([ and ]) inserted in its transliteration; for example, [DINGI]R and LUGA[L KU]R appear in the transliteration as ‘DINGIR’ and ‘LUGAL KUR’ respectively. This change was made to ensure compatibility of the online RINAP editions with the standards of the Open Richly Annotated Cuneiform Corpus (Oracc), the parent site and project where RINAP Online is housed. This change was implemented in the print version in order to present identical editions in RINAP 2 and RINAP Online. Note, however, that the translations may appear more damaged than their corresponding transliterations indicate, as the translations were prepared according to standard Assyriological practices; for example, ‘DINGIR’ (= [DINGI]R) and ‘LUGAL KUR’ (= LUGA[L KU]R) are translated as “[the go]d” and “king [of the lan]d,” and not “the god” and “king of the land.”

Since some of the most important inscriptions of Sargon either no longer exist, having been lost in the Tigris in 1855, or were reburied at the site, and thus are only attested via copies made by their excavator P.E. Botta at the site of Khorsabad (ancient Dūr-Šarrukīn) or at times also by poorly preserved squeezes of the inscriptions, it has been found necessary to edit some texts in a different manner than is normally the case in the RIM and RINAP volumes and to make use of some additional sigla. This is described more fully in the Introduction to the volume and/or at the relevant inscriptions, but a brief summary is also provided here. For texts 1–4 and 8, although there is only one actual exemplar of the inscription, it has been thought best to provide a score for each inscription, providing either full or partial transliterations of the various sources for a lost original (e.g., Botta's copy published in *Monument de Ninive*, a copy made by H. Winckler after examination of a squeeze of the inscription, a copy made by Ch.-F. Jean following an examination of a squeeze, a copy made by Botta at Khorsabad and preserved in the Institut de France or published in *Journal asiatique* in the 1840s, or a squeeze currently preserved in the Louvre). With regard to additional sigla, a superscript dagger (†) is placed after a sign that has an abnormal/incorrect form in a copy by Botta that cannot be verified or corrected from collation of the original or a squeeze, or from an earlier copy made by Botta (normally one preserved in the Institut de France and/or published in the *Journal asiatique*). A superscript right-facing triangular bullet (▶) is employed in the scores to note where a copy by H. Winckler specifically indicates that he began to collate the inscription from a squeeze. A superscript circular bullet (•) is similarly employed to note where Winckler specifically indicates that his collations from a squeeze ended. This latter siglum (•) is also used in the transliteration of text no. 117 (Najafabad Stele) to indicate where the lines of the inscription on the squeezes preserved in the Royal Ontario Museum end. At times Botta's copies misalign fragments of a wall slab; a double dagger (‡) is employed in the scores to indicate the point in the line of a Botta copy where one must either go up or down a line in his copy in order to continue reading the relevant line.

The reader should note that there is some inconsistency in the use of Roman versus Arabic numerals for the room numbers of the palace of Sargon at Khorsabad in publications. It has been thought best to cite the rooms from which inscribed wall slabs come (basically rooms I–XIV) using roman numerals, following the practice initiated by the first excavator of the site, Paul-Emile Botta, and used in most publications of the texts

(e.g., Winckler, Sar.; Lie, Sar.; and Fuchs, Khorsabad), but to use Arabic numerals for the other rooms (mostly in connection with texts found during the later excavations of the Oriental Institute of the University of Chicago and following its practice [e.g., Loud, Khorsabad 1; and Loud and Altman, Khorsabad 2]). See the Introduction for a fuller explanation of the matter.

In addition to the indices of museum and excavation numbers and selected publications found in RIM volumes, the RINAP volumes also contain indices of proper names (personal names, topographical names, and divine names). Concordances to correlate the line numbers used for the Khorsabad Annals in this volume and those given in the previous major editions by H. Winckler and A. Fuchs are also provided. Searchable online versions of the manuscripts are maintained on Oracc by MOCCI (Munich Open-access Cuneiform Corpus Initiative). Web versions of the editions are also hosted on CDLI (Cuneiform Digital Library Initiative).

W	Prefix for excavations numbers from the German excavations at Uruk/Warka
YBC	Babylonian Collection of the Yale University Library, New Haven

# Introduction

According to a Babylonian Chronicle, Shalmaneser V died in the month of ʾEḇētu (X) during the fifth year of his reign (722) and Sargon II ascended the throne on the twelfth day of that month. Sargon was a son of Tiglath-pileser III and thus a brother of Shalmaneser. It was likely not a peaceful transition of power since Sargon soon thereafter had over six thousand Assyrians deported to Hamath, possibly because they had not supported him. Sargon was to reign over Assyria for seventeen years, being killed while on campaign in 705 and being succeeded by his son Sennacherib, who took the throne on the twelfth day of Abu (V) in that year. The Assyrians lost control over Babylonia almost immediately upon Sargon's accession, with the Chaldean Marduk-apla-iddina (II) (Merodach-baladan) taking the throne of Babylon in the first month of 721. Only in 710 was Sargon able to drive the latter out of Babylon and, in 709, capture his tribal stronghold of Dūr-Yakīn in the marshland at the head of the Persian Gulf. Babylonian King List A and the Ptolemaic Canon thus credit Sargon with a reign of five years (709–705) over Babylonia, with his first full year of reign in Babylon (709) being his thirteenth year on the throne of Assyria.

## Sources for Reign

A large number and a wide variety of sources are attested for the reign of Sargon II. His inscriptions provide substantial information on both his military actions and building activities.<sup>1</sup> Two chronographic texts — the Assyrian Eponym Chronicle and a Babylonian Chronicle — as well as statements within some of the royal inscriptions as to the regnal year (*palû*) in which various events took place, provide the basic chronology of the period. Moreover, numerous letters and at least one astrological report date to his reign, some found at Nineveh (Parpola, SAA 1; Lanfranchi and Parpola, SAA 5; Hunger, SAA 8 no. 501; Fuchs and Parpola, SAA 15; and Dietrich, SAA 17) and others at Kalḫu (Luukko, SAA 19). While most were written to Sargon, including some from his son Sennacherib (Parpola, SAA 1 nos. 29–40; and Lanfranchi and Parpola, SAA 5 no. 281), a number were sent by Sargon himself. In addition, various legal and administrative documents (see Kwasman and Parpola, SAA 6; Fales and Postgate, SAA 7; and Fales and Postgate, SAA 11), and one renewal of a grant of land to provide offerings for the god Aššur (Kataja and Whiting, SAA 12 no. 19) are attested.<sup>2</sup> A few literary works refer to Sargon: two hymns — one to the goddess Nanāya and one to the goddess Ningal — that invoke blessings upon Sargon (Livingstone, SAA 3 no. 4; and Saggs, *Studies Cagni* pp. 905–912), a very fragmentary epic (Livingstone, SAA 3 no. 18), and the famous “Sin of Sargon” text, which most probably dates to the time of his grandson Esarhaddon (Livingstone, SAA 3 no. 33). A large number of stone wall slabs with reliefs depicting military and ceremonial actions were found in Sargon's palace at Khorsabad (ancient Dūr-Šarrukīn), as were a large number of bull-headed winged colossi with inscriptions on them. He is, however, mentioned only once in the Bible; Isaiah 20:1 states: “In the year that the field marshal, who was sent by Sargon, the king of Assyria, came to Ashdod, attacked Ashdod and took it.” This likely refers to the capture of that city in Sargon's eleventh regnal year (711). He is almost totally absent from classical sources, although he does appear in the Ptolemaic Canon as Arkeanos (for which see below).

---

<sup>1</sup> For studies of the style and structure of Sargon's royal inscriptions, see Renger, *CRRA* 32 pp. 109–128 and *Studies Moran* pp. 425–437.

<sup>2</sup> Kataja and Whiting, SAA 12 no. 77 refers to decrees about offerings from several different reigns, including Shalmaneser IV, Adad-nārārī III, Tiglath-pileser III, and Sargon II. For a list of the few economic texts dated by the regnal years of Sargon II from Babylonia, see Brinkman and Kennedy, *JCS* 35 (1983) p. 13, to which add W 24405 (Kessler, *Bagh. Mitt.* 23 [1992] pp. 465–467). The astrological report mentioned above (Hunger, SAA 8 no. 501) was likely sent from Babylonia since it was dated in the first year of “Sargon, king of Babylon.”

### Texts Excluded from RINAP 2

As is the case in the other RINAP volumes, numerous inscriptions that refer to the respective Assyrian king fall outside the scope of the present volume. In the case of Sargon II, such texts include letters to or from Sargon, legal and administrative texts dated to his reign, the one land grant issued in his name, and the various literary texts that mention him. Several royal inscriptions that have sometimes been attributed to Sargon have been treated elsewhere in the RINAP series or are omitted here for other reasons.

(1) A fragmentary inscription on a statue (IM 60497B, ND 5571) found in the Ninurta Temple at Nimrud (ancient Kalḫu) has sometimes been assigned to Shalmaneser III, Tiglath-pileser III, or Sargon II. The text has been treated in Tadmor and Yamada, RINAP 1 as Tiglath-pileser no. 36.

(2) An inscription on a stone fragment in the Vatican Museum (VAT/15023) was once thought to come from Khorsabad and to belong to Sargon II (see Bezold, *Literatur* p. 94 §56.14.m), but it is now known to belong to Sennacherib. For this text, see Sennacherib no. 44 ex. 1 in Grayson and Novotny, RINAP 3/2.

(3) A poorly preserved inscription found on two fragments of a clay tablet (K 6205+82-3-23,131) describes an Assyrian king's campaign against Hezekiah of Judah and an attack on the latter's city of Azekah. This inscription, which is often called the Azekah Inscription, was assigned to Tiglath-pileser III by L. Jakob-Rost, but has more recently been assigned by scholars to either the time of Sargon II or Sennacherib. This text is arbitrarily assigned to Sennacherib in the RINAP series and is given as Sennacherib no. 1015 in Grayson and Novotny, RINAP 3/2.

(4) A fragment of a Neo-Assyrian stele was found at Ben Shemen in Israel and now bears the registration number 71.74.221 in the Israel Museum. H. Tadmor dated the text to the reign of Sargon II (in Aviram, *Eretz Shomron* [1973] p. 72 [in Hebrew]), and W. Horowitz and T. Oshima agreed with this (Canaan pp. 19 and 45), but M. Cogan suggests it may come from the reign of Esarhaddon (*Studies Eph'al* pp. 66–69; Cogan, *Raging Torrent* p. 233 no. 4). The text is included in Leichty, RINAP 4 as Esarhaddon no. 1007.

(5) A rock relief located in the upper Tigris valley at Eḡil, about 50 km from Diyarbakir in Turkey, has sometimes been ascribed to Shalmaneser III or Sargon II. The relief may depict a deity and the inscription is no longer legible. See Börker-Klähn, *Bildstelen* no. 154; Russell, *RLA* 9/3–4 (1999) p. 256.

(6) A weathered Neo-Assyrian relief that is located on Uzunoğlantepi, about 2 km north of the village of Ferhatlı in the vilayet of Adana in southern Turkey, has been assigned variously to Shalmaneser III and Sargon II (see Taşyürek, *AnSt* 25 [1975] pp. 169–172; Börker-Klähn, *Bildstelen* no. 235; Reade, *IrAnt* 12 [1977] p. 44); however, the relief bears no inscription.

(7) A stele with an inscription of the mother of Sennacherib, and thus a wife of Sargon, has been presented as Grayson and Novotny, RINAP 3/2 no. 2001, just as the inscriptions of Naqī'a (Zakūtu) were presented with those of her son Esarhaddon (Leichty, RINAP 4 nos. 2003–2009).

(8) For the clay sealing Sm 2276 mentioning Sargon II and dating to the eponymy of Taklāk-ana-Bēl (715) that H. Winckler included in his work on the royal inscriptions of this king (*Sar.* 1 p. 196 and 2 pl. 49 no. 12) and D.D. Luckenbill in his translations of Sargon's inscriptions (*ARAB* 2 p. 114 §229), see Johns, *ADD* no. 766 and Fales and Postgate, *SAA* 11 no. 49 (with a photo of the sealing on p. 40). The royal stamp seal depicts the Assyrian king slaying a lion (see Figure 1). For another sealing possibly to be ascribed to Sargon II, see text no. 1002.

Figure 1. Sealing impressed with the royal seal of Sargon II (Sm 2276). © The Trustees of the British Museum.

Inscriptions of various independent and semi-independent rulers interacting with Assyria at the time are also not included. In addition to some Urartian royal inscriptions, we might note in particular the Akkadian inscription on the cylinder seal of Urzana, the king of Muṣaṣir whom Sargon forced to flee when the Assyrians attacked that city during Sargon's eighth campaign in 714 (see for example Thureau-Dangin, *TCL* 3 p. xii and Collon, *First Impressions* pp. 86–87 no. 405), and the Aramaic inscription on a stone stele found at Tepe Qalaichi, near Bukān in northwestern Iran, which may have been erected in the Mannean capital Izirtu during the reign of Sargon (see for example Lemaire, *Studia Iranica* 27 [1998] pp. 15–30 and Lipiński, *Studia* 4 pp. 19–27).

### Survey of Inscribed Objects

One hundred and thirty inscriptions are assigned to Sargon II in this book, although a handful of these might be open to question. A further ten inscriptions are tentatively — and at times arbitrarily — assigned to him (text nos. 1001–1010). In addition, one inscription of his wife Ataliya (text no. 2001), two of his brother Sîn-aḫ-uṣur (text nos. 2002–2003), and eight of various individuals who held office either certainly or likely during his reign (text nos. 2004–2011) are included in the volume. These inscriptions are found on a variety of objects:

<i>Object Type</i>	<i>Text No.</i>
Stone wall slabs	1–8, 23–42, 73, 81
Stone paving slabs	10–22, 95, 2002
Stone colossi	9, 41, 107 <sup>?</sup> , 1008
Stone altars	49
Stone tablet	47
Stone vessels	77 exs. 2–7
Stone steles	103–106, 108, 115, 117, 1009–1010, 2010–2011
Stone axe head	2008
Stone coffer	2005
Stone fragments (uncertain)	93–94, 1007
Clay prisms	63, 74–75, 82–83
Clay cylinders	43, 64, 76, 84–88, 109, 111–114, 125, 129, 1006, 2009
Clay tablets	48, 65, 72, 89–91, 101–102, 1001
Clay cones	67, 92, 1003–1004
Clay plaques	66, 1005 <sup>?</sup>
Clay bowls	59–60
Bricks	50–56, 68–70, 95–98, 110, 123–124, 126–128, 1005 <sup>?</sup>
Glazed bricks	57–58, 71
Metal tablets	44–46
Metal door jamb covers	99
Gold bowl	2001 ex. 1
Electrum mirror	2001 ex. 3
Bronze lion weights	78–79
Bronze macehead	62, 2003
Seals (including impressions and sealings)	1002, 2004, 2006–2007
Beads and eyestones	61, 100, 118–122, 130
Glass vessel	77 ex. 1
Rock crystal jar	2001 ex. 2
Ivory writing board	80
Rock face	116

back, an inscription that was frequently written in a sloppy manner, with numerous errors (text no. 41; see also text no. 42). Sometimes the inscription on the back of a slab is written upside down, suggesting that it was incised off-site, before the slab was put in place in the palace and the front of the slab carved.<sup>10</sup>

Inscribed wall slabs have been found at two other sites in addition to Khorsabad. One discovered at Nebi Yunus (within ancient Nineveh) bears an annalistic inscription of Sargon II and the sculpted image of an Assyrian eunuch (text no. 81). Unlike the decorated wall slabs from Khorsabad where the inscription is in a central panel with relief scenes both above and below that panel, the image of the eunuch on this slab protrudes into the inscription, separating the beginning of the lines from their ends. Moreover, a ridge indicating the top of the slab appears to be immediately above the inscription and the head of the eunuch. As noted by E. Frahm, rather than having been erected at Nineveh in the time of Sargon, it is conceivable that this slab was brought to Nineveh from another site by one of Sargon's successors to the throne or in modern times.<sup>11</sup> In addition, two unsculpted stone slabs with text no. 73 were mounted on the wall of the palace at Kalḫu; however, these were relatively small slabs and were situated above larger slabs with the standard inscription of Ashurnasirpal II.

### *Stone Paving Slabs*

Approximately thirty stone paving slabs incised with inscriptions have been found in the entryways of doors in the palace complex at Dūr-Šarrukīn. Those discovered within the main palace area bear one of five or six display inscriptions ranging from 23 to 150 lines in length (text nos. 10–14 and possibly 15). None of those found by Botta and copied by him (*Monument de Ninive* 3 pls. 1–21) are available for collation today, being either lost in the Tigris disaster in 1855 or left at the site.<sup>12</sup> Botta did make a squeeze of the inscription on one of these paving slabs and that squeeze is still extant today in the Louvre (text no. 11 ex. 2; Botta, *Monument de Ninive* 3 pl. 5<sup>c</sup>). Six inscribed paving slabs were found in what was originally thought to be the palace harem, but which was in fact the palace religious quarter, with the shrines of six deities (Ninurta, Ninšiku, Sîn, Adad, Ningal, and Šamaš). Place discovered two of these slabs (text nos. 16–17), but luckily, he did not attempt to send them to Paris and instead reburied them at the site. They were found in situ during the later work of the Oriental Institute, which also unearthed the other four slabs. Each paving slab has a 7–9 line inscription calling upon one of the deities to bless Sargon (text nos. 16–21).<sup>13</sup>

In addition to the palace complex, two other buildings within the citadel area had inscribed paving slabs: the temple of the god Nabû and the residence of Sargon's brother Sîn-aḫu-ušur. Nine exemplars of a fourteen-line inscription (text no. 22) were found within the temple of Nabû during excavations by the Oriental Institute and either one of these or a tenth exemplar was discovered during more recent work by Iraqi archaeologists.<sup>14</sup> The inscription on these slabs calls upon the god Nabû to bless the king. Three exemplars of a seven-line text identifying Sîn-aḫu-ušur as the builder of the house (text no. 2002) were found on stone slabs in doorways of Palace L (or Residence L), a building that was only exceeded in size within the citadel area by the palace complex itself.

At least three stone slabs were found by R. Campbell Thompson in the temple of Nabû at Nineveh that had an inscription identical to one found on bricks from Nineveh (text no. 95 exs. 4–6). The text identifies Sargon as the builder of the temple of the gods Nabû and Marduk.

### *Stone Colossi*

A large number of stone bull colossi were discovered in the palace and city gates at Dūr-Šarrukīn that bore the same inscription (text no. 9), a text with a summary of Sargon's military achievements and a lengthy description of the construction of the city, and in particular its palace and city wall. It normally required two bull colossi to bear one copy of the text (i.e., a pair of colossi flanking one doorway), but at least two bulls appear to have each borne the whole inscription. Many of these were lost in the Tigris disaster in 1855, but fortunately Botta had made squeezes of the inscription on most of the bulls that he had found and copied. In view of the large number of exemplars of the text, the existence of these squeezes, and the fact that some of

<sup>10</sup> For the inscriptions on the backs of the slabs, see the article by B. André-Salvini in Caubet, Khorsabad pp. 15–45 and J.M. Russell, *Writing on the Wall* pp. 101–103.

<sup>11</sup> *AoF* 40 [2013] pp. 52–53.

<sup>12</sup> A paving slab with one of these inscriptions (text no. 10 ex. 4) was also found during the Oriental Institute excavations of Palace F, Dūr-Šarrukīn's military base (*ekal māšarti*).

<sup>13</sup> For the inscribed paving slabs of Sargon, see in particular J.M. Russell, *Writing on the Wall* pp. 108–111.

<sup>14</sup> Some of the exemplars were threshold slabs while others were on top of platforms flanking stairs or on the treads of stairs.

the stone colossi still exist today (in whole or in part), the basic text of the inscription is clear. Some of these colossi also have on the back of them the same display inscription that is found on the backs of numerous wall slabs (text no. 41).<sup>15</sup>

F. Thureau-Dangin identified a stone fragment with an inscription of Sargon found at Tell Ahmar (ancient Til-Barsip) as being from a bull colossus (text no. 107). In addition, Layard states that he found a pair of stone lions in the palace of Sennacherib at Nineveh that had a “nearly illegible” inscription (text no. 1008). The information on his discovery and the text on the objects are unclear and it is not impossible that the lions (or possibly bulls) actually came from Khorsabad.

### *Stone Steles*

Sargon left a large number of stone steles recording his military achievements at various points throughout his realm and beyond, from Najafabad (near Isfahan) in the east to Cyprus in the west. The two best preserved were found in Cyprus (text no. 103) and in western Iran (text no. 117), and each has an image of the king on its front, in addition to an inscription. However, most of the steles exist today in only a fragmentary condition (text nos. 104–106, 108, and 115), possibly because local inhabitants intentionally destroyed them in ancient times when the Assyrians lost control of the areas in which they had been erected. The steles were set up at different points throughout his reign. The Acharneh Stele (text no. 106) and the Tell Tayinat Stele (text no. 108) may have been set up following Sargon’s victory over Hamath in 720; the text of the former stele actually refers to the erection of at least three steles in the west. The Najafabad Stele (text no. 117) commemorates Sargon’s campaign into the Zagros in his sixth regnal year and thus was likely set up in that year (716); unusually, the inscription on the stele was poorly written, perhaps the work of a less experienced scribe/carver.<sup>16</sup> Sargon may have had the stele from Ashdod (text no. 104) made following the capture of that city in 711. Since the so-called Beirut Stele (also known as the Borowski Stele and Hamath Stele; text no. 105) mentions the submission of kings from Cyprus, it must have been written after that occurred, likely in or around 708. The Cyprus Stele (text no. 103) refers to Sargon’s third year as king of Babylon and thus must date to 707 at the earliest.<sup>17</sup> Too little is preserved of the stele fragment found at Qal’eh-i Imam, near Lake Zeribor in Iranian Kurdistan (text no. 115), to allow us to be certain about its date of composition, although it has been suggested that it was composed in 716.<sup>18</sup>

Small fragments of what may have been steles of Sargon were found at Samaria (text no. 1009) and Carchemish (text no. 1010). If they can be attributed to Sargon, the one from Samaria might have been erected after his involvement with that city in his accession year (722) or in his second regnal year (720), and the one from Carchemish might have been set up in his fifth regnal year (717), following the defeat of its ruler Pisiris.

Two steles of non-royal individuals are also included in this volume. The first has a relief depicting the goddess Ištar of Arbela and was erected at Kār-Shalmaneser, also known as Til-Barsip (modern Tell Ahmar), by the governor of that city Aššur-dūr-pāniya (text no. 2010). The second, found at Turlu-Höyük, bears an image of the storm god and was set up by one Bēl-iddin, who is given no title (text no. 2011). An Aššur-dūr-pāniya is attested in several letters from the reign of Sargon and this stele is possibly to be attributed to that individual. The exact date of the latter text remains unknown, although the scholars who initially published the piece suggest that it may come from the time of Sargon II.

### *Clay Prisms*

Prior to the time of Sargon II, Assyrian royal inscriptions on clay prisms are only known with certainty from the reign of Tiglath-pileser I (1114–1076).<sup>19</sup> Five inscriptions from the reign of Sargon are found on prisms, although all of these are poorly preserved. All those prisms whose original shapes are clear or can be determined with some degree of certainty have eight columns. One inscription comes from Aššur (text no. 63), two from Kalḫu (text nos. 74–75), and two from Nineveh (text nos. 82–83), although there is some question as to whether or not one of the pieces said to come from Nineveh (text no. 83) was actually found at that site. It is possible that these five prisms represent only two distinct inscriptions, at least with regard to the text before

<sup>15</sup> For the inscription of Sargon on stone colossi, see in particular J.M. Russell, *Writing on the Wall* pp. 103–108.

<sup>16</sup> The edition of the Najafabad Stele presented here is the result of collaboration between the author and A. Fuchs.

<sup>17</sup> For an overview of Sargon’s various steles, see Frame, *Subartu* 18 pp. 49–68.

<sup>18</sup> Radner and Masoumian, *ZA* 120 (2020) p. 91.

<sup>19</sup> Grayson, *RIMA* 2 pp. 7–31 A.0.87.1, pp. 38–45 A.0.87.4 ex. 7, and p. 60 A.0.87.14. Note also Grayson, *RIMA* 1 p. 182 commentary to A.0.77.1 with regard to Ass 875, which may be a prismatic cylinder of Shalmaneser I (1273–1244), although E. Weidner called it a prism. For a possible prism inscription of Ashurnasirpal II (883–859) from Tell Billah, see Grayson, *RIMA* 2 p. 191.

the building section, one inscription being text nos. 63 and 82, and the other being text nos. 74–75 and 83. The inscription on text nos. 63 and 82 is annalistic in form, dating the campaigns according to the king's regnal years (*palû*), although when preserved, these are always one or two years lower than those given in the annals found on wall slabs in the palace at Khorsabad (see below). Text no. 74 and apparently text no. 83 bear display inscriptions, while text no. 75 is so fragmentary that it is impossible to state what type of inscription it has. The building section of text no. 82 appears to commemorate the construction of a ziggurat, possibly the one of Adad at Nineveh, and those of text nos. 74–75 the construction of the new city Dūr-Šarrukīn; the building reports are not preserved on the other pieces. Text no. 82 was composed no earlier than the king's eleventh regnal year (711) and text no. 74 no earlier than his sixteenth regnal year (706). The other inscriptions are much less well preserved, but since text no. 74 describes work on the palace at Khorsabad it also likely dates to around the completion of that city in 706. The latest event mentioned in text no. 63 took place in 713, but if this text were a duplicate of text no. 82, it would also have been written no earlier than 711. Text no. 83 mentions Sargon's campaign to Babylonia and the presentation of offerings to the gods of Babylonia, and thus must date to Sargon's twelfth regnal year (710) at the earliest.

### *Clay Cylinders*

The inscription of Assyrian royal texts on clay cylinders really begins in the time of Sargon II, although one small exemplar of an Assyrian vassal from the time of Aššur-rēša-iši II (971–967) is attested.<sup>20</sup> A number of texts on cylinders of stone or semi-precious materials are known from earlier periods, although these are normally quite small in size.<sup>21</sup> Several of Sargon's royal inscriptions are found on barrel-shaped cylinders (text nos. 64, 84, 86–87, 111–114, 125, and 2009) and on prismatic (i.e., multi-faceted) cylinders (text nos. 43, 76, 85, 88, 109, 129, and 1006).<sup>22</sup> Some of the latter-type are also larger in the center than they are at the ends (in particular text no. 43), while others are mostly the same size from one end to the other (e.g., text no. 76). Clay cylinders with inscriptions from the time of Sargon have been found at a number of sites: Dūr-Šarrukīn (almost all exemplars of text no. 43), Aššur (text no. 64), Kalḫu (text nos. 76 ex. 2 and 1006), Nineveh (text nos. 43 ex. 5, 84–88, and possibly 76 ex. 1), Carchemish (text no. 109), Melid (text nos. 111–114), Tell Ḥaddad (text no. 129), Tell Baradān (text no. 76 ex. 5 and text no. 2009), and possibly Chenchi (text no. 43 ex. 55) and Uruk (text no. 125). Over fifty exemplars of the Khorsabad Cylinder inscription (text no. 43) have been found at Dūr-Šarrukīn, for the most part from within the palace area. Unusually, there are two versions of this inscription, an earlier version that has 67 lines of text, ten fewer than the later (and less common) version that has an additional passage in the middle of the inscription. Apart from text nos. 43 and 125, all the cylinder inscriptions are only partially preserved and it is possible that some actually come from duplicate inscriptions (text nos. 84 and 85, and text nos. 86 and 87) or even from the same cylinder (text nos. 111 and 112). Like typical Babylonian royal inscriptions, the two cylinder inscriptions from Babylonia — text no. 125 from Uruk and text no. 2009 from Tell Baradān (written in the name of Nabû-bēlu-ka'in, the governor of the city Arrapha) — do not commemorate or mention military actions, but instead concentrate on religious and building matters. Otherwise, all the cylinder inscriptions mention in some manner the king's military achievements, except perhaps text no. 1006.

### *Clay Tablets*

Clay tablets and tablet fragments with inscriptions of Sargon have been found at a number of sites: Aššur (text nos. 65 and 72), Nineveh (text nos. 89–91 and 101–102), and probably Dūr-Šarrukīn (text no. 48; see also text no. 1001). Most of these are only fragments, but two important texts are relatively well preserved: Sargon's lengthy letter to the god Aššur (text no. 65) reporting on his campaign into Mannea, Urartu, and Muṣašir in his eighth regnal year (714), and the so-called Aššur Charter (text no. 89), recording his accession to the throne and granting of privileges to the city Aššur, as well military actions in his second regnal year (720). The other tablet fragments describe military (text nos. 72, 101–102, and likely 91), building (text no. 48), or dedicatory (text no. 90) actions.

<sup>20</sup> See Grayson, RIMA 2 pp. 126–128 A.0.96.2001 (inscription of Bēl-ēriš, an Assyrian vassal at Šadikanni).

<sup>21</sup> See for example Grayson, RIMA 1 pp. 51–55 A.0.39.2 (noting Reade, NABU 2000 pp. 86–87 no. 75) and p. 122 A.0.75.2; Grayson, RIMA 3 pp. 194–196 A.0.103.5–7.

<sup>22</sup> Prismatic cylinders are sometimes referred to as prisms or multi-faceted cylinders since they have several distinct faces like a prism; however, the inscription on these objects runs from one end of the object to the other, while the inscriptions on prisms run from one side of the face (or column) to the other. Thus, each face of a prismatic cylinder has only a few lines while one on a prism has many more lines, but lines that tend to be much shorter in length than those on the prismatic cylinders.

*Bricks*

Bricks with inscriptions of Sargon have been found at a number of places in addition to the major centers of Dūr-Šarrukīn, Aššur, Kalḫu, and Nineveh, including especially Carchemish, Babylon, and Uruk. The inscriptions may be inscribed or stamped; sometimes an inscription is found in both manners (text no. 50). At times, the text may be inscribed within an area that has been impressed, thus providing a border for the inscription, and in some scholarly literature such texts are described as stamped, rather than — more accurately — inscribed. While most of the inscriptions of Sargon are written in the Akkadian language, two of the brick inscriptions from Assyria are in Sumerian, one commemorating the construction of Dūr-Šarrukīn (text no. 53) and one work at Aššur (text no. 70). The latter inscription is also known from an Akkadian version (text no. 69). Three brick inscriptions from Babylonia are in Sumerian, one recording work at Babylon (text no. 124) and two work at Uruk (text nos. 127–128).

Bricks with the same three-line inscription stating that they came from Sargon's palace have been found at Dūr-Šarrukīn, Kalḫu, Nineveh, Karamles, Tag, and possibly Djigan (text no. 50). Since Sargon would have had more than one palace, this may not seem odd, but numerous bricks with inscriptions commemorating the building of Dūr-Šarrukīn and/or structures located there (e.g., the temple of Sīn and Šamaš) have also been discovered outside of Dūr-Šarrukīn, in particular at Kalḫu and Nineveh (text nos. 51 and 53–55). These bricks may have been taken to those places during the reign of Sargon or possibly after his death, when Dūr-Šarrukīn was basically abandoned and perhaps partially demolished.

Texts record the construction of the new capital Dūr-Šarrukīn (text nos. 51–54), its palace (text nos. 52–53, and see text nos. 50 and 56), and the temple of Sīn and Šamaš (text nos. 54–55). Numerous bricks from Aššur record the building of a structure for the god Aššur (text no. 68) and the paving of a processional way in the temple of that god (text nos. 69–70). Brick inscriptions commemorate work on the temple of the god Nabû (or the gods Nabû and Marduk) at Nineveh (text nos. 95–96 and possibly 97). The brick inscription from Carchemish is very short, merely indicating that the brick came from the palace of Sargon (text no. 110), while some of the brick inscriptions from Babylonia can be quite lengthy. Two brick inscriptions record construction at Babylon, one twenty-five lines long describing work on the quay wall and city walls and one eighteen lines long describing work on the city walls (text nos. 123 and 124 respectively). The three brick inscriptions from Uruk all refer to work on the Eanna temple (text nos. 126–128). Unusually, one of these latter inscriptions (text no. 126) is written in three columns of four lines each.

*Glazed Bricks*

Glazed bricks from friezes with cuneiform inscriptions of Sargon have been found at both Dūr-Šarrukīn and Aššur (text nos. 57 and 71 respectively), although all the friezes are in a poor state of preservation. Those from Dūr-Šarrukīn whose provenance is known come from the palace complex or Palace F, while those from Aššur were found in the temple of the god Aššur. Glazed brick panels are already mentioned in the texts of Tiglath-pileser I (1114–1076) and Ashurnasirpal II (883–859),<sup>23</sup> and individual glazed bricks with all or parts of inscriptions are attested from the reigns of Tukultī-Ninurta II (890–884), Shalmaneser II (858–824), and (possibly) Tiglath-pileser III.<sup>24</sup> In addition, ten glazed brick friezes from the palace at Khorsabad bear what is generally thought to be an inscription written in Assyrian 'hieroglyphs' or 'astroglyphs' (text no. 58). At times, that inscription is found in a shorter or abbreviated form (exs. 7–10). Such 'hieroglyphic' inscriptions are also attested in the time of Sargon's grandson Esarhaddon (680–669).<sup>25</sup>

*Metal Tablets*

Three of Sargon's inscriptions are inscribed on metal tablets, one of bronze (text no. 44), one of silver (text no. 45), and one of gold (text no. 46). A fourth metal tablet was apparently found, but was lost in the Tigris disaster in 1855, and no real information is known about it. These four had been placed in a stone box located within one of the walls of the royal palace at Dūr-Šarrukīn and the three preserved today all record the construction of that city.<sup>26</sup> Assyrian royal inscriptions on gold tablets are already attested from the time of

<sup>23</sup> Grayson, RIMA 2 pp. 54–55 A.0.78.10 lines 66–67; Grayson, RIMA 2 pp. 289–290 A.0.101.30 lines 30–32.

<sup>24</sup> Grayson, RIMA 2 pp. 184–185 A.0.100.15 (brick or tile); Grayson, RIMA 3 p. 157 A.0.102.100 exs. 1, 6, and 11, p. 168 A.0.102.112, and p. 169 A.0.102.114; Tadmor and Yamada, RINAP 1 p. 159 no. 1007. See also Grayson, RIMA 3 p. 250 A.0.0.1094–1096.

<sup>25</sup> Leichty, RINAP 4 pp. 238–243 no. 115.

<sup>26</sup> A stone tablet with an inscription also commemorating the construction of Dūr-Šarrukīn was found with these metal tablets (text no. 47). See Brinkman in Curtis, *Bronzeworking Centres* pp. 144–150 and 158–159.

Shalmaneser I (1273–1244), Tukulti-Ninurta I (1243–1207), Ashurnasirpal II (883–859), and Shalmaneser III (858–824),<sup>27</sup> and on silver tablets from the time of Tukulti-Ninurta I and Ashurnasirpal II,<sup>28</sup> as well as on lead tablets from the time of Tukulti-Ninurta I.<sup>29</sup>

### *Bronze Lion Weights*

Weights with brief labels indicating that they belonged to a king have a long tradition in Mesopotamia, going all the way back to the third millennium. Most of these weights are made of stone and in the shape of a duck,<sup>30</sup> although one in the shape of a lion is known from the time of Shalmaneser III.<sup>31</sup> In 1846, Layard discovered sixteen bronze weights in the shape of lions in the North-West Palace at Kalḫu. Thirteen of these bear Akkadian proprietary inscriptions, one of Tiglath-pileser III (Tadmor and Yamada, RINAP 1 Tiglath-pileser III no. 63), nine of Shalmaneser V (Tadmor and Yamada, RINAP 1 Shalmaneser V nos. 1–9 and note no. 1003), one of Sennacherib (Grayson and Novotny, RINAP 3/2 text no. 211), and two of Sargon II (text nos. 78–79). Most, including the two of Sargon, also have brief Aramaic inscriptions on them indicating the weight of the object.

### *Rock Face*

Three Assyrian rulers before Sargon II have left us royal inscriptions incised into rock faces, although the tradition of Mesopotamian rulers leaving inscriptions or reliefs on cliff faces goes back to the third millennium. Tiglath-pileser I and Shalmaneser III had two and five inscriptions respectively carved on rock faces in Turkey, mostly near the source of the Tigris River,<sup>32</sup> and Tiglath-pileser III had one made at Mila Mergi in Iraqi Kurdistan.<sup>33</sup> In addition to the inscription, a relief depicting the ruler is found with one of the inscriptions of Tiglath-pileser I, at least two of those of Shalmaneser III, and the inscription of Tiglath-pileser III. A relief and inscription of Sargon were carved into a cliff face at Tang-i Var in Iran in order to commemorate a campaign to Karalla led by Assyrian officials in 706 (text no. 116). Like the relief of Tiglath-pileser III at Mila Mergi, the one at Tang-i Var depicts the Assyrian king, but unlike the one of Tiglath-pileser, part of the inscription is written across the king's body.

### *Miscellaneous*

Inscriptions of Sargon are found on a variety of other objects of stone, clay, metal, and other materials. Apart from a stone tablet from Khorsabad that bears a twenty-five-line inscription recording the construction of that city (text no. 47), the inscriptions on the other stone objects (altars, vessels, axe head, coffer, and unidentifiable objects) are either short or very fragmentary. When it is possible to determine the nature of the inscription, it often simply states to whom the object belonged (text no. 77) or had been dedicated (text nos. 49 and 2005), although it might mention the actual construction of the object or some edifice (text nos. 93, 1007, and 2008). As far as I am aware, apart from one stone altar from Kalḫu from time of Ashurnasirpal II and one from Nineveh from the time of Shalmaneser III,<sup>34</sup> the sixteen stone altars from the temple of the Sebetti at Dūr-Šarrukīn (text no. 49) are the only other altars with inscriptions of Assyrian kings upon them. The inscriptions on clay cones record the construction of temples at Aššur and Nineveh (text nos. 67 and 92; cf. text nos. 1003–1004), while the clay plaques bear a brief proprietary inscription (text no. 66; cf. text no. 1005). The inscriptions on clay vessels (text nos. 59–60) are poorly preserved and their nature is not clear.<sup>35</sup> Surprisingly, the only two inscriptions in this volume that clearly bear dates indicating when they were written are found on clay cones from Aššur (text nos. 67 and 1004), although only one of these is sufficiently well preserved to allow us to

<sup>27</sup> Grayson, RIMA 1 p. 196 A.0.77.7, pp. 253–256 A.0.78.11 exs. 2–3, pp. 256–257 A.0.78.12 ex. 1, pp. 259–260 A.0.78.14 exs. 1 and 4, pp. 260–261 A.0.78.15 ex. 1, and pp. 264–265 A.0.78.17 ex. 1; Grayson, RIMA 2 pp. 341–342 A.0.101.70 ex. 1; and Grayson, RIMA 3 pp. 99–100 A.0.102.26.

<sup>28</sup> Grayson, RIMA 1 pp. 253–256 A.0.78.11 exs. 5–6, pp. 256–257 A.0.78.12 ex. 2, pp. 259–260 A.0.78.14 ex. 3, pp. 260–261 A.0.78.15 ex. 2, and pp. 264–265 A.0.78.17 ex. 2. Grayson, RIMA 2 pp. 341–342 A.0.101.70 ex. 2.

<sup>29</sup> Grayson, RIMA 1 pp. 253–256 A.0.78.11 exs. 4 and 7–10, and pp. 259–260 A.0.78.14 exs. 5–6.

<sup>30</sup> For example, Frayne, RIME 3/2 pp. 154–155 E3/2.1.2.51–53; Grayson, RIMA 2 pp. 181–182 A.0.100.10 (Tukulti-Ninurta II) and pp. 358–359 A.0.101.107 (Ashurnasirpal II); and Tadmor and Yamada, RINAP 1 pp. 150–152 Tiglath-pileser III nos. 61–62.

<sup>31</sup> Grayson, RIMA 3 pp. 169–170 A.0.102.115.

<sup>32</sup> Grayson, RIMA 2 pp. 61–62 A.0.87.15–16; Grayson, RIMA 3 pp. 90–96 A.0.102.20–24. Note that M. Worthington suggests that one of the inscriptions attributed to Tiglath-pileser I (Grayson, RIMA 2 p. 61 A.0.87.15) may actually be of later date, possibly from the time of Shalmaneser III.

<sup>33</sup> Tadmor and Yamada, RINAP 1 pp. 89–92 Tiglath-pileser III no. 37.

<sup>34</sup> Grayson, RIMA 2 pp. 351–352 A.0.101.98 (from Kalḫu); Grayson, RIMA 3 pp. 153–154 A.0.102.95 (from Nineveh).

<sup>35</sup> It is not impossible that one or both of the clay bowls are actually clay cones (*sikkatu*).

identify the year (text no. 67).<sup>36</sup> A number of metal objects (copper covers for door jambs, gold bowl, electrum mirror, and bronze macehead) also bear short proprietary (text nos. 99, 2001 exs. 1 and 3, and 2003) or dedicatory (text no. 99) inscriptions.

With regard to stamp and cylinder seals and impressions, a clay sealing with a stamped impression of what may be a royal seal (text no. 1002) appears to have been found at Khorsabad in the mid-1800s, but its present location is not known and it is thus unavailable for collation. A cylinder seal of unknown provenance and a clay bulla from Nimrud with the impression of a cylinder seal bear proprietary inscriptions of governors (text nos. 2006–2007); a stamp seal impression with a proprietary Aramaic inscription of one of Sargon's eunuchs was also found at Khorsabad (text no. 2004). The brief inscriptions on a glass vessel (text no. 77 ex. 1) and a rock crystal jar (text no. 2001 ex. 2) are also proprietary in nature. One of the most interesting objects bearing an inscription of Sargon's is an ivory writing board found at Kalḫu (text no. 80). The inscription states that it belonged to the palace of Sargon and that that king had had the astrological series *Enūma Anu Enlil* written upon it and the board deposited at Dūr-Šarrukīn.

### Overview of Previous Publications / Editions / Scholarship

In view of Sargon's involvement with Israel and the "Ten Lost Tribes of Israel" and his successful military campaigns throughout the Near East, from Philistia in the Southwest to Urartu in the North and Babylonia in the Southeast, every general history of ancient Assyria or Mesopotamia includes some treatment of his reign. In 1908, the American Assyriologist and historian A.T.E. Olmstead published his 1906 Cornell University dissertation *Western Asia in the Days of Sargon of Assyria 722–705 B.C.: A Study in Oriental History*. Surprisingly, this was to be the only monographic length study of his reign for over a century, although useful chapters on his reign appeared by A.K. Grayson in *CAH<sup>2</sup> 3/2* in 1991 and by W. Mayer in his *Politik und Kriegskunst der Assyrer* in 1995. In 2001 R.A. Gabriel even had a chapter on Sargon in his book *Great Captains of Antiquity* (part of the series *Contributions in Military Studies*); Sargon was the only Mesopotamian ruler included in the volume. A. Fuchs has presented important biographical overviews of the king within the past decade in *RLA 12/1–2* (2009) pp. 51–61 and *PNA 3/2* (2011) pp. 1239–1247. Recently, three books on Sargon appeared in almost successive years: *Le campagne babilonesi ed orientali di Sargon II d'Assiria: un'analisi topografica* (a revision of a 2007 doctoral dissertation presented at the Università di Roma La Sapienza) by F. Maniori in 2014, *The Campaigns of Sargon II, King of Assyria, 721–705 B.C* (in the series *Campaigns and Commanders*) by S.C. Melville in 2016, and *Sargon II, King of Assyria* (in the series *Archaeology and Biblical Studies*) by J. Elayi in 2017. The first author provides a detailed study of Sargon's southern and eastern campaigns, while each of the latter two authors provides a study of all Sargon's campaigns, although the authors do not always see things in the same way.

Translations of individual inscriptions of his or of selective passages from them – generally those dealing with Biblical matters – often appear in compendiums of translations of ancient Near Eastern texts, for example, Gressmann, *ATAT<sup>2</sup>* (translations by E. Ebeling); Pritchard, *ANET<sup>3</sup>* (translations by A.L. Oppenheim); Briend and Seux, *TPOA* (translations by M.-J. Seux); Galling, *Textbuch<sup>2</sup>* (translations by R. Borger); *TUAT 1/4* (translations by Borger); and *COS 2 and 4* (translations by K.L. Younger and F.M. Fales).

Before discussing the major previous editions and studies of this text corpus, I would like to cite here briefly some other important works in which Sargon II texts have been published. For editions/transliterations of a single text, or a very small group of texts, often accompanied by a copy and/or a photograph, see especially: Schrader, *Sargonsstele* (1882); Nassouhi, *MAOG 3/1* (1927); Thureau-Dangin, *RA 30* (1933); Unger, *IAMN 9* (1933); Weidner, *AfO 14* (1941–44); Barnett in Woolley and Barnett, *Carchemish 3* (1952); Gadd, *Iraq 16* (1954); Wiseman, *Iraq 17* (1955); Gadd in *Crowfoot, Samaria-Sebaste 3* (1957); Tadmor, *Eretz-Israel 8* (1967); Levine, *Stelae* (1972); Saggs, *Iraq 37* (1975); Al-Rawi, *Iraq 56* (1994); Frame, *Orientalia 68* (1999); Kessler, *AfO 50* (2003–4); Niederreiter, *RA 99* (2005); Frame, *Subartu 18* (2006); Akdoğan and Fuchs, *ZA 99* (2009); Frahm, *KAL 3* (2009); Frame, *Studies Parpola* (2009); Frame, *CUSAS 17* (2011); Frahm, *AoF 40* (2013); Lauinger and Batiuk, *ZA 105* (2015); Baruchi-Unna and Cogan, *IMSA 9* (2018–19); and Marchesi, *JNES 78* (2019).

According to the noted French archaeologist J.-C. Margueron, "Mesopotamian archaeology was born at the end of March 1843, on the day when P.E. Botta, the consular agent at Mosul, brought to light a group of buildings with bas-reliefs and inscriptions on the mound of Khorsabad (Dur-Sharrukin)."<sup>37</sup> The buildings that

<sup>36</sup> At least one exemplar of a text on prismatic cylinders (text no. 76 ex. 2) has a date written on the left end of the piece, but only the day is preserved and the eponymy was clearly not given.

<sup>37</sup> Margueron, *Mesopotamia* p. 13.

Botta (1802–1870) brought to light were the palace of Sargon II at his capital of Dūr-Šarrukīn (“Fortress/Wall of Sargon”), located next to the Khosr River about fifteen km northeast of the Iraqi city of Mosul. He carried out work there only until the following year, 1844, and in 1845 returned to France. However, he had unearthed numerous magnificent stone wall panels decorated with carved reliefs and massive stone sculptures of winged bulls, among other items. He sent a series of five letters about his discoveries back to Jules Mohl in Paris and these were published in the *Journal asiatique*<sup>38</sup> while Botta was still in Iraq. These reports encouraged the French government to send the artist E. Flandin to make drawings of the reliefs. The few items that Botta brought back to Paris caused a great sensation when they were displayed in the Louvre in 1847 and V. Place was thus sent out to continue the work at Khorsabad, where he, aided by F. Thomas, excavated in 1852–1854, finding more fabulous items. In numbering the rooms and courtyards in the palace that were excavated, Botta used Arabic numerals for rooms and Roman numerals for courts; however, some of the spaces initially thought by him to have been open areas (i.e., courts) were later realized to be rooms. Thus, for example, Court VII on his plan was actually the throne room, and Courts II, V, X, XIII, and XIV were also rooms. He did however refer to areas II, V, X, XIII, and XIV as rooms in connection with his copies, but continued to cite them with Roman numerals. Place corrected most of these in his plan of the palace (replacing the Roman numerals with Arabic ones), but he did not correct all of them (e.g., the throne room remained Court VII). As mentioned in the Editorial Notes, it has been thought best to maintain Botta’s numbering (i.e., using Roman numerals) when citing rooms with inscribed wall slabs since that is how they are noted on his copies and in most recent publications of the texts, but to use Arabic numerals for rooms mentioned in connection with other texts, texts mostly found during the later excavations by the Oriental Institute of the University of Chicago, which cited the rooms with Arabic numerals. Botta thought that he had found the Nineveh of the Bible and so his and Flandin’s publication claimed in its title: *Monument de Ninive*, 5 volumes published in 1849–1850 (Paris). The first two volumes of *Monument de Ninive* contained plans of the individual rooms excavated and Flandin’s drawings of the reliefs, as well as drawings of some individual objects and of some details on the reliefs. Volumes 3 and 4 contained Botta’s typeset copies of inscriptions on the bulls, paving slabs, and wall slabs, as well as on a few other items; and volume 5 recorded the discovery of the site and a description of the excavations, as well as having chapters on writing and decipherment. Botta, and later Place, found numerous inscribed materials. Botta’s initial copies of some of the texts that he found were published with his reports in *Journal asiatique* and the copies are preserved today in the archives of the Institut de France in Paris. He also made squeezes of many of the texts, which he used to correct his initial copies before they were published in typeset characters in *Monument de Ninive*. In the table of contents of volumes 3–4, a small “c” is placed with the plate number for each copy that had been collated from a squeeze or from the original in the Louvre (e.g., “99<sup>c</sup>”) and this is also done in this volume when a Botta plate number is cited in a text catalogue and usually in text introductions and commentaries, but it is not normally indicated in the bibliography sections of the individual texts, footnotes, or in runs of consecutive numbers.<sup>39</sup>

Place, who had worked at Khorsabad in 1852–1854, entitled the publication of his work *Ninive et l’Assyrie* (3 volumes published in 1867–1870; Paris), although he recognized that Khorsabad was not ancient Nineveh.

<sup>38</sup> JA 4/2 (1843) pp. 61–72 and pls. I–XII; and pp. 201–214 and pls. XIII–XXI. JA 4/3 (1844) pp. 91–103 and pls. XXII–XXXI; and pp. 424–435 and pls. XXXII–XXXVIII. JA 4/4 (1844) pp. 301–314 and pls. XXXIX–XLIX. These include at times notes and comments by J. Mohl. For English translations of these letters, see Botta’s *Letters on the Discoveries at Nineveh* (London, 1850) and *Illustrations of the Discoveries at Nineveh; Consisting of Forty-Nine Plates of the Sculpture and Inscriptions on Ancient Assyrian Monuments, with Descriptions, being a Translations of M. Botta’s Letters on the First Discoveries at Nineveh* (London, 1850). Note also JA 4/5 (1845) pp. 201–207 and pls. L–LV, a report by Botta to the Minister of the Interior.

<sup>39</sup> The squeezes that are still extant are preserved in the Louvre and were jointly given the museum number AO 7382 when they were accessioned into the Louvre. Although P.E. Botta indicates that he made squeezes of *Monument de Ninive* 3–4 pls. 32–35, 40, 47, 51, 73, 76, 79 (top), 117, 125, 135 (bottom) 139, 143 (top), 160 (bottom), 173, and 181–183, these were either destroyed or lost many years ago. The Louvre accession records indicate that squeezes of pls. 40, 47, 51, and 125 were among those acquired by the Louvre about a century ago when they moved there from the Bibliothèque Nationale, but the ones of pls. 40, 47, and 125 cannot be located today and for pl. 51, see below. Actually, there appears to be some uncertainty in the records whether squeezes of pls. 40 and 47 did indeed enter the Louvre. In addition, there may in fact never have been squeezes of the slabs presented on the top of pls. 79 and 143 (Room II, slab 2 [text no. 1 section 1] and Room VIII, slab 23 [text no. 7 ex. 5 section 12]) and bottom of pls. 135 and 160 (Room VIII, slab 16 [text no. 7 ex. 5 section 6] and Room XIV, slab 7 [text no. 8 section 3]), with Botta’s indication that this plate had been collated only referring to the other slab on the plate, for which a squeeze does exist. Winckler indicates that he did not see squeezes of the inscriptions presented on the top of Botta’s pl. 79 and bottom of pl. 160; the other two slabs have parts of the Display Inscription, for which Winckler only provided a copy of the text in Room X (with variants from the other exemplars). Squeezes of only ten of the fourteen epigraphs on pl. 180 are currently preserved in the Louvre and that is all that were extant at the time they entered the Louvre. There is a squeeze in the Louvre labeled as being pl. 51, but it is actually an impression of the inscription on the back of the bull colossus in question (text no. 41 ex. 21), and not of part of the inscription between the bull’s legs (text no. 9 ex. 2).

The first volume included, among other matters, descriptions of the various buildings and structures found and a discussion of the manner of construction used by the Assyrians. In addition to chapters on attempts at determining what the structures would have looked like and how they were decorated, on the excavation and transport of the antiquities discovered, and on numerous other topics (e.g., glyptics, painting, and ceramics), the second volume had a chapter on cuneiform inscriptions and an almost forty-page appendix (pp. 281–319) by J. Oppert on the inscriptions on the winged bulls, clay cylinders, and gold, silver, and ‘antimony’ tablets (text nos. 9, 43, 46, 45, and 47 respectively), with typeset copies of the texts, interlinear transliterations and Latin translations, as well as French translations.<sup>40</sup> Oppert also presented a translation of the annals based on the material from Rooms II, V, XIII, and XIV of the palace (text nos. 1–4), although this translation also incorporated parts of the Display Inscription from Room XIV (text no. 8). His were the first real published editions of texts from Khorsabad, but he had previously published translations of all or part of some of them elsewhere (e.g., bull: Oppert, *Chronologie* [1856] pp. 35–39 = *Annales de Philosophie chrétienne* 53 [1856] pp. 346–350; cylinder: *Annales de Philosophie chrétienne* 65 [1862] p. 45 no. 5 and pp. 183–188 [with a partial translation already back in 1856]). The third volume contained plans of the site and buildings, reconstructions of various structures, drawings of various reliefs and other finds, and heliogravures of the gold, silver, bronze and ‘antimony’ tablets, as well as of two exemplars of the Khorsabad Cylinder inscription (pls. 77–78). Some drawings of items from other sites (in particular Kuyunjik) are also found in volume 3.

Botta’s publication *Monument de Ninive* came out quite quickly after his work at the site, in only about five years, while Place’s took about fifteen years. Among the most active scholars working at this time on the decipherment of cuneiform was the aforementioned German-French scholar Julius (Jules) Oppert (1825–1905). Situated in Paris, he produced the most important early works on the texts from Khorsabad in a series of articles and books, beginning already in 1855–1856 with a partial translation of the Khorsabad Cylinder inscription (text no. 43) in the *Transactions of the Historic Society of Lancashire and Cheshire* (vol. 8) and a translation of the Khorsabad Bull inscription (text no. 9) in the *Annales de Philosophie chrétienne* (vol. 53). Among his publications are *Les inscriptions assyriennes des Sargonides et les fastes de Ninive* (1862; text nos. 7, 43, and 73); *Les fastes de Sargon, roi d’Assyrie (721 à 703 avant J.C.), traduits et publiés d’après le texte assyrien de la grande inscription des salles du palais de Khorsabad*, with J. Ménant (1863; text no. 7); *Grande inscription du palais de Khorsabad*, with Ménant (1863; text no. 7); and *Les inscriptions de Dour-Sarkayan (Khorsabad) provenant des fouilles de M. Victor Place* (1870; text nos. 1–4, 9, 43, and 45–47). Sometimes his works were published in two different places (e.g., *Sargonides* also appeared in the periodical *Annales de Philosophie chrétienne* vol. 65, and his section in Place’s *Ninive et l’Assyrie* volume 2 also appeared as *Dour-Sarkayan*). In addition to working with Oppert on two books on Sargon’s Khorsabad Display inscription, Joachim Ménant (1820–1899) published French translations of all or parts of several inscriptions of Sargon in his works *Annales des rois d’Assyrie* (1874; text nos. 1–4, 7, 9, 12, 16–17, 41, 43, 46, 50, 55, 73, 92, 95, and 103) and *Babylone et la Chaldée* (1875; text nos. 1–2).

David Gordon Lyon (1852–1935) produced his book *Keilschrifttexte Sargon’s, Königs von Assyrien (722–705 v. Chr.)* (Leipzig) in 1883 as the fifth volume in the series *Assyriologische Bibliothek*. This had been his doctoral thesis at the University of Leipzig, where he had been a student of Friedrich Delitzsch. The volume includes copies, transliterations, translations, and commentary of several inscriptions from Khorsabad, those on clay cylinders (text no. 43), on winged bulls (text no. 9), and on tablets of bronze, silver, gold, and ‘antimony’ (text nos. 44–47). The volume concludes with a glossary arranged according to the root letters in Hebraic script and a combined index of geographical, personal, and divine names. The edition of the cylinder was based on four exemplars (two in Paris and two in London) and that of the winged bulls on two exemplars in Paris, although with some variants from additional exemplars. He had also been able to examine the four tablets in the Louvre. D.D. Luckenbill later described his work as “a model of accurate, painstaking scholarship” (*ARAB* 2 p. 1 §2).

In 1889, Hugo Winckler (1863–1913) published an edition of the official inscriptions of Sargon II and it remained the most important and extensive publication of this ruler’s inscriptions for over a century.<sup>41</sup> In two volumes, his *Die Keilschrifttexte Sargons nach den Papierabklatschen und Originalen neu herausgegeben* (Leipzig) included copies and editions of basically all the inscriptions known up until that time. Following an introduction to Sargon’s official inscriptions and the historical information in them, volume 1 presents editions of Sargon’s official inscriptions and concludes with an index of Akkadian words and a combined index

<sup>40</sup> Editions of some docketts dated to the reign of Merodach-Baladan (Marduk-apla-iddina II) and of a clay cone inscription of Adad-apla-iddina (see *Frame RIMB* 2 pp. 56–57 B.2.8.6) are also presented.

<sup>41</sup> Three years earlier, in 1886, Winckler had published his thesis, written in Latin at the University of Berlin, on the annals of Sargon II (*De inscriptione Sargonis, regis Assyriae, quae vocatur Annalium*).

of geographical, personal, and divine names. Although the editions are now outdated, they represented a great advance on what had been available up until the time of their publication. Hand copies of almost all the texts edited in volume 1 are found in volume 2. These copies were made by L. Abel; however, Winckler had clearly been involved in their preparation and they are generally referred to as his copies. Volume 2 has copies of the Khorsabad Annals (pls. 1–28 nos. 1–52, 55, and 58–60 [text nos. 1–4 and 6]), the Display Inscription of Room XIV (pls. 25–27 and 29 nos. 53–54, 56–57, and 61–62 [text no. 8]), the Display Inscription (pls. 30–36 nos. 63–78 [text no. 7]), five pavement slabs (pls. 37–40 [text nos. 10–14]), the inscription on the back of wall slabs (pl. 40 [text no. 41]), the inscription on winged bulls (pls. 41–42 [text no. 9]), the inscriptions on four metal and stone tablets (pls. 42–44 [text nos. 44–47]), the Khorsabad Cylinder inscription (pl. 43 [text no. 43]), the Nineveh Prism (pls. 44–46; referred to as “Das zerbrochene Prisma [A and B]” and “Der Bericht über den Zug gegen Asdod nach S.” [text no. 82]), the Cyprus Stele (pls. 46–47 [text no. 103]), the Nimrud wall slabs (pl. 48 [text no. 73]), and various other short inscriptions (pl. 49: Khorsabad altar [text no. 49], epigraphs [text nos. 23–28, 30–32, 34–35, and 37–39]), two so-called “harem” inscriptions [text nos. 16–17], inscriptions on glass and stone vessels [text no. 77], bricks [text nos. 50–51, 53–55, and 95], an eyestone [referred to as a “Siegelabdruck”; text no. 61], and clay cones [text no. 92]).<sup>42</sup> These copies comprise ones for which he was able to examine the originals (relatively few), ones for which he was able to collate Botta’s copies from squeezes (a large part of the volume), and ones for which his copies are totally based on Botta’s copies and his views of what should have been on them. The third group thus provides no independent evidence for exactly what was on the inscriptions, and, for the most part, they are not normally used in this volume, although they are cited in the text bibliographies. With regard to the second group, it is often difficult to determine whether improvements to Botta’s copies were based upon what he could actually see on the squeezes or if they were based on what he believed must have been on the inscription. F. Thureau-Dangin has said with regard to Winckler’s copies:

“Il est à noter que ses copies contiennent beaucoup de restitutions, qui ne sont pas toujours signalées comme telles. Il est donc prudent de ne les utiliser qu’en les contrôlant par celles de Botta qui ont simplement pour objet de reproduire l’état réel du texte.”<sup>43</sup>

A.T.E. Olmstead has stated:

“Winckler ... corrected many of Botta’s misreadings, and he made numerous and excellent restorations. Unfortunately, it is too often uncertain whether Winckler actually read the correct sign on the squeeze or whether it was his own correction, while the brackets which should have indicated a restoration were often misplaced or even omitted ... If Winckler’s cuneiform text was to be used with caution, his transliteration and translation formed a veritable trap for those who trustingly quoted them without reference to the original text.”<sup>44</sup>

While my own examination of the squeezes often does support or allow Winckler’s corrected readings, it more often indicates that signs copied by him as being fully preserved were damaged on the original, are unclear (at times perhaps due to an imperfectly made squeeze), or are even not (or no longer<sup>2</sup>) visible on the squeezes. While Winckler was an excellent scholar and his corrected copies normally make good sense, they cannot be relied upon. As already noted by Fuchs (Khorsabad p. 6), the most important of Winckler’s copies are those that he made having collated the squeezes in Paris, but even here it is not possible to rely on his copies without question.<sup>45</sup> In sum, it is often not clear from the copies whether something was actually seen by him or has been restored/corrected in the copy, and his editions do not always clarify matters. As a result, it is likely that on occasion the editions presented in the present volume have interpreted his copies erroneously. In the text catalogues in this volume, a small “c” is placed after a Winckler text number that was collated by him from a squeeze (e.g., “Winckler, Sar. 2 pl. 16 no. 34<sup>c</sup>” in the catalogue for text no. 2 section 5). At times his copies specifically state where a squeeze began or ended. If this does not match his square brackets, this is indicated in the transliteration based upon Winckler’s copy in the score by superscript “▶” and “•” bullets, for the beginning and end of the squeeze respectively.<sup>46</sup>

<sup>42</sup> Note that apart from the Annals texts and the Display Inscription from Room XIV (text nos. 1–4, 6, and 8) many of these copies are composite copies, made from two or more exemplars. This is the case in particular for the Khorsabad Display Inscription (text no. 7), the five pavement slab inscriptions (text nos. 10–14), the inscription on the backs of wall slabs (text no. 41), the inscription on the winged bulls (text no. 9), and the cylinder inscription (text no. 43), but also for some of the shorter inscriptions (e.g., those on bricks).

<sup>43</sup> Thureau-Dangin, RA 24 (1927) p. 75.

<sup>44</sup> Olmstead, AJSL 47 (1930–31) p. 259.

<sup>45</sup> Although some of the squeezes made by P.E. Botta are no longer extant or have been lost, all of those that H. Winckler claims to have used are still preserved in the Louvre.

<sup>46</sup> See for example Winckler, Sar. 2 pl. 4 no. 8, which is his copy for Botta, Monument de Ninive plate 75<sup>c</sup> (text no. 1 lines 118–130). When his indication of the beginning or end of the squeeze runs through a sign, the “▶” or “•” are given before and after the sign respectively.

The publication in 1912 of *Une relation de la huitième campagne de Sargon (714 av. J.-C.)* (Textes cunéiformes du Louvre 3) (Paris) by the great French Assyriologist François Thureau-Dangin (1872–1944) presented an extremely important new inscription of Sargon's, a report (or letter) from the king to the god Aššur describing the campaign in his eighth regnal year (714) against Urarṭu and Mušašir (text no. 65). Although the large tablet had been purchased by the Louvre from an antiquities dealer, the piece had clearly been found at Aššur since several additional small fragments of the tablet discovered by German archaeologists at that city were later published by O. Schroeder in 1922 (KAH 2 no. 141) and by E. Weidner in 1937–39 (AfO 12 pp. 144–148 and pl. XI). In addition to a copy, photographs, and an edition of the text, Thureau-Dangin's volume also includes an edition (aided in part by collation of squeezes) of a section of the Annals from Room II that basically duplicated part of the new text and an edition of a section from the Nineveh Prism that also described the campaign against Mušašir.<sup>47</sup>

The article “Zu den Inschriften der Säle im Palaste Sargon's II. von Assyrien” published by Franz Heinrich Weissbach (1865–1944) in 1918 (ZDMG 72 pp. 161–185 and plate before p. 161) proved to be of great importance for our understanding of Sargon's inscriptions on the walls of his palace at Khorsabad. In particular, he recognized that room XIV preserved parts of two different inscriptions, part of the king's annals (text no. 4) and a separate display inscription (text no. 8), and he provided an edition of the latter text. He also improved our understanding of the various versions and copies of the annals and main display inscription in the various rooms of the palace. His study laid an important foundation for work on these texts.

As a result of work producing editions of the corpus of Assyrian royal inscriptions for the files of the Chicago Assyrian Dictionary, in 1926–1927 Daniel David Luckenbill (1881–1927) published English translations of the entire corpus available up until that time in his two-volume work *Ancient Records of Assyria and Babylonia* (ARAB). For the reign of Sargon, volume two includes approximately fifty inscriptions written on stone wall slabs, winged bulls, paving slabs, and steles, on metal tablets, on clay prisms, tablets, cylinders, and cones, and on mud bricks, as well as on several other minor objects. The inscriptions from Khorsabad are presented first, followed by those from Aššur, Calah (Kalḫu), and Nineveh. Luckenbill's work was based entirely on published material, without any additional collation, and he maintained Winckler's line numbering for the annals. ARAB has remained the main English translation of the royal inscriptions of Sargon up until the present time.

Winckler, like Oppert, had combined the versions of the annals from the different rooms of Sargon's palace into one recension, which while useful in many ways, also makes it difficult at times to determine exactly what comes from which room and exactly what is based on restoration as opposed to being actually preserved in the version from one or the other room. Thus, in 1929 the Norwegian scholar Arthur Godfred Lie (1887–1932) presented *The Inscriptions of Sargon II, King of Assyria. Part I: The Annals Transliterated and Translated with Notes* (Paris). This volume actually only gives an edition of the version of the annals from Room II, although where sections from that room were missing, he includes an edition of the sections in Room V. In addition, numerous footnotes give variants from Rooms V, XIII, and XIV to what is found in Room II. The line numbering of the Annals is based on the text in Room II, and, where it was thought necessary to include material from Room V, the lines are numbered separately, according to the line number on the relevant slab from Room V. Like Winckler, Lie had examined the squeezes in Paris, although he does not indicate exactly which ones he was able to see and it is difficult to determine which readings in the volume are based upon examination of the squeezes. Regrettably, Lie only published Part I of Sargon's inscriptions. Useful reviews of his work were presented by Thureau-Dangin (RA 27 [1930] pp. 159–160) and Olmstead (AJSL 47 [1930–31] pp. 259–280).

Following Botta's and Place's work at Khorsabad, no further major archaeological exploration of the site took place until 1929–1935, when the Oriental Institute of the University of Chicago sent out a team led in turn by Edward Chiera (in 1928–1929), Henri Frankfort (in 1929–1932), and Gordon Loud (in 1932–1935), with Thorkild Jacobsen as the epigraphist. Two volumes in the series *Oriental Institute Publications* resulted: *Khorsabad, Part I: Excavations in the Palace and at a City Gate*, by Loud, with chapters by Frankfort and Jacobsen (OIP 38) in 1936; and *Khorsabad, Part II: The Citadel and the Town*, by Loud and Charles B. Altman (OIP 40) in 1938.<sup>48</sup> Jacobsen's chapter in *Khorsabad 1* included copies and editions of the inscriptions on five pavement slabs from the palace chapels (earlier thought to be the “harem” section of the palace [text nos. 16–21]) and two inscriptions found in the throne room (one on a fragment of a wall slab with part of Sargon's

<sup>47</sup> It is useful to note here the article by Thureau-Dangin in RA 24 (1927) pp. 75–80 that includes important collations of the version of Sargon's Annals from Room II (text no. 1) based upon his examination of the squeezes then held in the Bibliothèque Nationale (Paris) and in particular new copies of slabs 13 and 14 that were made by Ch.-F. Jean based upon the squeezes (text no. 1 sections 12–13).

<sup>48</sup> Note also the four preliminary reports produced by H. Frankfort (OIC 16–17 and 19–20).

annals and one on a brick [text nos. 5 and 52 ex. 1 respectively]). The chapter on the inscriptions in Khorsabad 2 included copies and editions of three inscriptions by Jacobsen (one on threshold and stair slabs from the temple of the god Nabû, one on threshold slabs from residence L, and one on a stone altar found in the town area; text nos. 22, 2002, and 49 ex. 3 respectively), as well as a list of moveable inscriptions (those found on tablets, prisms, pottery, etc.).<sup>49</sup> Photos showing several inscriptions are found in these two volumes. The information given in the current volume for the findspots and excavation numbers for some of the items found by the Oriental Institute excavations may include some uncertain information, although attempts have been made to prevent this. There are various reasons for this. As noted by Loud in Khorsabad 2 p. ix, “room numbers assigned in the field have been altered in publication” and “Place’s numbering of the palace rooms and courts has been retained.” (See *ibid.* pp. 109–110 for a concordance of the publication and field numbers for the rooms.) At times information on a piece may only come from the original excavation records or from a published volume (Khorsabad 1 or 2); thus, pieces that are stated to come from different rooms may in fact have come from the same room. J. Larson has also determined that on at least three separate occasions, the excavators began the DŠ (at times DS and D.S.) series with a new no. 1.<sup>50</sup> As a consequence, the lower numbers in these series are shared, without explicit differentiation, by three different finds. By consulting the original field ledgers, ambiguities can be resolved in most cases.<sup>51</sup> In addition, the designations for various places differed from those used by Botta and Place. The most important differences between how locations are cited are given below:

Façade L	=	Court I	=	palace terrace (NW)
Façade N	=	Court III	=	palace terrace (NE)
Façade m	=	Court VI	=	third major palace courtyard
Façade n	=	Court VIII	=	second largest palace courtyard
		Court VII	=	throne room
		Court XV	=	largest palace courtyard

In 1958, Hayim Tadmor (1923–2005) published a two-part article on “The Campaigns of Sargon II of Assur: A Chronological-Historical Study” in the *Journal of Cuneiform Studies* (volume 12 pp. 22–40 and 77–100). Although the article published only one small new inscription (A 16947; text no. 102) and two new fragments of the Nineveh Prism (Rm 2,92 and Sm 2049; text no. 82), his careful study of the chronology of Sargon’s reign has remained important for all later studies of the royal inscriptions and campaigns of Sargon. He examined in particular the information on the fall of Samaria (pp. 33–40), using information from the Annals of Room II and from the Nimrud Prism (text nos. 1 and 73), and on the campaigns to Philistia and the border of Egypt (pp. 77–84), using in particular the Aššur Prism and the Nineveh Prism (text nos. 63 and 82).

Although it only included editions (by C.B.F. Walker) of some of Sargon’s epigraphs and the inscription on the altars from Khorsabad (text nos. 23, 26, 28–30, 36–39, and 49), Pauline Albenda’s 1986 study *The Palace of Sargon, King of Assyria / Le palais de Sargon d’Assyrie* (French translation by A. Caubet) presents a detailed study of the wall reliefs and stone objects found at Khorsabad, making particular use of the original drawings produced by Botta and Flandin in the 1840s and cataloguing all the pieces known to exist today.

In 1993, Andreas Fuchs presented his doctoral dissertation, a new edition of the royal inscriptions of Sargon II from Khorsabad, at the Georg-August-Universität in Göttingen, a work completed under the supervision of R. Borger. The dissertation was published the following year as *Die Inschriften Sargons II. aus Khorsabad*. In August 1991, he had been able to examine original documents in the Louvre and to make use of photographs of Botta’s squeezes. In addition, Borger provided him with transliterations and/or collations of seven exemplars of the Khorsabad Cylinder preserved in London and Chicago. In Fuchs’ work, the various versions of the Annals were presented as one text, using the “score” method. This used a different set of line numbers for the Annals than those used by Winckler (only the first twenty-five line numbers were the same) or Lie (only the first 234 line numbers were the same). In addition to these editions, the volume concluded with four appendices — the textual building blocks of the inscriptions from the palace, notes on the Annals and the Display Inscription, the geographical lists in the texts, and a reconstruction of the campaign in the king’s twelfth regnal year — and indices (with very useful commentaries) of personal, geographical, and divine names. The work is an excellent piece of scholarship, although the separation of the transliterations (pp. 29–

<sup>49</sup> For Jacobsen’s nos. 4 and 5, see text no. 10 ex. 4 and the commentary to text no. 11 in this volume.

<sup>50</sup> This has to do with numbers similar to DS 22, D.S. 113, and DŠ 48, and not to those where there is an indication of the field season (e.g., DŠ 32–47). In the present volume, DŠ is used in every case, even though DS or D.S. may appear in the actual field record.

<sup>51</sup> My thanks must be expressed to J. Larson and J.A. Brinkman for sharing information from their work on the provenances of the materials from Khorsabad.

287) from the translations (pp. 289–372) is at times awkward, particularly with regard to the different versions of the Annals.

In November 1993, the Louvre opened “De Khorsabad à Paris,” a special exhibition to commemorate the one hundred and fiftieth anniversary of Botta’s opening of excavations at Khorsabad. The exhibition ran until February 1994 and resulted in two useful publications: E. Fontan (ed.), *De Khorsabad à Paris: La découverte des Assyriens* (1994); and A. Caubet (ed.), *Khorsabad, le palais de Sargon II, roi d’Assyrie* (1995). The former volume includes chapters dealing with the discovery of Khorsabad and its excavators, as well as their discoveries and publications, and how the public received them. The latter is composed of presentations given at a conference held on January 21–22, 1994 to commemorate the occasion and exhibition; it contains articles dealing with such matters as the inscriptions on the back of Khorsabad relief slabs (text no. 41), Sargon’s Cyprus Stele (text no. 103), and the glazed brick panels at Khorsabad (text no. 58), as well as the construction of the city, the Oriental Institute of the University of Chicago’s work at the site, and other matters.

As part of the Royal Inscriptions of Mesopotamia project, in 1995 G. Frame published the royal inscriptions of the rulers of Babylonia from 1157 to 612 BC (RIMB 2), including those from Babylonia written in the name of its Assyrian overlords. These included six inscriptions of Sargon II: two brick inscriptions from Babylon (text nos. 123–124), and one clay cylinder inscription and three brick inscriptions from Uruk (text nos. 125–128). These record him sponsoring work on the city walls of Babylon and on the Eanna temple at Uruk. The editions of these texts presented in the current volume (text nos. 123–128) are essentially duplicates of those published in RIMB 2.

A few years later, in 1998, A. Fuchs presented a study of Sargon’s fragmentary Nineveh Prism, combined with the even more fragmentary texts on the Aššur Prism and a clay tablet (text nos. 82, 63, and 102 respectively). In addition to a careful edition of the texts based on an examination of the originals in London and Berlin, the volume (*Die Annalen des Jahres 711 v. Chr. [SAAS 8]*) includes new copies of the cuneiform texts and several appendices — dating according to regnal years in Assyria, the *sikkatu*-lock, Ursâ’s companion, Daltâ and the anger of the gods, and Iāmānī and Pir’û — as well as indices of personal, geographical, and divine names. Based on the material mentioned in the text, Fuchs states that the inscription likely dates to 711, the king’s eleventh regnal year. The edition of the Nineveh Prism presented by Fuchs is the basis for the one published here (text no. 82), which is the result of collaboration between G. Frame and A. Fuchs.

### Editing the Lost Inscriptions from Khorsabad

As a result of the unavailability of so many of the original inscriptions on stone wall slabs, paving slabs, and bull colossi from Khorsabad (in particular text nos. 1–4, 6–14, and 23–41) because of their loss in the Tigris River in 1855 or their reburial at the site of Khorsabad, the unreliability of Botta’s copies of these inscriptions, and the uncertainty about the reliability of Winckler’s newer copies of the texts, editing these texts presents many problems and challenges, in particular for text nos. 1–4, 6, and 8 (Annals from Rooms II, V, XIII, XIV, and an unknown room of the palace, and the Display Inscription of Room XIV), for which only one exemplar each is known, but also for text no. 7, for which five exemplars are known. As is well known, Botta’s copies contain numerous anomalous/unexpected sign forms, which is not surprising since he made no claim to be able to read cuneiform — indeed philologists were still in the process of deciphering Akkadian cuneiform texts at the time — since he was working under non-optimal conditions, and since the originals were clearly found at times in a damaged condition.<sup>52</sup> In addition, as was mentioned earlier, even though Winckler’s copies generally make excellent sense, they are not reliable, even when he claims to have collated the squeezes.

The poor state of preservation of the squeezes that Botta made and that are still extant in the Louvre and the difficulty in working with them means they are not as useful as one might hope. The original squeezes are frequently in a fragile condition and, having been rolled up for decades, do not lie totally flat on a surface; they are unwieldy to work with and require good lighting in order to facilitate the identification of signs and traces versus damage. Fortunately, the squeezes underwent conservation work in the 1990s; all but a few of the squeezes were photographed at that time and the author was able to obtain copies of these photographs with the permission of B. André-Salvini. It is generally both easier and more productive to work from the Louvre photos than the original squeezes since the photos were taken by an excellent photographer under ideal lighting conditions and then printed in reverse; the squeezes themselves of course show a mirror image of the

<sup>52</sup> As has been noted by earlier scholars, on occasion Botta’s copies misalign fragments of a wall slab (e.g., Room II slab 35 [Monument de Ninive 4 pl. 91]); a double dagger (‡) is employed in the scores to indicate the point in the line of Botta’s copy where one must either go up or down a line in his copy in order to continue reading the relevant line.

inscription. With the permission of A. Thomas, the author made photographs of those squeezes not photographed in the 1990s.

Regrettably, while examination of the squeezes (either directly or via photos) does allow one to improve or correct Botta's copies at times, the squeezes are often unhelpful, either being damaged or unclear themselves at a critical point. (See Figure 2 below for a photo of section of a squeeze in a moderate stage of preservation.) They often suggest that the original text was damaged at the point where Botta copied an anomalous or unexpected form. They do, however, often reveal traces of signs not copied by Botta, traces that were often, but not always, noted by Winckler. It is likely (and at times proven by squeezes) that signs or parts of signs not indicated on Botta's copies were hidden/not present due to damage to the text even where Botta's copies give no indication that the text was damaged. Thus, numerous signs indicated as being abnormal or incorrect in form or omitted were likely only partially preserved or totally missing due to damage on the original.

Figure 2. Squeeze of Botta, Monument de Ninive 4 pl. 80, middle (text no. 1 section 15). © Musée du Louvre, dist. RMN - Grand Palais / Christian Larrieu.

At times, lengthy discussions would be needed to justify the reading of numerous signs in a single line of a single slab; however, this would make this volume inordinately lengthy and difficult to use. After much consideration and discussion with colleagues, it has been decided that for text nos. 1–4 and 8 a score edition would be prepared and made available online with a simplified notation scheme.<sup>53</sup> No score is given for text no. 6 since there are no other sources of information on that text apart from Botta's copy in Monument de Ninive (i.e., no original, no earlier copy in *Journal asiatique* or the Institut de France, and no squeeze). In the scores, one line (indicated by the siglum Bt) indicates the reading based on Botta's copy in Monument de

<sup>53</sup> Note the author's article "Lost in the Tigris: The Trials and Tribulations in Editing the Royal Inscriptions of Sargon II of Assyria" in Yamada, SAAS 28 pp. 215–237; some examples of problems with Botta's copies are given *ibid.* p. 221. For text no. 7, see below.

Ninive, with the siglum † used here and elsewhere to indicate an abnormal sign form;<sup>54</sup> one line (Wi) is based on Winckler's copy, but this line is only present when Winckler claims to have collated the text from a squeeze;<sup>55</sup> one line (Sq) is based on collation of a squeeze still preserved in the Louvre (mostly examined by means of photographs, but at times from the original squeeze); one line (JA) gives information from Botta's copies published in *Journal asiatique* when a copy differs from his later one in *Monument de Ninive*; one line (IdF) gives information from Botta's original copy preserved in the Institut de France when it differs from his copy in *Monument de Ninive*;<sup>56</sup> one line (Je) is based on copies by Ch.-F. Jean published in *Revue d'assyriologie* 24 (1927) pp. 79–80 (only for two slabs in Room II [text no. 1 sections 12–13]); and one line (T-D) gives Thureau-Dangin's collations of individual words and signs on the squeezes published in RA 24 (1927) pp. 76–78 (only for slabs in Room II [text no. 1]). In most cases only one or a few of these lines will appear since the others do not exist for a line (or slab in general). On a few occasions, part of a particular wall slab still exists (see for example text no. 2 section 6 and text no. 3 section 1') or a squeeze exists outside the Institut de France (see text no. 1 section 5) and lines in the score will be given for them, with the line siglum indicated in the commentary to that text. The dagger siglum (†) is used in the scores to indicate an abnormal sign form in Botta's copy: e.g., *i-ta*†; this may be omitted if the sign is only slightly abnormal. However, if the unexpected form is an actual sign, that form is indicated in the score: e.g., *a-di*\*(copy: RU).

The master line is based upon the author's best assessment of the sum total of information, although the siglum † is generally placed after the reading of any sign that is less than certain and/or has conflicting information about it that seemed worthy of note.<sup>57</sup> The reader then needs to look at the score to see the conflicting information on/reading of the sign. This reduces the number of on-page notes arguing about the reading of any one sign. However, where the author felt information about the reading of a sign (or group of signs) was particularly useful, an on-page note on the matter is given. The author is fully aware this is not a perfectly satisfactory manner to deal with uncertain readings, but has decided that it is the most suitable manner to present a manuscript both easily usable by non-specialists and yet able to indicate to the specialist where uncertainty remains about a reading without over-burdening him/her with numerous lengthy discussions that would in many/most cases result in no definite answer.

With regard to the master lines and scores for these texts, it may be useful to explain a number of general procedures:

a) Normally, † will be placed after a sign in the master line if Botta's *Monument de Ninive* copy has an abnormal or incorrect sign even if a squeeze would allow the correct reading, but cannot confirm it. For example, the score may have *a-lid*\*(copy: TAB) for Bt and *a-lid*<sup>1</sup> for Sq, but have *a-lid*<sup>†</sup> in the master line; this would mean that the squeeze indicates the second sign is so damaged (or that the squeeze is so damaged at that point) that although it might well be LID one cannot rule out the possibility of it being TAB. Since Winckler's copies cannot be relied upon (see above), † may still appear in the master line even if *a-lid* is given in the line for Wi.

b) If Botta's copy has a sign fully preserved, while the squeeze shows it damaged, Botta's copy is followed in the master line.

c) When Botta's copy is only slightly abnormal (e.g., MA for LA, KAL for UN, or IZ for PA), while Winckler's copy has the correct form and the squeeze while indicating that the sign is damaged, supports the correct reading, then the correct reading is given in the master line with an indication that the sign is damaged (e.g., <sup>†</sup>UN<sup>†</sup>).

d) If Botta's copy in the *Journal asiatique* and/or Institut de France has the correct/desired sign form of a sign while the later copy in *Monument de Ninive* has an incorrect/abnormal form, preference is given to

<sup>54</sup> The siglum † is given after the expected/desired reading of the sign. Such abnormal signs are not normally indicated in the lists of variants at the back of this volume, particularly when there is more than one exemplar for an inscription (text nos. 7 and 9–14 and 41).

<sup>55</sup> At times Winckler has a line on his copies indicating either where the squeeze he had examined for collation purposes began or where it ended (e.g., his copies of Room II slabs 3 and 9 [Winckler, *Sar.* 2 pl. 1 no. 2 and pl. 3 no. 6]). In such cases, a superscript right-facing triangular bullet (▶) is employed in the scores to note where Winckler indicates that he began to collate the inscription from a squeeze and a superscript circular bullet (◉) is similarly employed to note where he indicates that his collations ended. This latter siglum is also used in the transliteration of text no. 117 (Najafabad Stele) to indicate where the lines of the inscription on the squeezes preserved in the Royal Ontario Museum end.

<sup>56</sup> For the most part, the copies in the Institut de France are identical to those published in *Journal asiatique*, but there are occasional differences between the two. My thanks must be expressed to M. Zink (now *secrétaire perpétuel de l'Académie des inscriptions et belles-lettres*) through whose support I was able to access the materials in the Institut de France in the summer of 2011 and also to J.-M. Durand for facilitating my visit there.

<sup>57</sup> For texts with only one exemplar (e.g., text nos. 1–4, 6, and 8) this will generally mean that P.E. Botta's copy has an abnormal or incorrect sign form and that there is no contradictory information from an original or from a squeeze.

the former in the master line and no indication is normally given in the master line that the copy in Monument de Ninive is abnormal, although this will of course be noted in the score.

e) If the master line has † with a sign being fully restored, this means that Winckler's copy shows the sign as fully present, while Botta's copy and the current state of the squeeze do not have any indication of it being there. For example, [a<sup>†</sup>]-*na* in the master line, [x]-*na* in Bt, *a-na* in Wi, and [x]-*na* or [x x] in Sq. However, if Winckler only indicates that part of the sign is preserved, then his reading is sometimes accepted. For example, if Bt has [x x], Wi has [ki]-<sup>f</sup>*ma*<sup>1</sup>, and Sq has [x x], then [ki]-<sup>f</sup>*ma*<sup>1</sup> may appear in the master line.

f) As is the case elsewhere in this series, if the unexpected sign is an actual sign, then that sign is given in parentheses following the expected reading of the sign in the score. However, † will normally be given in the master line. For example, if we expect *ia-a-ti* while Botta's copy has AD-*a-ti* and the squeeze is not preserved at that point, then the score will have *ia*<sup>\*</sup>(copy: AD)-*a-ti* for Bt and the master line *ia*<sup>†</sup>-*a-ti*.

g) Frequently, even if there is a squeeze of an inscription, it may not cover the whole area copied by Botta, thus not all of the copy has really been collated. In addition, the edges of the squeezes are generally the most damaged parts of them. Thus, the reader will sometimes find more signs with the siglum † in these areas.<sup>58</sup>

h) Squeezes and/or originals often show that a damaged area is greater or smaller in size than is indicated on Botta's copies. Thus, where we have only Botta's copy as evidence for a text or exemplar, the amount of restoration given at times in the master line may differ from what Botta's copy would suggest, although for the most part this only amounts to one or two additional or fewer signs.

In sum, unless we can confirm from a squeeze the accuracy of Winckler's copy of a sign against Botta's copy, Winckler's copy is not normally accepted in the master line. In addition, most of the signs in the master line indicated with † or as being totally omitted, were probably damaged on the original (e.g., *i*<sup>†</sup>-*na* should be <sup>f</sup>*i*<sup>†</sup>-[*na*]), but of course this cannot be proven unless the originals are recovered. It must be admitted that some tiny traces (or apparent traces) on the squeezes have not been noted in the scores. This occurs when the author was uncertain if they were or were not actual traces as opposed to damage on the original or to the squeeze.

Since there are five exemplars of text no. 7 (Khorsabad Display Inscription), a score edition of that inscription is presented online; however, only one line is given for each exemplar in that score even though information on each exemplar can come from a variety of sources in addition to Botta's copies in Monument de Ninive: Winckler's copies collated from squeezes, squeezes still in existence in the Louvre, and fragments of the original slabs preserved in various museums (in particular the British Museum, Louvre, Oriental Institute [Chicago], and Museo delle Antichità Egizie [Turin]). The transliteration of each exemplar in the score is thus a conflation of information from all of the sources available for it and has been made to the best of the ability of the author, although he would admit that matters of uncertainty remain over numerous individual signs and words on any one exemplar. Even though the exact reading of the individual exemplars is a matter of uncertainty at numerous places, and the siglum † is thus frequently found in the scores, because there are five exemplars of the inscription, the overall reading of the text (i.e., the master line) is basically secure.

For the inscriptions or exemplars that use more than one wall slab (text nos. 1–4 and 7–8),<sup>59</sup> the catalogues list each slab separately, calling it a “section” and numbering the sections in consecutive order. For example, text no. 8 is split up into six sections numbered 1–6 to represent each of the six slabs needed for the inscription.

## Name

In the past, the name of the king was often thought to mean “legitimate king” or “the king is legitimate” — *šarru-kēn(u)* or *šarru-kīn(u)* — and to have been taken by him following the death/murder of his brother in order to stress the new king's right to the throne and to remind people of the earlier great ruler Sargon of Akkad. These assumptions are open to question. The king's name is almost invariably written with logograms — <sup>(m)(d)</sup>LUGAL/MAN-GI.NA/GIN — which allows various different interpretations of the meaning of the name. On no occasion is the first element of his name written syllabically in cuneiform texts and on only a few occasions is the second element done so, some written in Assyria (A) and some in Babylonia (B); these are listed below:

<sup>58</sup> These were probably also the most damaged areas on the originals.

<sup>59</sup> Text nos. 5 and 6 would have required more than one wall slab, but information only on all or part of one slab is known for either text. As noted with text no. 6, it is possible that that text comes from the same room as text no. 5, the palace throne room (Court VII).

While the spelling Šarru-kīn is attested for Sargon I of Assyria, it is thus not clearly attested for Sargon II. As noted by Fuchs, the writers of the letters to Sargon listed above “would certainly have addressed their master in the most correct way.”<sup>60</sup> In addition, a few of the texts using the writing -ú-kin were written by the well-known royal scribe Nabû-zuqup-kēnu, who would surely not have written the name of the king incorrectly.<sup>61</sup> Therefore, the name of Sargon II should most probably be understood to be Šarru-ukīn and to mean “He (the god) made the king firm,” with only one (partially preserved) example indicating the reading Šarru-kēnu, “the legitimate/righteous/just/true king.”<sup>62</sup> Since the name was not reserved only for rulers as has sometimes been thought,<sup>63</sup> it may well have been Sargon’s birth name and not one that he took upon ascending the throne, although the latter possibility cannot be ruled out. The “king” originally referred to in the name would have been the ruler at the time of Sargon’s birth (possibly Aššur-dān III).<sup>64</sup> However, once Sargon had ascended the throne, the “king” might well have been re-interpreted to refer to him and encouraged the byform Šarru-kēnu, with its respective meaning(s). This new understanding of the name may be reflected in the following statement in the Khorsabad Cylinder: “In accordance with the saying of my name (*kīma zikir šumiya*) that the great gods had given to me — to protect truth and justice, to guide the powerless, (and) to prevent the wrongful harming of the weak” (text no. 43 line 50). In this connection, it must be noted that in his inscriptions, Sargon II was sometimes given the epithets *rē’û kēnu*, “the legitimate/righteous/just/true shepherd” (text no. 9 line 3, text no. 43 line 3, text no. 44 line 4 [partially restored], text no. 73 line 2, text no. 89 line 13, and probably text no. 117 i 22, as well as a few cases where it is likely to be restored), *šarru kīnu*, “the legitimate/righteous/just/true king” (text no. 65 line 114; Kataja and Whiting, SAA 12 no. 19 line 5'; see also the note to text no. 89 line 34), and *rubû kēnu*, “the legitimate/righteous/just/true prince” (text no. 82 vii 33'), stressing his legitimacy/righteousness/justness/trueness to be king and reminding one of his name.<sup>65</sup> A. Fuchs has argued that “Only a king who had won his throne by usurpation was in need of such epithets,”<sup>66</sup> although this may simply indicate that his accession was in some way irregular or unexpected, and not that he had violently overthrown Shalmaneser V.

The king’s name is written once in Aramaic as *srgn* on an impression of a seal belonging to one of Sargon’s eunuchs that was found at Khorsabad (text no. 2004 line 3) and once as *shrkn* on the Assur Ostrakon.<sup>67</sup> In the Hebrew scriptures, the name appears as *sargōn* (var. *sarggōn*) in Isaiah 20:1.<sup>68</sup> The name is rendered in the

<sup>60</sup> PNA 3/2 p. 1239.

<sup>68</sup> R. Kittel and P. Kahle, *Biblia Hebraica*, 3rd ed. (Stuttgart, 1945) p. 635.

Septuagint by editorial conjecture as *Σαρραν*, with the various manuscripts having *σαρρα*, *αρρα*, *αρραβα*, *αρραι*, or *αρρα*; later Greek translations give it variously as *σαραγων*, *σαργων*, and *σαργου*.<sup>69</sup>

Although it has at times been stated that Sargon II's name was a throne name taken by him in order to connect himself with Sargon of Akkad, a famous earlier ruler who did not come from a royal line and yet came to rule a major kingdom and found a new dynasty, it should be noted, as pointed out by Frahm (NABU 2005 p. 50 n. 30), that none of Sargon II's inscriptions ever mentions Sargon of Akkad. While he is called "the later (*arkû*) Sargon" in the date formulae of a few colophons and while the Ptolemaic canon does refer to him as Arkeanos (*Ἀρκεανοῦ* genitive), which may be derived from *arkû*, in theory this could simply be an indication of the existence of the (admittedly not-well-known and less significant) Old Assyrian king Sargon I instead of Sargon of Akkad.<sup>70</sup> There have been attempts to date the Sargon Legend and Sargon Geography to the reign of Sargon II and to consider them to reflect that ruler's political ideology.<sup>71</sup> While these texts may very well come from the time of Sargon II, this has not yet been proven conclusively.

The length of the wall of Sargon's new capital Dūr-Šarrukīn<sup>72</sup> is stated to be 16,280 cubits in four texts: ŠĀR ŠĀR ŠĀR ŠĀR GĒŠ.U GĒŠ.U GĒŠ.U 1 UŠ 1½ NINDA 2 KŪŠ in text no. 9 lines 79–80 and text no. 8 line 40 (partially restored) and ŠĀR ŠĀR ŠĀR ŠĀR GĒŠ.U GĒŠ.U GĒŠ.U 1 UŠ 3 *qa-ni* 2 KŪŠ in text no. 43 line 65 and text no. 44 line 47 (mostly restored).<sup>73</sup> In texts 43 and 44, the number is said to be *ni-bit* MU-*ia* "(corresponding to) the rendering of my name," or more literally "(corresponding to) the saying/pronunciation of my name."<sup>74</sup> Although various proposals have been made by scholars over the years to explain how this would work,<sup>75</sup> none has been convincing, although, as noted by Fuchs and other scholars, a connection between the sign ŠĀR and the first part of Sargon's name (*šarru*) would seem likely.<sup>76</sup>

## Family

It has frequently been stated that Sargon was either not a son of Tiglath-pileser III or only an illegitimate one. This was based on the view that his name was a throne name meaning "legitimate king" – suggesting that he was not in fact one – that he usually never mentioned the name of his father in his royal inscriptions, and that his accession to the throne did not take place in a smooth manner. As already noted, the actual writings of his name indicate a different meaning for his name. While it is true that Sargon almost never mentions the name of his father in his royal inscriptions, text no. 66, found on several wall plaques from Aššur, does refer to him as the son of Tiglath-pileser (A <sup>m</sup>*tukul-ti-A-é-šār-ra* MAN KUR *aš-šur-ma*). Tiglath-pileser and Sennacherib also rarely mention the name of their respective fathers (likely Adad-nārārī III and Sargon II respectively) in their royal inscriptions<sup>77</sup> and it has never been suggested that they were illegitimate.<sup>78</sup> Moreover, a Babylonian letter

<sup>69</sup> J. Ziegler, *Septuaginta: Vetus Testamentum Graecum Auctoritate Academiae Scientiarum Gottingensis editum*, volume 14: *Isaias*, 3d ed. (Göttingen, 1983) p. 192.

<sup>70</sup> See Hunger, *Kolophone nos.* 294, 297, and 313; May, *Studies Diakonoff* pp. 110–164, especially pp. 116–117 and Appendix 2 nos. 1–2, 5, 6, 20, 32, 35–37, 40, 42, 45–46, and 50–51; and Fuchs, *Studies Volk* pp. 69–86, especially pp. 75–77. The colophons are primarily on texts written by the royal scribe Nabû-zuqup-kēnu, for the writing *Ἀρκεανοῦ* in the Ptolemaic Canon, see below.

<sup>71</sup> E.g., Lewis, *Sargon Legend* pp. 97–107; Horowitz, *Cosmic Geography* pp. 92–93; Van De Mierop, *Studies Renger* pp. 327–339; Galter, *Studies Haider* pp. 279–302.

<sup>72</sup> The name of the city is always written with logograms in Sargon's royal inscriptions and thus we should perhaps give its name as Dūr-Šarru-ukīn rather than Dūr-Šarrukīn. A number of economic texts and letters write the last element of the place name syllabically or partially syllabically; however, it is often uncertain if these texts are referring to Sargon's city or to the city Dūr-Šarrukku in northern Babylonia. Note in particular Kwasman and Parpola, *SAA 6 no. 106 rev. 8* [URU.BĀD-LUGA]L-ú-k[īn], in connection with the eponym for 693. Two instances, for example, which might refer to Khorsabad are URU.BĀD-*sa-ru-uk-ka* and BĀD-MAN-*ka* (Fales and Postgate, *SAA 11 no. 94 rev. 4* and no. 133 ii 18' respectively); suggestion courtesy M. Worthington. See also Fuchs, *Studies Volk* p. 71 n. 15.

<sup>73</sup> Text no. 8 line 40 has ŠĀR ŠĀR ŠĀR ŠĀR GĒŠ.U GĒŠ.U GĒŠ.U [1 UŠ 1 1/2 NINDA 2 KŪŠ] and text no. 44 line 47 has [ŠĀR ŠĀR ŠĀR ŠĀR GĒŠ.U GĒŠ.U] GĒ[Š.U 1 UŠ] '3' *qa-ni* 2 KŪŠ.

<sup>74</sup> CAD N/2 p. 202 translates *nibīt šumiya* as "(corresponding to) the spelling of my name."

<sup>75</sup> For example, W. von Soden (Aus *Sprache* pp. 334–335 n. 33) suggested that the number might reflect the number of days Sargon had been alive (ca. 44.6 years) at the time.

<sup>76</sup> Fuchs, *Khorsabad* pp. 294–295 n. 88. For other recent discussions of this riddle, see Pearce, *JAOS* 116 (1996) 462; De Odorico, *Numbers* pp. 140–141; Morenz in Morenz and Bosshard-Nepustil, *Herrscherpräsentation* pp. 200–201; and Radner, *Macht des Namens* pp. 130–131. M. Roaf and M. Worthington are both preparing detailed studies of the problem with possible solutions.

<sup>77</sup> For Tiglath-pileser III, see Tadmor and Yamada, *RINAP 1* p. 148 Tiglath-pileser no. 58 line 2. For Sennacherib, see Grayson and Novotny, *RINAP 3/2* pp. 170 no. 135 line 2 (restored) and p. 232 no. 163 line 5'. See also Frahm, *Sanherib* pp. 194–195 and Frahm in *Sennacherib at the Gates of Jerusalem* p. 175. Esarhaddon, Ashurbanipal, Šamaš-šuma-ukīn, and Sīn-šarru-iškun did refer to Sargon as being their ancestor (see Fuchs, *PNA 3/2* pp. 1246–1247) and Ashurbanipal affirms that he, and thus also Sargon, was a descendant of Bēl-bāni son of Adāsi (e.g., Novotny and Jeffers, *RINAP 5/1* p. 220 no. 10 v 38–40). Therefore, Sargon was also a member of the long-established Assyrian royal family.

to Sargon ([*a-na* LUGAL]-*ú-kin* LUGAL [KUR.KUR], Dietrich, SAA 17 no. 46 line 1 [=CT 54 no. 109]) refers to Tiglath-pileser as the king's father (*tukul-ti-IBILA-<sup>r</sup>é<sup>1</sup>-[šár-ra]* / <sup>r</sup>LUGAL AD<sup>1</sup>-ka, *ibid.* rev. 10–11),<sup>79</sup> which would seem to settle the issue. Certainly, his accession to the throne may not have taken place in a normal manner. Based upon the Aššur Charter (text no. 89), the chief god had brought about the end of Shalmaneser V's brief reign because of the latter's impious actions against the citizens of the city of Aššur and the god had then made Sargon the new king; however, this does not prove that he was not a son of Tiglath-pileser or a member of the royal family. It is not known who Sargon's mother was, although it seems unlikely that it was Tiglath-pileser's wife Yabâ.<sup>80</sup> A Late Babylonian literary letter likely from Nabopolassar to Sîn-šarru-iškun threatens the latter for Sennacherib's actions against Babylonia (Akkad) and refers to "Sennacherib, son of Sargon, offspring of a houseborn slave (*dušmû*) from Babylon." Lambert says that this shows that Sargon was the son of a Babylonian slave, although he does also note that the whole letter may be an ancient work of fiction.<sup>81</sup> However, this statement might well be simply a piece of Babylonian invective towards the Assyrian royal family and, in any case, might be intended to refer to Sennacherib as the son of a slave, not Sargon.<sup>82</sup>

There is no evidence to support the idea proposed by Campbell Thompson that Sargon had served as governor of the city Aššur during the time of his brother Shalmaneser V.<sup>83</sup> In fact, there is no evidence to show that he had held any office under his father or brother.

It is not known if Sargon was a full brother or a half-brother of Shalmaneser V. Another brother of Sargon's was Sîn-aḥu-ušur, who served as his grand vizier (*sukkalmahḥu* and *sukkallu rabû*), had a large palace within the citadel area at Khorsabad (Residence L), and claimed to be Sargon's favorite brother (*ta-lim*).<sup>84</sup> The Sîn-aḥu-ušur whose cavalry contingent accompanied Sargon in the fight against the Urartian Rusâ (text no. 65 lines 132–133) is likely to be identified with Sargon's brother.

According to Babylonian King List A, Shalmaneser V was a member of the dynasty Baltil, while Sargon's son and successor Sennacherib was a member of the Ḥabigal (presumably for Ḥanigalbat) dynasty. Sargon himself is given no dynastic affiliation, which could mean that he was considered by whatever Babylonians compiled the king list to be from the previously mentioned Assyrian dynasty (Baltil) or possibly from the same one as his son.<sup>85</sup>

Ataliya (text no. 2001), a wife of Sargon II, was buried at Kalḥu, possibly suggesting that she died before the completion of the palace at Khorsabad.<sup>86</sup> Her name may suggest that she was of Northwest Semitic or Arab origin.<sup>87</sup> If read correctly, Grayson and Novotny, RINAP 3/2 p. 364 no. 2001, may refer to another wife of Sargon, one Ra'imâ, who appears to have been the mother of his son and successor Sennacherib.<sup>88</sup>

As noted by Frahm, Sargon must have been born "not much later than around 765" since his son Sennacherib, who was not the first of Sargon's sons, must have been born around 745 in order to have been made crown prince during Sargon's lifetime and to have installed his own heir (Aššur-nādin-šumi) as ruler of Babylon in 700.<sup>89</sup>

<sup>78</sup> E. Frahm (NABU 2005 no. 44 pp. 47–48) points out that there is a different pattern of royal name giving after Sargon than the one that had existed up until then and he suggests that the shift "may reflect an awareness on the part of the Late Assyrian rulers that they had entered a new political age."

<sup>79</sup> Thomas, *Studies Bergerhof* pp. 465–470.

<sup>80</sup> For Yabâ, see Tadmor and Yamada, RINAP 1 pp. 164–167 Tiglath-pileser nos. 2003–2005. For the case against Yabâ being the mother of Sargon, see Frahm in Sennacherib at the Gates of Jerusalem p. 185.

<sup>81</sup> Gerardi, AfO 33 (1986) pp. 30–38 BM 55467 rev. 7; Lambert, *Studies Grayson* p. 202 (note his collation to the end of the line in his n. 14).

<sup>82</sup> If it is Sargon who is meant by "offspring of a houseborn slave," this would seem to mean that Tiglath-pileser III had been a slave. Since the form *dušmû* (*du-uš-mu-û*) is used, not *dušmitu*, it should refer to the individual's father, not his mother, as having been a slave. On the matter of Sargon's parentage, see also Frahm in Sennacherib at the Gates p. 176.

<sup>83</sup> Thompson, *Iraq* 4 (1937) pp. 40–42.

<sup>84</sup> See text nos. 2002–2003.

<sup>85</sup> See n. 156 below.

<sup>86</sup> E. Frahm (in Sennacherib at the Gates of Jerusalem pp. 185–186) raises the possibility that the reason Ataliya's body had apparently been conserved by some process prior to its burial might be that Ataliya accompanied Sargon on his final campaign in 705 and been killed in Tabal along with her husband; her body had then been treated to conserve it during transport back to Assyria. He also raises the possibility that the fact that the burial took place "in a somewhat haphazard way" might be the result of "the unstable political situation (and Sennacherib's unfriendly feelings towards her?)." Frahm also notes, however, that this scenario may be "nothing but speculation." It is worth wondering how likely it would be that Ataliya's body would have been recovered by the Assyrians for burial but not Sargon's (see below), although of course the enemy may well have made greater efforts to prevent the king's body being recovered than that of a woman, even if she was the king's wife.

<sup>87</sup> On the question of the origin and meaning of the name Ataliya, see the introduction to text no. 2001.

<sup>88</sup> With regard to Ra'imâ, see Frahm in Sennacherib at the Gates of Jerusalem pp. 179–182. He suggests that she may have come from Ḥarrân or somewhere near there.

<sup>89</sup> NABU 2005 pp. 46–50 no. 44, especially p. 47.

At least two children of Sargon's are clearly attested: his heir Sennacherib and a daughter who made a political marriage; however, Sennacherib's name — "The god Sîn has replaced the brothers" — indicates that Sargon had had at least two previous sons who died before Sennacherib's birth. Moreover, a letter to Sargon from one Ḫunnî refers to "Sennacherib, the crown prince ... [and all] the princes/children of the king (DUMU.MEŠ MAN) (who are) [in] Assyria" (Parpola, SAA 1 no. 133 lines 9–11 [=Harper, ABL no. 216]), indicating that Sennacherib had more than one brother/sibling. While Sargon was likely off on campaign, Sennacherib remained in Assyria and sent a number of reports to his father (Parpola, SAA 1 nos. 29–40). These reports concentrate on matters to the north of Assyria, in particular events in Urarṭu, Kummū, and Ukku, but they also involve domestic matters, the receipt of tribute from Ashdod, and the arrival of emissaries from Kummūḫu (Commagene), as well as various other matters. Fuchs has argued that the earliest of these letters must date no later than 710, which would suggest that Sennacherib had been appointed crown prince by that year.<sup>90</sup>

In order to gain the support of Ḫullî, the king of Tabal, a daughter of Sargon's was given in marriage to Ambaris, Ḫullî's son. Ambaris was also made ruler of the city/land Ḫilakku (e.g., text no. 1 lines 194–198 and text no. 2 lines 226–230). Following the death of Ḫullî, however, Ambaris conspired with the rulers of Musku and Urarṭu and was overthrown by Sargon in 713. It is not known what happened to his wife. A letter to Sargon from his son Sennacherib refers to a message of the major-domo (*rab bīti*) of Aḫāt-abīša arriving from Tabal (Parpola, SAA 1 no. 31 rev. 26–29 [=Harper, ABL 197]) and this Aḫāt-abīša has often been assumed to be Sargon's daughter; however, this remains uncertain.<sup>91</sup>

### Accession to the Throne

The Babylonian Chronicle states: "The fifth year (722): Shalmaneser (V) died in the month Ṭebētu (X). Shalmaneser (V) ruled Akkad and Assyria for five years. On the twelfth day of the month Ṭebētu, Sargon (II) ascended the throne in Assyria. In the month Nisannu (I), Marduk-apla-iddina (II) (Merodach-baladan) ascended the throne in Babylon." It is not known how Shalmaneser died, whether as the result of natural causes or an accident, or whether killed, either on the battlefield or as the result of some palace conspiracy.<sup>92</sup> There is some evidence, however, that would suggest that the change in rule did not take place in a smooth manner. In the Aššur Charter (text no. 89), one of Sargon's earliest royal inscriptions, Sargon states that Shalmaneser had "with evil intent ... imposed oppressively (state) service (and) corvée-duty" upon the people of the city of Aššur and "treated (them) as if they were of low rank" and that it was because of this that the chief god had overthrown him and appointed Sargon to be ruler. Sargon then claims that he restored the city of Aššur's privileges.<sup>93</sup> This direct criticism of the preceding ruler, a close relative of the new ruler, is unprecedented in Assyrian royal inscriptions and may well suggest that something untoward had occurred at the time of the change of rulership. Sargon may have been involved in deposing Shalmaneser, but there is no other indication of this beyond the fact that he benefited from Shalmaneser's death by becoming the new ruler. Shalmaneser's actions with regard to the city of Aššur (assuming that Sargon's statements are accurate) may or may not have been connected with the change in rule, but Sargon was likely attempting to gain the support of the citizens of that important city by granting/renewing their privileges. Early in his reign, Sargon had mercy on 6,300 Assyrian criminals (*bēl ḫiṭṭi*) and settled them in the land Hamath. Exactly what their crime(s) had been is not stated, but it is possible that they had not supported Sargon's accession to the throne.<sup>94</sup> It was likely uncertainty/problems in Assyria at the time of the change of ruler that encouraged the Chaldean Marduk-apla-iddina (II), likely the grandson of the earlier ruler of Babylon Erība-Marduk, to seize the throne in Babylon and remove Babylonia from Assyrian control.

### Military Campaigns

The chronology for the reign of Sargon and the dating of his various campaigns is based for the most part upon the Assyrian Eponym Chronicle, a Babylonian chronicle, and statements in his royal inscriptions assigning

<sup>90</sup> Fuchs in Biainili-Urarṭu p. 137 no. 1.7 and pp. 155–157. For a discussion of Sennacherib's actions and life as crown prince, see Frahm in Sennacherib at the Gates of Jerusalem pp. 197–201.

<sup>91</sup> See Fuchs in Biainili-Urarṭu p. 155.

<sup>92</sup> See Mayer, *Studies Loretz* pp. 545–547. With regard to the accession of Sargon, see Vera Chamaza SAAB 6 (1992) pp. 21–33.

<sup>93</sup> G. Vera Chamaza (SAAB 6 [1992] pp. 25–29) raised the possibility that the taxation policies of Shalmaneser V and his predecessors may have been in place for some time, but had resulted in discontent among the temple elites.

<sup>94</sup> Text no. 84 line 20', text no. 103 ii 61–65, text no. 105 ii' 5–12, and text no. 108 Frgm. E. See for example Fuchs, PNA 3/2 p. 1240.

campaigns to particular regnal years (*palû*).<sup>95</sup> It must be noted that the dating of the campaigns in the Khorsabad Annals (in particular text nos. 1–4) and the Najafabad Stele (text no. 117) is different to that in the Aššur Prism (text no. 63), the Nineveh Prism (text no. 82), and a tablet fragment (text no. 102), with the former sources in general citing the campaigns one regnal year later than the latter and with the former's assignments better fitting the information found in the Assyrian Eponym Chronicle and Babylonian chronicle than does that of the latter.<sup>96</sup>

According to his annals, at the beginning of his reign Sargon defeated the city Samaria, deported a large number of its inhabitants, and then resettled the city and annexed it to Assyria proper, appointing one of his eunuchs as governor. Exactly when Samaria fell to the Assyrians — whether in the time of Shalmaneser V or Sargon II — and how many campaigns there were against Samaria have been matters of intense scholarly discussion and will not be treated here.<sup>97</sup> However, it is quite reasonable to assume that the deportation of the Israelites occurred at least in part during the reign of Sargon. Several actions carried out early in his reign may have been intended to reverse actions taken by his predecessor and set his own stamp on affairs. Among these may be the reopening of trade with Egypt and the reinstatement of Ḫullî as ruler of Tabal.<sup>98</sup>

During his first regnal year (721) Sargon does not appear to have carried out a major military campaign, likely because he needed to remain in the Assyrian heartland and consolidate his hold on the throne.<sup>99</sup> In Babylonia, the Chaldean Marduk-apla-iddina (II) used the uncertainty in Assyria to ascend the throne in Babylon and regain Babylonia's independence that had been lost in the time of Tiglath-pileser III.<sup>100</sup> The Khorsabad Annals do attribute two military actions to Sargon's first regnal year (721), a battle against the Elamites at Dēr and an action against the Aramean Tu'umuna tribe, who lived in northern Babylonia.<sup>101</sup> However, the Aššur Charter (text no. 89 lines 16–17a) and the Babylonian Chronicle state that the battle at Dēr actually took place in his second regnal year (720), and it is possible that the Tu'umuna were attacked in connection with that battle. The Assyrians had presumably moved south to deal with Marduk-apla-iddina's rebellion in Babylonia and were opposed by the latter's Elamite allies led by Ummanigaš (Ḫumban-nikaš I). The composer(s) of the annals may not have wanted to suggest that Sargon had been dilatory in dealing with Marduk-apla-iddina's rebellion in Babylonia and thus ascribed the battle to the previous year. According to the Babylonian chronicle the Elamite king inflicted a major defeat upon the Assyrians and forced them to retreat. Marduk-apla-iddina (II) and his troops are said to have arrived too late for the battle. Although Assyrian inscriptions state that the battle resulted in an Assyrian victory, it was clearly at best a stalemate since Babylonia remained independent for ten more years.<sup>102</sup> Interestingly, Marduk-apla-iddina, whose army does

<sup>95</sup> Translations of the relevant sections of the Assyrian Eponym Chronicle and the Babylonian chronicle that deal with the reign of Sargon are found at the end of this chapter. For good overviews of Sargon's campaigns, see Fuchs, RLA 12/1–2 (2009) pp. 53–58 and PNA 3/2 pp. 1240–1244. The recent books by F. Maniari (Campagne di Sargon), S. Melville (Campaigns of Sargon) and J. Elayi (Sargon II) present more detailed studies of these campaigns. Note also G.B. Lanfranchi's article on Sargon's foreign policy in CRRA 39 pp. 81–87, T. Dezső's article on Sargon's army (SAAB 15 [2006] pp. 93–140), S. Ponchia's study of mountain routes in Sargon's campaigns (SAAB 15 [2006] pp. 231–245), and A. Bagg's study of Sargon's western campaigns (Bagg, Assyrer und das Westland pp. 233–244 and maps 4.26–4.30).

<sup>96</sup> The Aššur Prism, the Nineveh Prism, and the tablet fragment are all damaged and actually preserve specific mentions of only a few regnal years (Aššur Prism: 6th and 8th regnal years; Nineveh Prism: 8th and 9th regnal years; tablet fragment: 5th regnal year). While the Nineveh Prism dates the campaign against Karalla and Ellipi to the eighth regnal year, as opposed to the ninth regnal year in the Khorsabad Annals, it assigns the campaigns to Gurgum and against Iāmāni of Ashdod to Sargon's ninth regnal year (text no. 82 vii 13'–4'''), rather than to his eleventh regnal year as in the Annals. For the use of the term *palû* in Assyrian royal inscriptions and in those of Sargon in particular, see Tadmor, JCS 12 (1958) pp. 22–33 and Fuchs, SAAS 8 pp. 81–96.

<sup>97</sup> For the various theories and for bibliographical references for them, see for example Elayi, Sargon II pp. 48–50 and note also various articles in the recent book Last Days (in particular the article by Frahm on pp. 55–86).

<sup>98</sup> Text no. 1 lines 12b–18a (heavily restored from the following texts), text no. 7 lines 23b–25a, and text no. 74 iv 25–49. Text no. 1 lines 17b–18a assign the reopening of a sealed harbor in Egypt and the subsequent trading between Assyrians and Egyptians to Sargon's accession year (722), but this may have occurred later, possibly after the campaign to Gaza in his second year (Elayi, Sargon II p. 56) or in his sixth regnal year (Melville, Campaigns of Sargon pp. xv, 93 and 196). With regard to this trading post, see Eph'al, Arabs pp. 101–104. For the reinstatement of Ḫullî, see text no. 1 lines 194a–198a and text no. 2 lines 226b–230a, where it is mentioned as having happened in the past. Note also May, SAAB 21 (2015) pp. 79–116 with regard to administrative changes in the reign of Sargon II (and also that of Tiglath-pileser III).

<sup>99</sup> Note however Tadmor's suggestion that the line for 721 in the Assyrian Eponym Chronicle read “[Against the land Ḫatt]i”; however, he had assumed that that line was for 720, not 721 (see below).

<sup>100</sup> See for example, text no. 1 lines 262b–268a, text no. 2 lines 287b–297a, text no. 3 lines 13'b–15', and text no. 7 lines 121b–124a.

<sup>101</sup> Text no. 1 lines 18b–23a. See also text no. 81 lines 1–4a, text no. 43 line 18, and text no. 76 line 11', which also mention actions against a second tribe, the Tēša. Text no. 81 (Mosul Annals) places the episode involving the Tēša in the regnal year before the one in which the campaign against Hamath took place, although the regnal year number is not preserved for either event.

<sup>102</sup> A Babylonian chronicle likely states that Assyria (or Sargon) was hostile towards Marduk-apla-iddina from his accession year until his tenth year (see below).

<sup>103</sup> Text nos.: 1 = Annals of Room II; 2 = Annals of Room V; 3 = Annals of Room XIII; 4 = Annals of Room XIV; 5 = Annals of the Throne Room; 6 = Annals of an Unknown Room; 63 = Aššur Prism; 81 = Mosul Annals; 82 = Nineveh Prism; 89 = Aššur Charter; 102 = Tablet Fragment A 16947; 117 = Najafabad Stele; AEC = Assyrian Eponym Chronicle; and BC = Babylonian Chronicle (Grayson, Chronicles no. 1).

If the regnal year in which an event occurred is mentioned in the text, the number of the regnal year is given. If the regnal year is not preserved but can be determined reliably due to the mention of a preceding or subsequent regnal year in the text, the number of the regnal year is given in square brackets. If the text preserves all or part of the account of the event (but does not mention the regnal year), it is given a check mark (✓). The Assyrian Eponym Chronicle assigns the indicated events to particular eponymies and these have been converted into regnal years.

An asterisk (\*) means that the event is described after the account of Sargon's campaign in his thirteenth regnal year (709), with the first event thus indicated (military actions by the Assyria governor of Que against Musku) said to have been conducted while the king was occupied defeating the Chaldeans and Arameans of the Eastern Sea and fighting Elam (text no 1 lines 444b–445a and text no. 2 line 428a). For the most part, the year to which they are assigned here follows the views proposed by other recent scholars (in particular Fuchs), although some scholars have differing views. For example, Elayi (Sargon II p. 243) places the Que/Musku and Tyre/Cyprus events in 710–709 and 709 respectively, rather than in 708. The episode in the annals involving Kummuḫu, which is in the same section in the Khorsabad Annals, can be assigned to Sargon's fourteenth regnal year (708) because the Assyrian Eponym Chronicle states that that city was captured in that year.

Year	Regnal Year	Event	Text

not appear to have taken part in the battle, seems to claim for himself the victory over the Assyrians in one of his inscriptions.<sup>104</sup>

During Sargon's second regnal year (720), the Assyrians did put down a rebellion at Qarqar in the west led by Ilu-bi'di (Iaū-bi'di) of Hamath, who had incited the important cities of Arpad, Šimarra, Damascus, and Samaria against Assyria. Ḥanūnu (Ḥanno), the vassal ruler of Gaza, made an alliance with Egypt and also

<sup>104</sup> Frame, RIMB 2 p. 137 B.6.21.1 lines 16–18; note Brinkman in Studies Oppenheim pp. 14–15. See also text no. 7 line 23b.

rebelled against Assyria. Their forces were defeated at the city Raphia (modern Rafah). The Egyptian commander, Rē'e, fled and Raphia was looted and then demolished.<sup>105</sup>

The campaigns in Sargon's third and fourth regnal years (719 and 718) were directed at the east and northwest respectively. In 719, he provided help to the Mannean ruler Iranzi. Two of the latter's cities had allied with Mitatti of the land Zikirtu and rebelled. In addition to demolishing the two cities, Sargon deported people from three other cities that had allied with the Urartian king Rusâ.<sup>106</sup> In the northwest, the various cities and states were under pressure from both Musku (Phrygia) and Urartu to oppose Assyria. Because Kiakki, king of the city Šinuhtu in the land Tabal, had allied with Mitâ of Musku and withheld his tribute, in 718 Sargon devastated his city, took him and his family captive, and granted the city to Kurtî of the land Atuna.<sup>107</sup>

In Sargon's fifth regnal year (717), campaigns were directed both to the northwest and to the east. Piširis of Carchemish attempted to ally with Mitâ of Musku and rebelled, but was defeated. Assyrians were settled in Carchemish and the yoke of the god Aššur imposed on them. People of the Mannean cities Papa and Lallukna who had allied with the land Kakmê against Assyria were deported and resettled in Damascus.<sup>108</sup> One version of a Babylonian chronicle has an entry for 717 stating that someone or some country, likely Sargon or Assyria, was hostile to the Babylonian king Marduk-apla-iddina (II) from his accession year until his tenth year, i.e., from 722 until 712. Another version of the chronicle puts this entry in the following year, the sixth regnal year (716). It is not clear why such a statement would be recorded under the fifth or sixth regnal year and not earlier, at the time Marduk-apla-iddina took control of Babylon, or why it refers to the hostility ending in 712 when Sargon invaded Babylonia in 710.

The campaigns in Sargon's sixth through ninth regnal years (716–713) were mainly directed to the north and east, against the Urartian ruler Rusâ and his allies. Rusâ had presumably been involved in the overthrow and murder of Azâ, the king of Mannea, by two of the latter's governors, and with the appointment of Aza's brother Ullusunu to be the new ruler of Mannea. In 716, Sargon defeated those two Mannean governors and, as a result, Ullusunu submitted to Sargon and was left in office. Sargon also dealt with Aššur-lē'i of Karalla and Itî of Allabria, the rulers of two lands to the south of Mannea, who had listened to Ullusunu and also allied with Rusâ. The cities Kišesim and Ḥarḥar were annexed to Assyria and renamed Kār-Nergal and Kār-Šarrukîn respectively. At this time, Sargon claims to have received tribute from twenty-eight city lords of the powerful Medes.<sup>109</sup> The Assyrians erected the Najafabad Stele (text no. 117) during the course this campaign in order to commemorate it. In the same year, some action may have taken place in the Palestinian area. Although nothing about this is reported in the Khorsabad Annals for that year, the end of the account for the year in the Aššur and Nineveh Prism inscriptions refers to people being settled near the Brook of Egypt under the authority of the sheikh of Laban and to the king of Egypt Šilkanni bringing an audience gift to Sargon.<sup>110</sup>

In 715, Sargon's seventh regnal year, twenty-two Mannean fortresses that Rusâ had seized from Ullusunu were recovered and annexed to Assyria. Dayukku, a Mannean governor who had been incited to rebel against Ullusunu by Rusâ, was captured and deported. Various other places in the lands on the borders of Urartu, including in the land Andia, were conquered. Sargon claims to have erected an image of himself in the Mannean capital Izirtu and to have received tribute from twenty-two Median city rulers. According to Sargon's Annals, in the same year the Assyrians also defeated some Ionians who had been raiding Que (Cilicia) and Tyre, recovered several cities of Que that the Muskian Mitâ had taken away, and defeated some Arab tribes who lived in the desert, resettling them in Samaria; these campaigns were likely led by Assyrian officials and not by the king himself. Sargon then boasts of having received tribute from the Egyptian Pir'û (i.e., pharaoh), the Arabian queen Samsi, and It'amar, the ruler of the land of the Sabaeans.<sup>111</sup> According to the Assyrian Eponym Chronicle,

<sup>105</sup> Text no. 1 lines 23b–57, text no. 7 lines 25b–26 and 33–36a, text no. 73 line 8, text no. 81 lines 4b–20, text no. 84 lines 18'–20', text no. 89 lines 17b–29, text no. 103 ii 51–65, text no. 105 ii' 1'–12', text no. 108 Frgm. <sup>110</sup> Text no. 63 ii' 1'–11' and no. 82 iii 1'''–8'''. It is not impossible that the people settled near the Brook of Egypt were people deported from Mannea and the Zagros region. Šilkanni may be Osorkon IV, the last ruler of Egypt's twenty-second dynasty; see Schwemer, *PNA* 3/2 pp. 1421–1422 sub Usilkanu 1.

<sup>111</sup> Text no. 1 lines 101–126, text no. 2 lines 95b–101, text no. 7 lines 27, 44–45a, 49b, 52–54 and 64b–67a, text no. 63 ii' 12'–25', text no. 74 v 34–40, and text no. 82 iii 9'''–17''''.

provincial governors were appointed in this year, but nothing further is known about that action or if it was connected to Assyrian campaigns in some way.

In Sargon's eighth regnal year (714), he conducted his best documented campaign, heading east into the Zagros, traversing Mannea, defeating Mitatti of Zikirtu, and then proceeding north into Urarṭu itself, where he defeated the Urarṭian king Rusâ on Mount Uauš. While he may or may not have gone all the way around Lake Urmia during the course of the campaign, he certainly claims to have ravaged several Urarṭian districts. On the way home, and in response to omens, he marched to the religious center Mušašir, and then captured and thoroughly looted it, making its ruler Urzana flee in order to save his life. Details of this campaign were reported to the god Aššur in a formal letter (text no. 65).<sup>112</sup>

In the following year (713), Sargon continued to consolidate his rule in the Zagros region, campaigning in Ellipi, Media, and Karalla, receiving tribute from the rulers of Mannea, Ellipi, and Allabria, as well as forty-five Median city rulers, and annexing the land Ḥabḥu. Although it is not mentioned in any royal inscription, Assyrian forces presumably also attacked Mušašir during this campaign since the Assyrian Eponym Chronicle states "[again]st the city Mušašir" as part of its entry for 713.<sup>113</sup> In the same year, Ambaris, king of Bīt-Purutaš in the land Tabal, an individual who had been granted the great honor of receiving a daughter of Sargon's in marriage, allied with the kings of Urarṭu and Musku, Rusâ and Mitâ, as well as with rulers of other principalities within Tabal, and rebelled. Assyrian troops that were presumably led by local governors defeated him. Ambaris and his family were carried off to Assyria, and the area was resettled and annexed to Assyria. Kurtî, the ruler of Atuna, to whom Sargon had given the city Šinuḥtu during his fourth campaign (719), had apparently joined the rebellion, trusting in the support of Mitâ; however, learning of the defeat of Ambaris, he immediately submitted to Sargon.<sup>114</sup>

According to the Assyrian Eponym Chronicle, in Sargon's tenth regnal year (712) the king remained in the land (i.e., Assyria). Sargon's Khorsabad Annals, however, recount a campaign (presumably not led by the king himself) to the northwest against Tarḥun-azi of the city Melid and the land Kammanu, whom Sargon had made ruler instead of Gunzinānu in the past but who had allied with Mitâ of Musku against Assyria. Melid and the city of Til-Garimme were captured, and Tarḥun-azi and his family were taken prisoner to Assyria. The area was annexed to Assyria and Til-Garimme was resettled with people from other lands. Several cities in the region were strengthened in order to defend against Urarṭian and Muskian actions and the city Melid was given to Mutallu of the land Kummuḥu.<sup>115</sup> Sargon's Annals describe the rich metallic resources found in the region that were brought to his new capital Dūr-Šarrukīn.<sup>116</sup>

In the following year, Sargon's eleventh regnal year (711), Assyrian attention was again drawn to the northwest and west. Tarḥu-lara of the land Gurgum, who had been defeated by Tiglath-pileser III and made an Assyrian vassal, was killed by his own son Mutallu. The Assyrians marched to Gurgum's capital Marqasa and carried off Mutallu and his family as booty. According to the Khorsabad Annals, Gurgum was then annexed to Assyria, but two other inscriptions of Sargon's state that that had happened earlier in his reign.<sup>117</sup> Desirous of no longer having to send tribute to Assyria, Azūri, the ruler of Ashdod, had rebelled against Assyria and sought to win support from other vassal rulers in the area (kings of Philistia, Judah, Edom, and Moab) and from the Egyptian pharaoh. Because of this, Sargon had removed him from the throne and made his brother Aḥī-Mīti the new ruler. The latter, however, was deposed by the inhabitants of the city and replaced by Iāmānī (or Iadna). Assyrian troops moved south, and hearing of this, Iāmānī fled to Egypt for refuge. Ashdod, as well as the nearby cities of Gath and Ashdod-Yam, were captured by the Assyrians, looted, and annexed to Assyria.<sup>118</sup>

The campaigns during Sargon's twelfth and thirteenth regnal years (710–709) were concentrated on the south, to deal with the Chaldean Marduk-apla-iddina (II) (Merodach-baladan) and to recover Babylonia for the

<sup>112</sup> See also text no. 1 lines 127–165a, text no. 2 lines 188–195a, text no. 7 lines 42b–43, 45b–47, 72b–78a (the suicide of Rusâ likely took place later, in 713), text no. 63 iii' 1'–12', text no. 74 iii' 1–41, text no. 82 iv' 1–v' 6, and text no. 103 ii' 39–50.

<sup>113</sup> With regard to the Assyrian conquest of, and control over, Mušašir, in particular after the eighth campaign, see Dubovsky, SAAB 15 (2006) pp. 141–146.

<sup>114</sup> Text no. 1 lines 165b–204a, text no. 2 lines 195b–235, text no. 7 lines 29b–32 and 67b–72a, text no. 63 iii' 13'–14', text no. 74 iii' 42–56 and v' 13–33, text no. 82 v' 7–vii' 12', and text no. 112.

<sup>115</sup> Text no. 1 lines 204b–221, text no. 2 lines 236–259a, text no. 7 lines 78b–83a, text no. 74 v' 41–75, and text no. 82 vii' 1''''–viii' 15'. Mutallu of Kummuḥu must be distinguished from Mutallu son of Tarḥu-lara, who ruled Gurgum (see the eleventh regnal year [711]).

<sup>116</sup> Text no. 1 lines 222–234a, text no. 2 lines 259b–267a, and text no. 82 viii' 16'–17'.

<sup>117</sup> Text no. 8 lines 10b–11a and text no. 74 v' 41–75.

<sup>118</sup> Text no. 1 lines 234b–262a, text no. 2 lines 267b–287a, text no. 3 lines 1'–13' a, text no. 7 lines 83b–109a, text no. 8 lines 11b–14, text no. 82 vii' 13'–48'' and possibly vii' 1'''–6''''', and no. 83 ii' 1'–11'; note also text no. 104. The capture of Ashdod in 711 is likely the one mentioned in Isaiah 20:1, where it is stated that the Assyrian army was led by the field marshal (*tartan*) and not by the king himself. With regard to the eventual return of Iāmānī, see n. 126 below.

Assyrian empire. According to the Assyrian Eponym Chronicle, the campaign in the twelfth regnal year (710) was against Bīt-zēri (location unknown), with the king staying in Kish and then taking the hand of Bēl (Marduk) in the New Year's festival (at Babylon) at the beginning of his thirteenth regnal year (709). According to the Babylonian Chronicle, in the former year, Sargon invaded Babylonia and did battle with Marduk-apla-iddina, causing the latter to flee to Elam, and in the latter year, Sargon took the hand of Bēl and captured Marduk-apla-iddina's tribal capital Dūr-Yakīn. The Khorsabad Annals provide much additional information on the conquest of Babylonia. They inform us that in 710 Sargon began his campaign by first dealing with the Arameans living east of the Tigris. Marduk-apla-iddina had strengthened Dūr-Abi-ḥāra in the area of the Gambulu tribe against the Assyrian forces, but Sargon took that fortress, defeated several other Aramean tribes in the area, and annexed the region. Beginning the campaign in this area had the advantage of cutting off Babylonia's easiest access to Elam, from whose ruler Marduk-apla-iddina had hoped to receive aid in opposing the Assyrians. When the Elamite king Šutur-Naḥūndi (Šutruk-Naḥḥunte II) refused to send military support, Marduk-apla-iddina fled from Babylon, going first to Iqbi-Bēl and then to Dūr-Yakīn, his tribal stronghold in the southern marshes. As a result, Sargon was supposedly welcomed into Babylon and Borsippa. He ascended the throne of Babylon, taking the role of the king of Babylon in the New Year's festival at the beginning of the following year (709). Thus, 709 was his first regnal year as king of Babylonia and his thirteenth as king of Assyria. He then proceeded to besiege Marduk-apla-iddina in Dūr-Yakīn. Although Sargon took the city, Marduk-apla-iddina managed to flee and take refuge in Elam.<sup>119</sup> Hearing of Sargon's military successes, Upēri and later Aḥundāra, kings of Dilmun in the Persian Gulf, sent him gifts in order to win his favor.<sup>120</sup> It was likely at some point after he ascended the throne of Babylon that Sargon granted special privileges to numerous Babylonian cities, likely in an attempt to win their support.<sup>121</sup>

Sargon remained in Babylonia until his fifteenth regnal year (707), when he returned to Assyria. According to Sargon's annals, while he was occupied in Babylonia, the governor of the land Que invaded the territory of Mitā of Musku three times, capturing and demolishing two fortresses. As a result of these actions, and learning of Sargon's military successes in Babylonia, Mitā sent gifts to Sargon and offered submission to him.<sup>122</sup> At about the same time, the ruler of Tyre, Silṭa, appears to have requested aid from Sargon to put down a rebellion in Yadnana (Cyprus). An Assyrian official with a military contingent (perhaps just a military escort) was provided to him and as a result the rebels became afraid and brought presents to Sargon in Babylon. It was undoubtedly in connection with this episode that the stele of Sargon found on Cyprus (text no. 103) was sent or created there.<sup>123</sup>

<sup>119</sup> Text no. 1 lines 262b–390 (year 12) and 404–416 (year 13), text no. 2 lines 287b–371 (year 12) and 372–426a (year 13), text no. 3 lines 13' b–60' (year 12), text no. 5 lines 2'–3' (year 12), text no. 6 lines 1'–14' (year 13), text no. 7 lines 121b–144a (years 12–13), text no. 8 lines 18b–20a, text no. 9 lines 30b–34a, text no. 13 lines 45b–54a, text no. 64 lines 1'–12', text no. 74 vi 14–85 and vii 7–19 (years 12–13 [also down to 707?]), text no. 83 ii' 12–iii' 13 (years 12–13), text no. 86 lines 2'–18' (year 13), text no. 87 lines 3'–16' (year 13), text no. 91 (year 12 and possibly year 13), text no. 103 iv 1–22 (year 13), text no. 111 lines 1'–9' (year 13), text no. 113 lines 6'–27' (years 12–13), and text no. 114 lines 1'–14' (year 13). While some texts state that Marduk-apla-iddina was captured (text no. 7 lines 133–134a and text no. 74 vi 45–46; note also text no. 8 lines 18b–19a, text no. 9 lines 31b–32a, and text no. 13 lines 48b–49a, where the verb *kašādu* can mean both “conquer/defeat” and “capture”), the Khorsabad Annals of Room V (text no. 2 lines 402b–403) and the Babylonian chronicle say that he fled. The Annals version from an unknown room of the Khorsabad palace records that he submitted to Sargon's messenger and apparently gave tribute (text no. 6 lines 11' b–14'); this may indicate that this text was composed before the truth was known, and thus before text no. 2. These differing accounts were noted already back in 1916 by A.T.E. Olmstead (Historiography p. 57); see most recently Fuchs, Khorsabad p. 351 n. 479. Marduk-apla-iddina will reappear in opposition to Assyria in the reign of Sennacherib.

<sup>120</sup> Text no. 1 lines 442b–444a, text no. 2 lines 426b–427, text no. 7 lines 144b–145a, text no. 8 lines 20b–21, text no. 9 lines 34b–35, text no. 13 lines 54b–59a, text no. 64 line 13', text no. 74 vii 20–24a (Aḥundāra), text no. 87 line 17', text no. 103 iv 23–27, and text no. 116 line 27 (Aḥundāra). Upēri may have brought his gifts in 710 (Sargon's twelfth regnal year) rather than 709 (Fuchs, Khorsabad p. 410) and Aḥundāra (presumably Upēri's successor as king) in or by 706 (Sargon's sixteenth regnal year), when text no. 74 was likely composed.

<sup>121</sup> The granting of the privileges (e.g., *šubarrû* and *andurāru*) is mentioned in numerous texts of Sargon, often soon after the mention of his titles and epithets and in association with the mention of privileges also being granted to Aššur, Ḥarrān, and at times Dēr, or as part of descriptions of the defeat of Marduk-apla-iddina and conquest of Babylonia (e.g., text no. 7 lines 5b–12a and 136b–137a, and text no. 43 lines 4–6). With regard to the granting of *andurāru* by Neo-Assyrian kings, including Sargon, see Villard, RA 101 (2007) pp. 107–124.

<sup>122</sup> Text no. 1 lines 444b–456a, text no. 2 lines 428–436a, and text no. 7 lines 149b–153a. The governor's actions and subsequent submission of Mitā may have taken place in or around 710–709 and 708 respectively.

<sup>123</sup> Text no. 1 lines 456b–467a, text no. 2 lines 436b–441a, text no. 7 lines 145b–149a, text no. 64 lines 14'–17', text no. 74 vii 24b–44, text no. 87 lines 18'–21', and text no. 103 iv 28–57. The gifts likely reached Sargon in Babylon in 708, although it is not impossible this happened in 709 or early in 707 before he returned to Assyria. Josephus (Jewish Antiquities 9.283–287) describes a five-year siege of Tyre during the reign of the Assyrian king who besieged and captured Samaria. The name of the king credited with these actions is written several ways in Josephus' Greek account (one way being Salmanassēs), but it is normally understood to refer to Shalmaneser (V). J. Elayi argues that the siege took place during the reign of Sargon, probably beginning in 709 and ending in 705, and that it was supervised by one of Sargon's officials (Sargon II pp. 67–72, 237–238, and 243). I am aware of no real evidence of such a siege in the cuneiform sources for either the reign of Shalmaneser V or that of Sargon II, although the Khorsabad Cylinder inscription does state somewhat ambiguously that Sargon

While Sargon remained in Babylonia, Mutallu of the city Kummuhu, to whom Sargon had given the city Melid in his tenth regnal year (712), rebelled, putting his trust in the Urartian king Argišti (II), who had ascended the throne following the suicide of his father Rusâ, an event which likely took place in 713. However, when he heard of the advance of an Assyrian army led by Assyrian officials in 708, Mutallu fled. His city was looted and his family taken prisoner to Assyria. Sargon annexed the area and resettled there some of the people whom he had captured in Bīt-Yakin.<sup>124</sup>

Sargon returned to Assyria from Babylon in his fifteenth regnal year (707) and in that year Dūr-Yakin was looted by Sargon's officials and destroyed according to the Assyrian Eponym Chronicle. A Babylonian chronicle informs us that there was plague in Assyria in that year and that the gods of the Sealand returned to their shrines. It was likely in that same year or the preceding one that Daltâ, the king of Ellipi whom Sargon had confirmed as ruler of that land in 713, died. Two of his nephews fought over the kingship, with one, Nibê, seeking aid from the Elamite king, and the other, Ašpa-bara, turning to Sargon. Assyrian officials led an army to help Ašpa-bara and captured Nibê, ending the dispute.<sup>125</sup> About the same time, Šapataku' (Shebitko), the Nubian ruler (king of Meluhḥa) of Egypt's Twenty-Fifth Dynasty, extradited Iāmānī to Assyria; Iāmānī had briefly seized the throne of Ashdod and then fled to Egypt, away from Assyrian troops, in 711.<sup>126</sup>

In his sixteenth regnal year (706), Sargon again did not lead any campaign, staying in Assyria, where the inauguration of his new capital Dūr-Šarrukīn took place. Officials of his, however, campaigned against Karalla in the central Zagros and subdued it. This was the third time that the Assyrians had had to campaign in that region, the earlier campaigns being in Sargon's sixth and ninth regnal years (716 and 713). The campaign is briefly mentioned in the Assyrian Eponym Chronicle, but an Assyrian rock relief and inscription in the central Zagros at Tang-i Var commemorate the campaign (text no. 116).<sup>127</sup>

Sargon campaigned for a last time in his seventeenth regnal year (705). A Babylonian chronicle appears to state that he marched to the land Tabal. The Assyrian Eponym Chronicle informs us that he fought Gurdī, the Kulumian,<sup>128</sup> and was killed, but no details about the battle are given beyond the statement that the enemy seized the Assyrian camp. A later text informs us that Sargon's body was not recovered (see below).<sup>129</sup>

## Building Activities

Just like other rulers of Mesopotamia, Sargon II carried out numerous building projects throughout his realm, in particular in Assyria and Babylonia, and especially at his new capital city Dūr-Šarrukīn.<sup>130</sup>

### Khorsabad (Dūr-Šarrukīn)

The founding and construction of Dūr-Šarrukīn ("Wall of Sargon" or "Fortress of Sargon") to be the new royal center of Assyria is the most important building activity carried out during the reign of Sargon and is recorded in a large number of his royal inscriptions. Most of these texts come from Khorsabad (see in particular text nos. 2, 7–9, 11–14, 41, 43–48, and 51–56), but a number come from other cities, in particular from Nineveh (see text nos. 84–85) and Arslantepe (ancient Melid; text no. 111). Moreover, bricks stating that they were from the palace of Sargon or mentioning the building of the city Dūr-Šarrukīn and its palace have been found at

---

"pacified" (*ušapšihu*) Tyre (text no. 43 line 21). While there are few contemporary sources for events during the reign of Shalmaneser V, there are a large number for the reign of Sargon and thus the lack of any mention of a siege of Tyre in them is worthy of note, even though the scribes of Sargon's official inscriptions might not have wished to mention an episode (siege) that had not been completed or that had failed in its objective. It must also be noted that Josephus was writing his account over seven hundred years after the time of Sargon and thus his version of events may not always be accurate. He does, however, state that he used information from Tyrian archives (via Menander) for his description of this episode.

<sup>124</sup> Text no. 1 lines 467b–468, text no. 2 lines 441b–454, text no. 7 lines 112b–117a, text no. 74 iv 1–12 and text no. 84 lines 21'–27'; note also the Assyrian Eponym Chronicle entry for 708. Text no. 74 vii 45–76 describes the poor state of the road to Babylon and likely refers to the time in or around 708.

<sup>125</sup> Text no. 2 lines 455–467a and text no. 7 lines 117b–121a.

<sup>126</sup> The extradition of Iāmānī by the Nubian ruler Shebitko is mentioned as already having happened in an inscription composed in the following year (text no. 116 lines 19–21; note also text no. 113 lines 1'–5'). For the return of Iāmānī, see also text no. 7 lines 109b–112a, text no. 8 lines 11b–14, and text no. 83 ii' 1–11. Note A. Fuchs' discussion of this episode in SAAS 8 pp. 124–131.

<sup>127</sup> See in particular lines 37–44.

<sup>128</sup> As noted by previous scholars, "Gurdī, the Kulumian," may be the same person as Kurtī of Atuna, who is mentioned in accounts of events in Sargon's fourth and eleventh regnal years.

<sup>129</sup> Livingstone, SAA 3 no. 33, especially lines 8'–9' and 19'–20'.

<sup>130</sup> With regard to Sargon's building activities, see also Fuchs, RLA 12/1–2 (2009) p. 59 and PNA 3/2 p. 1244. The Assyrian Eponym Chronicle appears to state that a deity entered his/her new temple in 713. That temple may or may not be mentioned in this section. Note also the possible restoration of the entries for 720 and 719 in that chronicle (see below).

numerous locations outside of the city itself: Nimrud, Nineveh, Karamles, Tag, Tepe Gawra and possibly Djigan (see text nos. 50 and 53).

Sargon states that he founded the new city in order to make the land of Assyria prosper and that rather than expropriate land for the city he purchased it from its previous owners, paying them either in silver and bronze according to the original purchase prices for the land or with equivalent land elsewhere.<sup>131</sup> The new city was located about fifteen km upstream from Nineveh, at the site of a town called Maganuba and “at the foot of Mount Mušri.” Archaeological work has shown that the new city was approximately square in shape (1800×1700m) and covered an area of about 300 hectares. The Assyrian Eponym Chronicle (see below) states that the city was founded in 717 and Assyrian inscriptions tell us that individuals captured during Sargon’s various campaigns were used as laborers on the massive building project.<sup>132</sup> According to the Assyrian Eponym Chronicle, various gods entered their temples in the city on the twenty-second day of Tašritu (VII) in 707 and the city was inaugurated on the sixth day of Ayyāru (II) in 706.<sup>133</sup> Thus, the construction of the city had taken about ten years and been concluded only about a year before the king’s death. To celebrate the completion of the city and palace, Aššur and the other deities of Assyria (presumably their statues) were invited to the city, where the king made sumptuous offerings to them.<sup>134</sup> After the deities returned to their own cities, the king took up residence in his palace and held a great festival, one to which numerous foreign rulers, officials, nobles, and important Assyrians were invited. These ‘guests’ presented to the king substantial tribute, including among other things precious metals, garments, aromatics, ivory, ebony, horses, and oxen.<sup>135</sup> Among the people settled in the new city were the foreign captives who had been employed in building it, along with their Assyrian overseers and commanders.<sup>136</sup>

In preparation for commencing work on the city, bricks were made at an auspicious time, in the month Šitaš/Simānu (III), and the foundations of the city were laid in the month Abu (V).<sup>137</sup> The texts record in particular work on the city wall, with its gates, and the palace, with its chapels to the deities Ea, Šin, Ningal, Adad, Šamaš, and Ninurta. The city wall is said to be 16,280 cubits long and to comprise two separate walls, an outer wall with a name honoring the state god Aššur (“The God Aššur Is the One Who Prolongs the Reign of Its Royal Builder (and) Protects His Troops [var.: Offspring]”) and an inner wall with one honoring the warrior god Ninurta (“The God Ninurta Is the One Who Establishes the Foundation of His City [var.: the Wall] for (All) Days to Come”). Three texts state that there were eight gates in the city wall: two gates in each of the four sides of the city and each gate having a name honoring one of the gods. The published plan of the city (see Figure 3) has only one gate in its north(west) side. However, J.E. Reade has noted that at the point where the royal palace platform projects from the citadel, the line of the city wall was clearly eroded and the published ground plans are partly hypothetical. He thus suggests that there may have been a postern gate below the ziggurat on the palace platform, just as there was one below the South-West Palace of Sennacherib at Nineveh. Since the gates

<sup>131</sup> Text no. 43 lines 34–52; see also text no. 8 lines 29b–31a. Note also Sargon’s renewal of a land grant originally made by Adad-nārārī III to three individuals in order to ensure offerings to the god Aššur (Kataja and Whiting, SAA 12 no. 19). Sargon gave the original grantees of the land (or their sons) “field for field” in another location so that they could continue to provide the offerings while he could take the land originally granted to them for the construction of Dūr-Šarrukīn. The text was composed at Nineveh in Sargon’s ninth year (713). While Sargon states that he built the new city in order to make Assyria prosper, K. Radner argues that his “decision to move the court and the central administration to a new centre was in part motivated by the lack of acceptance and the active and fierce resistance his rule had met with in the Assyrian heartland” (HSAO 14 p. 325). Radner may well be correct in this matter; however, it is not really clear who actually did oppose Sargon and how they had done so, even though it seems probable that some or all of 6,300 Assyrian “criminals” deported to Hamath early in his reign had opposed his accession. For the movement of the capital from Kalḫu to Dūr-Šarrukīn, see Radner, HSAO 14 pp. 325–327.

<sup>132</sup> For references in the texts to the initial work, including the making of bricks, the laying of foundation deposits, and the use of deportees, see in particular text nos. 2 lines 467b–469a and 473b–474a, 7 lines 153b–155a and 159b–160a, 8 lines 27b–28a and 31b–34a, 9 lines 49b–57a, 12 lines 23b–29, 13 lines 90–97a, 14 lines 28b–33a, 43 lines 57–61, 45 lines 40–44a, 46 lines 32b–36, and 47 lines 18–21. Samaritans were among the people employed in the construction of the new city; see Cogan, *Bound for Exile* pp. 45–49 nos. 2.03–5. For information from contemporary letters on the actual building of the city, see S. Parpola in Caubet, *Khorsabad* pp. 47–77.

<sup>133</sup> The word used for “inaugurated” is SAR-ru, an Assyrian stative form from the verb šurrû, “to begin; to inaugurate a building, to kindle a censor; to start, originate (said of eclipses and other natural phenomenon), to erupt, grow” (CAD Š/3 p. 358), and “to begin, start; inaugurate” (CDA p. 388).

<sup>134</sup> One exemplar of text no. 9 informs us that these gods were invited to come to Dūr-Šarrukīn for a celebration (*tašiltu*) in the month Tašritu (VII), i.e., in 707; see the on-page note to text no. 9 line 98. This celebration is distinct from the festival (*nigūtu*) in Ayyāru (II) of 706 to which numerous foreign rulers and important Assyrians were invited.

<sup>135</sup> See in particular text nos. 2 lines 483b–494, 7 lines 167–186a, 8 lines 54–69a, 9 lines 97b–100, 12 lines 34–45, 13 lines 123b–130, and 15 lines 1’–5’. Mention of this festival in a text indicates that that text was composed no earlier than 706, unless we assume that they were recording an event that was planned, but that had not yet taken place.

<sup>136</sup> See in particular text nos. 8 lines 49b–53, 9 lines 92b–97a, 41 lines 25b–26a, 43 lines 72–74, 44 lines 49b–54, 75 lines 10’–14’, and 84 line 11’.

<sup>137</sup> See for example text nos. 8 lines 31b–34a, and 9 lines 49b–57a, and 43 lines 57–61.

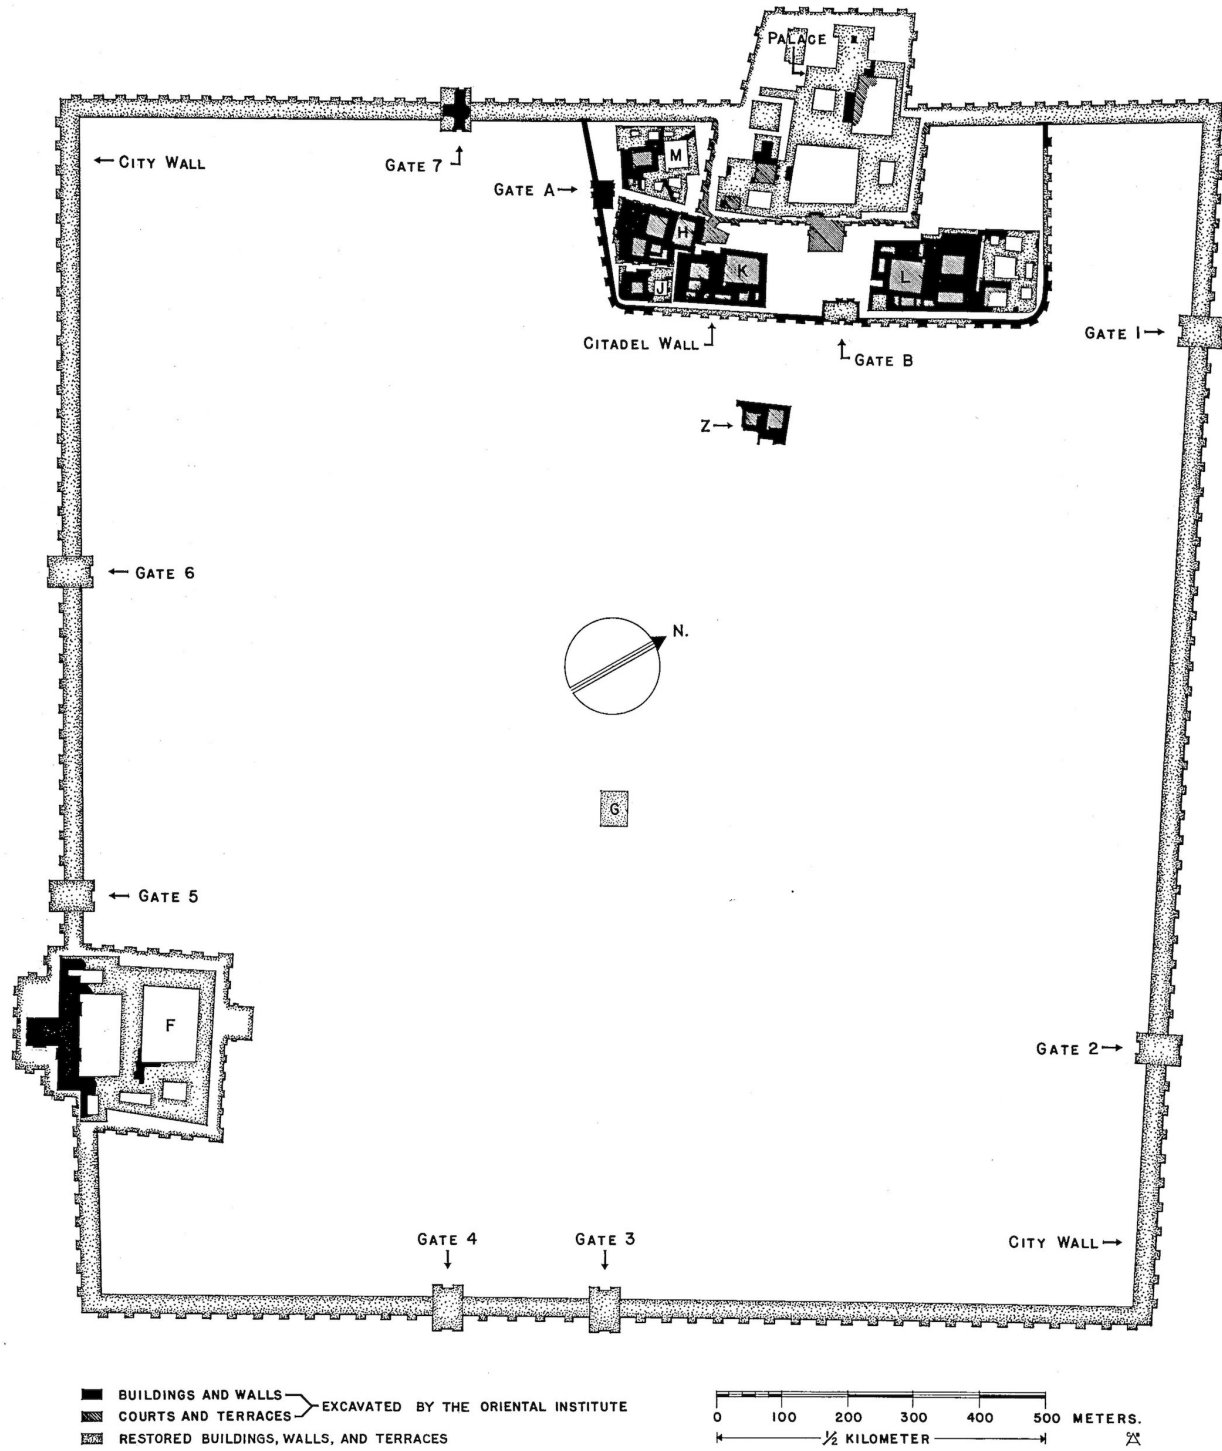

Figure 3. Plan of the city of Khorsabad. Reprinted from Loud and Altman, *Khorsabad 2* pl. 69 courtesy of the Oriental Institute of the University of Chicago.

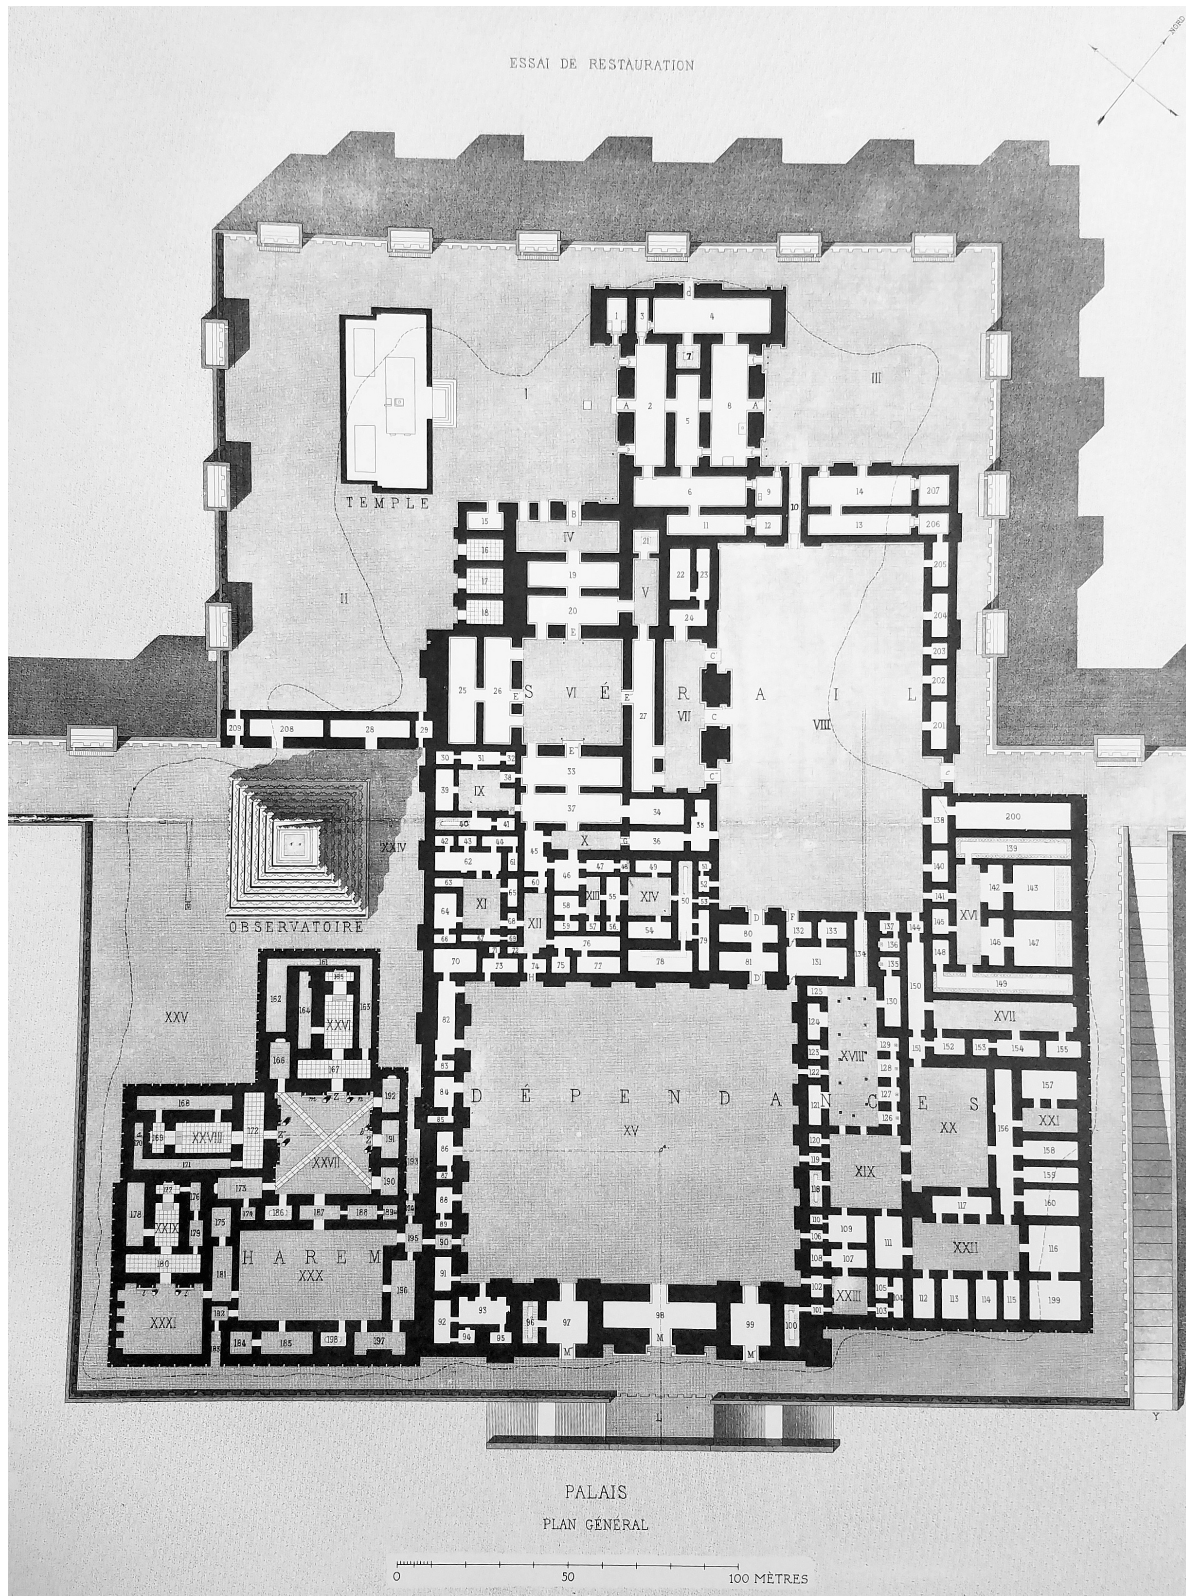

Figure 4. Plan of the palace at Khorsabad, as restored by V. Place. Reprinted from Loud and Altman, *Khorsabad* 2 pl. 76 courtesy of the Oriental Institute of the University of Chicago.

are listed in a counterclockwise order (east > north > west > south), the presumed postern gate would have been the one called “The God Enlil is the One Who Establishes the Foundation of My City.”<sup>138</sup>

The palace complex (see Figure 4) and the adjoining temple of Nabû were located on raised platforms connected by a bridge within the city’s ‘citadel’ located against the northwestern city wall; the palace partially protruded beyond the regular plan of the city wall. The palace complex consisted of over two hundred rooms and courtyards, as well as a ziggurat. The palace was given the name *égalgabarinutukua*, “Palace That Has No Equal,” and all types of luxurious materials were used in its construction. In one part of the palace was a *bīt hilāni* structure in imitation of a Hittite palace.<sup>139</sup> Pavement inscriptions have been found identifying the chapels of Ninšiku (Ea), Sîn, Ningal, Adad, Šamaš, and Ninurta within the palace complex (text nos. 16–21),<sup>140</sup> as well as the temple of Nabû (text no. 22).

Although the temple of Nabû was the largest religious structure at the city, no inscriptions appear to record its construction apart from a brief mention on inscribed stone slabs used as thresholds or on or near steps in the temple itself (text no. 22). The Khorsabad Cylinder inscription (text no. 43 line 43) states that Sargon ordered that a *simakku*-shrine of Šamaš be constructed in the city, but nothing further is known about it. Brick inscriptions (text nos. 54–55) record the construction of the temple of Sîn and Šamaš in the city, but it is not clear if this refers to the chapels of these gods within the palace complex, the *simakku*-shrine, or some other independent temple (or temples).<sup>141</sup> Archaeologists discovered a temple in the lower city in which there were numerous stone altars. The inscription on the altars only refers to them being set up for the Sebetti by Sargon, and not to the construction of the temple itself (text no. 49). No inscription refers to the ziggurat constructed behind the palace chapels on the palace terrace.

Within the citadel were located at least four large residences (J, K, L, and M), the largest of which being the residence of the king’s brother and grand vizier Sîn-aḥu-ušur. Three pavement slabs from Sîn-aḥu-ušur’s residence (L) state that he had constructed the building (text no. 2002). In the lower city, adjacent to the southern city wall was located the city’s *ekal māšarti* (Palace F), but no royal inscription mentions its construction,<sup>142</sup> although several inscriptions of Sargon were found there.<sup>143</sup> Around the city Sargon had a botanical garden (or great park, *kirimaḥḥu*) created, one that was to be a replica of Mount Amanus and to have every kind of aromatic plant and fruit-bearing mountain tree.<sup>144</sup>

### Aššur

At the city of Aššur, work was carried out on Eḫursaggalkurkurra, the main cella within the temple of the god Aššur, in particular on the processional way in the temple courtyard (text nos. 69–70) and on a glazed brick frieze from the temple (text no. 71), but also on the towers (text no. 67). A cylinder inscription from Nineveh refers to “shining *zaḥalû*-silver for the work on Eḫursaggalkurkurra (“House, the Great Mountain of the Lands”), the sanctuary of the god Aššur [...] ... the goddesses Queen-of-Nineveh and Lady-of-Arbela.”<sup>145</sup> In addition, one letter from the governor of the city (Parpola, SAA 1 no. 77 [=Harper, ABL no. 91]) describes work

<sup>138</sup> See Reade, SAAB 25 (2019) pp. 85–86. For the building of the city walls and its gates, see in particular text nos. 8 lines 40b–49a, 9 lines 79b–92a, 43 lines 65–71, and 44 lines 47–49a. Note also Battini, CRRA 43 pp. 41–55 and RA 94 (2000) pp. 33–56. With regard to the building of the city wall, note Cogan, IEJ 56 (2006) pp. 84–95. For the connection of the length of the city wall and the king’s name, see the earlier section on the name of the king.

<sup>139</sup> For the building and decoration of the palace, including its gates, see in particular text nos. 2 lines 472b–483a, 7 lines 158b–166, 8 lines 35–40a, 9 lines 60b–79a, 11 lines 21b–46, 12 lines 30–33, 13 lines 97b–123a, 14 lines 33b–47, 41 lines 18b–25a, 43 lines 63–64, 44 lines 33–45, 45 lines 19–39, 46 lines 22–32a, 47 lines 14–17, 48 lines 6’b–7’, 74 viii 1’–6’’, 75 lines 6’–9’, 84 line 10’, 85 line 6’, and 111 line 13. With regard to the *bīt hilāni*, see most recently Reade, Iraq 70 (2008) pp. 13–40; Erarslan, Akkadica 135 (2014) pp. 173–195; and Kertai, Iraq 79 (2017) pp. 85–104, especially pp. 97–101; see also the note to text no. 2 line 476. For the use of the term *É.GAL.MEŠ*, literally “palaces” but translated here as “palatial halls,” for the palace complex, see the note to text no. 2 line 472.

<sup>140</sup> For the construction of the temples, in particular the palace chapels, and the entry of the deities into them, see in particular text nos. 2 lines 469b–472a, 7 lines 155b–158a, 8 line 34b, 9 lines 57b–60a, 41 lines 17–18a, 43 line 62, 44 lines 28b–30, 45 lines 12b–18, 46 lines 14–21, 47 lines 11b–13, 48 lines 1’b–6’a, 75 lines 1’–5’, 84 line 9’, 85 line 5’, and 111 line 12. The deities are sometimes stated to have been born within Eḫursaggalkurkurra, the cella of the god Aššur within that god’s temple Ešarra at the city Aššur; see text nos. 2 lines 469b–470a, 7 lines 155b–156a, and 111 line 12a (totally restored).

<sup>141</sup> Bricks with these inscriptions have been found at Kalḫu and Nineveh, as well as Khorsabad. One of those from Khorsabad was found in the throne room of the palace.

<sup>142</sup> With regard to this structure, see in particular Loud and Altman, Khorsabad 2 and note also Matthiae in *Studies Donbaz* pp. 197–203.

<sup>143</sup> See text no. 10 ex. 4, text no. 11 commentary, text no. 43 exs. 13–21, 28, and 31–32, and text no. 57 Frgms. L and M.

<sup>144</sup> See in particular text nos. 8 lines 28b–29a, 9 lines 41b–42, and 74 viii 7’–9’.

<sup>145</sup> Text no. 84 line 3’–4’; cf. text no. 74 i 25–27.

on the palace of the inner city. Work may also have been carried out on the temple of the gods *Sîn* and *Šamaš*.<sup>146</sup>

### *Kalḫu*

Sargon had the Juniper Palace at *Kalḫu* (modern Nimrud), which had previously been built by Ashurnasirpal (II), completely renovated, from its foundations to its crenellations. Upon its completion, he invited *Nergal*, *Adad*, and the other gods dwelling in the city, to come inside and he then held a festival. Silver and gold that had been taken as booty from *Pisiris*, king of *Carchemish*, were stored there (text no. 73). Very little of the end of the *Nimrud Prism* inscription (text no. 74) is preserved and what little there is refers to work at *Dūr-Šarrukīn*, but it is not impossible that some work at *Kalḫu* had also been mentioned.

### *Nineveh*

Two bricks from the temple of *Nabû* at *Nineveh* record that Sargon completely (re)built that temple (text no. 96 and cf. text nos. 93 and 97), while several other bricks, pavement slabs, and cones found at *Nineveh* state that the king had completely (re)built the temple of the gods *Nabû* and *Marduk* (text nos. 92 and 95). The inscription on the cones states that *Adad-nārārī III* (810–783) had previously restored the temple.<sup>147</sup> Inscribed copper coverings for doorjambs in the temple of *Nabû* have also been recovered (text no. 99).<sup>148</sup> Although the passage is damaged, the *Nineveh Prism* likely indicates that Sargon had carried out work on a ziggurat, possibly the one of *Adad* at *Nineveh* (text no. 82 viii 4''b-8'').

One inscribed wall slab of Sargon's is said to have been found at *Nebi Yunus*, the secondary mound (likely the *ekal māšarti*) at *Nineveh* (text no. 81), but it is not impossible that it was actually brought there by one of Sargon's successors or in modern times.<sup>149</sup> In addition, a later inscription of *Ashurbanipal* (*Novotny and Jeffers*, *RINAP 5/1* p. 220 no. 10 v 33–42) states that Sargon had been the builder of the *akītu*-house of the goddess *Ištar* that was inside *Nineveh*.

### *Ḫarrān*

A broken passage in a cylinder inscription from *Nineveh* (text no. 84 line 6') refers to "seven and a half minas of shining silver for the work of *Eḫulḫul* ("House which Gives Joy"), the abode of the god *Sîn* who dwells in the city *Ḫarrān*." This presumably refers to some construction work on the temple or on some item associated with it.

### *Dēr*

According to one letter (*Fuchs and Parpola*, *SAA 15* no. 113 [=CT 54 no. 89+]), work was carried out on the fort and outer city wall at *Dēr*.

### *Tabal*

The *Khorsabad Annals* (text no. 1 lines 202b–204a; cf. text no. 2 lines 234b–235a) may refer to some construction in the land *Tabal*, and in particular the construction of an enclosure wall (*kerḫu*), in connection with the settlement of people there and the appointment of one of Sargon's eunuchs as governor over them. As noted by *Fuchs*,<sup>150</sup> it is possible that this work was never completed.

### *Til-Barsip*

A poorly preserved inscription from *Til-Barsip* (modern *Tell Ahmar*), possibly on part of a bull colossus (text no. 107), appears to refer to a temple of *Adad*, possibly one that *Ashurnasirpal (II)* had originally constructed, but it is not clear in which city that structure was located.

<sup>146</sup> See *Haller*, *Heiligtümer* pp. 89–92.

<sup>147</sup> For an inscription of *Adad-nārārī III* recording work on the temple of *Nabû* at *Nineveh*, see *Grayson*, *RIMA 3* pp. 219–220 A.0.104.14.

<sup>148</sup> Text no. 92 states that *Adad-nārārī III* had carried out his work on the temple seventy-five years earlier and *Reade* suggests that Sargon may have restored it in 713 (*Iraq 67* [2005] p. 380).

<sup>149</sup> See *Frahm*, *AoF 40* (2013) pp. 52–53. Note also *Reade* in *Studies Calmeyer* p. 612. Some bricks with inscriptions of Sargon II were found at *Nebi Yunus* (e.g., text no. 53 ex. 24 and text no. 54 ex. 4).

<sup>150</sup> *RLA 12/1–2* (2009) p. 59 and *PNA 3/2* p. 1244.

*Carchemish*

A brief brick inscription (text no. 110) that refers to the palace of Sargon has been discovered at Carchemish and a nearby site (Tell Amarna), and this could suggest that there was a royal palace there. Three copies of a clay cylinder inscription of the king found at Carchemish (text no. 109) mention building activities carried out there by Sargon and the expansion of irrigation in the area of the city.

*Melid*

Although four texts on clay cylinders come from Melid (modern Arslantepe, near Malatya), they are all in fragmentary condition (text nos. 111–114). Only one (text no. 111) preserves part of the end of its inscription and no reference to any building work can be detected. The curse at the end of the text invokes the god Marduk, which might suggest that any structure or object whose construction or dedication was mentioned at the end of the inscription would have been associated with that deity.

*Ḫarḫar and Iran*

The Najafabad Stele states that following the king's conquest of the Iranian city of Ḫarḫar during his sixth regnal year (716), he renamed it Kār-Šarrukīn. In addition, as well as rebuilding a temple, he constructed something else there.<sup>151</sup> It is not known what that other structure was, although a later letter to the king from that city (Fuchs and Parpola, SAA 15 no. 94 [=Harper, ABL no. 126]) refers to the building of a "grand hall" (É dan-nu) with glazed bricks. Sargon's Khorsabad Annals also state that during the campaign of the following year (715) he rebuilt the cities Kišešlu, Kindayu, Anzaria, and Bīt-Gabaya and renamed them Kār-Nabû, Kār-Sîn, Kār-Adad, and Kār-Ištar (text no. 1 lines 113b–114a).

*Babylonia*

Following his defeat of Marduk-apla-iddina II (Merodach-Baladan) in 710–709, Sargon had work carried out at Babylon, Uruk, and likely Kish and Tell Haddad. Most of the texts mentioning this work are written in the Akkadian language, but three were composed in Sumerian (text nos. 124 and 127–128).

Bricks with inscriptions recording Sargon's restoration of Babylon's city walls, Imgur-Enlil and Nēmet-Enlil, for the god Marduk have been found at both Babylon and Kish (text nos. 123–124). Presumably the bricks found at Kish had been used for some work at the same time at that city or been taken there for reuse later. One of the inscriptions (text no. 123) also mentions that work had been carried out with baked bricks along the bank of the Euphrates River (presumably inside Babylon). Of the two texts, one is written in Akkadian and one in Sumerian. According to Sargon's annals from Khorsabad, the king had a new canal dug from Borsippa to Babylon for the procession of the god Nabû.<sup>152</sup>

One clay cylinder and several brick inscriptions testify to work carried out at the city of Uruk in southern Babylonia. The one cylinder records the restoration of Eanna, and in particular its outer enclosure wall in the lower courtyard (text no. 125), for the goddess Ištar. Numerous bricks found at Uruk record work on various parts of the Eanna temple, including the outer enclosure wall, the courtyard, the narrow gate, the regular gate, and the processional way (text nos. 126–128).

A clay cylinder of Sargon's was found at Tell Haddad in the Hamrin region (text no. 129). Although none of the building section of the text is preserved, it may have been intended to record work at that city, and in view of the fact that it was found not far from the temple of Nergal (Ešaḫula) at that site, it may well have mentioned work on that temple. A fragmentary axe head of one of Sargon's eunuchs was also found at Tell Haddad and the text on it recorded the dedication of the object to the god who dwelled in Ešaḫul(a) located inside the city Mēturna (Mê-Turnat) (text no. 2008). A clay cylinder (text no. 2009) from Tell Baradān, a neighboring site, appears to refer to the governor of Arrapha Nabû-bēlu-ka" in doing something because Sargon wanted to rebuild the wall of Sirara (a literary term for Mê-Turnat). The cylinder was likely created to commemorate the governor's work on that wall.

<sup>151</sup> Text no. 117 ii 41b–45a; see also text no. 1 lines 114–115.

<sup>152</sup> Text no. 1 lines 377b–379a and text no. 2 lines 359b–360.

## Death

Assuming that Sargon had been born by 765 (see above), he would have been at least sixty years old at the time of his death in 705. In that year he led his troops to the land of Tabal to deal with Gurdî, the Kulummanian (presumably the ruler of the city Til-Garimme).<sup>153</sup> Although damaged, the Assyrian Eponym Chronicle states that “the king was killed; the camp of the king of Assyria [was] sei[zed ...]; Sennacherib [ascended the throne] on the 12th day of the month Abu (V).” Thus, Sargon was likely killed early in 705 while on campaign against Tabal. The later “Sin of Sargon” text states: “the death of Sargon, [my father, who was killed in enemy country and] not buried in his house” and “[... Sargon, my father], was killed [in enemy country] and not b[uried] in his house” (Livingstone, SAA 3 no. 33 lines 8’–9’ and 19’–20’). It appears that his body had not been recovered after the battle and could not be brought back to Assyria for burial. This was a great disaster since a proper burial was essential for an individual to have a good afterlife and, as an angry ghost, Sargon might haunt his living descendants until they provided him with one. It was likely because of this disaster and in an attempt to distance himself from it that Sennacherib abandoned Sargon’s capital of Dūr-Šarrukīn<sup>154</sup> and created a new one at Nineveh. It is not known if Sennacherib ever tried to discover the reason the gods allowed this tragedy to occur, but it is likely that Sargon’s grandson Esarhaddon did and that it was under his reign that the “Sin of Sargon” text was composed. Although damaged, this text appears to be trying to determine if Sargon had met his sad fate because he had not treated the gods of Babylonia as well as those of Assyria and had not kept a treaty sworn by the “king of the gods.”<sup>155</sup>

## Dating and Chronology

Texts edited in this volume occasionally mention contemporary dates and the charts in this section are intended to aid the reader in understanding those dates.

The month names in Neo-Assyrian inscriptions and their modern equivalents are:

I	Nisannu	March–April	VII	Tašrītu	September–October
II	Ayyāru	April–May	VIII	Araḥsamna	October–November
III	Simānu	May–June	IX	Kislīmu	November–December
IV	Du’ūzu	June–July	X	Ṭebētu, Kinūnu	December–January
V	Abu	July–August	XI	Šabātu	January–February
VI	Ulūlu	August–September	XII	Addaru	February–March
VI <sub>2</sub>	Intercalary Ulūlu		XII <sub>2</sub>	Intercalary Addaru	

Unless stated otherwise, the dates given in this volume (excluding those in bibliographical citations) are all BC. Each ancient Mesopotamian year has been given a single Julian year equivalent even though the ancient year actually encompassed parts of two Julian years, with the ancient year beginning around the time of the vernal equinox. For example, Sargon ascended the throne of Assyria on the twelfth day of Ṭebētu of his accession year, which is indicated to be 722, although that event may have taken place in January 721. Thus, events that occurred late in the ancient year “722” actually happened early in the Julian year 721.

### King Lists

Unfortunately, no list of Assyrian kings preserves a mention of Sargon II. The Assyrian King List ends with Sargon’s predecessor Shalmaneser V, and both the Synchronistic King List and Assyrian King List fragment KAV no. 182 have lacunae immediately before their mention of Sennacherib. Sargon II is listed as a ruler of Babylonia in Babylonian King List A and the Ptolemaic Canon immediately following Marduk-apla-iddina II (Merodach-baladan), who seized control of Babylonia from Assyria upon the death of Shalmaneser V and ruled

<sup>153</sup> See below for translations of the Assyrian Eponym Chronicle and the Babylonian chronicle (recension B) for 705.

<sup>154</sup> There is in fact evidence that Dūr-Šarrukīn was not totally abandoned following the death of Sargon; see Brinkman, *Prelude* p. 54 n. 254 and Dalley, *Kaskal* 11 (2014) pp. 176–179. A prism inscription of Esarhaddon and several economic texts dated to post-canonical eponyms were found during the Oriental Institute excavations at Khorsabad; these will be published by J.A. Brinkman and S. Parpola.

<sup>155</sup> With regard to the death of Sargon, note Frahm, *JCS* 51 (1999) pp. 73–90, in particular pp. 74–76. Part of the motivation in determining if the tragedy had been connected with the Assyrian king’s not having honored Babylonian gods sufficiently may have been in connection with Esarhaddon’s decision to rebuild Babylon and Marduk’s temple Esagila, following their destruction in the time of Sennacherib.

that land until defeated by Sargon in 710. Thus, those two lists only assign him a reign of five years (709–705). For the convenience of the user of this volume, it has been thought useful to present translations of the relevant passages here. In this section, the entries immediately preceding and following those of the king whose inscriptions are edited in this volume are given when they are preserved.

### 1. Babylonian King List A

(CT 36 pls. 24–25; Grayson, RLA 6/1–2 [1980] pp. 90–96 §3.3)

iv 9)	5 (years)	Ulūlāyu (Shalmaneser V), Dynasty of Baltil (Aššur)
iv 10)	12 (years)	Marduk-apla-iddina (II), Dynasty of the Sealand
iv 11)	5 (years)	Sargon (II)
iv 12)	2 (years)	Sennacherib, Ḫabigal (Ḫanigalbat) Dynasty <sup>156</sup>

### 2. Ptolemaic Canon

(Wachsmuth, Alten Geschichte p. 305; Grayson, RLA 6/1–2 [1980] p. 101 §3.8)

Ἰλουλαίου	ε	Iloulaios (Ulūlāyu) (Shalmaneser V)	5 (years)
Μαρδοκεμπάδου	ιβ	Mardokempados (Marduk-apla-iddina II)	12 (years)
Ἀρκεανοῦ	ε	Arkeanos (Sargon II) <sup>157</sup>	5 (years)
ἄβασίλευτα	β	Kingless <sup>158</sup>	2 (years)

### Eponym Dates

In Assyria, each year was named after a high official, called a *limmu* or *līmu*, and lists of these officials (eponyms) were compiled by the Assyrian scribes. The following list of the eponym officials for the reign of Sargon is based upon Millard, SAAS 2, especially pp. 46–48 and 59–60. Dated inscriptions that are included in the present volume are also noted below. A number of inscriptions whose dates may possibly be determined with some degree of confidence (e.g., instances with a clear *terminus post quem* for the inscription) are given in bold. Line rulings are found before the eponym for 722 and after the eponyms for 720, 706, and 705 in one or more exemplars of the eponym lists.<sup>159</sup>

Year	Regnal Year in Assyria	Regnal Year in Babylonia	Eponym	Dated Texts
722	Accession year		Ninurta-ilāya, (governor of Našībīna)	
721	1		Nabû-tāriṣ	

<sup>156</sup> As noted in Grayson and Novotny, RINAP 3/1 p. 23 n. 1, see Brinkman in Studies Oppenheim pp. 35–37 and Frame, RIMB 2 pp. 90–91 for an explanation of BALA *ḫa-bi-gal* (iv 12). M. Valério (Journal of Language Relationship 6 [2011] pp. 173–183) has argued that the Semitic name of Mitanni (Ḫanigalbat) should be read as Ḫani-Rabbat, a West-Semitic (Amorite) name meaning “Great Ḫani.” If this understanding of the name is correct, then one should read BALA *ḫa-bi-gal* as BALA *ḫa-bi-GAL* “Ḫabi-Rabbat dynasty.” As pointed out by G. Frame (RIMB 2 pp. 90–91), it is unclear why some Assyrian kings are given dynastic affiliation (Sennacherib and Aššur-nādin-šumi to the Ḫabigal dynasty, and Shalmaneser V to the Baltil dynasty) while others are not (Tiglath-pileser III, Sargon II, and Esarhaddon), unless we are to assume that only changes in dynasty were mentioned and thus Sargon II was of the same dynasty as his predecessor Shalmaneser V, the Baltil dynasty. It is also curious that King List A describes Marduk-apla-iddina II during his first regnal period (721–710) as being from the Sealand dynasty (KUR *tam-tim*), but as a soldier of Ḫabi (presumably for Ḫabigal) during his second regnal period (703). N. May (BiOr 74 [2017] p. 516) suggests that “[i]t seems possible that King List A considered every collateral Assyrian royal branch that came to the throne as a new dynasty. Thus, the collateral branch of Sargon is in King List A referred to as the ‘Dynasty of Habi-GAL’ and that of Tiglath-pileser as the ‘Dynasty of Assur.’” See also Fales in Studies Lanfranchi p. 205 for the idea that BALA *ḫa-bi-GAL* refers to Sargon as well as Sennacherib. For the suggestion that Baltil and Ḫabigal may allude to the birth places of the respective king’s mother and not his father, see E. Frahm in Sennacherib at the Gates of Jerusalem pp. 180–181. Frahm also raises the possibility that the reference to the dynasty of Ḫabigal for Sennacherib might be that “Sargon, Sennacherib’s father, held a high military office in the west before he became king of Assyria, a position similar to that of the Middle Assyrian ‘King of Ḫanigalbat’” (ibid. p. 181).

<sup>157</sup> Sargon II was sometimes called Sargon *arkū*, “the later Sargon” (see above) and Arkeanos may be a late reflection of *arkū* instead of Sargon’s actual name (see, for example, CAD A/2 p. 286).

<sup>158</sup> Sennacherib is not mentioned by name in the Ptolemaic Canon and the periods when he ruled it directly at the beginning and end of his reign were recorded as being “kingless.”

<sup>159</sup> See Ungnad, RLA 2/5 (1938) pp. 415–416 for texts with double dates, giving the equivalencies between some of the eponym years and regnal years, including some giving the equivalencies between Sargon’s Assyrian regnal years and his Babylonian ones; note also Millard, SAAS 2 pp. 70–71.

Year	Regnal Year in Assyria	Regnal Year in Babylonia	Eponym	Dated Texts
720	2		Aššur-nirka-da''in	<b>89, 106</b> <sup>7</sup>

705	17	5	Nashur-Bēl, governor of Amedi <sup>167</sup>	67

### Chronicles

The Assyrian Eponym Chronicle and two recensions of one Mesopotamian chronicle provide useful information both on events of the reign of Sargon II and on the order of those events. The standard edition of the Assyrian Eponym Chronicle is that of A.R. Millard (Millard, SAAS 2) and the one of Mesopotamian chronicles is that of A.K. Grayson (Grayson, Chronicles), but note also the recent editions by J.-J. Glassner (Glassner, Chronicles) and the on-going online work by I. Finkel and R.J. van der Spek (see <https://www.livius.org/sources/about/mesopotamian-chronicles/> [2020]). For the convenience of the user of this volume, it has been thought useful to present translations of the relevant passages here; these translations are adapted from the aforementioned works.

#### 1. The Eponym Chronicle

(Millard, SAAS 2, in particular pp. 46–48 and 59–60; Glassner, Chronicles pp. 164–177 no. 9, especially pp. 174–175; Weissert, CRRA 38 pp. 273–282, especially pp. 279–280; and Finkel and Reade, *Orientalia* NS 67 [1998] p. 252)

-----  
 [In the eponymy of Ninurta-ilāya ...] [...] (722):<sup>168</sup>

<sup>160</sup> One copy of the eponym list (exemplar A5) has Aššur-mātu-upaḫḫir (<sup>m</sup>aš-šur-KUR-ú<sup>7</sup>-paḫ<sup>7</sup>-ḫir<sup>7</sup>; see Millard, SAAS 2 p. 46) or Aššur-mātka-tēra (<sup>m</sup>aš-šur-KUR-<sup>r</sup>ka<sup>1</sup>-GUR!!-<sup>r</sup>ra<sup>1</sup>; see Finkel and Reade, *Orientalia* NS 67 [1998] p. 252) instead of Zēru-ibni. I. Finkel and J.E. Reade (ibid.) suggest that he may have been field marshal (*turtānu*) and that having died or been removed from office, he was replaced by Zēru-ibni as eponym.

<sup>161</sup> He is at times also given the title governor of the land of the Lullumu; see Millard, SAAS 2 p. 120.

<sup>162</sup> Also, text nos. 63 and 102 if they prove to be duplicates of the Nineveh Prism (text no. 82).

<sup>163</sup> Šamaš-bēlu-ušur was transferred to the governorship of Dēr possibly sometime in 710 or shortly thereafter (see Baker, PNA 3/2 p. 1193 sub Šamaš-bēlu-ušur 4).

<sup>164</sup> Fuchs (Khorsabad p. 387) tentatively assigns this text to Sargon's fifteenth regnal year (707).

<sup>165</sup> Likely also the other versions of the Khorsabad Annals (text nos. 1 and 3–6).

<sup>166</sup> Perhaps also text no. 83 if it proves to be a duplicate of text no. 74.

<sup>167</sup> Or Našir-Bēl; see Streck, PNA 2/2 p. 932. He is at times also given the title governor of the city Sinabu (e.g., text no. 67 line 9; see also Millard, SAAS 2 p. 109).

<sup>168</sup> Possibly “[In the eponymy of Ninurta-ilāya, field marsh]al”; see Finkel and Reade, *Orientalia* NS 67 (1998) p. 252 for a possible reading [...<sup>r</sup>ur]-<sup>r</sup>tan<sup>1</sup>.

[In the eponymy of Nabû-tāriṣ ...] (721):	[...] <sup>169</sup>
[In the eponymy of Aššur-nirka-da' in ...] (720):	[...] ... <sup>170</sup>
[In the eponymy of Sargon ...] (719):	[... ent]ered. <sup>171</sup>
[In the eponymy of Zēru-ibni ...] (718):	[Against the land Ta]bal.
[In the eponymy of Ṭāb-šar-Aššur ...] (717):	[The city Dūr-Šarru]kin was founded.
[In the eponymy of Ṭāb-šil-Ešarra ...] (716):	[Against the ci]ty of the Manneans.
[In the eponymy of Taklāk-ana-bēli ...] (715):	[...] provincial governors were appointed.
[In the eponymy of Ištar-dūri ...] (714):	[Against the land Ur]arṭu, the city Mušašir, (and the god) Ḫaldi.
[In the eponymy Aššur-bāni ...] (713):	[... the no]bles in Ellipi; [ <i>the god/goddess</i> ...] entered (his/her) new [tem]ple; [again]st the city Mušašir. (The king stayed) in the land (Assyria).
[In the eponymy of Šamaš-ēmuranni ...] (712):	
[In the eponymy of Ninurta-ālik-pāni ...] (711):	Against the city Marqasa.
[In the eponymy of Šamaš-bēlu-ušur ...] (710):	Against Bīt-zēri; the king stayed in Kish.
[In the eponymy of Mannu-kī-Aššur-lē'i, governor of the city Till]ê (709):	Sargon (II) took the hands of the god Bēl.
In the eponymy of [Šamaš-u]pa[ḫ]hir, governor of the city Ḫabru]ri (708):	The city Kummuḫu was captured; a provincial governor was appointed. Variant: The nobles ... [(...)] against the city Kummuḫu [(...)].
In the eponymy of Ša-Aššur-dubbu, governor of the city Tušḫan (707):	The king returned fr[om Ba]bylon; the (chief) vizier ( <i>sukkallu</i> ) (and) the nobles carried off the booty of Dūr-Yakīn; the city Dūr-Yakīn was destroyed; on the twenty-second day of Tašrītu (VII) the gods of the city Dūr-Šarrukīn entered their temples.
In the eponymy of Mutakkil-Aššur, governor of the city Guzāna (706):	The king (stayed) in the land (Assyria); the nobles (were) in Karalla; on the sixth day of Ayyāru (II), the city Dūr-Šarrukīn was inaugurated; [...] received.
-----	
In the eponymy of Našur-Bēl, governor of the city Amedi (705):	The ki[ng ... to the land Tabal] against Gurdī, the Kulummian ... [(...)] the king was killed; the camp of the king of Assyria [ <i>was</i> ] sei[zed ...]; Sennacherib [ <i>ascended the throne</i> ] on the twelfth day of the month Abu (V). <sup>172</sup>

## 2. Chronicle Concerning the Period from Nabû-nāšir to Šamaš-šuma-ukīn

(Grayson, *Chronicles* pp. 69–87 no. 1; Glassner, *Chronicles* pp. 193–203 no. 16 and pp. 202–207 no. 17; CT 34 pls. 43–50; note also Brinkman in *Studies Moran* pp. 73–104, especially p. 101 for recension B; and Weissert, *CRRA* 38 pp. 273–282, especially p. 282) <sup>173</sup>

(i) Recension A (BM 92502 [84-2-11,356]) (CT 34 pls. 46–50)

i 29–32) The fifth year (722): Shalmaneser (V) died in the month Ṭebētu (X). Shalmaneser (V) ruled Akkad

<sup>169</sup> H. Tadmor (*JCS* 12 [1958] p. 85) suggests restoring “[To the land Ḫatt]i” ([... ana KUR Ḫat]-<sup>r</sup>ti) for this line (see Millard, *SAAS* 2 p. 46 version B4), but he assumed that both this line and the following one were for 720.

<sup>170</sup> H. Tadmor (*JCS* 12 [1958] p. 85, following Forrer, *MVAG* 20/3 [1915] p. 17) suggests restoring “[The foundations of the temple of the god(dess) DN of the city GN were la]jid” ([uššū ša bīt <sup>d</sup>X ša URU X Y kar]-ru); cf. the entry for 788 (Millard, *SAAS* 2 p. 36).

<sup>171</sup> H. Tadmor (*JCS* 12 [1958] p. 85, following Forrer, *MVAG* 20/3 [1915] p. 17) suggests restoring “[The god(dess) en]tered [(his/her) new temple]” ([<sup>l</sup>Y a-na bīte ešše e]-ta-rab); cf. the entry for 787 (Millard, *SAAS* 2 pp. 36–37).

<sup>172</sup> See Weissert, *CRRA* 38 pp. 279–280 and Frahm, *JCS* 51 (1999) pp. 75 and 83–84.

<sup>173</sup> J.A. Brinkman (*Studies Moran* pp. 73–104) prefers to treat this chronographic text as made up of three separate recensions rather than three duplicates of one text, as was done by A.K. Grayson. J.J. Glassner (*Chronicles* pp. 193–203 no. 16 and pp. 202–207 no. 17) treats this text as having two separate recensions, taking BM 75977 (AH 83-1-18,1339) with recension A. See also Weissert, *CRRA* 38 p. 273 n. 1. BM 75977 does not preserve any part of the relevant section and so it not taken into consideration here.

and Assyria for five years. On the twelfth day of the month ʾṬebētu, Sargon (II) ascended the throne in Assyria. In the month Nisannu (I), Marduk-apla-iddina (II) (Merodach-baladan) ascended the throne in Babylon.

- i 33–37) The second year of Marduk-apla-iddina (II) (720): Ummanigaš (Ḫumban-nikaš I), king of Elam, did battle against Sargon (II), king of Assyria, in the district of Dēr and brought about an Assyrian retreat; he inflicted a major defeat upon them. Marduk-apla-iddina (II) and his army, who had gone to aid the king of Elam, did not arrive (in time for) the battle (and so) he (Marduk-apla-iddina) withdrew.
- i 38–42) The fifth year of Marduk-apla-iddina (II) (717): Ummanigaš, king of Elam, died. [For twenty-six ye]ars Ummanigaš ruled Elam. [Ištar-ḫu]ndu (Šutruk-Naḫḫunte II), his sister's son, ascended the throne in Elam. [From the accession year] of Marduk-apla-iddina (II) until the tenth year, [Assyria/Sargon] was hostile [to]ward [Marduk-apla-id]dina.
- i 43–44) [The tenth year (712): Marduk-apla-idd]ina (II) [ravaged Bīt-...] ... [(and) plunder]ed [i]t.
- ii 1–5) The [twelfth] year [of Marduk-apla-iddina (II) (710): Sargon (II) came down to the land Akkad and did] battl[e against Marduk-apla-iddina (II)]. Mard[uk-apla-iddina (II)] then retreated before him (and) fled to Elam. Marduk-apla-iddina (II) ruled Babylon for] twelve y[ears]. Sargo[n (II)] ascended the throne in Babylon].

(The following lines are either not preserved or too poorly preserved to allow translation. When the text is again legible, it is dealing with the reign of Sennacherib.)

(ii) Recension B (BM 75976 [AH 83-1-18,1338]) (CT 34 pls. 44–45)

(Lacuna)

- ii 1'–2') rul[ed Elam. Ištar-ḫundu (Šutruk-Naḫḫunte II), his] sist[er's] son, [ascended the throne in Elam].
- ii 3'–6') The sixth year (716): Ass[yr]ia ... ]. From the accession ye[ar of Marduk-apla-iddina (II)] until the tenth year, [Assyria/Sargon was hostile] toward Mar[duk-apla-iddina].
- ii 7'–8') The tenth year (712): Marduk-apla-iddina (II) ravaged Bīt-... (and) plu[nd]ered it.
- ii 9'–14') The *twelfth* year of Marduk-apla-iddina (II) (710): Sargo[n] (II) came down [to the land Akkad] and did battle against [Marduk-apla-iddina (II)]. Marduk-apla-iddina (II) then [retreated] before [him] (and) fled to Elam. For twelve years [Marduk-apla-idd]ina (II) rul[ed] Babylon. Sargon (II) ascended the throne in Babylon.
- ii 15'–16') The thirteenth year (709): Sargon (II) to[ok] the hand of Bēl. He (also) captu[red] Dūr-Yakīn.
- ii 17') The fourteenth year (708): The king (stayed) in [the land (Babylonia)].
- ii 18'–19') The fifteenth [yea]r (707): On the twenty-second day of the month Tašritu (VII), the gods of the Se[a]land returned [to] their [shr]ines. There was plague in Assyria.
- ii 20'–21') [The *seventeenth* year (705): Sarg[on] (II) [marched] to the land Tabal [...] ... [...].

(Lacuna)

## 1–8

On the stone slabs lining the walls of several rooms and at least one corridor in the inner part the palace of Sargon II at Dūr-Šarrukīn (Khorsabad) were incised versions of the king's Annals (text nos. 1–6) and two different display (or summary) inscriptions (text nos. 7–8), as well as sculpted reliefs depicting mostly military events, but also hunting, feasting, and the bringing of tribute. The Annals come from Rooms II, V, XIII, XIV, the throne room (=Court VII), and an unknown room (text nos. 1–6 respectively). Copies of Sargon's main Display Inscription were found in Rooms I, IV, VII, VIII, and X (the last actually a corridor leading from Court VIII to the northeastern terrace). Room XIV unusually had both a version of the Annals (text no. 4) and a display inscription (text no. 8) that was about half as long as the main Display Inscription. (For a plan of the palace indicating the various rooms, see Figure 4, although note that the room numbers are given as Arabic numerals.)

No version of the Annals is fully preserved, but the best-preserved versions are those from Rooms II and V (text nos. 1 and 2 respectively). Parts of the beginning of the Annals are preserved only in Room II and parts of the end only in Room V. Events are assigned from Sargon's accession year (722) through to his thirteenth regnal year (709). Following an account of Sargon's reconquest of Babylonia in his twelfth and thirteenth regnal years (710–709), the version of the Annals in Room V recounts events in Que (Cilicia) and Musku (Phrygia), Tyre and Yadnana (Cyprus), Kummuhu (Commagene) and Melid, and Ellipi and Marubištu; the events in Kummuhu are likely to be associated with events recorded in the Assyrian Eponym Chronicle for 708. The inscription in Room V then describes the building of the city Dūr-Šarrukīn and a festival that the king held when he took up residence there (text no. 2 lines 467b–494). This should indicate that the text was composed no earlier than 706, since the city's inauguration took place in Ayyāru (II) of 706 according to the Assyrian Eponym Chronicle. Both display inscriptions refer to the festival held after the king took up residence in Dūr-Šarrukīn (text no. 7 lines 177b–186a and text no. 8 lines 59b–69a), indicating that they were also composed after that event, unless they were all recording an event that was planned, but that had not yet taken place.

## 1

The version of Sargon's Annals in Room II, a large room measuring 35.5×9 m in size, probably extended over at least thirty-seven wall slabs — thirty-five in the room itself and two in Entrance H. P.E. Botta prepared copies of the inscriptions on twenty-eight of these slabs, twenty-six from the room itself and the two in Entrance H. It is likely that the end of the inscription continued onto two or possibly four slabs in Entrance C, although we might not have expected the text to end in a doorway rather than on a slab within the room itself (see below). As far as one can tell, each slab appears to

have had thirteen lines, for a total of at least four hundred and eighty-one lines and a maximum of five hundred and thirty-three lines. Regrettably, not one single original sign of this inscription is known to be preserved today, although some parts may remain in situ at Khorsabad. In the edition of this text and the other texts where the inscription requires more than one stone wall slab, the slabs are given consecutive “section” numbers in order to facilitate use of the editions.

This is the only version of the Annals for which the beginning is preserved, albeit in a fragmentary state. As currently known, the text breaks off shortly after the beginning of the description of events in Sargon’s second regnal year (720; lines 1–26) and, after a gap of twenty-six lines (sections 3–4 = lines 27–52), recommences a few lines before the end of the account for that year (lines 53–57). Following accounts of the third through tenth regnal years (719–712; lines 58–234a), the text breaks off again at the very beginning of the eleventh regnal year (711; line 234b), and, after a gap of thirteen lines (section 19 = lines 235–247), recommences within the account of that same year (lines 248–261a). The account of the twelfth year (710) is particularly lengthy (lines 262b–299 and 313–390) although there is a gap of thirteen lines within it (section 24 = lines 300–312) and the end of the account and beginning of the account of the thirteenth year (709) are also missing (section 31 = lines 391–403). After twenty-six lines (two slabs) dealing with year thirteen (709; lines 404–416), the text breaks off again, still within the account of that regnal year, for a gap of twenty-six lines (sections 33–34 = lines 417–442). When the text recommences, it is still dealing with the thirteenth regnal year, or more accurately Upēri of Dilmun who, having heard of Sargon’s victories, sent a gift to the Assyrian king (lines 443–444a). It then proceeds to describe events involving Mitā of Musku, Silṭa of Tyre, and finally Mutallu of Kummuhu, ending just after beginning the passage about Mutallu (lines 444b–468). The account about Mutallu of Kummuhu is probably to be dated to Sargon’s fourteenth regnal year (708) in view of the mention of the capture of the city Kummuhu in the Assyrian Eponym Chronicle’s account for that year. The inscription would presumably have continued onto slab II,1 (section 37) and possibly also onto slabs in Entrance C, none of which were copied by Botta. The lines are to be associated with Winckler, *Sar. Annals* lines 1–208, 214–261, 266–274, 280–284, 290–314, 319–340, and 370–389, and with Fuchs, *Khorsabad Annals* lines 1–26, 53–234, 240–279n, 283–286c, 288–291, 297–301, 307–321e, 331–351, and 384–399. (Note that A. Fuchs’ line numbering is the same as that used for this inscription for lines 1–234, after which it diverges.) Since the scheme used for numbering the lines in this room is the same as that used by A.G. Lie (*Sar.*), the line numbers here are the same as those used in his edition (although see the commentary below for differences with regard to lines 1–13); Lie used separate line numbers for the individual sections not preserved in Room II.

F.H. Weissbach (*ZDMG* 72 [1918] pp. 171–172) originally thought that the inscription was also found on two slabs in Entrance G, two slabs in Entrance B, and perhaps two or four slabs in Entrance C, but according to F. Thureau-Dangin (*RA* 24 [1927] p. 75 n. 4), he later abandoned this view. J.E. Reade (*JNES* 35 [1976] p. 96) has noted that Botta stated that the slabs in Entrances B and C were inscribed and that E. Flandin drew line delineations on his depictions of the slabs in Entrance G. It is assumed here that any inscription in Entrance B and Entrance G was different to that in Room II. It is thought,

however, that Entrance C likely did have part of the inscription (the very end of the text).

For a plan of the room, with the slabs numbered, and for sketch drawings of the slabs, see Figure 5; Botta, *Monument de Ninive* 1 pls. 51–52; and Albenda, *Palace of Sargon* pls. 109–110. Drawings of the reliefs found in this room are given in Botta, *Monument de Ninive* 1 on pls. 53–71, and on pls. 76–77 for Entrance H<sub>1</sub> and H<sub>2</sub>. With regard to the reliefs in the room, which are thought to depict Sargon's campaign to the east in his sixth regnal year (716), see Reade, *JNES* 35 (1976) pp. 96 and 102–104; and Reade, *Bagh. Mitt.* 10 (1979) pp. 78–81.

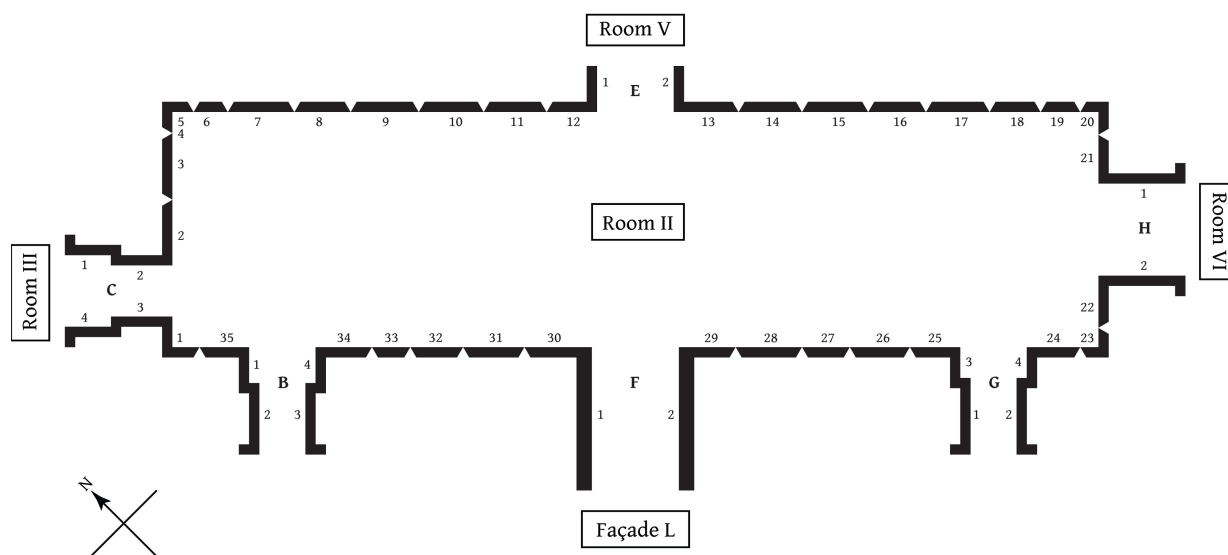

Figure 5. Plan of Room II of the palace at Khorsabad, whose wall slabs had a version of Sargon's Annals (text no. 1). Plan after Botta, Monument de Ninive 1 pl. 51.

## COMMENTARY

Before publishing the copies that he had made in the field in Monument de Ninive, P.E. Botta collated most of them from *papier mâché* squeezes that he had made of the originals. These are marked with <sup>c</sup> after the Botta, Monument de Ninive 3-4 plate number in the catalogue; the same is done with the

text numbers which Winckler is supposed to have collated from squeezes or originals. Botta did not make copies or squeezes of sections 3-4, 19, 24, 31, 33-34, and 37 (Room II slabs 4-5, 20, 23, 30, 32-33, and 1 respectively), or of any inscribed slabs that may have existed in Entrance C. Although he made

copies of the inscriptions on sections 25, 27, and 36 (Room II slabs 24, 26 and 35 respectively), squeezes of these were not made. Squeezes were supposedly made by Botta of sections 1, 7, and 11 (Room II slabs 2, 8, and 12 respectively) and used by him when he prepared the final copies for Monument de Ninive, but these were already not available or extant in the time of H. Winckler. Thus, Winckler's copies of those three sections were totally based on those of Botta and provide no independent information on what was on those slabs. Botta, Monument de Ninive 4 pl. 79<sup>c</sup> has copies of two slabs, sections 1 and 14 (Room II, slabs 2 and 15), and Botta indicates in his table of contents that he collated what was on that plate; however, a squeeze of only the latter piece is preserved today and it is possible that he did not have one of the former piece (slab 2) to check. A new copy of section 13 (II,14) was made in the 1920s by Ch.-F. Jean based upon an examination of the squeeze.

Since the inscription crossed over a large number of slabs and since none of the original inscription is preserved today due to the loss of most of P.E. Botta's and V. Place's finds in the Tigris in 1855, it has been thought necessary to divide up the text by slab (section) in the catalogue, provide information on the sources of information for each separate slab, and create a score edition for the text based on the different sources of information, even though there was only one original text. In the catalogue and in the score, these sources are presented in the following order and with the following notations:

Bt = copy by Botta published in Monument de Ninive.

Wi = copy by Winckler, Sar. 2 (when he states that he collated a squeeze of the original).

Sq = squeeze in the Louvre (examined primarily via photographs, but also via the original squeeze in places).

JA = copy by Botta published in *Journal asiatique* (1843–1845). Generally these copies are exact duplicates of the ones preserved in the Institut de France (see the next entry), but there are occasional differences.

IdF = copy by Botta made while at Khorsabad, sent to Jules Mohl (secretary of the Société asiatique), and preserved in the Institut de France in the file Botta-Cotta II 2976.

Je = copy by Jean published on pp. 79–80 of Thureau-Dangin, RA 24 (1927) pp. 75–80; these are copies of sections 12 and 13 (slabs 13 and 14 respectively).

T-D = copies and transliterations of selected individual words and passages by Thureau-Dangin in RA 24 (1927) pp. 76–78. For a detailed listing of which lines are mentioned, see the bibliography below.

BM = rubbing in British Museum (only for section 5 [slab 6]).

Botta states that some of the copies made by him at Khorsabad and published in Monument de Ninive had been collated by him from the squeezes and/or originals in the Louvre (including much of this text: Monument de Ninive 3–4 pls. 65–65<sup>bis</sup> and 70–90 = sections 1–2, 5–18, 20–23, 26, 29–30, 32, and 35). Thus, those copies should be improvements upon those published in *Journal asiatique* and those preserved in the Institut de France, and it has not been thought necessary to include in the scores complete transliterations of the copies in *Journal asiatique* and the Institut de France, but only to note useful differences from the copies in Monument de Ninive, in particular when one or both of the copies has a correct form of a sign and the copy in Monument de Ninive is abnormal or when one or the other has major traces of a sign omitted in Monument de Ninive.

Section 1 (lines 1–13): As copied by Botta, lines 2–10 of the first section of the inscription (slab II,2) clearly duplicate parts of lines 6–16 of the Khorsabad Cylinder Inscription (text no. 43), and line 1, as far as it is preserved, could duplicate part of the third line of that inscription, but with insufficient room at the beginning of the line to restore what would be expected before that, namely the name of the king and several titles and epithets, even if that passage was a greatly abbreviated version of what was in lines 1–2 of the cylinder inscription. It is most unlikely that the inscription had begun on a previous, unpreserved slab, since slab 2 was located immediately to the left of Door C when entering Room II and the slab to the right of the doorway (Room II, slab 1), would have contained the very end of the inscription. The slabs in this room regularly have thirteen lines of text; however, Botta copied only eleven lines for slab II,2, indicating that nothing of lines 12 and 13 was preserved and that the depiction of a royal parasol protruded up into the inscribed area, taking up parts of what would have been the last four lines (lines 10–13 of the slab); see Figure 6 and Botta, Monument de Ninive 4 pl. 79<sup>c</sup> top and note 1 pl. 53. (Winckler's copy follows Botta's in the arrangement of the lines.) A.T.E. Olmstead assumed that line 1 of Botta's copy was actually the second line of the inscription, thus presumably assuming that nothing was preserved of only the last line of the slab, i.e., Botta's lines 1–11 are actually lines 2–12 of the original thirteen lines. Olmstead then restored his lines 1–2 based on the cylinder inscription lines 1–3, although he added the god Nabû between the gods Aššur and Marduk in line 2 (line 3 of text no. 43). A. Fuchs (Khorsabad p. 19) also considers the problem and

suggests that what Botta copied for line 1 was an isolated fragment that he placed wrongly and that it was the first and third lines of the text that were completely unpreserved, i.e., what is on Botta's line 1 was actually on line 2 and Botta's lines 2–11 were actually lines 4–13. However, Fuchs also notes that the parasol intrudes well into the inscription on both Botta, *Monument de Ninive* 1 pl. 53 and 4 pl. 79<sup>c</sup> (top), suggesting that Botta's copy might have been accurate, and thus in his edition follows Botta's line arrangement. One should note, however, the drawing of the relief on *Monument de Ninive* 1 pl. 53 shows the parasol protruding into only two or at most three lines of text (assuming that the line rulings indicated by E. Flandin are correct) and that the parasols on Room II slabs 16 and 34 (sections 15 and 35) protrude into only the bottom two lines of the text, with only the top end of the stick of the parasol going just into the third line from the bottom (on both Botta's copies [ibid. 4 pls. 80 and 90] and squeezes). Flandin's drawings of those reliefs show the parasols protruding the same distance into the inscription as the one on slab 2 (see ibid. 1 pls. 63, 71 and 53 respectively). Botta's initial copy of the text preserved in the Institut de France has just eleven lines, with no indication of any damaged lines either above or below the eleven lines copied (i.e., the lines with no preserved text), and the same is true for the copy published in *Journal asiatique* (4/2 [1843] pl. 18). Thus, it is possible that in making the typeset copy and knowing that the slabs in this room always had thirteen lines of text he erroneously placed the two missing lines at the end of the text. Since nothing of slab II,2 is preserved today and no squeeze of it was made by Botta, no final conclusion can be made about the matter, although Fuchs' suggestion (one which he did not follow in his edition) that Botta's copies represent parts of lines 2 and 4–13 makes the best sense for the text, fits well with the drawings of the reliefs, and is followed here. Thus, lines 1 and 2–11 in Winckler's, A.G. Lie's, and Fuchs' editions are here lines 2 and 4–13 respectively. It should be noted that in his original handcopy of this slab and in the copy published in JA, there are traces of two or three unidentifiable signs to the right of the first line. Since these traces were not included in the copy published in *Monument de Ninive* and since it is not clear which line they would come from (presumably either what is considered here as line 2 or line 3) they are not included in the present edition. The author presented a more detailed paper on the first thirteen lines of the *Annals* from Room II at the 65<sup>e</sup> *Rencontre Assyriologique Internationale* in Paris on July 10, 2019 and this will be published in the *Proceedings* volume of that conference.

Sections 3 (lines 27–39) and 4 (lines 40–52): Botta

(followed by F.H. Weissbach) has two slabs (II,4–5) in the northwest corner of the room, unlike the other three corners where there is one corner slab; however, he provides no copies for the inscriptions upon these slabs. N. Na'aman (*Tel Aviv* 34/2 [2007] pp. 165–170) argues that there was likely only one slab there, based partially upon what would have been recorded on those slabs. Thus line 40 would have begun on slab II,6 (section 5) and our lines 53–481 would be 40–468 (i.e., each line number being 13 lines less). His reasoning has merit, although it is not impossible that there were two slabs there, rather than one, with each slab being much narrower than the other slabs in the room. It has been thought best to maintain the traditional slab and line numbering for this area, which is also the same line numbering used by Lie.

Section 5 (lines 53–65): A rubbing of slab II,6 was presented to the British Museum on January 23, 1845 by Rev. G.P. Badger and has the designation ADD. Ms. 15441. This occasionally shows a bit more at the beginning of a line than Botta's copy and indicates that some areas of damage on Botta's copy do not exist.

Section 9 (lines 105–117): With regard to slab II,10, Botta's copy does not include a section at the right side of the slab (lines 107–113) that is visible on the squeeze and that was copied by Winckler.

Section 10 (lines 118–130): The squeeze of slab II,11 only has approximately the first sixty percent of each line; this was also the case when Winckler saw the squeeze and made his copy.

Sections 12 (lines 144–156) and 13 (lines 157–169): The copies of these two slabs (II,13–14) done by Jean (RA 24 [1927] pp. 79–80) are in general given preference in the edition over those of Botta when they are supported by an examination of the squeezes (although at times the current state of a squeeze might suggest the addition of half brackets to indicate a certain level of damage).

Section 20 (lines 248–260): Botta's copy for slab II,21 indicates a damaged area sufficient for several (ca. 4–6) signs immediately before the final sign(s) on a line; however, the squeeze indicates that there is room for far fewer signs per line in the damaged area.

Section 25 (lines 313–325): Botta's copy for slab II,24; (*Monument de Ninive* 4 pl. 92 top) has parts of nine lines and indicates damage both before and after those lines. Winckler's copy (*Sar.* 2 pl. 9 no. 19) presents those lines as the last nine lines of the slab and that view is followed here, as it was by Fuchs (see Fuchs, *Khorsabad* pp. 145–147), although this must remain uncertain.

Sections 27 (lines 339–351) and 28 (lines 352–364): As already noted by Fuchs (*Khorsabad* pp. 20–21),

Botta's copy for Room II slab 26 (Monument de Ninive 4 pl. 92 bottom = Winckler, Sar. 2 pl. 10 no. 21; section 27), which has parts of twelve lines, presents problems if one attempts to edit it as one passage and in the order that the lines are presented. Botta provides no separate copy for slab 27 (section 28) and Fuchs proposes that the copy for slab 26 represents four fragments from the two slabs. Although there is no proof that this is correct, this suggestion is reasonable and is followed here. The text on Botta's copy is assigned to section 27 lines 339–340 and 350–351 (Botta lines 4'–5' and 2'–3' respectively) and to section 28 lines 352–355 (Botta lines 8'–12'). Nevertheless, the exact line numbers for the fragment(s) must remain uncertain and parts of three lines copied by Botta have remained unplaced: 1' ([...] AN [...]), 6' ([...] A I MUNUS [...]), and 7' ([...] x i-na [...]), although 6'–7' could conceivably be from lines 341–342. See the on-page notes to lines 339–340 and 350–355.

Section 32 (lines 404–416): The squeeze for slab II,31 is faint and illegible for the most part; many of the legible signs are in the lower righthand section of the squeeze. Thus, only a few signs are noted in the score for the squeeze and it is particularly uncertain whether Winckler's copies can be relied upon or not when they deviate from Botta's copy.

Section 36 (lines 456–468): As already noted by Winckler, Botta's copy of slab II,35 is unreliable, with the right side of the copy indicated a line higher than it should be; Winckler corrected this in his own copy (Sar. 2 pl. 12 no. 26). Fuchs (Khorsabad p. 20) suggests that Botta had found the slab in two pieces and that he put them together wrongly, misaligning the lines. Thus, for example line 459 is made up of Botta's II,35 lines 4a and 3b. In the score, a double dagger (#) indicates where the line shifts on Botta's copy. (This misalignment is found on Botta's copies in *Journal asiatique* and in the Institut de France Archives, as well as on the one in Monument de Ninive.)

Section 37 (lines 469–481): It is thought likely that the inscription continued after this unpreserved section (slab II,1) by going into Entrance C and continuing on two (C<sub>3</sub> and C<sub>2</sub>) or four (C<sub>3</sub>, C<sub>4</sub>, C<sub>1</sub>, and C<sub>2</sub>) slabs there, for an additional 26 or 52 lines which would likely have been similar to text no. 2 lines 443–510. This would mean that the text would have ended within a doorway, rather than within the room itself, which would be most unusual; however, if it did not do so, the inscription would likely either not have had a final building section or only a much abbreviated one compared to that in Room V (text no. 2), since the end of slab II,2 is still dealing with political/military matters.

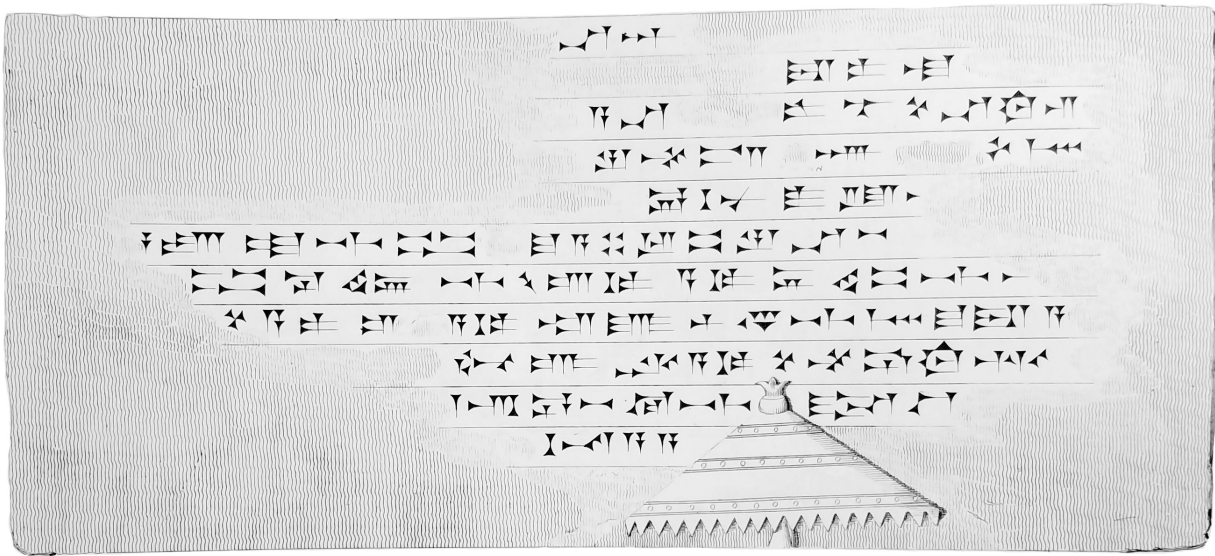

Figure 6. Copy of the inscription on Room II, slab 2, published by P.E. Botta in Monument de Ninive 4 pl. 79<sup>c</sup> top (text no. 1, section 1).

**Section 1** = lines 1–13 = II,2:1–13. See Winckler, Sar. Annals lines 1–13; Lie, Sar. lines 1–13; and Fuchs, Khorsabad Annals lines 1–13. Cf. text no. 43 lines 1–16.

**1–13** For the line arrangement and tentative restorations, see the commentary to this section and Frame, CRRA 65 (forthcoming). In brief, it is assumed that lines 1–11 of P.E. Botta’s copy (Monument de Ninive 4 pl. 79<sup>c</sup> top; see also Figure 6) were actually lines 2 and 4–13 and that all but one and a half lines on the slab (Botta’s lines 10b and 11, here lines 12b and 13) duplicated almost exactly the introduction of the Khorsabad cylinder inscription (text no. 43) lines 1–13a. The line breaks in the restorations given above are at times uncertain (e.g., where line 11 ends and line 12 begins). Cf. Olmstead, AJSL 47 (1930–31) pp. 261–262, which would have the text omit line 4 and part of line 5 of text no. 43. Line 1: For NU.ÈŠ “nešakku-priest,” see the on-page note to text no. 41 line 1.

**2** Possibly add <sup>d</sup>AG, “Nabû,” between Aššur and Marduk, following text no. 7 line 3. The copies in JA and IdF have [...] x-na-an [(x x)] x BAR x [...], where the first x is a vertical wedge, which might suggest a reading [...] <sup>r</sup>ša<sup>1</sup>-na-an or less likely [...] <sup>r</sup>šá<sup>1</sup>-na-an. Since the x before the BAR is an upside down vertical wedge and since the BAR x do not seem to fit into what is expected in line 2, it has been thought best to omit these traces from the main edition. It is possible that they actually come from line 3, situated immediately above the signs preserved for line 4.

**5** The JA and IdF copies have the head of a vertical wedge before the a-, which could conceivably be the end of šA.

**6** The JA and IdF copies have traces of the sign before the KUR, but they do not fit ḥU easily.

**8–10** Since what is preserved of line 9 does not match exactly text no. 43 line 13, it is not clear that what was at the end of line 8 and the beginning of line 9 or if the end of line 9 and beginning of line 10 duplicated part of text no. 43 line 13.

in terrifying location(s)] and crossed eve[ry swamp]; 8b-12a) [(who) ruled from the land Rāši on the border of the land Elam, the Puqudu (and) Damūnu (tribes), the cities Dūr-Kurigalzu (and) Rapi]qu, all of Chaldea, as far as the other side [of the sea ...; (who)se great hand] con[quered from] the land Ḥašmar to the city Šibar — which borders on the [distant] Medes [in the east — the lands Namri, Ellipi, Bit-Ḥamban, Parsua(š), Mannea, Urarṭu, Kask]u, (and) Tabal, as far as the land Musku; [(who) set eunuchs of his as governors over them and] imposed upon them [(the same) tribute (and) payment(s) as if (they were) Ass]yrians —

12b-17a) At the be[ginning of my reign, having as-cended the royal throne and been crowned with the crown of lordship, ... (as for) the peo]ple [of the city Samar]ia [who had come to an agreement with a king hostile to me not to do obeisance (to me) or to bring tribute (to me) and (who) had offered battle, with the might of the god Aššur, my lord, who ma]kes me triumph, [I fought them and brought about their defeat ... I] carried off as booty [27,280/27,290 people who lived there. [I conscripted] 50 chariot(s) from [among them] into my royal (military) contingent [and (re)settled the remainder of them in Assyria ... I res]tored [the city Samaria] and made (it) greater than before. [I brought there] people from the lands that [I had] conquer[ed. I set a eunuch of mine as provincial governor over them and imposed upon

9-10 Following *nēberti*, we might expect something like *tam-tim* or (ID).*mar-ra-ti*, “other side of the sea,” but the traces as copied by P.E. Botta would not seem to fit either reading; see also Fuchs, Khorsabad p. 313 and n. 223 and cf. text no. 7 lines 21-22. After URU.ra-pi-qu and before iš-tu KUR.ḥa-áš-mar of line 10, text no. 43 line 13 has *mad-bar* DÙ.A.BI a-di na-ḥal KUR.mu-uš-ri KUR.a-mur-re-e DAGAL-tum KUR.ḥat-ti a-na si-<sup>1</sup>hir-ti-šá i-be-lu, “(who) ruled ... the entire desert as far as the Brook of Egypt, the wide land Amurru, (and) the land Ḥatti (Syria) in its entirety.”

10-11 KUR.ma-da-a-a and KUR.ma-an-na-a-a: In this volume, it has been thought preferable to translate these terms normally as “the land Media” and “the land Mannea” (rather than more literally as “the land of the Medes” and “the land of the Manneans” unless they clearly refer to individuals (e.g., <sup>m</sup>ul-lu-su-nu KUR.man-na-a-a, “Ullusunu, the Mannean,” in line 137) or are modified by a plural adjective (e.g., in line 10, where the adjective is restored based on a duplicate passage, and in line 100 where we have KUR.ma-da-a-a dan-nu-ti, “the powerful Medes”). The same is the case with several similar writings for other places (e.g., KUR.zi-kir-ta-a-a, “the land Zikirtu,” rather than “the land of the Zikirtians,” in text no. 37 line 2).

11 <sup>1</sup>ku<sup>1</sup> KUR<sup>1</sup>: P.E. Botta’s copy has [...] GU.

12 For the phrase *ki-i ša áš-šū-ri*, “as if (they were) Assyrians,” see the on-page note to text no. 41 line 12. *e-mid-su-<nu>-ti*: We would expect *ēmidušunūti* since the preceding verb *ištakkanuma* (restored) is in the subjunctive; see also text nos. 10 line 23, 11 line 18, 13 line 89, 41 line 13, 42 line 19, 43 line 16, 44 line 25, 76 line 10’, 105 i’ 13’ (mostly restored), and 129 line 18 (restored).

12b-16 The tentative restorations in the translation follow for the most part text no. 89 lines 15-16 for lines 12b-13a and text no. 74 iv 25-37 (see also Tadmor, JCS 12 1958 p. 34) for lines 13b-16. It is unlikely that there was room at the end of line 13 and beginning of line 14 for the restoration of all of text no. 74 iv 25b-28 given in the translation above (“who had come ... offered battle”). With regard to lines 15-16, E. Frahm (Last Days pp. 70-71) suggests the possibility of also restoring at the beginning of line 15 (after *libbišu*) *adi narkabātišunu u ilāni tiklišun*, “together with their chariots and the gods in whom they trusted,” and restoring *sittātišunu* at the very end of line 15 and *ina qereb māt aššur ušāšbit* at the beginning of line 16 (before Samaria), thus “[The rest of them I settled within Assyria].” However, while there is likely room to restore *sittātišunu* at the end of line 15, there would not be sufficient room for the additional restorations at the beginning of lines 15 and 16 based on how much is to be restored at the end of lines 16 and 17 and at beginning of lines 17 and 18, where the restorations are much more certain. It is possible that some of the actions described here should be attributed to Sargon’s second regnal year (720) when he also fought against Samaria.

Section 2 = lines 14-26 = II,3:1-13: See Winckler, Sar. Annals lines 14-26; Lie, Sar. lines 14-26; and Fuchs, Khorsabad Annals lines 14-26. Since neither the beginning nor the end of any line on this slab is preserved, the line divisions in the restorations must be considered tentative.

14 <sup>1</sup>du<sup>1</sup>: H. Winckler copied <sup>1</sup>šid<sup>1</sup> (note also Winckler, Sar. 1 p. 4 n. 1); Saggs, JSS 42 (1997) p. 138 read <sup>1</sup>du<sup>1</sup>; and Fuchs, Khorsabad p. 87 line 14 has <sup>1</sup>id<sup>1</sup>; the spacing and the traces on the squeeze fit DU better than ID.

15 27,280/27,290: Various exemplars of text no. 7 line 24 have 27,290, 27,280, and apparently 24,280 here, while the Nimrud Prism has 47,280 or 27,280 (see the on-page note to text no. 74 iv 31).

16 See the on-page note to the duplicate passage in text no. 74 iv 37-38 with regard to the restoration of Samaria.

17-18a See also text no. 74 iv 42-49.

them (the same) tribute] (and) payment(s) as if (they were) Assyrians.

17b–18a) [I opened up a sealed-off] ḥa[rbor district of Egypt], mingled together [the people of Assyria and Egypt], and allowed (them) to engage in trade.

18b–20a) [In my first regnal year, (...) Ḥumbanigaš (Ḥumban-nikaš I), the Elamite, ...] committed [a crime] and became hostile to me, (wanting) to (do) battle ... [... I] brought about his [def]eat [on the outskirts of Dēr].

20b–23a) The Tu'umuna (tribe) [threw off] the yoke of the god Aššur, [arrested their sheikh, and brought (him) before the king of Chaldea] who [exercised] the kingship over Babylon against the will of the gods, [...] I deported [...] +7 people together with their property and [...] I (re)settled (them) [(...) in the land Ḥ]atti (Syria).

23b–26) In my second regnal year, Ilu-b[i]dī of the land Hamath [...] assembled [the troops of the] wide [land Amurru] in the city Qarqar and [transgressed against] the oath [(sworn) by the great gods ...] he inc[ited] the cities Arpad, Šimirra], Damascus, (and) Samaria [to rebel against me and ...]

Lines 27–52 are not preserved

53–57) [he/I est]ablished [...], he gave him Rē'e, his field marshal, to he[]p him, and he rose up against me to do war [and] battle. At the command of the god Aššur, my lord, I inflicted a defeat on them. [R]ē'e then fled off by himself, like a shepherd whose flock had been stolen, and got away. I captured [Ḥ]anūnu (Ḥanno) and brought him in bondage to my city Aššur; I then

**18b–20a** Cf. text no. 7 line 23b. Although the Annals appears to date the battle of Der to Sargon's first regnal year (721), the Aššur Charter (text no. 89 lines 16–17a) and a Babylonian chronicle (see the Introduction to this volume, under the subsection "Chronicles") assign it to his second regnal year (720).

**20–21** <sup>r</sup>LÚ<sup>1</sup>.<sup>r</sup>[KUR<sup>2</sup>].<sup>r</sup>tu<sup>1</sup>-u-<sup>r</sup>mu-na-a-a: The spacing on the squeeze suggests that there was a small sign in the damaged area between the LÚ and the tu-. ni-<sup>r</sup>ir<sup>1</sup>: P.E. Botta's copy has ir-ni, while H. Winckler's copy and the squeeze have ni-<sup>r</sup>ir<sup>1</sup>. H.W.F. Saggs suggests that Botta transposed the signs when copying them (JSS 42 [1997] p. 138). 20b–21: Cf. text no 7 line 18b.

**23b–26** Cf. text no. 7 lines 33–35a.

**24** Among numerous other possible restorations are "[the troops of the] wide [land Hamath]" and "the vast [troops of the land Hamath/Amurru]" instead of "[the troops of the] wide [land Amurru]," and "[had them take] an oath [(sworn) by the great gods ...]" instead of "[...] they transgressed against] the oath [(sworn) by the great gods ...]."

**25** di-maš-<sup>r</sup>qa<sup>1</sup> [URU<sup>1</sup>].<sup>r</sup>sa<sup>1</sup>-me-: P.E. Botta's copy has di-maš-[x x]-me- and H. Winckler's copy has ... di-maš-qi URU.sa-me-.... The squeeze has di-maš-<sup>r</sup>qa<sup>1</sup> [x] <sup>r</sup>sa<sup>1</sup>-me-, where there would barely be enough room for URU in the gap.

**Sections 3–5** Section 3 = lines 27–39 = II,4:1–13; See Lie, Sar. lines 27–39; and Fuchs, Khorsabad Annals lines 27–39; Winckler, Sar. Annals omits. Section 4 = lines 40–52 = II,5:1–13; See Lie, Sar. lines 40–52; and Fuchs, Khorsabad Annals lines 40–52; Winckler, Sar. Annals omits. It is possible that only one wall slab is missing and not two. Thus, only thirteen lines would be missing between our lines 26 and 53. See the commentary to this text on this matter. Section 5 = lines 53–65 = II,6:1–13; See Winckler, Sar. Annals lines 27–39; Lie, Sar. lines 53–65; and Fuchs, Khorsabad Annals lines 53–65. Cf. text no. 4 lines 1'–2'.

**53** <sup>r</sup>LÚ.tur<sup>2</sup>-tan<sup>2</sup>-nu<sup>21</sup>-šú: Text no. 7 line 25 has LÚ.tar-tan-nu. P.E. Botta's copy has <sup>r</sup>LÚ<sup>1</sup> [x x]-šú, while H. Winckler's copy has <sup>r</sup>LÚ.tur<sup>1</sup>-tan-nu-šú; the squeeze has <sup>r</sup>LÚ<sup>1</sup>.x-<sup>r</sup>tan<sup>2</sup>-nu<sup>21</sup>-šú and the BM rubbing is not useful here. id-<sup>r</sup>din<sup>2</sup>-šú<sup>21</sup>-ma: Botta's copy has id-[x-(x)]-ma. Winckler's copy has IT-x-x-ma, with each x being a Winkelhaken in a damaged area; he identified the signs as it-mu-u-ma. The squeeze and BM rubbing have no clear traces of the DIN and ŠÚ.

**54** [ù]: H. Winckler's copy has <sup>r</sup>ù<sup>1</sup>, but no trace of the sign is given on P.E. Botta's copy or is currently visible on the squeeze or rubbing.

**55** LÚ.SIPA\*: P.E. Botta's and H. Winckler's copies' LÚ.ŠAB are confirmed by the squeeze and the rubbing in the British Museum. See Frahm, CRRA 43 p. 151 for the comic wordplay between the name of the person fleeing and the Akkadian word for shepherd.

destroyed, demolished, (and) burned down with fire [the city Rap]ḫia. I carried off as booty 9,033 people together with their numerous possessions.

58–65) [In] my third regnal year, (the people of) the cities Šuandaḫul (and) Durdukkā, fortified cities, plotted resistance against Iranzi, the [Man]nean, the king, their lord, one who pulls my yoke, and put their trust [i]n Mitatti of the land Zikirtu. Mitatti of the land Zikirtu gave them his combat troops, together with their cavalry and (thus) aid was provided to them. I mustered the numerous troops of the god Aššur and marched (forth) to conquer those [cit]ies. [I shatter]ed their very strong walls with a mighty battering ram, leveling (them) to the ground. I carried off as booty [the peo]ple, together with their property. [I de]stroyed, [demolished, (and) burned down th]os[e cities] with fire.

66–68a) [The peo]ple of the cities S[uk]kia, Bāla, (and) Abitikna conceived (lit.: “deliberated”) an e]vil [plan] that was to eradica[te] (lit.: “to tear out the ro[ot of]”) (their own) land and glave their word [to Ursâ (Rusâ), the Ura]rṭian, (to do obeisance to him). Because of the crime that they had committed, I deported them from their (own) places and (re)settled them [i]n [the land] Ḫatti (Syria) and (lit.: “of”) [the land Amurru].

68b–71) In my fourth regnal year, Kiakki of the city Šinuḫtu disregarded the treaty (sworn) by the great gods and became [di]latory about delivering (his) tribute. I raised my hand(s) (in supplication) to the gods, my lords, overwhelmed his royal city Šinuḫtu like a fog, and counted him as booty, together with [his] fight[ing men], 7,350 people, his wife, his sons, his daughters, and the people of his palace, together with abundant property of his. I gave his royal city

56 [m]ha]-<sup>r</sup>a<sup>1</sup>-nu-nu: H. Winckler's copy has [m]ha]-nu-nu, but the traces and spacing on the squeeze and rubbing suggests the proposed reading (see also, for example, text no. 9 line 23 and text no. 43 line 19).

58 <sup>r</sup>3<sup>1</sup>: Although not noted on P.E. Botta's and H. Winckler's copies, there are two vertical wedges and likely a trace of a third for the number on the squeeze; the BM rubbing has [...]+2.

59 LUGAL: H. Winckler's copy has three initial horizontal wedges, but both P.E. Botta's copy and the squeeze indicate only two were present.

65 <sup>r</sup>ap-pul<sup>1</sup>: The reading is based on the JA and IdF copies. P.E. Botta's copy in Monument de Ninive has ANŠE [...]; H. Winckler did not indicate any traces of the signs, although he suggested that Botta's ANŠE might stand for *al-me*. There are no discernible traces of the sign on the squeeze and A. Fuchs (Khorsabad p. 91 line 65) suggested reading *aq-[qur]*. The spacing on the Botta's copies would suggest, however, that there was room for several signs between the <sup>r</sup>ap-pul<sup>1</sup> and where the NA of *i-na* would begin.

Section 6 = lines 66–78 = II,7:1–13: See Winckler, Sar. Annals lines 40–52; Lie, Sar. lines 66–78; and Fuchs, Khorsabad Annals lines 66–78. Cf. no. 4 lines 3'–20'a and text no. 4 lines 3'–20'a. See also text no. 2 lines 69–70 for lines 77–78.

67 Text no. 4 line 4' has *a-na e-peš ar-du-ti*, “to do obeisance (to him)” after [KUR.ur]-<sup>r</sup>ar<sup>1</sup>-ta-a-a. Text no. 7 refers to (re)settling people from the cities Sukkia, Bāla, Abitikna, Pappa, (and) Lalluknu “in the city Damascus and the land Ḫatti” (line 57).

68 Šinuḫtu may be Aksaray in central Anatolia (Hawkins in Liverani, Neo-Assyrian Geography p. 99 and Bagge, Rép. Géogr. 7/1 pp. 240–241).

70 H. Winckler's copy indicates that the squeeze has the last two vertical wedges of the number 3 (before ME), but the spacing on the squeeze suggests it is the final vertical wedge of the number and the beginning of the following ME. Cf. text no. 4 lines 9'b–10'a.

Šinuḫtu to Kurtî of the land Atuna. Then, I made larger than before (the number/amount of) horses, mules, gold, (and) silver (that he had to pay as tribute) and I imposed (this) upon him.

72–76a) In my fifth regnal year, Pisiri(s) the city Carchemish sinned against the treaty (sworn) by the great gods and repeatedly sent (messages) hostile to Assyria to Mitâ (Midas), [k]ing of the land Musku. I raised my hand(s) (in supplication) to the god Aššur, my lord, and brought him, together with his family, out in bondage. I then carried off as booty gold (and) silver, (along) with the property of his palace and the guilty people of the city Carchemish who (had sided) with him, (along) with their possessions. (75) I brought (them) to Assyria. I conscripted 50 chariots, 200 cavalry, (and) 3,000 foot soldiers from among them and added (them) to my royal (military) contingent. I settled people of Assyria in the city Carchemish and imposed the yoke of the god Aššur, my lord, upon them.

76b–78a) The people of the cities Pāpa (and) Lalluknu, dogs who had been brought up in my palace, conspired with the land Kakmê for the purpose of [sep]arating (from Assyria). I deported them from their (own) places and [(re)settled them i]n the city [D]a[m]ascus o[f the lan]d A[murru].

78b–83a) [In my sixth regnal year, Ur]sâ (Rusâ), [the Ura]rṭian, [sent his mounted messenger with a mendacious message to Bag-dāti of the land Uišdiš (and) KAR... of the land Z]ikirtu, governor[s] [of the land Mann]e[a]. He made them hostile t[o (me)], Sargon, (and) to Azâ, the son of their (former) lord and [made them] s[ide] with [him (Rusâ)]. They brought about the rout of the Manneans [on Mount] Uau[š], a rug[ge]d mountain, and threw down the cor[pse of] Azâ, their lord, (there). I raised my hand(s) (in supplication) to the god Ašš[ur, my lord, in order to ave]nge the Manneans (and) to make (that area part of) the territory of Assyria. Then, on Mount Uauš, the

71 See Weippert, ZDMG Suppl. 1/1 (1969) pp. 213–215 and ZDPV 89 (1973) p. 50 on the reading of the personal name <sup>m</sup>kur-ti-i.

73b–74a Cf. text no. 4 lines 14' b–16' a. [...] <sup>r</sup>su<sup>†1</sup>-nu: So JA and IdF copies; no trace of SU on Botta, Monument de Ninive 4 pl. 72<sup>c</sup>.

76b–78a LÚ.URU.pa-a-pa-a-a LÚ.URU.lal-lu-uk-na-a-a <sup>r</sup>UR.GI<sub>7</sub>.MEŠ<sup>1</sup> tar-bit É.GAL-ia “The people of the cities Pāpa (and) Lallukna, dogs who had been brought up in my palace”: One should possibly understand this to refer to just the rulers of these two cities, individuals who at some point had been held hostage in Assyria, likely while their fathers were still alive and ruling those cities. However, the reference to them being deported and resettled in Damascus (lines 77b–78a) might suggest that a larger group of people are being dealt with here.

77 Text no. 2 line 69 adds ša after É.GAL-ia. Kakmê may be the Mannean name for Urartu (Fuchs, Khorsabad pp. 440–441).

78–83 Cf. text no. 2 lines 70–74/75 and text no. 4 lines 20'–26'.

Section 7 = lines 79–91 = II,8:1–13: See Winckler, Sar. Annals lines 53–65; Lie, Sar. lines 79–91; and Fuchs, Khorsabad Annals lines 79–91. Cf. text no. 2 lines 71–76+ and text no. 4 lines 20' b–37' a.

79 [KUR]-<sup>r</sup>zi<sup>†1</sup>-kir<sup>2</sup>-<sup>r</sup>ta<sup>1</sup>: The tentative reading follows A. Fuchs (Khorsabad, p. 95). P.E. Botta's copy in Monument de Ninive has [...] <sup>r</sup>zi<sup>†1</sup> (copy: [A-ŠE)-kir\* (copy: DA)-<sup>r</sup>ta<sup>1</sup> [...]. The copies in JA and IdF have [...] <sup>r</sup>a<sup>†1</sup> <sup>m</sup>KAR DA-x [...], where there is a question mark inside the copy of the DA and the x is exactly as the trace after the DA (tentatively read -kir-) in Monument de Ninive and assumed to be -<sup>r</sup>ta<sup>1</sup>). This could suggest the signs represent an earlier part of the restoration (note <sup>m</sup>KAR is restored from text no. 4 line 21'); however, the spacing could then be problematic for the reading after this point.

80 -ú-[uš]: P.E. Botta's copy indicates that the line ended with -ú, with no space to restore UŠ; thus possibly -ú-<uš>.

mountain wh[ere] they had thrown down [the corpse of] Azâ, I flayed the skin from Bag-dâti and (then) showed (it) to the Mannans.

83b-85a) (As for) Ullusunu, his brother, who had sat on the royal throne, the wrath of the god [Aššur] (was directed) against him. He (Ullusunu) then put his trust in Rusâ, the Urartian. He caused Aššur-lē'i of the land Karalla (and) Ittî (85) of the land Allabria to rebel against me and per[suaded (lit.: "spoke to") the]m to do obeisance to the land Urartu.

85b-96a) Furiously, I enveloped those lands like [a swa]rm of locusts and overwhelmed the city Izirtu, the royal city of the land <Man>nea, as with a bird trap. I inflicted a major defeat on them. I burned down the city Izirtu with fire and conquered the city Zibia (and) the city Armaet. (As a result), Ullusunu, the Mannan, together with his whole land gathered together and [gras]ped hold of m[y] feet. I then h[ad] pity [on the]m (and) pardoned (lit.: "overturned") [U]llusunu's crimes. [I had him sit (again)] on [his] royal throne [and rece]ived [tribute] from him. I deported Ittî of the land [Allabria (90) together with] his family, [flayed the skin from] Aššur-lē'i [of the land Karalla, and ...] ... [...] the city GanuGIŠ[...] ... [...] I c[on]quered (in total) six cities of] the district [Niksamm]a. I s[eiz]ed Šep-šarri, the ci[ty ruler] of the city Šurgadia, (and) [add]ed those [citie]s to the province of P[arsua]š. I personally cap[tur]ed Bēl-šarru-ušur of the city Kiše[sim] and brought him, together with the property of his palace, to Assyria. I set a eunuch of mine as provincial governor over his city. I installed the gods who go before me inside it (the city Kišesim) and (re)named it (the city Kišesim) Kār-Ner<gal>. I erected a royal image of myself there. I conquered the lands Bīt-Sagbat, Bīt-Ḥirmami, (and) Bīt-Umargi, (and) the cities Ḥarḥubarban, Kilambāti,

83 <sup>m</sup>ul-lu<sup>+</sup>-su<sup>+</sup>-nu: The copies in JA and IdF make the suggested alternate reading <sup>m</sup>ul-<sup>r</sup>li<sup>+</sup>-[su]-nu (Fuchs, Khorsabad p. 97 line 83; Saggs, JSS 42 [1997] p. 139) unlikely; the SU is only minimally abnormal on these copies.

84 šib-sa-at: So JA and IdF copies; see also Thureau-Dangin, RA 27 (1930), p. 159.

86 In view of a possible reference to Izirtu on an Aramaic stele found at Tapeh Qalâychi (located near Bukân southeast of Lake Urmia), A. Lemaire (Studia Iranica 27 [1998] pp. 15-30, especially pp. 15 and 29) argues that that site was ancient Izirtu. H. Winckler's copy adds a R between -a-a and hu-ḥa-riš, although this is not included in his edition (p. 12 line 60) and is presumably a mistake since he did not have a squeeze to collate for this section.

89 ḥi-ṭa<sup>+</sup>-ti-šu: Likely ḥi-ṭa<sup>+</sup>-ti-šu although there is no indication of damage in the area on P.E. Botta's copy. The reading ṬA as opposed to IṬ follows R. Borger (BiOr 14 [1957] p. 121 sub 211b) and A. Fuchs (Khorsabad p. 100 line 89), against H. Winckler (copy ḥi-ṭi<sup>+</sup>-ti-šu and edition p. 14 line 63) and H.W.F. Saggs (JSS 42 [1997] p. 139).

90 For the restorations, cf. text no. 7 line 56. A.G. Lie restores the end of the line as [KUR.kar-al-la-a-a ma-šak-šú a-ku-uš-ma UN.MEŠ KUR.kar-al-la i-na qé-reb KUR.a-ma-at-ti ú-še-šib], i.e., "[flayed] ... [of the land Allabria, and (re)settled people of the land Karalla in the land Hamath]"; cf. Geers apud Olmstead, AJSL 47 (1930-31) p. 265.

Section 8 = lines 92-104 = II,9:1-13: See Winckler, Sar. Annals lines 66-78; Lie, Sar. lines 92-104, and Fuchs, Khorsabad Annals lines 92-104. Cf. text no. 2 lines +86-99 and text no. 4 lines 37<sup>b</sup>-45<sup>c</sup>.

92 URU.ga-nu-GIŠ [x] KUR x [...]: This follows P.E. Botta's copy in Monument de Ninive; the exact reading of the name is unknown. The copies in JA and IdF have URU.ga-nu-GIŠ<sup>2</sup> x x x, where the -GIŠ<sup>2</sup> x could well be GA and the following x x (KUR x of Monument de Ninive) ŠU. M. El-Amin (Sumer 9 [1953] p. 53) suggested URU.ga-nu-<sup>r</sup>un-gu<sup>+</sup>-uh<sup>+</sup>-[tu] and connected it to the Ganguḥtu of text no. 27. As noted by A. Fuchs (Khorsabad p. 101 line 92 n. 1), A.T.E. Olmstead's suggestion that it might be compared with Qana in Sennacherib's royal inscriptions (e.g., Grayson and Novotny, RINAP 3/1 p. 117 no. 16 iv 73) and Qaniun in Harper, ABL no. 444 line 9 (= Lanfranchi and Parpola, SAA 5 no. 87) is unlikely since the former is in the vicinity of Mount Nipur and the latter in Urartu. There is room for ca. 10-12 signs in the gap before 6 URU.MEŠ. [KUR.ni-ik-sa-am]<sup>+</sup>-ma<sup>+</sup>: Botta's copy has [...]<sup>+</sup>a<sup>+</sup>; the squeeze is not clear at this point, but the sign does appear to end in one vertical wedge, not one vertical wedge on top of a second vertical wedge. Text no. 7 line 58 has KUR.ni-ik-sa-am-ma.

(and) Armangu; and I added (them) to its province.

96b–100) The people of the city Ḥarḥar drove out Kibaba, their city ruler, and sent to Daltâ of the land Ellipi to do obeisance (to him). I conquered that city and plundered it. I brought there people from the lands that I had conquered (and) set a eunuch of mi[ne] as provincial governor over them. I conquered the upper river(land) of the land Aranzêšu, the lower river(land) of Bît-Ramatua, the land Uriqatu, the land Sikris, the land Šaparda, (and) the land Uriakku, (a total of) six districts, and added (them) to them (the people of the city Ḥarḥar). I estab[lished] the weapon of the god Aššur, my lord, to be their divinity. I (re)named it (the city Ḥarḥar) Kâr-Šarrukîn. I received tribute from twenty-eight city lords of the powerful Medes and erected a royal image of myself in the city Kâr-Šarrukîn.

101–104a) In my seventh regnal year, Rusâ, the Urartian, spoke deceitfully with Ullusunu, the Mannean, and took away from him twenty-two of his fortresses. He spoke treacherous words, libels against Ullusunu, to Dayukku, a governor of the land Mannea, and received his son as a hostage. I raised my hand(s) (in supplication) to the god Aššur, the king [of the gods], and (then) surrounded (and) conquered those twenty-two fortresses. [I ma]de (them part of) the territory of [Ass]yria. I depor[ted] Dayukku, together with

94b–95a Cf. text no. 2 lines 86b–87a and text no. 4 line 40'.

95 URU.kar-<sup>d</sup>MAŠ.<MAŠ> “Kâr-Ner<gal>: Or URU.kar-<sup>d</sup>MAŠ “the city Kâr-Ninurta”. The squeeze is not preserved at this point and the reading <sup>d</sup>MAŠ.MAŠ is based on text no. 7 line 60. -sa-ag-bat: Note the writing -sa-ga-bi in text no. 117 ii 40; this could suggest that we should read -sa-ga-be here (as well as in text nos. 2 line 87, 4 line 41', and 65 line 44), although it could also reflect an ancient misunderstanding. -<sup>†</sup>ban<sup>1</sup>: The reading is based on the squeeze; F. Thureau-Dangin (RA 24 [1927] p. 76) stated that the last sign was not NIM, as on P.E. Botta's and H. Winckler's copies (although see Winckler's note to the sign which suggests BAN instead).

97a Cf. text no. 2 lines 89b–90a and text no. 4 line 43'a.

98 ÍD-tu e-li-<sup>†</sup>tum<sup>1</sup> and ÍD-tu šap-li-tu “the upper river(land)” and “the lower river(land)”: Following a suggestion by G.B. Lanfranchi, S. Parpola and M. Porter (Helsinki Atlas maps 11–12 and p. 14), take these to refer to two particular rivers in Iran, while A. Bagg (personal communication) suggests they were possibly alternative names for Aranzêšu and Bît-Ramatua respectively. šap-li-tu: H. Winckler's copy has šap<sub>5</sub>-li-tu, but P.E. Botta's copy and the squeeze have šap-li-tu.

99 With regard to the “weapon of the god Aššur” being set up to be the god of the people of Ḥarḥar, cf. text no. 2 lines 92–93 and see Lanfranchi, SAAB 12 (1998) pp. 103–104.

100 Cf. text no. 2 lines 93–95.

101 Text no. 2 line 96 adds UD-x-ti-<sup>†</sup>iš<sup>1</sup> before e-kim-šú.

102 MAN: So P.E. Botta's copy and the squeeze; H. Winckler's copy has <sup>†</sup>MAN<sup>1</sup>, but in a note he indicates it might be the traces of EN-ia (thus <sup>†</sup>EN<sup>1</sup>-[ia]).

103 [ú<sup>†</sup>]-<sup>†</sup>ter-ra<sup>1</sup>: The reading is based on the squeeze as currently preserved. H. Winckler read ú-tir-ra and, based on his examination of the squeeze, F. Thureau-Dangin (RA 24 [1927] p. 76) read ú-tir(!)-ra. According to text no. 7 line 49b Dayukku and his family were deported to Hamath.

his family, [and] brought order to the disturbed land Mannea.

104b–109a) [I received] tribute from Ia[nz]û, k[ing of the land Na'i]ri, [in] his city [Ḫ]ubuškia. (105) [I conquered] nine fo[r]tresses [...] I [carried off as booty] the people of five di[st]ricts [of U]rsâ (Rusâ), [the] U[rar]ṭian, together with their property [...] ... their oxen, (and) their sheep and goats. I conquered [eight fo[r]tresses, together with the settlements [in] the[ir] enviro[ns], [that] belonged to the land Tuāy[adi, a district belonging to T]elusina of the land Andia. I carried off as booty [4],2[00] peo[ple], together with their property. [I des]troyed, demolished, (and) [burned down with fire] tho[se] fo[r]tress[es]. I made [a] royal [im]age of myself and wrote upon it the victor(ies) of the god Aššur, [m]y lo[rd]. I (then) erected (it) in the city Izirtu, the royal city [o]f the land Mannea.

109b–114a) [The people] of the upper and lower river(lands), whom in my previous campaign I had considered as people of the city Ḫarḫar, made the lands Bīt-Sangib[uti], Ur[iqat], Si[kris], Šaparda, (and) Upparia side with them and (then) revolted against m[e]. I struck down [that] di[st]rict wi[th] the sword and plundered them. [I] conquered the cities Ka...na, Kinzarbara, Ḫalbuknu, Š[u...], (and) Anzaria of the upper (and) lower river(lands) [and] received in my (military) camp [4,000] fa[ce-guards] of their warriors (as trophies) (and) 4,820 [peo]ple, [together with] their [property]. I [re]built the cities Kišešlu, Qindāu, Anzaria, (and) Bīt-Gabāya that I had conquered. I (then) (re)[na]med them Kār-Nabû, Kār-Sîn, Kār-Adad, (and) Kār-Išt[ar].

104 KUR.man-na-a-a dal-ḥu “the disturbed land Mannea”: We might expect *dalihtu* rather than *dalhu*, but the names of lands are sometimes given masculine adjectives (e.g., text no. 43 line 31 and text no. 65 line 57). 9 URU.<sup>1</sup>bi<sup>1</sup>-[ra-a-ti]: See also F. Thureau-Dangin (RA 24 [1927] p. 76) for this reading.

Section 9 = lines 105–117 = II,10:1–13: See Winckler, Sar. Annals lines 79–91; Lie, Sar. lines 105–117; and Fuchs, Khorsabad Annals lines 105–117. Cf. text no. 2 lines 100–101+.

106 [...] x-ba-ni: P.E. Botta's copy has no trace of a sign before -ba-ni, while H. Winckler's copy has the trace of a ḪAL towards the bottom of the sign; A. Fuchs (Khorsabad p. 107 line 106 n. 1) suggests <sup>1</sup>GAG<sup>1</sup> or <sup>1</sup>RAB<sup>1</sup> based on the squeeze. [URU.bi]-ra-a<sup>2</sup>-ti: Winckler's copy has URU.bi-ra-a-ti, but Botta's copy has [...] -ra-ti and the squeeze currently has [...] -ra<sup>2</sup>-ti.

107 H. Winckler's copy has “[” before 4 LIM, but there is no matching “[” although square brackets are later put around [bi-ra-a]-. Thus, it is not clear what he saw on the squeeze for the part of the line between these markers.

110 [KUR].ú-ri<sup>1</sup>-[qa-tu]: Or [KUR].ú-ri<sup>1</sup>-[ak-ku/ki]; H. Winckler's copy has [KUR].ú-ri<sup>1</sup>-[ak-ki]. See line 99 above and text no. 2 line 92.

111 URU.ka-x-na<sup>1</sup> URU.ki-in-za-ar<sup>1</sup>-ba-ra<sup>1</sup>: The reading is based on the squeeze. P.E. Botta's copy has URU.ka-[x x] x ki-in-za-ar<sup>1</sup>-ba-x, while H. Winckler's copy has URU.ka-qu<sup>2</sup>-na-ki-in-za-ar-ba-ra. F. Thureau-Dangin (RA 24 [1927] p. 76) copied URU.ka<sup>1</sup>-x-na<sup>1</sup> URU.ki-in-za-ar-ba-ra<sup>1</sup>. Winckler puts “[” at the end of the line, after -nu, with no matching earlier “[”.

112 [(x)] URU.šú<sup>1</sup>-[x x x x (x)] KU: The reading is based on the current state of the squeeze; H. Winckler's copy appears to indicate URU<sup>1</sup>.šú- [...] -a<sup>1</sup>, with room for about four signs in the gap, but due to his manner of giving square brackets and indicating damage, this cannot be considered certain for the beginning of the passage, and the squeeze clearly has a KU form at the end, not <sup>1</sup>AL<sup>1</sup>. Following the traces on Winckler's copy, A.T.E. Olmstead (AJSL 47 [1930–31] p. 266) restored URU.šú-[an-da-ḥa]-a<sup>1</sup>, but as noted by A. Fuchs (Khorsabad p. 108 line 112 n. 2) that city lay in Mannea (although disputed with Zikirtu), while this passage deals with a different area. *zīm pānī*: The phrase literally means “appearance of the face,” but the meaning here is not clear. The tentative translation “face-guards)” for *zīm pānī* follows CDA p. 447 (cf. CAD Z p. 122) and assumes that they refer to the extensions from helmets used to protect the ears/checks. However, some Assyrian reliefs indicate that the severed heads of defeated enemies were at times collected and counted by Assyrian soldiers, and it is quite possible that this phrase refers to them instead; see also Fuchs, Khorsabad p. 319 n. 257.

113 URU.É-ga-ba-ia: Cf. text no. 7 line 64 URU.É-m<sup>1</sup>ba-ga-ia and text no. 28 URU.É-ba-ga-ia.

- 114b–117a) In order to subjugate Media [in the environs of the city Kār-Šarruk]in, I reinforced their (the people of the riverlands) [de]fenses (lit.: “[st]ructures”). [I received tribute from twenty-two [city] rulers of the powerful Med[e]s. [...] I conquered [(...) the ci]ty Kimirra of the land Bit-Ḥamban. I carried off as booty 1,530/1,630 people, together with their property, an[d ...]
- 117b–120a) In ord[er to conquer the Ionians, whose abode] is situated [in the] m[iddle of the s]ea (and) who from the dis[tant] pa[st] had killed pe[ople of the city Ty]re (and) [of the land] Que (Cilicia) and [...-ed] ..., I went down to the sea [in ship]s ... against them and struck (them) down with the sword, (both) young (and) old. (120) I conquer[ed] the cities Ḥa[r]rua, Ušnanis, (and) Qumas[i] of the land Que that Mitâ, king of the land Musku, had t[ak]en away, (and) I plundered them.
- 120b–123a) (As for) the Tamudu, [I]bādidi, Marsīma-[ni], (and) Ḥayappa (tribes), faraway Arabs who live in the desert, did not know (either) overseer (or) commander, and had never brought their tribute to any king, I struck them down with the sword of the god Aššur, my lord, deported the remainder of them, and (re)settled (them) in the city Samaria.

114 KUR.<sup>f</sup>ma<sup>1</sup>-da-a-<sup>f</sup>a<sup>1</sup>: P.E. Botta's copy has <sup>m</sup>da-a-<sup>f</sup>a<sup>1</sup> and H. Winckler's KUR.ma-da-a-<sup>f</sup>a<sup>1</sup>; KUR.<sup>f</sup>ma<sup>1</sup>- is clear on the squeeze.

115 For the restorations at the beginning of the line, see text no. 7 line 66, which has *maššartu* instead of *rikissin*. H. Winckler puts “[” at the end of the line, after -nu, with no preceding matching “[” bracket.

116 1 LIM <sup>f</sup>5+(1) ME 30<sup>1</sup>: P.E. Botta's copy has 2 LIM <sup>f</sup>5+(1<sup>1</sup>) [x] 30, and H. Winckler's 2 LIM 5 ME <sup>f</sup>30<sup>1</sup>, with a note indicating the 30 might be 50; however, the squeeze clearly has only 1 LIM and based on the spacing of the wedges, perhaps more likely 6 ME than 5 ME, followed by <sup>f</sup>30<sup>1</sup>.

117 Possibly restore *šuk-nu-uš* instead of *ka-šad* (as already noted by Fuchs, Khorsabad p.109 line 117 n. 1). The restoration LÚ.ia-am-na-a-a ša šú-bat-sún follows Winckler, AOF 1 p. 368. The Ionians are mentioned in several of Sargon's inscriptions; see the index of geographic, ethnic, and tribal names at the back of this volume. With regard to the Akkadian words for Ionia and Ionians, see Brinkman in *Studies Schoder* pp. 53–71; and Muhly in *Karageorghis and Kouka, Cyprus and the East Aegean* pp. 23–30. W. Röllig (RLA 5/1–2 [1976] p. 150) suggests that LÚ.ia-am-na-a-a might be Ionian pirates on the Cilician coast; but see Lanfranchi, *Melammu* 1 pp. 14–22. See also Rollinger, RA 91 (1997) pp. 167–172; and Rollinger in *Melammu* 1 p. 13 n. 20 and *Melammu* 2 pp. 233–264.

**Section 10** = lines 118–130 = II,11:1–13: See Winckler, *Sar. Annals* lines 92–104; Lie, *Sar. lines* 118–130; and Fuchs, *Khorsabad Annals* lines 118–130.

118 [ina] <sup>f</sup>MURUB<sub>4</sub><sup>?</sup> tam<sup>1</sup>-tim: P.E. Botta's copy has [x] GIŠ [x]-tim, while H. Winckler copies a Winkelhaken after the GIŠ and suggests it might be the remains of a ša. The squeeze currently has only indistinct traces before <sup>f</sup>tam<sup>1</sup>-tim and the copies in JA and IdF put the GIŠ in the second line of the slab. A.G. Lie reads [i-na a-<sup>h</sup>i tam]-tim. The proposed reading follows A. Fuchs (Khorsabad p. 109 line 118), but the spacing on the squeeze might suggest a longer restoration. [URU.šur]-<sup>f</sup>ri<sup>1</sup>: For the reading, see text no. 43 line 21; cf. Olmstead, *AJSL* 47 (1930–31) p. 266. a-lak x [x (x)]: Or a-lak x x of JA and IdF copies. Possibly a-lak-<sup>f</sup>tu<sup>1</sup>, following A.T.E. Olmstead (*AJSL* 47 [1930–31] p. 266) and Fuchs (Khorsabad, p. 109 line 118 n. 3); Fuchs (ibid. p. 320) tentatively translates “Handelsverkehr unterbrochen,” which is followed by F.M. Fales (SAAB 23 [2017] p. 235) “interrupted commercial traffic.”

119 [ina<sup>?</sup> GIŠ.MÁ<sup>?</sup>].MEŠ [(x)] <sup>f</sup>NA<sup>?</sup> šī: The restoration [ina GIŠ.MÁ].MEŠ follows Fuchs, Khorsabad p. 109 line 119 (cf. Grayson, *RIMA* 3 p. 36 A.0.102.6 ii 12–13), who then very tentatively suggests [KUR].<sup>h</sup>at<sup>2</sup>-ti<sup>2</sup> based on Grayson and Novotny, *RINAP* 3/1 p. 222 no. 34 line 23; the traces on the squeeze do not support the latter reading. The JA and IdF copies have [x (x)] GIŠ [x].MEŠ [(x)] <sup>f</sup>NA<sup>?</sup> šī, but the GIŠ may actually have been on the previous line (see the on-page note to line 118). A. Fuchs notes that the šī may have been written for ME, as in some other places.

121 -ma-[ni]: H. Winckler restores -[nu] rather than -[ni].

122 LUGAL ia-im-ma: As noted by H.W.F. Saggs (*JSS* 42 [1997]: 139), P.E. Botta's copy has a damaged area between the LUGAL and the IA which might suggest [a]-ia-im-ma. The squeeze would permit such a restoration, but does not require one.

- 123b–125a) [I] received as tribute from Pir'û (Pharaoh), king of Egypt, Sa[m]si, queen of the Arabs, (and) It'amar, the Sabaean, kings from the seashore and desert, gold — ore from the mountain(s) — precious stones, elephant ivory, seed(s) from ebony tree(s), every kind of aromatic, horses, (and) camels.
- 125b–126) For a second time, I brought about [the defeat] of Mitâ, king of the land Musku, in his (own) wide district and I (then) restored to their former status the cities Ḫarrua (and) Ušnanis, fortresses of the land Que (Cilicia) that he had taken away by force in the distant past.
- 127–133a) In my eighth regnal year, I marched to the lands Mannea and Media. I received tribute from the people of the lands Mannea, Ellipi, (and) [Media], city lords of the mountains. (As for) Zizî (and) Zalâ, the city lords of [the district] Giz[ilbunda, from whom] the kings who preceded me had never received tribute, I received tribute from them] and ... (130) ...] lands [...] I inflicted a defeat on [Mitatti of the land Z]ikirtu. [I (surrounded and)] conquer[ed] three fortified cities, together with twenty-four settlements in their environs, [...]. I plundered them (and) burned down Parđa, his royal city, with fire. However, that (man) (Mitatti), together with the people of [his] land, fled and their whereabouts have never been discovered.

123 URU<sup>1</sup>.sa-<sup>r</sup>me<sup>2</sup>-ri-na: P.E. Botta's copies have šI for ME, while H. Winckler's copy has ME and the squeeze is unclear, allowing either reading; note the commentary to line 119. KUR.a-ri<sup>t</sup>-bi: Possibly KUR.a-rib-bi, following Winckler's copy; however, Botta's copy in Monument de Ninive has a KID for the RI and his copies in JA and IdF have one long horizontal wedge cutting through three vertical wedges. m<sup>pi</sup>-ir-<sup>r</sup>i<sup>1</sup>: According to A. Spalinger, Pir'û, which stands for pharaoh, must refer to an Egyptian ruler and not one of the Kushite rulers of Egypt (JARCE 10 [1973] p. 100). For tribute from Pir'û, Samsi, and It'amar, see also text no. 7 line 27. Note also text no. 82 vii 30'' with regard to rebels in the southern Levant requesting military aid from Pir'û in 711.

125b–126 Cf. text no. 74 v 34–40.

127 [x] KI [x x x (x)]: So the copy in Monument de Ninive and essentially that of H. Winckler; the squeeze is not helpful at this point. The JA and IdF copies have x ki<sup>t</sup> [(x)] MAN x<sup>r</sup>A<sup>2</sup>. As noted by A. Fuchs (Khorsabad p. 110 line 127 n. 2), we would expect KUR.ma-da-a-a here.

128 m<sup>za</sup>-la-<sup>r</sup>a<sup>1</sup>: P.E. Botta's copy in Monument de Ninive has m<sup>za</sup>-la-ERIM, but F. Thureau-Dangin (RA 24 [1927] p. 76) read m<sup>za</sup>-<sup>r</sup>la<sup>1</sup>-a, based on the squeeze, and the squeeze currently would support the suggested reading. The copies in JA and IdF are closer to A (although with two question marks and an angled wedge at the front) than ERIM. URU.<sup>r</sup>MEŠ<sup>t</sup>-ni: Botta's copy in Monument de Ninive has URU.ME-U-ni, without indicating the presence of any damage; the JA and IdF copies are similar but also have a small Winkelhaken attached to the beginning of the NI, which is here assumed to be the end of the MEŠ. URU.<<x>>-gi-<sup>r</sup>zi<sup>t</sup>-[il-bu-un-di na-gi]-i<sup>t</sup>: Botta's copy has URU x gi-<sup>r</sup>zi<sup>t</sup>\*(copy: MIN) [x x x (x)] LÚ. As noted by A. Fuchs (Khorsabad p. 111 line 128 n. 2), the traces between the URU and GI may be a copyist's (i.e., Botta's) error. Based on the spacing of Botta's copies, there is not room for the proposed restoration, but he is not always accurate with regard to the spacing on his copies.

130 The JA and IdF copies include a few more indistinct traces than appear in the copy in Monument de Ninive; they are not indicated in the score.

Section 11 = lines 131–143 = II,12:1–13: See Winckler, Sar. Annals lines 105–117; Lie, Sar. lines 131–143; and Fuchs, Khorsabad Annals lines 131–143.

131 -kir-: The copy in Monument de Ninive has MA-ḪA, but the JA and IdF copies have -kir-, with just a little space after the three horizontal wedges before the vertical wedges. [(x x x)]: P.E. Botta's copies indicate damage at the end of the line, with room for two or three signs; H. Winckler's copy indicates no damage at the end of the line, but he had not collated any squeeze. Thus, it is not clear if there was anything missing at the end of the line or not. A. Fuchs (Khorsabad p. 111 line 131 n. 1) suggests that if there was anything missing, it might be al-me, "I surrounded."

132 -šu-<sup>r</sup>ud<sup>t</sup>: P.E. Botta's copy in Monument de Ninive has -MA-[x], but the JA and IdF copies have an additional angled wedge-head at the beginning of the first sign and follow this sign with two angled-wedgeheads.

133b-147a) I defeated countless (troops) of Ursâ (Rusâ), the Urartian. (and) captured two hundred and sixty members of his royal family (and) his cavalymen. In order to save (135) his [li]fe, he mounted a mare and took to the hill(s). I pursued him over a distance of five leagues, from Mount Uau[š as far] as Mount Zimur. I took away from him the land Uišdiš, a district of the land Mannea, [and] gave (it) [t]o Ullusunu, the Mannean. I conqu[er]ed the city Ušqaya – a fortress that was constructed in the pass to the [dis]trict Zaran[da] (and) on Mount Mallâu, a mountain with juniper tree(s) – together with its one hundred and fifteen settlements. I conquered (and) burned down with fire [the city] Aniaštania, which is on the border of the land Bīt-Sangibuti, the cities Tarui (and) Tarmakisa of the land Dalāy[a], (140) the environs of the city Ulḥu, which is (located) at the foot of Mount Kišpal, (and) twenty-one fortified cities, together with one hundred and forty settlements [in] their environs, which are (located) on Mount Arzabia. I conquered [seven] fortified ci[ti]es, together with thirty settlements in their environs, which belong to the land Armari[ya]l[î] (and) are (located) at the foot of] Mount] Ubianda. [I ccon]quered the city Arbu, where Rusâ ... [..., the city] Riyar, a city belonging to Ištardūrī (Sarduri), [...]. I conquered (and) burned down with fire thirty (145) [for]tified cities of the district Ayaid (Ayādi), which is (located) on the shore of the sea, the cities Arg[išt]iun[a] (and) Qallania – which were constructed upon (and) between the mountains Arši[du (and)] M[a]hḥ[a]u[n]nia – (and) five fortresses in the environs of the land Uay[is], [tog]let[her] with [f]orty settlements of the district Uayis.

135 <sup>r</sup>MEŠ<sup>1</sup>: The JA and IdF copies have a vertical wedge followed by a Winkelhaken, although nothing of the sign is given on the Monument de Ninive copy. 5: The copies in JA and IdF have 6.

140 KUR.kiš-pal: Cf. KUR.kiš-te-er in text no. 65 line 212. 21: Or 20+[20/30]+1, but note 21 in text no. 65 line 239. <sup>r</sup>1<sup>1</sup> ME 40: 1 ME <sup>r</sup>46<sup>†1</sup> in text no. 65 line 268.

142 For the restoration at the beginning of the line, see text no. 65 line 272. JA and IdF have [...] x <sup>r</sup>URU<sup>1</sup>.MEŠ at the beginning of the line, although nothing before the MEŠ is found on the copy in Monument de Ninive. The traces before the <sup>r</sup>URU<sup>1</sup> may be two of the wedgeheads of the number, i.e. [5]+2.

143 For the restoration at the beginning of the line, see text no. 65 line 272. <sup>m</sup>ru-sa-a ĤI AN x [...]: P.E. Botta's copy in Monument de Ninive has <sup>m</sup>ru-sa-a> AN x [...], but his copies in JA and IdF have <sup>m</sup>ru-sa-a ĤI AN x [...], where the ĤI AN could of course be A'.

Section 12 = lines 144–156 II,13:1–13: See Winckler, Sar. Annals lines 118–130; Lie, Sar. lines 144–156; and Fuchs, Khorsabad Annals lines 144–156.

144 H. Winckler's copy has MURUB<sub>4</sub><sup>2</sup> after BÀD.

145 KUR.a-ia-id: The reading follows Ch.-F. Jean's (RA 24 [1927] p. 79); the squeeze currently has <sup>r</sup>KUR.a-ia-id<sup>1</sup>. Both P.E. Botta and H. Winckler's copies have KUR.a-RA-a-id; F. Thureau-Dangin initially suggested KUR.a-<sup>r</sup>ia<sup>1</sup>-a-id (TCL 3 p. 70 n. 5), but later retracted that reading and read KUR.a-i-a-id (RA 24 [1927] p. 75 n. 2). Cf. text no. 65 line 297 KUR.a-ia-di. URU.qa-<sup>r</sup>al<sup>1</sup>-la-<sup>r</sup>ni<sup>1</sup>-a: The reading follows the squeeze and Jean's copy. Cf. text no. 65 line 297 ID.qa-al-la-ni-a. Botta's copy has URU.qa-<sup>r</sup>al<sup>1</sup>-[(x)] and Winckler's URU.qa-du-la-ni<sup>2</sup>-a.

146 [KUR].<sup>r</sup>maḥ-<sup>r</sup>ha-un-ni-a<sup>1</sup>: The reading is based on the squeeze, Ch.-F. Jean's copy, and Thureau-Dangin, TCL 3 p. 70 line 120; H. Winckler read KUR.ar<sup>2</sup>-za-ú<sup>2</sup>-ni<sup>2</sup>-a. A. Fuchs (Khorsabad p. 113 line 146) restores ù at the very beginning of the line, but there would not appear to be room for this.

I distributed] the remainder of their possessions to [...]

147 [10]+30: The reading is based Ch.-F. Jean's copy of the number (two Winkelhaken on top of one Winkelhaken) as opposed to the copies of P.E. Botta and H. Winckler that have three Winkelhaken in a row; see also text no. 65 line 305 for the number 40. KUR.ú-a-ii-<sup>f</sup>is<sup>1</sup>: Winckler's copy has KUR.ú-a-ii-uš, but the reading -<sup>f</sup>is<sup>1</sup> follows Jean and Thureau-Dangin, TCL 3 p. 72 line 121 (but see his n. 2).

149 iš-<sup>f</sup>pu<sup>1</sup>-[ra]: The reading follows Thureau-Dangin, TCL 3 p. 72 line 123, but as noted by A. Fuchs (Khorsabad p. 113), a reading iš-<sup>f</sup>ku<sup>1</sup>-[na] is also possible. The traces on the squeeze do not fit H. Winckler's copy iš-<sup>f</sup>pu<sup>21</sup>-[ru].

150 <sup>f</sup>ša-ru<sup>21</sup>: The reading follows Thureau-Dangin, TCL 3 p. 72 line 124. While the copy by Ch.-F. Jean would allow <sup>f</sup>ša<sup>1</sup>, the reading of the second sign is less clear. The squeeze currently only has indistinct traces of the two signs, but ones which do not really fit RU. H. Winckler's copy has [...] BAR with possible earlier traces indicated by three question marks. 1 GIŠ.GIGIR-ia: Winckler's copy omits the 1, although it is indicated in his transliteration.

151 KUR.ši-ia-ak: So Ch.-F. Jean's copy (RA 24 [1927] p. 79), against P.E. Botta's and H. Winckler's copies that have E for IA; the squeeze suggests -<sup>f</sup>ia<sup>1</sup>.

154 6,170: Text no. 65 line 349 has 6,110.

155 <sup>f</sup>GU<sub>4</sub><sup>21</sup>.MEŠ: None of the published copies shows a trace before the MEŠ, but A. Fuchs (Khorsabad p. 114 line 155) indicates a trace of the end of a GU<sub>4</sub>. There is a trace on the squeeze, but it is not clear that is part of a GU<sub>4</sub>, although that sign would be expected (see also Thureau-Dangin, TCL 3 p. 72 line 129). 100,225: Text no. 65 lines 349 and 424 have 1,235 and 1,285 respectively.

156 x x x <sup>f</sup>ša<sup>1</sup>: The reading is based on the squeeze; H. Winckler's copy has x x [(x)]-e ša and Ch.-F. Jean's copy x [x] x x <sup>f</sup>ša<sup>1</sup>.

Section 13 = lines 157-169 = II,14:1-13: See Winckler, Sar. Annals lines 131-143; Lie, Sar. lines 157-169; and Fuchs, Khorsabad Annals lines 157-169. Cf. text no. 2 lines +188-202.

158 <sup>f</sup>62<sup>1</sup>: The reading is based Ch.-F. Jean's copy; both P.E. Botta's and H. Winckler's copies have [...] +42. [...] +27: The reading is based Botta's and Jean's copies; Winckler has 37.

- 161b–165a) I caused there to b[e] lamenation [in the wide land] Ur[arṭu] (and in) all [the mount]ains, and I made [Ursâ (Rusâ), their king, (use) flint (blades), raz]ors, scalpels, (and) [... (to slash himself in mourn- ing) for as long as he li]ved. [I m]a[de] that district (Mušašir) [(part of) the territory of Assyria and] as- signed [it t]o the auth[ority of] a [eunuch of m]ine, the pala[ce] herald. [The awesome splendor] of the god Aššur, m[y] lord, [overwhelmed U]rsâ (Rusâ), [the U]r[rar[ṭi]an, and (so) with his own [iro]n [dagge]r he stabbed (himself) in the heart like a pig and [put an en]d to his life.
- 165b–170a) In my [ninth regnal year], I marched to the lands Elli[pi, M]edia, and Karalla. (As for) the people of the land Karalla w[ho] had driven out my [eun]uchs [and] elevated [A]mitašši, the brother of Aššur-lē'i, over them, I st[ru]ck them down with the sw[ord] on [Mou]nt Ana, [a mounta]in peak, and (then) receiv[ed] i[n] my (military) camp 2,200 of their face- (guards) (as trophies). I pursued Amitašši and [...] him, together with his allies, on Mount Šurda, [...].
- 170b–172a) [The peo]ple of the land ḥ[ab]ḥu (...) hear]d [of the harsh deeds that I had done in the land Karalla;

160 Following Fuchs, Khorsabad p. 115 line 160 n. 2, the restoration is based on text no. 7 line 76 and may be followed by [NÍG.GA É.KUR]^{-}šú^{-}1- [(nu)] (cf. text no. 65 line 368).  $^{\dagger}šU^{\dagger}1$ : H. Winckler's copy has ÁŠ, Ch.-F. Jean's  $^{\dagger}šU^{\dagger}1$ , and P.E. Botta's would allow either; the squeeze suggests possibly  $^{\dagger}šU^{\dagger}1$ .

161  $[x] \ x \ [x] \ x \ [x]$ : P.E. Botta has  $[x \ x \ (x)]$  MA  $[x \ (x)]$  and H. Winckler has  $x \ [x \ (x)] \ x \ MA \ [x \ x \ x]$ .  $ú-še^{-}rib^1$ : The reading follows Ch.-F. Jean's copy; Botta has  $ú-še-[x]$  and Winckler  $ú-še-šú^{\dagger}1$ .

162 The transliteration is based on Ch.-F. Jean's copy and Thureau-Dangin, TCL 3 p. 74 line 136, as well as text no. 2 lines 189–190. P.E. Botta's and H. Winckler's copies have  $[x \ x] \ šU \ [x \ x] \ x-la-ma$  and LUGAL-šú<sup>1</sup> [nu-šur-ti-ki]  $^{\dagger}hu^1-la-ma$  for the beginning of the line respectively. It is not clear from the Winckler's copy if the LUGAL was actually seen or is a restoration; his edition has  $rap-ši$  KUR for the beginning of the line (his line 136). Winckler's copy also has a trace of the A of  $a-na$ .  $^{\dagger}qu-pé-e^1$ : The transliteration is based on Jean's copy and the squeeze.

163 The restoration at the beginning of the line is based on text no. 2 line 191. Ch.-F. Jean's copy has a trace of the sign before  $áš-kun$ .

164  $^{\dagger}be-lí-ia^1$ : The reading follows Ch.-F. Jean's copy; P.E. Botta's and H. Winckler's copies have  $[x]^{-}lí-ia^1$  and [EN]^{-}ia<sup>1</sup> respectively.

165  $[is-ḥup]-šú-ma$ : Text no. 2 line 194 has  $is-ḥu-pa-šú-[ma]$ , but the spacing on all three copies (P.E. Botta, H. Winckler, and Ch.-F. Jean) and the squeeze suggests  $[is-ḥup]-šú-ma$ .

166  $[KUR].^{\dagger}ma^1-da-a^{-}a^1 \ ú$ : The reading is based on the squeeze and Jean's copy; cf. Winckler's copy, which has  $[KUR.É]-da-a-[a-uk]-ki$ .

168  $^{\dagger}i^1-[na]$ : Ch.-F. Jean's copy and the squeeze have space for only one sign to be restored; cf. Botta's and Winckler's copies.

169  $^{\dagger}EGIR^{\dagger}m$ : Only the trace of the head of a final vertical wedge is preserved on the squeeze and indicated on Ch.-F. Jean's copy; nothing is shown on P.E. Botta's or H. Winckler's copies, although Winckler does restore EGIR. A.G. Lie (Sar. p. 30) has  $[ar]^{-}ki^1$  and A. Fuchs (Khorsabad p. 118 line 169)  $[ar]^{-}ki^1$ , but the spacing on all the copies (Botta, Winckler, and Jean) and the squeeze would suggest there was not sufficient room for that restoration.  $[(x)] \ x \ [(x \ x)] \ x \ [(x)]$ : The reading is based on Jean's copy; H. Tadmor (JCS 12 [1958] p. 89) suggests restoring "killed" at the end of the line and A. Fuchs (ibid. n. 4) suggests  $^{\dagger}ú^1-[šam]^{-}qit^1$ , "I [struck] do[wn]," noting that the preposition  $i-na$  speaks against restoring the verbs  $nabalkutu$  or  $naparšudu$  ( $^{\dagger}ib^1-[bal]^{-}kit^1$  or  $^{\dagger}ip^1-[par]^{-}šid^1$ ).

Section 14 = lines 170–182 = II,15:1–13: See Winckler, Sar. Annals lines 144–156; Lie, Sar. lines 170–182; and Fuchs, Khorsabad Annals lines 170–182. Cf. text no. 2 lines 205–217a and text no. 74 iii 42–53.

170–182 Cf. text no. 2 lines 205–217a. Line 170: The tentative reading is based on text no. 82 v 31'.

171  $^{\dagger}ḥat^{\dagger}1-ti$ : P.E. Botta's copy has  $[x]-ti$  and H. Winckler's  $-PA-ti$ ; the sign before TI is indistinct on the squeeze. Winckler's copy suggests that he may have taken all the visible signs as part of a place name since he restored KUR immediately before the preserved signs [... KUR<sup>?</sup>]. $ma-pa/ḥat-ti^{-}ra^1$ , but as noted by A. Fuchs (Khorsabad p. 119 line 171 n. 2), no such place is otherwise attested. For the restoration at the end of

their own] fear(s) (then) [fell upon them (and) they sent their messenger to me to do obeisance (to me). I] assigned th[em to the authority of a eunuch of mine, the governor of the land Lulumû].

172b–184a) [(As for) Daltâ of the land Ellipi, a submissive subject who pulled my yoke ... (175) ...] everyth[ing ... I had] him [surrou]nded and [...] their [...] them] in bondage [...] (180) ... the land Ellipi because of the seizure of ... [...] with entreaties at the same ti]me to Azuk[tu ... he besought] me and I listened to his word(s). [...] I ordered [him (to continue) to exer]cise his kingship, made Daltâ happy, and brought order to his disturbed [land].

184b–191a) (With regard to) the land Ba'it-ili, a district of the land Media that is on the b[o]rder of the land Ellipi; the lands Absaḫutti, Parnuatti, (and) Utirna; the city Diristânu of the land Uriakku; the land Rimanuti, a district of the land Uppuriya; the lands Uyadaue, Bustis, Agazi, Ambanda, (and) Dananu, [far]-off districts of the territory of the Arabs in the east; and the district(s) of the powerful Medes, who [had thr]own off the yoke of the god Aššur and roamed about the mountain(s) and desert like [thi]eves — I threw firebrands into all their settlements and [tu]rned all their districts into forgotten (ruin) mounds.

191b–194a) I received 4,609 ho[rs]es, mules, oxen, (and) sheep and goats, [i]n countless numbers, as tribute from Ullusunu, the Mannean, [D]altâ of the land Ellipi, Bē[l]-aplū-iddina of the la[nd] Allabria, (and) from forty-five city lords [of] the powerful Medes.

the line, see line 365. Fuchs (ibid. n. 1) suggests that the beginning of the line might have had [ep-šet ma-ru-uš-ti ša i-na KUR.kar-al-li e-tep-pu-šu iš]-<sup>1</sup>mu<sup>1</sup>-ma (see text no. 82 v 34'–35') or, less likely, [a-lak gir-ri-ia ru-qiš iš]-<sup>1</sup>mu<sup>1</sup>-ma (see text no. 7 lines 101–102) and that *im-qut-su-nu-ti-ma* might have been followed by LÚ.DUMU šip-ri-šú-nu/un ša e-peš ar-du-ti iš-pu-ru-nim-ma (see text no. 82 v 35'–36').

172 For a possible restoration, see text no. 2 line 207.

178 The restoration is based on text no. 2 line 213; H. Winckler's copy has [i-na u<sub>4</sub>]-me-šu-ma.

180 P.E. Botta's and H. Winckler's copies, as well as the squeeze, would allow GIŠ.<sup>1</sup>TUKUL<sup>1</sup>, "weapon."

181 For the restoration at the beginning of the line and the reading of the name, see text no. 2 lines 216 and 209 respectively.

182 The restoration at the beginning of the line follows text no. 7 line 120.

**Section 15** = lines 183–195 = II,16:1–13; See Winckler, Sar. Annals lines 157–169; Lie, Sar. lines 183–195; and Fuchs, Khorsabad Annals lines 183–195. Cf. text no. 2 lines 217b–228a. See Figure 2 for a photo of the middle section of the squeeze of Room II, slab 16.

183 <sup>1</sup>ú-tib<sup>1</sup>: The reading follows the copy in Thureau-Dangin, RA 24 (1927) p. 76. Both P.E. Botta's and H. Winckler's copies have no trace of the ú and an anomalous form for the DIB. The squeeze currently shows traces of what could be an ú and indistinct traces of a sign that would fit either F. Thureau-Dangin's or Botta's and Winckler's copies.

188 H. Winckler's copy omits the -šī after <sup>d</sup>UTU.

190 -ma\*: P.E. Botta's copy has ÁŠ and this is supported by the squeeze, against H. Winckler's copy MA.

192b–193a See text no. 82 vi 14'–37' for the names of some of the Median rulers who brought tribute to Sargon.

193 H. Winckler's copy has a <sup>1</sup>ME<sup>1</sup> following the number 9, but there are no traces of this (unwanted) sign on the squeeze. <sup>1</sup>US<sub>5</sub><sup>1</sup>: P.E. Botta's copy has an abnormal sign form, while Winckler's is correct for US<sub>5</sub>; the traces on the squeeze are indistinct and could fit either Botta's or Winckler's copies.

- 194b–198a) (As for) Ambaris of the land T[abal, king of the land Bīt-Pu]rutaš, [the family of who[se father] Ḫull[ī], a ruler, a predecessor of mine, [had bro]ught [to Assyria together with booty from] his [land], (when) ... the [great] gods [determi]ned the firm establishment of m[y] reign, they (Ḫullī and his family) were [on] my mind. [I had] Ḫullī [sit (again)] on [his] royal throne. I gathered together [the people of the land Bīt]-P[u]rutaš and assigned (them) to his authority. In the time of Ḫull[ī, his father], I had granted him (Ambaris) [...], gave him a daughter (of mine), (along) with the city Ḫilakku, and (thus) ex[anded his land]. 198b–204a) [However, that (man) (Ambaris), a H]ittite who did not protect justice, sent to Ursā (Rusā), king of the land Urartu, Mit[â, king of the land Musku, (200) and the ki]ngs of the land Tabal about taking away territory of mine. [I mustered] the troops of the god [Aššur and] overwhelmed [the land Tabal to] its [fu]ll [extent] as if with a net. (Then), I brought [in bond]age to Assyria Ambaris, king of the land Bīt-Purutaš, toge[ther with the (other) offspring of his father's house (and) the nobles of his land], (along) with one hundred of his chariot(s). [I had] the lands Bīt-P[ur]utaš (and) Ḫila[kku dwell (as safely) as in a meadow and ...] ... had enclosure walls built in it. [I (re)settled (there)] people from the lands that the god Aššur, [my] lor[d], had conquered. I set [a eunuch of mine as provincial governor over the]m (and) imposed upon them (the same) corvée duty (as if they were) Assyrians. 204b–208a) In [m]y tenth regnal year, (as for) Tarḫun- [azi of the city Melid, (an evil Hittite) who did not

**194–196a** Line 194: P.E. Botta's copy has irregular signs for the -<sup>h</sup>ur<sup>1</sup> (copy HI-PA), -is<sup>\*</sup> (copy: DI), -iš<sup>\*</sup> (copy: IB), -lik, and pa<sup>\*</sup> (copy GIŠ)-, and H. Winckler's copy has abnormal signs for the -is<sup>\*</sup> (copy: DI), NUN<sup>\*</sup> (copy: É), -lik<sup>\*</sup> (copy: KU), and pa<sup>\*</sup> (copy: KA)-. The squeeze is currently unclear in most cases, except that it is likely -<sup>r</sup>iš<sup>†</sup> not DI, -<sup>r</sup>iš<sup>†</sup> not IB, and clearly pa<sup>1</sup> not KA. F. Thureau-Dangin's copy would allow -<sup>r</sup>iš<sup>†</sup>, -<sup>r</sup>lik<sup>†</sup>, and -<sup>r</sup>pa<sup>1</sup>. Lines 194b–196a: The exact understanding of the passage is not completely clear. A. Fuchs (Khorsabad p. 323 and see his n. 283) translates "(Was) Ambaris von Tabal, [den König des Langes Bīt]-Purititš (anlangt), so hatte mein fürstlicher Vorgänger die Familie des Ḫullī, [...] (und) die Beute aus seinem Land nach Assyrien geholt. Als dann ... die [großen] Götter mir eine feste Regierung *bestimmten*, da waren sie mir noch im Gedächtnis." He assumes that it was Ḫullī and his family that was on the king's mind (ibid. n. 284), and this is followed here. See also text no. 2 lines 226b–228a.

**195** The tentative restoration is based in part on text no. 2 line 227 and follows A.G. Lie (p. 32); for m<sup>h</sup>ul-li-i AD-šú, see text no. 7 line 30. [ú]-<sup>r</sup>ra<sup>1</sup>-[áš]-šu-nu-[ti] i-<sup>r</sup>na<sup>†</sup>: H. Winckler's copy has [...] URU.MEŠ<sup>1</sup>-šu-nu-x DUMU<sup>1</sup> x. Lie (p. 32) reads i-<sup>r</sup>na<sup>†</sup> GIŠ.TUKUL<sup>?</sup> DINGIR.MEŠ for the end of the line, but Winckler states that the second sign is not TUKUL. The signs are indistinct on the squeeze, but might conceivably be <sup>r</sup>pa-<sup>r</sup>ni<sup>†</sup> for GIŠ UD.

**Section 16** = lines 196–208 = II,17:1–13: See Winckler, Sar. Annals lines 170–182; Lie, Sar. lines 196–208; and Fuchs, Khorsabad Annals lines 196–208. Cf. text no. 2 lines 228b–238+.

**196** A.G. Lie (p. 32) restored [GAL.MEŠ i]-<sup>r</sup>na<sup>1</sup> at the beginning of the line. Cf. i-na uz-ni-šú-nu ib-šī-ma in text no. 65 line 40, as noted by A. Fuchs (Khorsabad p. 123 line 196 n. 2). The restoration at the end of the line is based on text no. 74 v 16 and cf. text no. 7 line 30.

**197** -pu<sup>†</sup>: P.E. Botta's copy has ŠE with no indication of any damage after it; the sign is not preserved on the squeeze.

**198** For the very end of the restoration, see text no. 74 v 20.

**200** -<sup>r</sup>ke<sup>1</sup>: P.E. Botta's copy has -<sup>r</sup>RIM<sup>1</sup>- and H. Winckler's -ke-; the squeeze is not clear but seems to fit -<sup>r</sup>ke<sup>1</sup>-. <sup>r</sup>d<sup>2</sup>[aš-šur]: Botta's copy has GIŠ and Winckler's <sup>r</sup>áš<sup>†</sup>. Only the trace of the head of one horizontal wedge in the middle of the line is really visible on the squeeze.

**201** LÚ.SAG.KAL-ut: Restored from text no. 2 line 233; written a-šá-red-du-ti in text no. 7 line 31.

**202** -<sup>r</sup>pu-ru<sup>1</sup>: P.E. Botta's copy has -ŠE-A- with no indication of any damage to the area, while H. Winckler has -pu-ru-; the squeeze is not clear at this point but would allow -<sup>r</sup>pu-ru<sup>1</sup>-.  
**203** It is not clear what should be restored at the beginning of the line. A.G. Lie (p. 32) and A.T.E. Olmstead (AJSL 47 [1930–31] p. 268) read [ḫa-an-du<sup>†</sup>]-re-e kir-<sup>h</sup>e, while D.D. Luckenbill read [...] -ri e-piš DÜG (reading ṭābi for DÜG), "which does good" (see ibid.).

**204** -<sup>r</sup>un<sup>†</sup>: The traces as copied by P.E. Botta and H. Winckler are the ends of two horizontal wedges, one on top of the other, but these might simply be the right edges of the heads of vertical wedges, one on top of the other; no traces are visible on the squeeze. Text no. 2 line 235 has UGU-šú-nu. Following F.W. Geers, A.T.E. Olmstead (AJSL 47 [1930–31] p. 268) notes the possibility of adding LÚ.<sup>h</sup>at-tu ḪUL, "an evil Hittite," between URU.me-lid-da-a-a and la a-dir, but there would not seem to be room for this.

- 205) <sup>m</sup>tar-ḥu-<sup>r</sup>na<sup>1</sup>-[zi URU.me-lid-da-a-a (...) la a-dir] [zik-ri] <sup>r</sup>DINGIR<sup>1</sup>.MEŠ GAL.MEŠ KUR.kam-ma-nu rap-šú ša <sup>r</sup>i-na<sup>1</sup> tu-kul-ti <sup>d</sup>aš-šur be-lí-ia [e<sup>†</sup>-ki-mu <sup>m</sup>gu-un-zi-na-nu]

fear the words of the] great [go]ds, (and as for) the wide land Kammanu, which [I had taken away] with the support of the god Aššur, my lord [(and) who]se [king Gunzinānu] I had driven out and (then) had [him (Tarḥun-azi)] s[it] on his (Gunzinānu's) royal throne [... (whom) I] made do obeisance to me, to (whom) I handed over lo[rd]ship of [wide] lands, [(and whose)] understanding [...], he [repeatedly sent to Mitâ, king of the land Musku], (messages) hostile to Assyria.

208b–217a) Angri[ly, I conquered] the land Kammanu to [its full] extent [...]. I smashed h[is] royal city Melid like a pot (and) considered all his people as if (they were) flocks of sheep and goats. (210) However, that (man) (Tarḥun-azi) entered the city [Til]-Garimme in order to save his life. I overwhelmed that city like a cloud. They took fright at the awesome radiance of my weapons and op[en]ed [th]eir (city) gate. I threw in [ir]on fetters Tarḥun-azi, their ruler, together with his fighting men, and (then) [brou]ght to my city Ašš[ur] his wife, his sons, (and) his daughters, (along) with five thousand of his captured warriors. I reorganized (the administration of) the city Til-Garimme (and) brought there people whom I had captured. I had (them) occupy [the land Kam]manu in its entirety, (215) and assigned (them) to the authority of a eunuch of mine. I imposed upon them the (same state) service (and) corvée duty a[s (in the time) of] Gunzinānu. I erected ten strong fortresses around it (the land Kammanu) a[nd] allowed its [people] to live in peace.

217b–221) I strengthened the garrison(s) (of) the cities Luḥsu, Purṭir, Anmurru, Ki[aka], (and) Anduarsalia against the land Uruarṭu. I erected the cities Usi, Usia[n], (and) Uargin on the border of the land Musku and seized (control of) their entry [point]s (lit.: “ga[te]s”) so that there should be no escape (lit.:

205 For the restoration <sup>m</sup>gu-un-zi-na-nu at the end of the line, see Lie, Sar. p. 34 n. 6.

207–208a Line 207: Text no. 112 line 10' has KUR.MEŠ-šú-nu rap-šá-a-te, “their wide lands.” For the restoration at the end of the line, cf. text no. 74 v 49–50. Following J. Renger (CRRA 32 p. 117), perhaps restore ú-zu-un-[šú a-na <sup>m</sup>mi-ta-a LUGAL KUR mus-ki / šá-kin-ma], “[his] attention [was directed (lit.: “set”) towards Mitâ, king of the land Musku].”

208 The tentative restoration at the end of the line follows H. Winckler (p. 32) and A.G. Lie (p. 34).

Section 17 = lines 209–221 = II,18:1–13: See Winckler, Sar. Annals lines 183–195; Lie, Sar. lines 209–221; and Fuchs, Khorsabad Annals lines 209–221. Cf. text no. 2 lines +256–259a.

210 With regard to Til-Garimme (Tilgarimmu) in Neo-Assyrian sources, and a possible location in the plain of Elbistan, see Yamada, Aof 33 (2006) pp. 223–236 and Bagg, Rép. Géogr. 7/1 pp. 256–257.

213 aš-<sup>r</sup>šur<sup>†</sup>: P.E. Botta's copy has aš-BAR or AN, and H. Winckler's aš-<sup>r</sup>šur<sup>†</sup>; the squeeze has aš-[...]. DU<sub>6</sub>\*: The squeeze has DUL.

214 The translation “to reorganize (the administration of) GN” for GN ana eššūti šabātu is based on CAD E p. 375; see also CDA p. 83.

217 <sup>r</sup>pur<sup>2</sup>-tir<sup>1</sup>: P.E. Botta's copy has UN-SI-A and H. Winckler's pur-tir, with the PUR marked “sol”; the squeeze has <sup>r</sup>pur<sup>1</sup>-tir<sup>1</sup>, where the traces of the first sign would fit both PUR and UN. <sup>r</sup>URU<sup>1</sup>.ki-[a<sup>2</sup>-ka<sup>2</sup>]: A.G. Lie (p. 36), following E. Forrer (Provinz. p. 75), read <sup>r</sup>URU<sup>1</sup>.ki-[ia-ka<sup>2</sup>] and A. Fuchs (Khorsabad p. 127 line 217) <sup>r</sup>URU<sup>1</sup>.ki<sup>1</sup>-[a<sup>2</sup>-ka<sup>2</sup>].

218 -<sup>r</sup>an<sup>†</sup>: P.E. Botta's copy has a horizontal wedge running into a vertical wedge, followed by a damaged area, while H. Winckler's copy has AN with a question mark. Only the head of a horizontal wedge is visible on the squeeze.

219 -<sup>r</sup>šú<sup>2</sup>-un<sup>†</sup>: The reading follows the squeeze, but the traces are not clear. P.E. Botta's copy has [x (x)]; it is not clear from H. Winckler's copy if he saw -[šú-un] or -<sup>r</sup>šú-un<sup>†</sup>, although his edition has -šú-un (Winckler's line 193). A. Fuchs (Khorsabad p. 128 line 219) read -[šú]. Instead

“exit”). (220) (Finally), I constructed the cities Ellibir (and) Šindarara against the people [of the land Kasku]. I g[ave] his (Tarḥun-azi’s) royal city [Meli]d, as well as the district [in its environs, (...) to] Mut[al]lu of the land Kummuhu.

222–234a) At that time, (everything) that was hidden in the mountains of the land Ḥatti (Syria) was revealed (to me). [(...)] They brought to me during my reign [...] and I heaped up the property of the land [Ḥatti (...). On Mount ... was produced] refined [...], appropriate for a palace; (on) Mounts Laris’u, Šuruman, [(and) ... was produced] (225) the creation of the god Nudimm[u]d (Ea), shining copper; on Mounts Tu[šanira, ...-durini], (and) Elikudurini was produced iron; (the part of) Mount Lammun that is (located) be[tw]een [Mount] U[... and Mount ...] produced lead, which whitens their dirty state; (the part of) Mount [Lammu]n [that is (located)] facing [... produced] pure alabaster; Mount Ammun, a mountain [that is (located)] facing [... produced] choice [BAR.GÜN.GÜN.NU-(stone)], fit for royalty (and) as white as pale lapis lazuli [...]; (230) (and) Mount Ba’il-šapūna, a great mountain, [produced at the] s[ame time] copper. I then mixed mound(s) of ore from those mountains, depos[ited (them)] into furnac[es ..., (and)] watch[ed] their smelting. I stored up inside my city Dūr-Šarrukīn countless possessions that my ancestors had never received; as a result, in Assyria the exchange rate for silver is fixed as if it were for bronze.

of the translation “seized (control of) their entry [point]s (lit.: “ga[te]s”) so that there should be no escape (lit.: “exit”),” possibly understand following Fuchs (Khorsabad p. 324) “bemächtigte ich mich seiner (Ausfall)tore, so daß (aus diesem Land nun) nichts mehr (nach Assyrien) herauskommen kann.”

220 The restoration KUR.ka-as-ku follows Lie, Sar. p. 36, as suggested by Forrer, Provinz. p. 75.

221 A. Fuchs (Khorsabad p. 128 line 221 n. 1) suggests that in the gap we should probably restore ša li-mi-ti-šū a-na, for which there would certainly be room; cf. text no. 2 line 258. <sup>1</sup>ad<sup>1</sup>-[di-in]: H. Winckler’s copy has <sup>1</sup>šá<sup>2</sup> ki<sup>21</sup> [x], where it is not clear if he actually saw any of the KI or not. The traces on the squeeze are indistinct but would allow <sup>1</sup>ad<sup>1</sup>-[...], which follows Lie, Sar. p. 36.

Section 18 = lines 222–234 = II,19:1–13: See Winckler, Sar. Annals lines 196–208; Lie, Sar. lines 222–234; and Fuchs, Khorsabad Annals lines 222–234. Cf. text no. 2 lines 259b–267a.

222–234 Since the right end of the slab is not preserved, it is not always clear how much is missing at the end of a line and the suggested numbers of signs must be considered extremely uncertain, although lines 230 and 232–234 almost certainly end as indicated.

223 The restoration follows Olmstead, AJSL 47 (1930–31) p. 268.

226–228 Line 226: KUR.e-li-ku-du-ri-ni: As noted by A. Fuchs (Khorsabad p. 129 line 226 n. 2), J. Lewy’s (HUCA 23/1 [1950–51] p. 386 n. 99) emendation to KUR.el-li-bir du-ri-ni is problematic. P.E. Botta’s copy has a clear -ku-, while H. Winckler’s copy has an abnormal form that he transliterated as -pu in his edition, but which looks more like KU. The sign is not clear on the squeeze, but might be KU or KI. To get Lewy’s reading BIR, we would need to assume an error by the ancient scribe/stonemason. Lines 226–228: With regard to Mount Lammun and Mount Ammun, see Bagg, SAAB 15 (2006) p. 188 and Bagg, Rép. Géogr. 7/1 pp. 9 and 155–156.

227 a-ru-uš-ti-šū-nu: So P.E. Botta and squeeze; H. Winckler’s copy has a-ru-DU-ti-šū-nu. It is not clear to what the -šū-nu, “their,” refers; CAD A/2 p. 324 suggests it may be the buildings, while A. Fuchs (Khorsabad p. 325 n. 297) takes it to be the other metals. [ša/šá]: The spacing on the squeeze would suggest šá rather than ša.

228 Based on the squeeze, it is not clear that there is room to restore TI between <sup>1</sup>IM<sup>1</sup> and ḤI. For the end of the line, see text no. 2 line 263.

229 [...] <sup>1</sup>A<sup>1</sup>: <sup>1</sup>UN<sup>1</sup>, <sup>1</sup>KAL<sup>1</sup>, [...] <sup>1</sup>ZA<sup>1</sup>, etc. are also possible.

230 <sup>1</sup>ma<sup>21</sup>: A reading -ma is prompted by text no. 2 line 264. P.E. Botta’s and H. Winckler’s copies have -šū, and the squeeze would seem to have <sup>1</sup>šū; A. Fuchs (Khorsabad p. 130 line 230) reads <sup>1</sup>ma<sup>1</sup>.

231 ú-še-ri-[id<sup>2</sup>]: Text no. 2 line 265 is restored [... ú-še-ri-is-su]-<sup>1</sup>nu<sup>21</sup>-ti-ma here, but there is room for only one or at most two signs at the end of 231.

232 -šul<sup>1</sup>-. P.E. Botta’s copy has an extra wedge at the beginning of the sign, while H. Winckler’s copy has the correct form; it is not clear from the squeeze which copy is the more accurate.

233b–234a For the translation, see Fales, SAAB 10/1 (1996) p. 20 and Radner, ZA 105 (2015) p. 193 commentary to line 5; cf. CAD S p. 298 and Š/1 p. 356.

234b) In m[y] eleventh [re]gnal year,

Lines 235–247 are not preserved

248–249a) [I reorganized (the administration of) the people of the land Gurgum to its full extent], set [a eunuch of mine] as provincial governor over them, (and) [considered them] as people [of Assy]ria.  
 249b–255) Azūri, king of the city Ashdod, [pl]otted [...] (so as) to no longer (have to) de[liv]er [tribute (to me)] and sent (messages) [hostile to Assyria] to the kings in his enviro[ns]. Then, because of the e[vi]l that he had done, I di[d awa]y with [his lordship] o[ver the people of his land] and [se]t his favorite brother Aḫī-Mīti as king [over them. The] Hittites, who (always) speak treachery, [hated h]is rule [and] elevated over them [I]a[dn]a (Iāmāni), who had no right to the throne (and) who, like the[m], did [not] kn[o]w [how to respect (any) authority].

256–262a) [Angrily], with (only) my personal chariot and [m]y cavalry [who] never leave my [side (even) in friendly territory], I [quickly] marched to [his royal city] Ashdod. I then [surrounded (and) conquered] the cities Ashdod, Ga[th, (and) Ashdod-Yam]. I cou[n]ted as bo[lo]ty (both) the gods who d[wel]t in them (and) th[at (man) (Iāmāni), (260) together with the people of his land, gold, silver, (and) the possessions of his palace]. I reorganized (the administration of) those cities (and) settled there people from the lands that I had conquered. I set a eunuch of mi[ne] as provincial governor over them and considered them as people of Assyria; they (now) pull my yoke.

262b–271) In m[y] twelfth regnal year, Marduk-apla-iddina (II) (Merodach-Baladan), descendant of Yakīn, king of Chaldea, whose settlements are situated on the (coastal) plain of the Eastern Sea, had put his trust in the sea and (its) surging waves. He then broke (lit.: “overturned”) the treaty sworn by the great gods

**Sections 19–20** Section 19 = lines 235–247 = II,20:1–13. See Winckler, Sar. Annals lines 209–213; Lie, Sar. lines 235–247; and Fuchs, Khorsabad Annals lines 235–239. Cf. text no. 2 lines 267b–272a and text no. 3 lines 1’–5’. Section 20 = lines 248–260 = II,21:1–13. See Winckler, Sar. Annals lines 214–226; Lie, Sar. lines 248–260; and Fuchs, Khorsabad Annals lines 240–252. Cf. text no. 2 lines 272b–284 and text no. 3 lines 6’–11’a.

**248–249a** The proposed restoration at the beginning of the translation assumes that the preceding line ended with UN.MEŠ KUR.gúr-gu-me a-na paṭ gim-ri-šú a-na eš-šu-ti a-šur-ma, for which see text no. 3 line 5’ and text no. 7 line 88.

**250** H. Winckler’s copy has [bil-te lib-bu-šu ik]-pu-ud-ma for the beginning of the line, but see text no. 2 line 274 [V,12:2] and text no. 3 lines 6’–7’.

**251–252** Possibly take <sup>r</sup>UGU<sup>r</sup>[UN<sup>†</sup>].MEŠ [KUR-šú] with what goes before, rather than with what goes after, and translate instead “Thus, because of the e[vi]l that he had done ag[ainst] the people of his land], I di[d awa]y with [his lordship] and ...”

**252** -<sup>r</sup>kir<sup>r</sup>-ma: P.E. Botta’s copy has -x-ma and H. Winckler’s -RU-ma, but F. Thureau-Dangin’s copy and the squeeze would allow -<sup>r</sup>kir<sup>r</sup>-ma. With regard to meaning of the word talīmu, see the on-page note to text no. 2002 lines 1 and 7.

**254** [<sup>m</sup>ia]-<sup>r</sup>ad-na<sup>r</sup>: P.E. Botta’s copy has [...]ḫal-<sup>r</sup>na<sup>r</sup>, while H. Winckler’s has: [<sup>m</sup>ia-ad-na; the squeeze currently only has -<sup>r</sup>na<sup>r</sup>].

**Section 21** = lines 261–273 = H<sub>1</sub>:1–13: See Winckler, Sar. Annals lines 227–246a; Lie, Sar. lines 261–273; and Fuchs, Khorsabad Annals lines 253–265. Cf. text no. 2 lines 285–306a and text no. 3 lines 11’b–15’. For photos of the squeeze from Entrance H<sub>1</sub> to Room II, see Figures 7–10; this is one of the best preserved squeezes.

**263–264** For an alternate passage to ša i-na sa-pan ... da-ád-me-šu, “whose settlements ... Eastern Sea,” see text no. 3 lines 13’b–14’a and text no. 2 lines 288b–289a.

- (265) and withheld his audience gift. He turned to Ḥumbanigaš (Ḥumban-nikaš I), the Elamite, for aid, made all the Sutiāns, the people of the steppe, hostile to me, and prepared for battle (against me). He came down to the territory of the land of Sumer and Akkad [and], against the will of the gods, ruled and governed Babylon, the city of the Enlil of the g[ods] (Marduk), for twelve years. (However), the god Marduk, the great lord, saw the evil deeds of Chaldea, which he hated. [Then], (the order for) the removal of his royal scepter (and) throne was set upon his lips. He duly chose me, Sargon, the reve[rent] king, from among all rulers and exalted me. He made [my] weapons prevail in order to bar the evil enemy Chaldeans from the territory of the land of Sumer and Akkad.
- 272–279a) At the command of the great divine lord, the god Marduk, I got my (chariot) teams ready, prepared my (military) camp, (and) ordered the march against the Ch[aldean, a doer] of evil (deeds). However, (when) that (man), Marduk-ap[la-iddina] (II) (Merodach-Baladan) heard of [the ad]vance of my expeditionary force, he strengthened [his] fortress[es] (and) assembled his (military) contingents. He brought the Gambulu (tribe) in its entirety (275) into Dūr-Abi-ḥāra and, at the approach of my expeditionary force, strengthened (its) garrison. He gave them six hundred cavalry (and) four thousand garrison soldiers, the vanguard of his army, and (thereby) made them confident. They raised their (city) wall higher than before, cut a channel from the Surappu River, and surrounded its environs as if with cresting flood (waters). I conquered that city before sunset. I carried off as booty 18,<sup>[4]</sup>30

266 Between *is-ḥur-ma* and *gi-mir*, text no. 2 line 292–293a adds LÚ.ru-u<sub>8</sub>-a LÚ.ḥi-in-da-ru LÚ.KUR.ia-ad-bu-ru LÚ.pu-qu-du and text no. 3 line 15' adds LÚ.ru-u<sub>8</sub>-a [LÚ.ḥi-in]-da-ru KUR.ia-ad-bu-<sup>r</sup>ri<sup>1</sup> (following line not preserved).

267 <sup>d</sup>EN.LÍL.LÁ <sup>r</sup>DINGIR<sup>1</sup>.<sup>[MEŠ]</sup>: For the reading, see text no. 2 line 296. P.E. Botta's copy has <sup>d</sup>EN.LÍL\*(copy: É) [x] (with presumably the final vertical wedge of the É for the vertical of the LÁ) and H. Winckler's <sup>d</sup>EN.LÍL.LÁ, but the squeeze has <sup>r</sup>d<sup>1</sup>EN.LÍL.<sup>r</sup>LÁ DINGIR<sup>1</sup> [(x)].

268 *i-ṭul-[ma]*: H. Winckler's copy has *i-bu<sub>4</sub>-[uk]*.

269 *šaḥ-[tu]*: The restoration follows text no. 2 line 299. H. Winckler's copy has *šaḥ-tú*, but no trace of the final sign is currently preserved on the squeeze or copied by P.E. Botta. It is not clear whether some of the final signs copied by Winckler at the ends of the lines of this slab were seen by him or ever actually preserved on the squeeze.

272 LÚ.<sup>r</sup>kal<sup>1</sup>-<sup>[di</sup> (x x)]: The reading follows P.E. Botta's copy and the squeeze. H. Winckler's copy has LÚ.<sup>r</sup>kal<sup>1</sup>-<sup>[di</sup> LÚ.KÚR] (see text no. 2 line 304) but we would not then expect the feminine plural *lemnēte* in the following line. A. Fuchs (Khorsabad p. 138 line 264 n. 1) suggests that *ēpiš* or *kāpid* might be missing at the end of the line and the translation tentatively assumes *e-piš*, although there would be barely enough room for it. This may refer to Marduk-apla-iddina II or to the Chaldeans in general; see also text no. 2 lines 304–305 and text no. 7 line 125.

Section 22 = lines 274–286 = H<sub>2</sub>:1–13; See Winckler, Sar. Annals lines 246b–253 and 258b–261a; Lie, Sar. lines 274–286; and Fuchs, Khorsabad Annals lines 266–279a. Cf. text no. 2 line 306b–ca. 322 and text no. 3 lines 31'–39'.

275 For the reading of the place name as Dūr-Abi-ḥāra instead of Dūr-Aṭhāra, see Parpola, Studies Dietrich p. 567; PNA 1/1 p. 9; and note also Van Buylaere, WO 46 (2016) pp. 140–142. The place has been tentatively identified with modern Šaiḥ-Ya'qūb al-Yūsuf (Parpola and Porter, Helsinki Atlas map 11 and p. 8).

278 A. Fuchs (Khorsabad p. 459) identifies the Surappu River with the Rūdḥāne-ye Čangūle, while S.W. Cole and H. Gasche (Akkadica 128 [2007] pp. 34–35) identify it with the Nahr Tib [Nahr at-Tīb] (Iranian Mehmeh).

279 [LIM 4<sup>†</sup>]<sup>r</sup>ME<sup>1</sup> 30: P.E. Botta's copy has [x (x)] MEŠ, and H. Winckler's [LIM] 4 ME 90; the reading follows the squeeze and F. Thureau-Dangin's copy.

people, together with [their] property, horses, oxen, (and) sheep and goats.

280b–286a) The remainder of them who had fle[d befor]e my weapons and [...] the Uqû River, which was difficult (to ford), and reed thicket(s) for [(their)] protection, [...] heard of (my) conquest of that city and (as a result) their hearts pounded. They flew to me like a bird [and ...] I reorganized (the administration of) that city (and) (re)named it Dūr-Nabû. [I ...-ed] those people [...]. I set a eunuch of mine as provincial governor over them. I imposed upon them the annual payment of one talent thirty minas of silver, two thousand <gur> of barley, one ox out [of (every) twenty oxen (that they had), (and)] one sheep [out] of (every) twenty sh[ee]p (that they had). I mustered those soldiers and took [one soldier of theirs] o[ut of (every) three] soldiers (for my own army).

286b–299) The city Qarat-Nanni, the city of Nabû-ušalla [...] ... [...] (and) the city Maḥīru, (a total of) five settlements of [the district] Ḫubaqā[n]; the city Qan-Ra'me-il (and) the city of Iādi (Iadī'), (a total of) two fort[ified] settlements [of] the district [Timass]ina; the city of Parasa, the city of Ian[nuqu], (and) [...] (a total of) three settlements of the Ḫirīte River (290) district; the city of Tābāya (Tābiya), the city of [...], the city] of Asiān, the fortress of Mannu-Iašana, the city of Raḫi[...], (and) the city of] Aḫḫē-iddina, (a total of) six settlements of the city Ḫilti; the city of Ḫazā-[il, ...], the city of Sabḫarru, the city of Ḫamadānu (Ḫamdanu), the city of [..., (and) the city] of Iašyanu, (a total of) six settlements; the city of Sa'lāni, the city of [..., the city] of Na[...], the city of Zārūtī, (295) the city of Sa'dani, the city of [..., (and) the city of ...]sal[i...], (a

281 A. Fuchs (Khorsabad p. 140 line 273 n. 1) suggests restoring *is-ba-tu* or *e-ḫu-zu* in the gap after *ki-din-nu-<sup>r</sup>ti<sup>1</sup>* (see line 334 versus text no. 2 line 332 and text no. 3 line 51'). H. Winckler's copy indicates that there is nothing missing between the traces *x x* and *ka-šad*, but that is not clear on the squeeze today.

284 As noted by A. Fuchs (Khorsabad p. 142 line 276 n. 1), no capacity measurement is given between 2 LIM and ŠE.BAR; A.G. Lie (p. 46) read *imêr?* after 2 LIM and before ŠE.BAR. <sup>r</sup>UGU<sup>1</sup> 20 <sup>r</sup>UDU<sup>1</sup>.MEŠ: P.E. Botta's copy has UGU<sup>1</sup>(copy: KA) 10+[x].MEŠ and Winckler's UGU 10+[10 UDU].MEŠ; the squeeze has <sup>r</sup>UGU<sup>1</sup> 20 <sup>r</sup>UDU.MEŠ<sup>1</sup>.

285 For the end of the line, see text no. 2 lines 321–322 and text no. 3 lines 39'–40'; however, there seems too much room in the first gap to read just <sup>r</sup>i<sup>1</sup>-[na UGU 3 LÚ].ERIM.MEŠ and, as noted by A. Fuchs (Khorsabad p. 143 line 279 n. 1), not enough at the end for [1-en LÚ.ERIM-šú-nu].

286–299 For the places mentioned, see Zadok, WO 16 (1985) pp. 38–39. As noted by A. Fuchs (Khorsabad p. 144 line 279a n. 1), the traces after MEŠ at the end of line 286 might be <sup>r</sup>BÀD<sup>1</sup>.

Section 23 = lines 287–299 = II,22:1–13: See Lie, Sar. lines 287–299; and Fuchs, Khorsabad Annals lines 279b–n; Winckler, Sar. Annals omits. Cf. text no. 2 lines ca. 323–324a.

287 For the reading KUR.<sup>h</sup>u-ba-qa-[nu], see text no. 2 line 323 and text no. 3 line 41'.

288 The restoration is based on Olmstead, AJSL 47 (1930–31) p. 271. See text no. 2 line 323 and text no. 3 line 41'.

289 Olmstead, AJSL 47 (1930–31) p. 271 reads <sup>m</sup>ia-<sup>r</sup>nu<sup>1</sup>-[qu ša KUR.za-me-e]; see text no. 2 line 327 and text no. 3 line 45'.

290 <sup>m</sup>DÛG.GA-a-a: For the reading Tābāya, see Parpola, Toponyms pp. 327–328 and Zadok, WO 16 (1985) p. 38. <sup>m</sup>a-si-an: Or <sup>m</sup>a-si-an.

291 ŠEŠ.MEŠ-<sup>r</sup>SUM<sup>1</sup>.NA: The reading follows the squeeze and the reading of F. Thureau-Dangin.

292 URU.<sup>h</sup>i-il-ti: A.T.E. Olmstead (AJSL 47 [1930–31] p. 271; see also Fuchs, Khorsabad p. 328 n. 325) says that this is an "obvious error" for URU.<sup>h</sup>i-il-mu; KUR.<sup>h</sup>i-il-mu appears in text no. 2 line 324 and cf. line 344. <sup>m</sup>ha-za-[DINGIR]: H. Winckler's copy may indicate that he saw part of the -DINGIR on the squeeze, but it may just be a restoration from Room V (text no. 2 line 314).

293 <sup>m</sup>ia-<sup>r</sup>as<sup>1</sup>-ia-nu: The reading AŠ for the sign between the two IA signs goes back to D.D. Luckenbill (see Olmstead, AJSL 47 [1930–31] p. 271) and follows the copy of H. Winckler and (less well) that of P.E. Botta. F. Thureau-Dangin, who examined the squeeze, copied <sup>m</sup>ia<sup>1</sup>-x-<sup>r</sup>ia<sup>1</sup>-nu, where the vague traces of the *x* would seem to fit the beginning of AŠ better than AŠ.

total of) seven settlements that are (located) between the land Nagia[tu (Nagītu) and the Tupliya]š [River] (and) whose environs (are) without (special) name designation; the city Aya-Sammu, the city [...]paqa, the city of Dīnāya, the city of Ibnāya, the city of Bābilê, the city of [...]me, the city [of] Anda-il, the city Sī'rāya, the city Patiyān, the city Ḥula[...].su, the city of Samsi-yada', the city Ḥa'ilāya,

Lines 300–312 are not preserved

313–316) Not preserved

317–332a) [I dammed up the] Tu[pliyaš River, a river upon which they relied], with p[ile(s) of dirt and reeds. I erected] two f[ortresses, side by side, and (320) star[ved them out. They [then came] out [from the Uqnû River and grasped hold of my feet. Iannuqu], the leader o[f the city Zāmê, Nabû-ušalla of the city Abūrê, Paš]šunu (and) [Ḥaukānu of the city Nuḥānu, (and) Sa'īlu of the city] Ibūli, (a total of) five sheikhs of (325) the Pu]qudu (tribe); [Abi-ḥatâ of the Ru'ū'a (tribe)]; (and) Ḥunnu, Sāme', Sabḥarru, (and) Rāpi', (a total of) four sheikhs of the Ḥindaru (tribe); together with their (tribes)men, came to me at the city Dūr-Abi-ḥāra and grasped hold of m[y] feet. I took hostages from them and (330) imposed upon them (the same) tribute and payments as if (they were) Assyrians. I assigned them to the authority of a eunuch of mine, the governor of Gambulu, and imposed the annual šibtu-tax on their oxen (and) their sheep for the gods Bēl (Marduk) (and) Son of Bēl (Nabû)].

294 <sup>m</sup>na-[x (x)] x: So P.E. Botta's copy; H. Winckler's copy has <sup>m</sup>na-[x] x. The traces of the final sign would fit -<sup>r</sup>ri<sup>1</sup> or -<sup>r</sup>ḥu<sup>1</sup> among other signs. A.T.E. Olmstead (AJSL 47 [1930–31] p. 271) suggested reading the name na-[na-aḥ]-ḥu, but the published copies and the squeeze would indicate that there was not sufficient room for this restoration.

296 For the restoration, cf. text no. 2 line 326 and text no. 3 line 43'. A. Fuchs (Khorsabad p. 465) identifies the Tupliyaš River with the Nahr al-Tib (Nahr aṭ-Ṭib), while S.W. Cole and H. Gasche (Akkadica 128 [2007] pp. 34–35) identify it with the Dawairij. -šú<sup>1</sup>-nu: P.E. Botta and H. Winckler have -ši-nu; it is unclear from the squeeze if the sign is šú or ši.

297 With regard to the reading of the city name ending in -pa-qa, see Bagg, Rép. Géogr. 7/3-2 p. 637. <sup>m</sup>ib<sup>1</sup>-na-ia: The reading follows the squeeze and F. Thureau-Dangin's reading.

298 [ša] <sup>m</sup>an-da-DINGIR: The spacing might suggest instead [šá] <sup>m</sup>an-da-DINGIR or just <sup>m</sup>an-da-DINGIR. H. Winckler's copy has [ša] <<sup>m</sup>an-da-DINGIR.

299 URU.pa-ti-ia-a-an: Cf. URU.pat-ti-a-nu in text no. 2 line 334 and URU.pat-ti-[...] in text no. 3 line 55'. <sup>m</sup>sam-si-ia-da-<sup>2</sup>i: The reading follows D.D. Luckenbill (apud Olmstead, AJSL 47 [1930–31] p. 271).

332 <sup>d</sup>DUMU EN: As noted by A. Fuchs (Khorsabad p. 148 line 288b n. 1), A.G. Lie (Sar. p. 50) and K. Tallqvist (Götterepitheta p. 120) erroneously place the divine determinative before EN rather than DUMU; see also text no. 2 line 321.

335 Text no. 2 line 332 and text no. 3 line 52' have GIŠ.GIŠIMMAR instead of GIŠ.NÍG.TUKU and place *qi-ra-a-ti-šú-nu um-ma-ni ú-šá-kil* before it; for the additional passage, cf. lines 333-334. As noted by A. Fuchs (Khorsabad p. 149 line 289 n. 2), CAD M/1 p. 387 suggests the reading of GIŠ.NÍG.TUKU to be *iš mašrê/î*, “tree of wealth,” instead of *gišimmaru*, “date palm.”

338 LÚ.[qu<sup>+</sup>]-<sup>r</sup>ra<sup>1</sup>-di-ia: The reading follows P.E. Botta's copy and the squeeze; H. Winckler's copy has LÚ.qu-ra-di-ia. -<sup>r</sup>šu-nu<sup>1</sup>: The reading follows the squeeze; Botta's copy has -GAL and Winckler's -šu-nu.

**Section 27** = lines 339-351 = II,27:1-13: See Winckler, Sar. Annals lines 273b-274 and 280; Lie, Sar. lines 339-351; and Fuchs, Khorsabad Annals lines 291 and 297. Cf. text no. 2 lines 333b-340 and text no. 3 lines 54'b-55'.

**339-364** See the commentary section with regard to sections 27 and 28. Since the placement of the text on Botta, Monument de Ninive pl. 92 (bottom) is not certain, restorations in the Akkadian have been kept to a minimum, although the translation assumes that the beginning of line 339 had UN.MEŠ a-di-mar-ši-ti-šú-nu iš-lul-ú-ni before URU.za-a-me; see text no. 2 lines 333b-334a and text no. 3 line 54' for the reading. Some of the restored translation for lines 350-355 was likely at the beginning of line 356. As noted in the commentary, three lines of P.E. Botta's copy are not currently placed anywhere in the edition: Botta, Monument de Ninive 4 pl. 92 bottom lines 1' ([...] AN [...]), 6' ([...] A I MUNUS [...]), and 7' ([...] x i-na [...]). Lines 339-340: These lines represent Botta, Monument de Ninive pl. 92 bottom lines 4'-5' and their placement here is uncertain. Cf. text no. 2 line 334 and text no. 3 lines 54'-55' for the restorations in the translation.

**350-351** These lines represent P.E. Botta, Monument de Ninive 4 pl. 92 bottom lines 2'-3' and their placement here is uncertain. Cf. text no. 2 line 340; the line division in the restoration is arbitrary.

**Section 28** = lines 352-364 = II,27:1-13 (see the commentary section with regard to sections 27 and 28): See Winckler, Sar. Annals lines 281-284; Lie, Sar. lines 352-364; and Fuchs, Khorsabad Annals lines 298-301. Cf. text no. 2 lines 341-349.

**352-355** These lines represent P.E. Botta, Monument de Ninive 4 pl. 92 bottom lines 8' and 9'a, 9'b and 10'a, 10'b and 11'a, and 11'b and 12'a respectively, and their placement here is uncertain. Cf. text no. 2 lines 341, 342 (where it is six sheikhs, not five), 343, and 343-344 (where it is <sup>r</sup>URU<sup>1</sup>.a-ĥi-li-im-<sup>r</sup>mu<sup>1</sup>) respectively.

- total of) five she[ikhs of the land Yadburu — brought]  
horse[s, mules, oxen, and sheep and goats into my  
(military) camp and grasped hold of my feet in order  
to do obeisance. I considered] the city Lahi[ru of the  
land Yadburu, the cities] Sulāya, [...], fortified] cities [of  
the land Yadburu], the cities Ḫil[immu (and) Pillatu that  
are on the border of the land Elam, together with the  
settlements in their environs that are (located) along  
the Naṭitu River, as (part) of my territory].  
356–364) Not preserved
- 365–368a) [As a result, in the midst of his (own)  
palace] his own fear(s) fell upon him; he then went  
out (from Babylon) during the night together with  
[his] alli[es] (and) his battle [troop]s and set out for  
the land Yadburu, which is (part) of the land Ela[m].  
He gave to [Š]utur-Naḫūndi, the Elamite, [his royal]  
ut[ensils], a bed, a throne, a chair, a royal washbasin,  
(and) his neck ornament, as gifts from him in order  
to get [his] revenge (on me).  
368b–371a) (That) Elamite villain accepted his bribe,  
but [took fright at] my [weapon(s)]. He turned away  
and told him (Marduk-apla-iddina) that he would  
not come (to help him). (When) he (Marduk-apla-  
iddina II) heard the words of (the one who was to  
be) his avenger, he threw himself on the ground,  
ripped his [cloa]k, wielded (his) razor, and uttered  
cries of mourning. Together with his allies (and) [his]  
bat[tle] troops, that (man) moved away [from] the land  
Yadburu, entered int[o] the city Iqbi-Bēl, an[d] stayed  
(there) in [f]ear.  
371b–374a) The citizens of Baby[lon (and) Bor]sippa,  
the temple personnel, the craftsmen who know (their)  
trade, the lea[der]s, (and) administrators of the land,  
who (up till then) had been his su[bjects], bro[ught]  
before me in the city [Dūr-Lad]jinni the leftovers of  
(the sacrifices to) the deities Bēl, Zarpanītu, [Nabû,  
(and) Taš]mētu, [and] invited (lit.: “said to”) me [to  
en]ter into Babylon, [making] my heart [rejoice].

**Section 29** = lines 365–377 = II,28:1–13: See Winckler, *Sar. Annals* lines 290–302; Lie, *Sar. lines 365–377*; and Fuchs, *Khorsabad Annals* lines 307–316. Cf. text no. 2 lines 350–359a.

**365** The translation “[As a result, in the midst of his (own) palace]” assumes that the previous line ended with *-ma ina MURUB<sub>4</sub>-ti É.GAL-šú* and is based on text no. 2 line 349.

**368–369a** A. Fuchs (*Khorsabad* p. 331 n. 344) notes that Šutur-Naḫūndi’s refusal to come is comparable to refusals of several gods to oppose Anzū in the Anzū Epic.

**369** The phrase “wield the razor” refers to using razors to slash oneself in order to indicate mourning. See also line 162.

**372** *i-<sup>†</sup>da-ag<sup>1</sup>-[ga-lu<sup>?</sup>]*: The reading follows F. Thureau-Dangin’s collation and copy of the passage (RA 24 [1927] p. 77). P.E. Botta’s copy has *i-<sup>†</sup>da<sup>1</sup>-[...]*, H. Winckler’s *i-da-[a-ga-lu]*, and the squeeze currently *i-<sup>†</sup>da<sup>1</sup>-[...]*. Text no. 2 line 355 has *<sup>†</sup>i-dag<sup>†</sup>-ga-lu*.

Lines 391–403 are not preserved

374b–377a) Happily, I entered Babylo[n, the c]lity of the En[lil of the gods (Marduk); I prayed] to the gods [who dwelt in Esagil (and) Ezida, (and)] offered [pure vol]u[ntary offerings bef]ore them. Inside his palace, [his royal residence, ... I received substantial ... from ...] the land Aram, the land Bīt-Amukāni, [the land Bīt-Dakkūri, ...].

377b–379a) (With regard to) the former Borsippa canal, [which k]ings who preceded me had co[ns]truced, I dug a new [ca]nal into Šuanna (Babylon) for the procession of the god [Nabû], my lord.

379b–383) I sent eunuchs of mine, provincial governors, against the Ḥamarānu (tribe), who had fled from my weapons, entered Sippar, and were constantly, repeatedly robbing caravan(s) of the citizen(s) of Babylon while they were en route. They then surrounded them so that (no one), neither young (nor) old, could escape, (and) struck (them) down with the sword.

384–388a) (When) the month Nis[annu] ar[ri]ved, [the m]onth the lo[rd] of the gods goes out (from his temple), I to[ok] the hands of the great divine lord, (385) the god M[ar]duk, (and) of the god Nabû, the king of the [to]tality of heaven (and) earth, and brought (them) safely along the roa[d] to the akītu-house. I presented before them prize bulls in prime condition, fattened sheep, gee[se], (and) ducks, (along) with (other) innumerable gifts.

388b–390) I offered [sacrific]es of hom[ag]e to the gods of the cult centers of the land of Sum[er] and Ak[kad, and ...] presents [...]

Lines 391–403 are not preserved

374 A. Fuchs' edition (Khorsabad p. 154 line 314) ends the line with DINGIR.MEŠ [ ]-šit-[ ], assuming that the following a-ši-bu-ut was on this line. The line actually ends with DINGIR.MEŠ<sup>1</sup>, with a bump/flaw in the squeeze making the <sup>r</sup>MEŠ<sup>1</sup> appear to be šī.

376–377 The restorations are based on text no. 2 line 357–358. After mu-šab LUGAL-ti-šú, A.T.E. Olmstead would restore [e-ru-um-ma bi-ra-a]-ti and restore ak-šud ma-da-ta-šú-nu at the beginning of line 377 (AJSL 47 [1930–31] pp. 273–274), thus “ [I entered] into his palace, [his royal abode. I conquered the fortress]es of the lands Aram, Bīt-Amukāni, [(and) Bīt-Dakkūri]. I received [their] substantial [tribute].” However, there would seem to be too much room for just this at the beginning of the lines and A. Fuchs (Khorsabad p. 155 line 315 n. 2) prefers to assume the tribute passage began here.

377 The restoration is based on text no. 2 lines 358–359. H. Winckler's copy indicates that ka-bit-tu am-ḥur is fully preserved, but there is currently no trace of this on the squeeze.

**Section 30** = lines 378–390 = II,29:1–13: See Winckler, Sar. Annals lines 303–314; Lie, Sar. lines 378–390; and Fuchs, Khorsabad Annals lines 316–321 and 321a–e. Cf. text no. 2 lines 359b–371 and text no. 5 lines 1'–3'.

378 e-<sup>r</sup>pu-šú<sup>1</sup>-[ma]: The reading is based on the squeeze; H. Winckler's copy has e-ḥi-ru-[ma].

379 aḥ-<sup>r</sup>re<sup>1</sup>: The reading follows the squeeze. P.E. Botta's copy has aḥ-[x] and H. Winckler's aḥ-re-[ma], but as already noted by F. Thureau-Dangin (RA 24 [1927] p. 77), the squeeze indicates that there no room to restore MA.

386–389 Cf. text no. 2 lines 364b–369.

389 It is not clear from H. Winckler's copy if he saw ak-[ka]-<sup>r</sup>de-e<sup>1</sup> or if the last two signs were also restored; nothing of -de-e is currently visible on the squeeze. The restoration and reading [UDU.SÍSKUR.(MEŠ)]-<sup>r</sup>e taš-ri<sup>1</sup>-[iḥ]-<sup>r</sup>ti<sup>1</sup> is based on the squeeze; see also text no. 65 line 161 and Fuchs, Khorsabad p. 159 line 321d.

- 404–408a) [(Marduk-apla-iddina) carried off the people of (the cities) Ur, ..., Kissik, Nēmed-Laguda (and) ...], and bro[ught (them) [into] the city Dūr-Yakīn. [He then stren]gth[ened its en]clo[sure walls (and), moving back a distance of one] measuring rope [from the front of its main wall], he mad[e] a moat [two hundred] cubits wide; [he made (the moat) one and a half nindanu deep and reached] g[round water. He cut] [a channel from the Euphrates River], (thereby) making (its water) flow to it (lit.: “against it”). [He (thus) filled the city’s] fla[tlands, wh]e[re bat]tles (are fought), with water and [cut the bridges]. Together with his allies (and) [his battle] troops, he pitched his [royal tent] in a be[nd of the river (lit.: “bet[ween river]s”) li]ke [a cran]e and [set up his] (military) cam[p].
- 408b–414) [At] the command of the gods Aššur, [Šamaš, (and)] Marduk, [I had my c]ho[lice fighting men f]ly over [its water channels (like) eag]le(s) ... [and they br]oug[ht about] his defeat. [I surrounded] him [together with his] royal [(military) contingent (410) an]d slaughtered [his] wa[rriors] like shee[p a]t his feet. I [pierced the horses trained to his yo]ke [with ar]rows. Then, (as for) hi[m, I pie]r[ced (lit.: “loosened”) his hand wi]th the point [of an arro]w [and] he (then) entered [the gate] of his city ste[althfu]lly, like a mongoose. [I cut] down the Puqudians, his allie(s), (and) the [Marša]nians, together with [the Sutians] who [were with him, in] fr[ont of] the gat[e (of his city) (and)] splattered his

**Sections 31–32** Section 31 = lines 391–403 = II,30:1–13: Cf. text no. 2 lines 371/372–374a. The start of the account of the thirteenth regnal would have been located towards the end of this section. Section 32 = lines 404–416 = II,31:1–13: See Winckler, Sar. Annals lines 319–340/341; Lie, Sar. lines 404–416; and Fuchs, Khorsabad Annals lines 331–351/352. Cf. text no. 2 lines 374b–394+ and text no. 6 lines 1’–6’.

**404–405** Following H. Winckler and A. Fuchs (Khorsabad p. 159 line 333), it is assumed here that the first sign in the first line of the slab on P.E. Botta’s copy was actually on the second line (Botta’s copy <sup>h</sup>A standing for <sup>r</sup>ker<sup>1</sup> in line 405). The restoration of line 404 follows text no. 2 lines 374–376.

**405** For the passage “moving back ... main wall,” see the note to text no. 74 vi 32. <sup>r</sup>TA<sup>1</sup>: So H. Winckler’s copy; no trace of the sign is found on P.E. Botta’s copy or currently visible on the squeeze. Winckler restored ú-šab instead of ú-né-si-ma on his copy. Text no. 74 vi 32 has 10 NINDA.TA.ĀM, “ten nindanu,” here instead of áš-la.TA.ĀM, “one measuring rope.” iš-<sup>r</sup>ku-un<sup>1</sup>: The transliteration follows Winckler’s copy; nothing after the iš is currently visible on the squeeze or on Botta’s copy. A nindanu is 12 cubits, or about 6 m (see Powell, RLA 7/5–6 [1989] p. 459).

**407** H. Winckler’s copy has [...] <sup>r</sup>li<sup>1</sup>-ma and MÈ-šú i-na bi-rit [ÍD].MEŠ, but the squeeze cannot confirm this, although there are traces of what might be MÈ-.

**408** [ki]-<sup>r</sup>ma<sup>1</sup> [ku<sup>†</sup>-mé<sup>†</sup>]-e.[MUŠEN] and [<sup>d</sup>]MES<sup>†</sup> [LÚ<sup>†</sup>.mun<sup>†</sup>-dah<sup>†</sup>-ši<sup>†</sup>-ia<sup>†</sup>]: The readings are based on P.E. Botta’s copy. H. Winckler’s copy has [ki]-ma ku<sup>\*</sup>(copy: UR)-mé-e.[MUŠEN] and [<sup>d</sup>]MES LÚ.mun-dah-ši-ia, but this cannot currently be confirmed by the squeeze. uš-ma<sup>†</sup>-. Botta’s copy has uš-BA- and Winckler’s uš-ma-; as noted by A. Fuchs (Khorsabad p. 160 line 340), possibly -man- instead of -ma-.

**409** <sup>r</sup>na-as<sup>1</sup>-[qu<sup>†</sup>]-ti: P.E. Botta’s copy has <sup>r</sup>na-as<sup>1</sup>-[(x)]-ti, while H. Winckler’s copy has <sup>r</sup>na-as<sup>1</sup>-qu-ti and the squeeze currently has <sup>r</sup>na-as<sup>1</sup>-[...]. As already noted by A. Fuchs (Khorsabad p. 161 line 342) -qu- is less likely orthographically than -qu-. [TI<sub>8</sub>].<sup>r</sup>MUŠEN<sup>††</sup> SU <sup>r</sup>MIR<sup>1</sup> [x ú-šap]-riš-[ma]: Based on text no. 2 line 385, we do not expect anything between TI<sub>8</sub>.MUŠEN and ú-šap-riš-ma, and so Fuchs has suggested reading [TI<sub>8</sub>].<sup>r</sup>MUŠEN<sup>1</sup>-niš ú-šap-riš-[ma] (see also text no. 6 line 1’), although he notes that this would conflict with Winckler’s copy, which has <sup>r</sup>MUŠEN<sup>††</sup> SU <sup>r</sup>MIR<sup>1</sup> [(x)] ú-šap-riš-[ma]. The squeeze is not clear at this point.

**410** ú-<sup>r</sup>nap-pi<sup>1</sup>-ša [LÚ<sup>†</sup>].qu-[ra<sup>†</sup>-di-šu]: P.E. Botta’s copy has ú-tap-pi<sup>\*</sup>(copy: ERIM)-ša [x x] qu-[...] and H. Winckler’s copy ú-<sup>r</sup>nap-pi-ša LÚ.qu-ra-[di-šu]. The squeeze confirms the reading -nap- instead of -tap- (see also text no. 2 line 387), but cannot currently confirm the rest of Winckler’s readings.

**411** H. Winckler’s copy has ši-mit-ti ni-ri-[šú], uš-ši, and šá-a-šu i-na zi-qip mul-mul-li rit-ta-šú ap-<sup>r</sup>tur<sup>1</sup>, but the squeeze cannot confirm the initial section. It can confirm that there is a damaged area after šá-a- which would allow -[šú a]- (as opposed to šá-a-<šu i>-na in P.E. Botta’s copy), that it is <sup>r</sup>qit<sup>1</sup> not <sup>r</sup>qip (see also Thureau-Dangin, RA 24 [1927] p. 77), and that the beginning of the -tur- is present. Winckler’s copy restores ú-šaq-qir-ma; while Botta’s copy would indicate that there was room to have the -ma, text no. 2 line 389 does not have -ma here. For the translation of rittaša aptur, see the note to text no. 2 lines 390–391.

**412** [KÁ<sup>†</sup>.GAL<sup>†</sup>] URU-šú e-ru<sup>1</sup>-ub<sup>†</sup>: P.E. Botta’s copy has [x x] URU-šú e-ru<sup>\*</sup>(copy: KUG)-ub<sup>\*</sup>(copy: E-AŠ-[(x)]), while H. Winckler’s copy has KÁ.GAL URU-šú e-ru<sup>1</sup>-um<sup>1</sup>-[ma]. The squeeze is not currently useful for this passage. See text no. 6 line 3’, which has <sup>r</sup>e<sup>1</sup>-ru-ub. a-<sup>r</sup>di<sup>1</sup> [LÚ<sup>†</sup>.su<sup>†</sup>-te<sup>†</sup>-e<sup>†</sup>] ša <sup>r</sup>it<sup>†</sup>-[ti-šú]: Winckler’s copy has a-di LÚ.su-te-e ša it-[x], but this cannot be currently confirmed by the squeeze, although the squeeze does allow a-<sup>r</sup>di<sup>1</sup> rather than Botta’s a-<sup>r</sup>di<sup>†</sup>.

people with deadly [ve]nom. I took away [from him]  
 his royal tent, [his] royal go[ld para]sol, [gol]d scepter,  
 gold bed, gold [ch]air, gold (and) silver objects, ..., [his]  
 potstands, [equip]me[nt, (and) bat]tle gear.

415–416) [(As for) a]ll his [people], the inhabitants of  
 the settlements of all of his land, whom *he had* [...] from before my [weapon]s, ... [...]

Lines 417–442 are not preserved

443–444a) [Upēri, king of Dilmun, who(se)] l[a]ir is  
 situated [at a di]stance of [th]irty leagues in the middle  
 of the [Ea]stern Sea, like (that of) a fish, [hea]rd of  
 [(my)] lordly might and brought me his audience gift.  
 444b–452a) While I was br[ing]ing about] the defeat  
 of the Chaldeans (and) Arameans of the Eastern Sea  
 [and] making my weapons prevail over the people of  
 [the land El]am, a eunuch of mine, the governor of the  
 land Que (Cilicia), whom I had established [...] in the  
 land ... [...] ... [of the we]st and (who) governed the  
 people (there), marched ...ly [th]ree tim[es] into the  
 district of Mitâ (Midas) of the land Musku, (going) in a  
 chariot over easy [terrain] (and) on foot over difficult  
 terrain, and took away one thousand of his (Mitâ's)

413 [<sup>+</sup>ú-nak]-<sup>+</sup>kis<sup>1</sup>: For the reading, see text no. 7 line 131. P.E. Botta's and H. Winckler's copies both have [...] MEŠ; the squeeze is not clear at this point. Winckler's copy has KÙ.GI GIŠ.GU.ZA LUGAL-ti-[šú], but, as noted by F. Thureau-Dangin (RA 24 [1927] p. 77), the squeeze shows that there is not sufficient room for GIŠ.GU.ZA between KÙ.GI and LUGAL-ti-[šú].

414 ú-de-e<sup>+</sup>: Both P.E. Botta's and H. Winckler's copies have -NI for -e; the sign is not clear on the squeeze.

415 [x (x)] x DI AN BÀD [x x (x)]: Both P.E. Botta's and H. Winckler's copies have DI AN BÀD, but only the BÀD is clear on the squeeze. A. Fuchs (Khorsabad p. 163 line 351 n. 1) suggests possibly <sup>+</sup>BŪR<sup>1</sup> instead of AN.

416 ŠU: Thus the copies by P.E. Botta and H. Winckler. The squeeze would currently also allow <sup>+</sup>MA<sup>1</sup>, <sup>+</sup>ÁŠ<sup>1</sup>, and <sup>+</sup>PA<sup>1</sup> (note also Fuchs, Khorsabad p. 163 line 351).

Sections 33–35 Section 33 = lines 417–429 = II,32:1–13 and section 34 = lines 430–442 = II,33:1–13: Cf. text no. 2 lines ca. 395–426 and text no. 6 lines 7'–14'. Section 35 = lines 443–455 = II,34:1–13: See Winckler, Sar. Annals lines 370–382; Lie, Sar. lines 443–455; and Fuchs, Khorsabad Annals lines 384–392. Cf. text no. 2 lines 427–435a; note also text no. 7 lines 149b–153a.

443 The restoration at the beginning of the translation assumes that the previous line ended with <sup>+</sup>ú-pe-e-ri LUGAL.NI.TUK.KI; see text no. 2 line 426 and text no. 7 line 144. -ti-[(ia)]: Both P.E. Botta's and H. Winckler's copies place the TI at the end of the line, with no damage afterwards; however, the squeeze has -<sup>+</sup>ti<sup>1</sup>- and based on what is restored at the ends of some later lines, it is not clear that there would not be room for -ia at the end of the line.

445 KUR x x x [x x (x)] TI x x [(x)]: P.E. Botta's copy in Monument de Ninive has KUR LÍMMU [x] x [x x x (x)] TI [x x] IGI and H. Winckler's copy has KUR LÍMMU [(x)] <sup>+</sup>LU<sup>1</sup> [x x (x)] TI [x] ME. The copies in JA and IdF have KUR x [x (x)] x [x] MIN [x] <sup>+</sup>TI<sup>1</sup> IGI [...]. The squeeze has KUR x x x [x x (x)] <sup>+</sup>TI<sup>1</sup> x x [(x)], although [...] <sup>+</sup>TI<sup>1</sup> x ME/<sup>+</sup>MEŠ<sup>1</sup> [(x)] is also possible for the final few signs.

446 [šá-lam<sup>?</sup>]: The restoration follows Fuchs, Khorsabad p. 171 line 386b and is based on a proposed translation by H. Winckler (AOF 1/4 p. 365), but, as noted by A. Fuchs, other restorations (e.g., šul-mu and e-reb) are also possible. [1]<sup>+</sup>2-[šú]: The reading is based on the squeeze, but note that F. Thureau-Dangin read 3-[šú].

446–447 It is possible that ša <sup>+</sup>mi-ta-a KUR.mu-us-<sup>+</sup>ka<sup>1</sup>-a-a should go with <sup>+</sup>te<sup>1</sup>-né-še-e-te rather than with what follows, i.e., "... governed the people of Mitâ of the land Musku, marched ...ly [...]ree tim[es] into his district ..."; however, this would assume that the Assyrian governor already governed some of Mitâ's subjects before these campaigns against Mitâ.

447 šilpu illikma "he marched ...ly ... and": The meaning of the term šilpu in this phrase (which also appears in text no. 2 line 429 and text no. 7 line 151, as well as text no. 117 ii 57, where šilpu appears with the verb wâru instead of alâku) is not clear, although it may simply mean "raid" (i.e., "he made/went on a raid ... and"), following Winckler, AOF 2 p. 133 ("hatte er einfälle gemacht") and Lie, Sar. p. 67 ("made a raiding expedition"); see CAD S p. 447 and CDA p. 373, as well as Zadok, RA 76 (1982) p. 177. 1 LIM "one thousand": So Winckler's copy and the squeeze; Botta's copy has 2 LIM, with the two vertical wedges of the 2 attached to the end of the preceding sign. The reading of the end of the line is uncertain. Fuchs (Khorsabad p. 172 line 387) reads the sign following tidûkišu as <sup>+</sup>ša<sup>1</sup>, which is possible, but not certain. Possibly GAG [(x)] instead of <sup>+</sup>NI<sup>1</sup>.

com[bat] troops ... (and) their war [hors]es, letting none escape. He conquered two fortresses upon which his (Mitâ's) district relied (and) which are (located) on a ru[gg]ed mountain ad[jace]nt to [... (and)] whose location is very difficult (to reach) ... He then defeated his (Mitâ's) garrison troops, those who did battle, and [...] the gate(s) of his fortresses to [...]. (450) He did [no]t allow to live [...]. He brought to me as booty two thousand four hundred soldiers ... and slaves from his (Mitâ's) land, and (then) [destroyed, demolished, (and) burned (them) down with fire [his fort]ified cities, together with the settlements in [their] environs. His messenger, who bore the good news, brought me one thousand *face*-(guards) (taken) from his (Mitâ's) warriors (as trophies) to me in the city Sama'ûna, which is (located) [on the Elami]te [border], and (thus) made my heart rejoice.

452b–456a) Moreover, that (man), Mitâ of the land Musku, who had not submitted to the kings who preceded me (and) had [never] cha[n]ged his [mind (about doing so), he]ard about the accomplishment of the victori(es) (and) conquest(s) that the gods Aššur (and) Marduk had granted me and (that) I [had regularly] car[ried] out in (the region of) the Eastern Sea, as well as [of the onslaught of] my [weapon]s, the destruction of its (Bīt-Yakin's) land, the carrying off of its [peo]ple, (and) the subjugation of U[p]ē[r]i, king of Dilmun, which is (located) in the middle of the sea [...]. Then, ... in [his far-off land, dea]th[ly] quiet

448–449a 2: P.E. Botta's and H. Winckler's copies omits this, but it is present on the squeeze and noted by F. Thureau-Dangin. na-<sup>1</sup>gi<sup>1</sup>-šú: Winckler's copy has na-gi-šú-nu, but there is no trace or room for -nu on the squeeze; see also Thureau-Dangin, RA 24 (1927) p. 78. Lines 448b–449a: A.T.E. Olmstead (AJSL 47 [1930–31] p. 277) suggests ... i-ta-at [tam-tim KUR <sup>1</sup>dUTU-š<sup>1</sup>i] šup-šú-qu, which would assume that three or four signs are missing at the end of line 448. Due to damage to the squeeze, it is not clear if there was anything missing or not, but based on where the other lines on the slab end, one would assume that nothing is missing. But note line 452 might suggest there was room for the restoration.

449 x x x: H. Winckler describes the traces as “Unerkennbare Spuren”; A. Fuchs (Khorsabad p. 172 line 387a) suggests the third sign may be šē<sup>1</sup>?. a-na<sup>1</sup>UD<sup>2</sup> [x x x]: A. Fuchs (ibid.) suggests a-na may be followed by <sup>1</sup>UD<sup>2</sup> and the squeeze would allow such a reading. The JA and IdF copies have a<sup>1</sup>-na<sup>1</sup> x [(x)] x [(...)] where the first trace could be <sup>1</sup>UD<sup>2</sup>.

450 <sup>1</sup>LA<sup>2</sup>: Various other readings are also possible, including <sup>1</sup>MA<sup>1</sup>. LÚ.<sup>1</sup>ERIM<sup>1</sup>.MEŠ x <sup>1</sup>GIŠ<sup>2</sup> [(x)] MEŠ: The reading follows the squeeze and see Thureau-Dangin, RA 24 (1927) p. 78 and Fuchs, Khorsabad p. 173 line 387b. Both P.E. Botta's Monument de Ninive copy and H. Winckler's copy have LÚ.A.MEŠ DI.MEŠ, but Winckler's copy has the following note for the A.MEŠ DI: “War auf dem Abklatsch nicht zu erkennen.” The JA and IdF copies have A.MEŠ DIŠ<sup>2</sup> GIŠ<sup>2</sup> [(x)] MEŠ.

451 ip-pul: Text no. 2 line 431 has ip-pu-[ul], but the spacing would suggest the proposed restoration (following H. Winckler). URU.sa-ma-<sup>1</sup>u-<sup>1</sup>ú-na<sup>1</sup>: So the squeeze and F. Thureau-Dangin (RA 24 [1927] p. 78), against Winckler's URU.sa<sup>1</sup>(copy: IR)-ma-<sup>1</sup>u-mi.

452–453a Line 452: Text no. 2 lines 432–433 add a-di maḥ-ri-ia before ub-lam-ma and have LUGAL.<sup>1</sup>MEŠ<sup>1</sup>-[ni<sup>1</sup>] <sup>1</sup>AD<sup>1</sup>.MEŠ-<sup>1</sup>ia<sup>1</sup> instead of LUGAL.MEŠ a-<sup>1</sup>lik<sup>1</sup> pa-<sup>1</sup>ni<sup>2</sup>-ia. Lines 452b–453a: [la] <sup>1</sup>ú<sup>2</sup>-šá-[an-nu-u] / ṭè-en]-šú: The reading basically follows Olmstead, AJSL 47 (1930–31) p. 277; see also Meissner, MAOG 11/1–2 (1937) p. 74. Cf. text no. 2 line 433, which has <sup>1</sup>a-na<sup>1</sup> šá-<sup>1</sup>a-al šul-me-šú-un la iš-<sup>1</sup>pu-ra<sup>1</sup> [rak-bu]-<sup>1</sup>šú<sup>1</sup>, “had never sent his [mounted messenger] to inquire about their well-being.”

453 <sup>1</sup>daš-šur <sup>1</sup>dAMAR.UTU: H. Winckler's copy erroneously has <sup>1</sup>daš-šur [x] <sup>1</sup>dAMAR.UTU. As noted by A. Fuchs (Khorsabad p. 174 line 391), the error may have been inspired by text no. 2 lines 347–349 and 467.

454–456a The tentative translation is based on text no. 2 lines 435–436, but at times the traces would not seem to support this. Line 454: [ti-bu-ut GIŠ.TUKUL].MEŠ-ia: The restoration follows Olmstead, AJSL 47 (1930–31) p. 277. The -šú of KUR-šú and <sup>1</sup>UN<sup>1</sup>.MEŠ-šú is assumed to refer to Bīt-Yakin (as opposed to Marduk-apla-iddina) since the parallel passage appears to refer to the destruction of that area and the carrying off of its people (text no. 2 line 434: <sup>1</sup>he<sup>2</sup>-pe<sup>2</sup>-e<sup>2</sup> [(x)] <sup>1</sup>ē-<sup>1</sup>mi-ia-kin, [šá<sup>1</sup>-lal UN<sup>1</sup>].MEŠ-šú). [(x x)] <sup>1</sup>iš-me-ma<sup>1</sup> x [(x)] MA<sup>2</sup> [x (x)] <sup>1</sup>i<sup>2</sup>-na<sup>2</sup>: The reading follows the squeeze, which is in part supported by P.E. Botta's copies in JA and IdF (as opposed to his copy in Monument de Ninive). Since the area immediately before the <sup>1</sup>iš<sup>1</sup> is taken up by the top of a parasol protruding from the relief below the inscription, it is not clear that any text is missing between tam-tim and <sup>1</sup>iš<sup>1</sup>. Botta's copy only indicates damage after the parasol, while H. Winckler's copy has KI [x x x x x (x)], but there is no visible trace of a KI on the squeeze.

455 -<sup>1</sup>hur<sup>2</sup>-. P.E. Botta's copy and H. Winckler's copy both have šē; only the traces of the two upper Winkelhaken are currently visible on the squeeze. x x [x x] x [(x x x)] <sup>1</sup>HI BI<sup>2</sup> x [x x (...)]: The reading of the end of the line is not clear and based on the squeeze. Botta's copy has <sup>1</sup>Ú [x x

overwhelmed him (and) he sent his messenger before me  
 a]t [the Eastern Sea to do obeissance (to me) and to bring  
 (me) tribute (and) presents].

456b–467a) [(As for) Silṭa of the city Tyre], the brin[ging  
 of tri]bute ... to [Assyria], seven [kings of the land Y]ā<sup>2</sup>, a  
 region of the land Adnana (Cyprus) – whose abode(s)  
 [are situated] at a distance of [seven] da[ys (journey)]  
 in the middle of the sea and] who from the distant  
 past until [now ... (460) ...] all together [st]opp[ed (the  
 delivery of)] their gifts (and) [wi]th[the] [ld their tri]bute.  
 [However, Silṭa] brought his substantial tribute to me  
 and, in [order to subjugate ..., he] asked me for (military)  
 aid. I sent a trustworthy eunuch of mine who was  
 fearless [in battle, with a royal (military) contingent]  
 of mine, and [ordered (him)] to avenge him (Silṭa).  
 [...] they heard [(...)] of the numerous forces of the  
 god [Ašš]ur. Then, [they became afraid] at the (mere)  
 me[n]tion of my name and (...) their arms grew weak.  
 They brought before me in Babylon gold, silver, (and)  
 utensils of [eb]ony (and) [boxwood, product(s) of] their  
 [lan]d [and (so) I considered them ...].

x x (x x x) 𒄩 [x x x (x)] and Winckler's has x ú [x x x (x x x)] 𒄩 [x x x (x)]. A. Fuchs (Khorsabad p.175 line 392) reads ša<sup>2</sup> e<sup>2</sup>-peš<sup>21</sup> for Botta's Monument de Ninive ú and Winckler's x ú, and this would somewhat fit Botta's copies in JA and IdF. The traces on the squeeze are unclear and a reading -peš<sup>2</sup> ar<sup>21</sup>-[...] might also be possible; we would expect ar-du-ti after e-peš. See text no. 2 line 435.

**Section 36** = lines 456–468 = II,35:1–13: See Winckler, Sar. Annals lines 382–389; Lie, Sar. lines 456–468; and Fuchs, Khorsabad Annals lines 392–399. Cf. text no. 2 lines 435b–442.

**456–468** See the commentary with regard to the line numbering. It is difficult to be sure how much is missing at the beginning or end of any one line, and what is proposed is only an educated guess. H. Winckler's copy (Sar. 2 pl. 12 no. 26) cannot be taken as proof, for example, that line 465 began with ir-ma-a<sup>2</sup>; his copy for Room II slab 35 is totally based upon that of Botta since no squeeze of this slab was made. For the restorations, cf. in general text no. 2 lines 435–442. Lines 456b–467a: See Na'aman, Orientalia NS 67 (1998) pp. 243–244 for the at times very tentative restorations. The name Silṭa may be derived from the root šlṭ or possibly be a misunderstanding for a title; see ibid. p. 242 n. 17, following A. Fuchs, and PNA 3/1 p. 1112.

**457** In a communication to N. Na'aman, A. Fuchs suggested the following alternate restoration for the latter part of the line: ir\*(copy: KID) kan\*(copy: LA)-še šá<sup>2</sup>-di\*(copy: UD)-id<sup>2</sup> [ni-ir daš<sup>2</sup>-šur<sup>2</sup> [be-lī-ia], “a submissive servant who pull[s] the yoke of the god Ašš[ur], [my lord]”; cf. text no. 82 v 61 and text no. 7 line 36. GUN<sup>21</sup>: the copy has [x]-UN, thus quite possibly [GÚ].UN. KUR<sup>21</sup> [daš-šur.KI<sup>2</sup>]: Cf. text no. 2 line 436.

**458b–459a** Based on text no. 2 line 437, H. Winckler's copy (Sar. 2 pl. 12 no. 26) has ... ma-lak [7 u<sub>4</sub>-me ina MURUB<sub>4</sub> tam-tim e-reb dUTU-ši šit-ku-nat\*(copy: NU)] / né-es-sa-at šu-bat-su-[un] ..., thus “(who)[s] dwelling(s) [are situated] far away, at distance of [seven] da[ys (journey)] in the middle of the Western Sea.” As already noted by A. Fuchs (Khorsabad p. 175 line 394), it is unlikely that there was sufficient room to restore all this and it is better to follow text no. 13 lines 44–45.

**459** Or restore šit-ku-nat following text no. 13 line 44 ex. 9 (listed in Minor Variants), rather than text no. 2 line 437 (so Fuchs, Khorsabad p. 175 line 394, for reasons of spacing). JA and IdF have a-na x [...] at the end of the line.

**460** The tentative reading of the end of the line is partially based on text no. 7 line 113 and following Na'aman, Orientalia NS 67 (1998) pp. 243–244, but restoring -su-un rather than -sún. JA and IdF have ik-lu<sup>21</sup>.

**461** The tentative restoration at the beginning of the line follows Na'aman, Orientalia NS 67 (1998) pp. 243–244. JA and IdF have [...] x ma-... at the beginning of the line, but the traces are too indistinct to determine if they could be -ta or not. iš<sup>21</sup>-šam-ma: H. Winckler's copy has iš-šu-ú-ma, but as already noted by A. Fuchs (Khorsabad p. 176 line 395 n. 4), we must be dealing with a singular subject in view of the -šu in madattašu.

**462** [(x x x) x]-RI-an-ni: Possibly [e]-ri-šá->-an-ni, “[he] asked me for,” or [ú]-šal<sup>2</sup>-an-ni, “[he] besought me for”; see text no. 2 line 461 and following N. Na'aman (Orientalia NS 67 [1998] pp. 243–244) and H. Tadmor (Eretz-Israel 25 [1996] p. 288 n. 3 [in Hebrew]) respectively.

**463** For the restorations, see text no. 2 line 439.

**464** N. Na'aman (Orientalia NS 67 [1998] pp. 243–244) suggests [e<sup>2</sup>]-ti<sup>21</sup>-[qu<sup>2</sup>-(ma<sup>2</sup>)], “[they] cr[ossed?]”; cf. text no. 2 lines 440. It is not clear if išḥuṭīma was at the end of this line (so Na'aman, ibid. p. 243) or the beginning of the next (so Fuchs, Khorsabad p. 176 line 397).

**465** JA and IdF have ...-a<sup>2</sup>-šú-un<sup>2</sup> [...]. It is not clear if né-peš-ti is at the end of the this line (so Winckler and Na'aman, Orientalia NS 67 [1998] p. 243) or the beginning of the next (so Fuchs, Khorsabad p. 177 line 398). If the latter, instead of GIŠ.TÚG we should probably restore a syllabic writing, e.g., GIŠ.tas-ka-ri-ni.

**466** N. Na'aman (Orientalia NS 67 [1998] p. 243) reads [KUR].MEŠ<sup>2</sup>-šú-un, but see text no. 74 vii 36 and text no. 7 lines 148–149.

- maḥ<sup>1</sup>-ri-ia* <sup>1</sup>*iš<sup>1</sup>-šu-*[*nim-ma* (*x x x*)]

## 2

The version of Sargon's Annals in Room V probably extended over thirty wall slabs (twenty-eight in the room itself and two in Entrance O). P.E. Botta prepared copies of the inscriptions for twenty of these, but appears to have numbered four of his copies incorrectly, leaving the impression that the inscription did not move regularly from one slab to the next, in a clockwise manner. It was recently possible to prove that at least one of the four passages had been assigned to the wrong slab and to raise suspicions about some other assignments. (See Frame, *Studies Grayson* pp. 89–102 for a study of the order of the wall slabs in this room.) As far as one can tell, each slab appears to have had seventeen lines, for a total of five hundred and ten lines. The last sixty-eight lines (lines 443–510) are not preserved in any other version of the annals, as is the case for lines 403–426. Assuming that the reassignment of the inscriptions on the four slabs is correct, there are two major gaps and one minor gap in the text due to a lack of copies by Botta: The first four inscribed slabs are missing (sections 1–4 = lines 1–68), as are the seventh through eleventh slabs (sections 7–11 = lines 103–187) and the fifteenth slab (section 15 = lines 239–255).

As mentioned, the beginning of the inscription is missing (lines 1–68), with the preserved text beginning at the very end of the description of the king's fifth regnal year (717; lines 69–70a). After giving an account of the sixth regnal year (716; lines 70b–95a), the text breaks off part way through the description of the seventh regnal year (715; lines 70b–102) and recommences toward the end of the account of the eighth regnal year (714; lines 188–195a). Following an account of the ninth regnal year (713; lines 195b–235), the text breaks off again shortly after the beginning of the description of the tenth regnal year (712; lines 236–238) and then recommences part way through the description of that regnal year (lines 256–267a). The text preserves the accounts of the eleventh, twelfth, and thirteenth regnal years (711–709; lines 267b–427). Following the description of the thirteenth year's campaign in Babylonia, and in particular the conquest of Dūr-Yakīn and the sending of a gift to Sargon by Upēri of Dilmun, are sections dealing with Mitā of Musku, Silṭa of Tyre, Mutallu of Kummuḥu, and the sons of Daltā of Ellipi (lines 428–467a). The text then describes the construction of the city of Dūr-Šarrukīn, and in particular its palace, and the festival that took place when the city was completed (lines 467b–494), in the second month of 706, as noted in the Assyrian Eponym Chronicle. The text concludes with blessing and curse formulae (lines 495–510).

**1 lines 467–468a** Line 467: JA and IdF have [...]<sup>1</sup>*x<sup>1</sup>am<sup>1</sup>-... / x ku-... LÚ.<sup>1</sup>ḥat<sup>1</sup>-[...]*; the traces copied before KU do not fit KUR. Lines 467b–468a: For the tentative restoration, see text no. 2 line 442 and text no. 7 line 112.

**1 lines 468** JA and IdF have traces of two signs at the end of its twelfth line, which thus should come towards the end of line 13 (see commentary).

**1 Section 37** = lines 469–481 = II,1:1–3: Cf. text no. 2 lines 443ff.

Only one slab of the inscription is preserved today (section 6 = lines 86–102), on display in the Iraq Museum (Baghdad). This would have been slab 21 from the room, although Botta labeled it slab 17 on his copy (see commentary below). The rest of the inscription appears to have been lost in the Tigris disaster of 1855, unless some pieces were left in situ.

For a plan of the room and drawings of the reliefs in this room, see Figure 11 and Botta, *Monument de Ninive* 2 pls. 84–100. With regard to the reliefs in the room, which are thought to depict Sargon's campaign to the west in his second regnal year (720), see Reade, *JNES* 35 (1976) pp. 96 and 99–102; and Reade, *Bagh. Mitt.* 10 (1979) p. 82; cf. Tadmor, *JCS* 12 (1958) p. 83 n. 243.

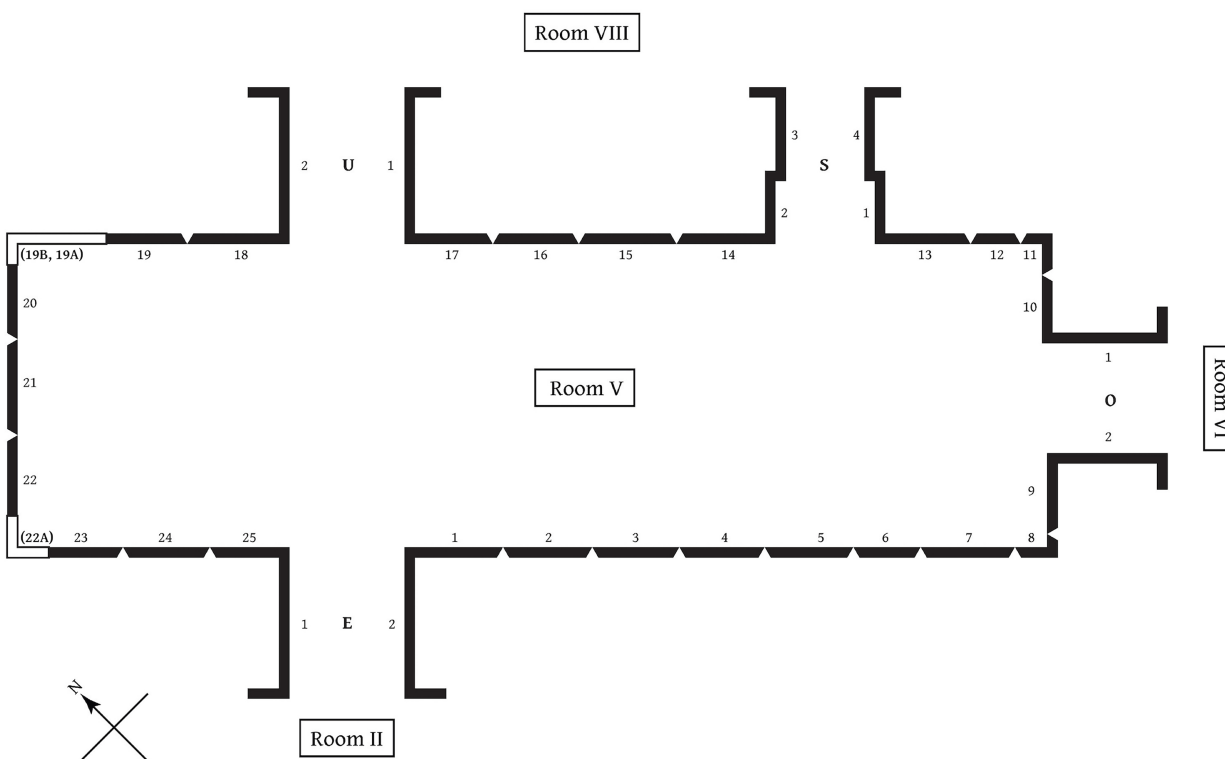

Figure 11. Plan of Room V of the palace at Khorsabad, whose wall slabs had a version of Sargon's Annals (text no. 2). Plan after Botta, *Monument de Ninive* 2 pl. 84.

## COMMENTARY

In the above Catalogue and in the edition below, P.E. Botta's numbering of the slabs (as indicated on the table of contents in Monument de Ninive 3 and on the plates in volume 4) for sections 5-6 and 12-13 is given in parentheses, while those proposed in Frame, Studies Grayson p. 91 are given as the primary reference, but placed within single quotes (e.g., for section 5 "Room V, slab '22' (Botta 16)."

F.H. Weissbach (ZDMG 72 [1918] p. 173) assumed that there is only one slab missing in each of the two northeastern corners of the room, between his slabs V,19 and V,20 and between his slabs V,22 and V,23, but the catalogue follows Frame, Studies Grayson pp. 91-92 in assuming that there was one slab between Botta's slabs V,22 and V,23 and two slabs between Botta's slabs V,19 and V,20. Since Botta

numbered the slabs in the room counterclockwise (unlike his normal procedure), these additional slabs are given the provisional numbers '22A,' '19B', and '19A' respectively (i.e., sections 4 and 8–9).

Botta did not make copies or squeezes of the inscriptions on sections 1–4, 7–11, and 15. Although he made copies of sections 12 and 13, he did not make squeezes of those sections. Squeezes of sections 14 and 30 were made and used by Botta when he prepared his copies, but these were not available in the time of H. Winckler. Thus, Winckler's copies of those two sections were solely based on those of Botta and are not taken into consideration as independent evidence of what was on those sections. The squeeze of section 30, however, is extant today and could be used here. The pieces which Botta collated either from the original or from squeezes before publishing his copies are marked with <sup>c</sup> after the Botta, Monument de Ninive 3–4 plate number in the catalogue; the same is done with the text numbers which Winckler is supposed to have collated from squeezes or originals.

Section 5 (lines 69–85): Winckler's copy of slab V,'22' (Botta 16) erroneously states that only the part of the inscription to the left of a line drawn on his copy was preserved on the squeeze (and thus collated by him); it is the section to the right of the line that is preserved. At times, however, his copy includes signs to the left of that line that are not found on Botta's copies and these have been noted in the score. In the score the point where the section collated by him begins is indicated with the siglum ▶.

Section 6 (lines 86–102): Botta's and Winckler's copies of slab V,'21' (Botta's V,17) have parts of only sixteen lines. Photos of the original in the Iraq Museum show that their copies are correct in indicating that it is the last line of the passage, and not the first line, that was not copied. The original was briefly seen in 1998, but in conditions that made careful examination of the inscription impossible. Photos of IM 60980 taken at that time are used in the score, but it must be acknowledged that they are not of high quality and combined with the fragmentary nature of the original are of only limited use. In the score only the relatively clear sections are noted, with the remaining sections indicated by "...".

Section 12 (lines 188–204): As already noted by Winckler and indicated on his copy (Sar. 2 pl. 17 no. 36), approximately the last quarter of each line on Botta's copy of slab V,'17' (Botta's V,18) (Monument de Ninive 4 pl. 120) is one line lower than it should be. (In the score, the point of the shift of line is indicated in the transliteration for Botta's copy

with a double dagger [‡].) As result of this we have traces of only sixteen lines of text. It is not known whether it is the first line or the last line on the slab that is missing. Following Winckler's copy, it is arbitrarily assumed here that it is the last line (line 204) that is missing.

Section 16 (lines 256–272): Botta's copy (Monument de Ninive 4 pl. 115<sup>c</sup> bottom) of slab V,13 only has parts of the right side of the slab and it is not always clear how much room for restoration is available to the left of what was copied.

Section 17 (lines 273–289): Botta's copy (Monument de Ninive 4 pl. 115<sup>c</sup> top) of slab V,12 would suggest that this slab only had fifteen lines of inscription, with a gap of two lines between the first five and last eight lines. An examination of the squeeze, however, shows that the gap was four lines in length rather than just two. Thus, Botta's and Winckler's copies represent parts of lines 273–277 and 282–289. The squeeze shows traces of lines 279–281, as well as all or part of the very first sign in lines 283 and 284, which do not appear on Botta's copy; they are all situated to the left of what appears on the copy.

Section 18 (lines 290–306): The squeeze of Botta, Monument de Ninive 4 pl. 114<sup>c</sup>, could be checked for only a few signs, thus in the score only a limited number of collations are noted where they help the reading of the signs.

Sections 20 and 21 (lines 324–340 and 341–357) come from Entrance O and are indicated as O<sub>1</sub> and O<sub>2</sub> respectively (Botta, Monument de Ninive 3 pl. 66<sup>c</sup>). Winckler, followed by A.G. Lie and A. Fuchs, refers to them as C<sub>1</sub> and C<sub>2</sub> respectively, but Winckler was using C<sub>1</sub> and C<sub>2</sub> to stand for Côte 1 and Côte 2 of Entrance O, not to indicate that they came from Entrance C (see Frame, Studies Grayson p. 91).

Section 24 (lines 392–408): Botta presents two copies of slab V,7 in Monument de Ninive 4 (pls. 110<sup>c</sup> and 116 top; designated here Bt<sub>1</sub> and Bt<sub>2</sub> respectively), although he does not indicate on which slab in Room V the latter copy was found; as a result, Winckler also presents two copies (Sar. pl. 21 no. 45<sup>c</sup> and pl. 22 no. 46). Botta indicates that only the first copy was checked against a squeeze, and Winckler notes that he was not able to collate his second copy (no. 46). The second copy does not include a small section on the lower left side of the slab, a section that is also not currently preserved on the squeeze. As already noted by Fuchs (Khorsabad p. 22), is it likely that the latter copy was made first, before the section on the left of the slab was discovered. In the score, transliterations of both copies are presented; pl. 110<sup>c</sup> (Bt<sub>1</sub>) is given preference in the master line.

## TEXT

Lines 1–68 are not preserved

69) [... tar]-bit ṚÉ<sup>1</sup>.GAL-ia ša [a<sup>+</sup>]-na  
KUR.ka-ak-me-Ṛe<sup>27</sup> [...]

Lines 1–68 are not preserved

69–70a) [The people of the cities Pāpa (and) Lalluknu, dogs who had been bro]ught up in my palace (and) who [had conspired wi]th the land Kakmê [for the

**Sections 1–5** Section 1 = lines 1–17 = V, 25:1–17; section 2 = lines 18–34 = V, 24:1–17; section 3 = lines 35–51 = V, 23:1–17; and section 4 = lines 52–68 = V, 22A:1–17. Cf. text no. 1 lines 1–76 and text no. 4 lines 1'–18'/19'a. Section 5 = lines 69–85 = V, 22:1–17 (Botta: V, 16:1–17). See Winckler, Sar. Annals lines 51–68; Lie, Sar. lines 77–84+; and Fuchs, Khorsabad Annals lines 77–83, 83a–b, and 84–94. Cf. text no. 1 lines 77–84+ and text no. 4 lines 19'–28'+.

**69–85** It is not clear how much is missing at the beginnings and ends of the lines since P.E. Botta's copy does not include either a right or left edge for the copy and the squeeze does not help in this matter. Thus, the line division for any restorations would be tentative and it has been thought best to only restore in the translation. H. Winckler assumed that for line 69 there were only four signs missing at the beginning of the line ([UR.GI, MEŠ tar]) and twenty-one missing at the end of the line ([id-bu-bu na-pa-di-iš ul-tu āš-ri-šú-nu as-su-ḥa-āš-šú-nu-ti-ma]). Line 69: Text no. 1 line 77 and text no. 4 line 19' omit the ša after É.GAL-ia.

**70** H. Winckler's copy indicates that he saw three vertical wedges — the bottom row of vertical wedges of the ÅŠ sign (= the number 6) — but the squeeze only has clear traces of two small vertical wedges — two of the three bottom wedges of the sign. Therefore, the transliteration 2+[4] indicates that only two of the six vertical wedges comprising the ÅŠ sign are preserved.

purpose of separating (from Assyria), I had deported them from their (own) places and] (re)settled them [in the city Damas]cus of the land [A]murru.

70b-74) I[<sup>n</sup> my] si[xth regnal year, Ursâ (Rusâ), the Urartian, sent his mounted messenger with a mendacious message to Bag-dāti of the land Uišdiš (and) KAR... of the land Zikirtu, governors of the land Mannea. He ma[de them hostile to (me), Sar]gon, (and) to A[zâ, the son] of their (former) lord, [and made them side with him (Rusâ)]. Th[ey brought about the rou]t of the Mannians [on Mount Uauš, a rugged mountain], and [threw down] the corpse of Azâ, [their lord, (there)]. I raised my hand(s) (in prayer) to the god Aššur, my lord, in order to avenge the Mannians (and) to make (that area part of) the territory of Assyria. Then, on Mount] Uau[š, the mountain where they had] t[hrown down the c]orpse of Azâ, [I flayed the skin from Bag-dāti and (then) showed (it) to the Mannians]. 75-76) [(As for) Ullusun]u, whom [they had set on the throne of] Az[â an]d [to whom they had entrusted] all [of the wide land Mannea, the wrath of the god Aššur] was directed [against Ullusunu, the Mannian, (ordaining) the destruction of his land. He (Ullusunu)] then [put his trust in Ursâ (Rusâ), the Ura]rṭi[an, ...] 77-85) Too fragmentary for translation.

86-88) [...] I [s]et [a eunuch of mine as] provincial [governor over] his city. I had [the weapon(s) of the (great) gods who] go [before] me made [and I] install[ed (them) ins]i[de it (the city Kišesim)]. I (re)named it (the city Kišesim) Kār-Nergal (and) ere]cted a [royal] image [of myself there. I conquered] the lands Bīt-[Sag]bat, Bīt-ḥi[rmami, (and)] Bīt-U[margi], (and) the cities [Ḥar]ḥubarban, Kilambāti, (and) [Ar]mang[u; and] I

73 r<sup>1</sup>iš<sup>1</sup>-[ku<sup>†</sup>-nu<sup>†</sup>]-ma: P.E. Botta's copy has x [x x]-ma and H. Winckler's copy has iš-ku-nu-ma, but only r<sup>1</sup>iš<sup>1</sup>-[x x]-<sup>r</sup>ma<sup>1</sup> is clear on the squeeze.

75 Text no. 1 line 83 has <sup>m</sup>ul-lu<sup>†</sup>-su<sup>†</sup>-nu šēš-šú ša i-na GIŠ.GU.ZA LUGAL<sup>†</sup>-ti, but the trace before šá here does not fit -šú. It may be -<sup>r</sup>un<sup>1</sup> and parallel to -nu of Ullusunu in text no. 4 line 26', according to A. Fuchs (Khorsabad p. 97 line 83a).

77-85 P.E. Botta copied only a few signs for these lines and it is not clear if the lines would have matched all or parts of text no. 1 lines 86-95 and/or text no. 4 lines 28'-40'. See also Fuchs, Khorsabad p. 98 n. 1 to line 85. Line 77: Possibly <sup>r</sup>EN<sup>1</sup>.URU, "city [I]ord".

79 P.E. Botta's and H. Winckler's copies both have [...] MEŠ AD [...], but the squeeze would suggest [...] x <sup>r</sup>TA<sup>††</sup> [...], which might allow [... di]-<sup>r</sup>ik-ta<sup>1</sup>-[šú-nu ...], and thus match up with di-ik-ta-šú-nu in text no. 1 line 86.

80 Ullusunu is mentioned in text no. 1 lines 87 and 88.

**Section 6** = lines 86-102 = V, 21':1-17 (Botta: V, 17:1-17). See Winckler, Sar. Annals lines 68-81; Lie, Sar. lines 94-107; and Fuchs, Khorsabad Annals lines 94, 94a, 95-96, 96a, 97-99, 99a, and 100-107. Cf. text no. 1 lines 94-107 and text no. 4 lines 40'-45'. See the commentary with regard to the line numbering.

86 H. Winckler's copy has [LÚ.EN].NAM UGU URU-šú áš-kun, but this is not clear from the squeeze or the original. [a<sup>2</sup>]-<sup>r</sup>li<sup>2</sup>-kut<sup>††</sup> [maḥ-ri]-<sup>r</sup>ia<sup>1</sup>: P.E. Botta's and Winckler's copies have TI ŠÚ [x x (x)]-<sup>r</sup>ia<sup>1</sup>\* (copy: ZA) and TI ŠÚ [x x x (x)]-<sup>r</sup>ia<sup>1</sup>\* (copy: ZA) respectively, while the original appears to have ...-<sup>r</sup>li<sup>2</sup>-kut<sup>††</sup> x x-<sup>r</sup>ia<sup>1</sup>; the section is not clear on the squeeze. Cf. line 92 and text no. 4 line 40'.

87 P.E. Botta's copy has [...] -šar-<sup>r</sup>me<sup>1</sup> on the following line, but the squeeze shows that H. Winckler was correct in putting it in this line. Although Winckler's copy has URU.kar-<sup>d</sup>MAŠ as being fully preserved, only the URU and part of the KAR are currently visible on the squeeze. It is not clear if we should restore -<sup>d</sup>MAŠ, "Ninurta," or <sup>d</sup>MAŠ.MAŠ, "Nergal"; see the on-page note to text no. 1 line 95.

89 -ʿma<sup>1</sup>(x) x UD: The reading follows H. Winckler's copy; P.E. Botta's copy has [...] UD and the squeeze is not clear at this point. Text no. 1 line 97 has a-na m<sup>1</sup>da-al-ta-a KUR.el-li-ba-a-a iš-pu-ru e-peš ARAD-ti, "sent to Daltâ of the land Ellipi to do obeisance (to him)." The x UD could be ʿa-na<sup>1</sup> but this would not make sense with the following urabbû elišun. m<sup>1</sup>da-al-ta<sup>1</sup>-<a> ʿLUGAL<sup>21</sup> [KUR<sup>†</sup>].ʿel<sup>1</sup>-li-[ba<sup>†</sup>]-a-a ú-ʿrab-bu<sup>1</sup>-[ú]: This is based on a combination of Botta's copy, the squeeze, and the original; Winckler's copy has m<sup>1</sup>da-al-ta LUGAL KUR.el-li-ba-a-a ú-ʿrab-bu-ú totally preserved. The traces following the TA on the squeeze seem closer to the beginning of LUGAL than A.

90 H. Winckler's copy has [ŠU.II]-ia rather than [qa-ti]-ia; the latter is based on text no. 1 line 97.

92 H. Winckler's copy has at the end of the line UGU-šú [ú]-rad-di GIŠ.TUKUL DINGIR.[MEŠ a-li-kut maḫ-ri-ia].

93-94a Line 93a: Based on text no. 4 line 40', A. Fuchs (Khorsabad p. 105 line 99a) reads ʿú<sup>1</sup>-[še-piš-ma qé]-ʿreb<sup>1</sup>-šú at the beginning of the line, which would be allowed by the spacing on P.E. Botta's and H. Winckler's copies. The squeeze, however, indicates that there is not sufficient room for this. The traces at the beginning of the line could be those of numerous signs other than Ú, including I. It is not clear that there is any trace of a sign before ŠU on the squeeze, but both Botta's and Winckler's copies have a small Winkelhaken before ŠU which could fit the end of BI, or better BE, but not reb. m<sup>1</sup>LUGAL-GIN: So Winckler's restoration. Text no. 1 line 100 has m<sup>1</sup>LUGAL-GI.NA, but there is not sufficient room to restore all this here. Lines 93-94a: Text no. 1 lines 99b-100a have a-na DINGIR-ti-šú-un áš-ʿkun<sup>1</sup> / URU.kar-m<sup>1</sup>LUGAL-GI.NA MU-šú ab-bi, "I estab[lished] the weapon of the god Aššur, my lord, to be their divinity. I (re)named it (the city Ḫarḫar) Kār-Šarrukīn."

94 P.E. Botta's copy has AD at the beginning of the line and H. Winckler's copy indicates nothing was visible there. A. Fuchs (Khorsabad p. 105 line 100) has ʿGIŠ<sup>†</sup>, which is possible but, as indicated by Fuchs, very uncertain. Winckler restored [da-na-an EN-ti-ia] at the beginning of the line, but the squeeze indicates that there is not sufficient room for this. [26]<sup>†</sup>2<sup>1</sup>: The reading is based on the squeeze; Botta's copy has only damage here, while Winckler's copy has 28, which is also found in text no. 1 line 100.

96 UD-x-ti-ʿiš: A.T.E. Olmstead (AJSL 47 [1930-31] p. 266 sub V.101) read ʿšal<sup>1</sup>-[la]-ti-iš, but, as already noted by A. Fuchs (Khorsabad p. 105 line 101 n. 1), the first sign is clearly not ŠAL. Fuchs tentatively suggested ut-[ta]-ti-iš, "like grain," but examination of the original slab in the Iraq Museum showed that the second sign is smaller than ta. It could conceivably be ḪI, but we would not expect ḪI to have the value ta in this period. Could it be tam-ʿḫi<sup>1</sup>-ti-iš, "at nightfall" or "during the dusk of evening" (derived from CAD T p. 118 tamḫitu, "nightfall")? taš-ger-[ti<sup>†</sup> ta<sup>†</sup>-pīl<sup>†</sup>-ti m<sup>†</sup>ul<sup>†</sup>]-ʿlu-su<sup>1</sup>-nu: Winckler's copy has: taš-ger-ti ta-pīl-[ti] m<sup>†</sup>ul-lu-su-nu, but the squeeze and original cannot support this.

97 [li]-ʿtu<sup>1</sup>-ti: The restoration follows Borger, BiOr 32 (1975) p. 72b. d[aš-šur MAN DINGIR.MEŠ qa-a-ti]: The restoration is based on text no. 1 lines 102-103. H. Winckler's copy has d[aš-šur] d<sup>1</sup>AMAR.UTU [qa-ti], but nothing is currently visible after the d on the squeeze or original until one gets to ʿáš-ší; there is room to restore seven or eight signs in the gap.

part of) the territory of Assyria. I [deported] Dayukku, togeth[er with his fami]ly, [and brought order to the] dist[urbed land Mannea].

99–102) [I rec]ei[ved tribute from] Ianzû, king of the land [N]a[<sup>r</sup>iri, i]n [his] c[ity] <sup>h</sup>u[b]uš[ki]a. [I conquered] ni[ne] fort[resses (...)] (100) ... I carried off as booty the people of five districts of Ursâ (Rusâ), the Urartian, [together with] their property, ... [... I conquered eight fo]rtresses, together with the settlements in [their] environs, [that belonged to the land Tuāyadi, a dis]trict belonging to Telu[sina of the land And]ia and [...]

Lines 103–187 are not preserved

188–195a) [... I caused there to] be lamentati[on] i]n the wide land [Urartu] (and) all the mountains, and I made Ursâ (Rusâ), their king, (use) flint (blades), razors, scalpels, (and) [...] (to slash himself in mourning) for as long as he lived. I made that district (Muššir) (part of) the territory of Assyria [a]nd assigned it to the authority of a eunuch of mine, the palace herald. The awes[ome] splendor of the god Aššur, my lord, overwhelmed Ursâ (Rusâ), the [Ur]a[r]t[ian], [and (so) with his o]w[n] ir[on] da[gg]er [he] stabbed (himself) in the heart [like a p]lig an[d] p[ut an end to his life].

195b–205a) In my ninth regnal year, I marched t[o] the lands [E]l[i]pi, Media, [and] Karalla. (As for) the peop[le] of the land Ka[ra]l[la] who had driven out my eu[nuc]hs and elevated Amitaš[š<sup>†</sup>i] of the land Karalla, the brother of Aššur-lē<sup>†</sup>i, over them, I struck them down with the sword on Mount Ana, a mountain peak, and (then) received in my (military) c[am]p 2,2[00] of their face-(guards) (as trophies). Amitašš<sup>†</sup>i fled together with his allies [and] ... [...] ... [...] ... [...]

98 <sup>r</sup>dal<sup>1</sup>-. A. Fuchs (Khorsabad p. 106 line 104) takes the traces visible on the squeeze to be the ú of ú-taq-qi-in, but the spacing and traces fit <sup>r</sup>dal<sup>1</sup> better.

99 H. Winckler's copy has URU.<sup>h</sup>u-[bu-uš-ki-a <sup>r</sup>URU<sup>1</sup>], thus making it uncertain if he saw any of -bu-uš-ki-a. <sup>r</sup>URU<sup>†</sup>.bi-: P.E. Botta's and Winckler's copies have E-bi-; the squeeze would allow <sup>r</sup>URU<sup>1</sup> instead of E, but cannot confirm that the sign was fully correct.

101 P.E. Botta's copy has <sup>m</sup>te\*(copy: Eš)-lu-[x x x] MA [...], while H. Winckler's copy has <sup>m</sup>te-lu-[si-na] KUR.an-di-[a-a ...]. The photos of IM 60980 indicate <sup>m</sup>te-lu-[x x x (x)]-<sup>r</sup>di-a<sup>1</sup> [x x x (x)] MA [...].

102 This line may have had some or all of text no. 1 lines 107b–108a which have [4] <sup>r</sup>LIM<sup>1</sup> 2 [ME] <sup>r</sup>UN.MEŠ a<sup>1</sup>-di mar-š<sup>†</sup>i-ti<sup>1</sup>-šú-nu áš-lu-la URU.<sup>r</sup>bi<sup>1</sup>-[ra-a]-te šá-a-ti-[na] / [ap]-pul aq-qur [i-na IZI áš-ru-up ša]-lam LUGAL-ti-ia DÜ-uš-ma li-<sup>r</sup>i<sup>1</sup>-ti <sup>d</sup>a-šur <sup>r</sup>EN-ia<sup>1</sup> UGU-šú áš-tur, "I took as booty [4],2[00] peop[le], together with their possessions. [I des]troyed, demolished, (and) [burned down with fire] tho[se] for[tresses]. I made [a] royal [im]age of myself and wrote upon it the victor(ies) of the god Aššur, [m]y lo[rd]."

Sections 7–12 Section 7 = lines 103–119 = V,20:1–17; section 8 = lines 120–136 = 'V,19B':1–17; section 9 = lines 137–153 = 'V,19A':1–17; section 10 = lines 154–170 = V,19:1–17; and section 11 = lines 171–187 = V,18:1–17. Cf. text no. 1 lines 108–160/161? The account of the eighth regnal year would likely have begun towards the end of section 8 or the beginning of section 9. Section 12 = lines 188–204 = V,17:1–17 (Botta: V,18:1–17). See Winckler, Sar. Annals lines 135–143; Lie, Sar. lines 161–169; and Fuchs, Khorsabad Annals lines 161–168 and 168a–c. Cf. text no. 1 lines 161–169. See also the commentary for the line numbering of this section with regard to Botta's copy. In the score, a double dagger (‡) is noted in the line for Botta's copy where the line shifts, with the end of the following line going with the current line.

191 <sup>r</sup>tu<sup>1</sup>-. Or less likely <sup>r</sup>tú<sup>1</sup>-, as noted by A. Fuchs (Khorsabad p. 116 line 163 n. 2).

195 It is not clear if the KUR goes in this line or with the second mention of Karalla in the following line.

(215) ... the land] Ellipi be[cause of the seizure of ...] ... [...] with entreaties at the same [time to Azuktu ...] ... [...] he [besought me] and I listened to [his wo]rd(s). [...] I ordered (him to continue) to exercise kingship. I (thus) made] Da[ltâ happy and brought order to his] dist[urbed land].

201 *zīm pāni face-(guards)*: See the note to text no. 1 line 112.

**Section 13** = lines 205–221 = V, 16:1–17 (Botta V, 14:1–17). See Winckler, Sar. Annals lines 157–162; Lie, Sar. lines 177–188; and Fuchs, Khorsabad Annals lines 168c/d and 170–185. Cf. text no. 1 lines 170–188 and text no. 74 iii 42–53.

205 The tentative restoration at the end of the line is based on text no. 82 v 31’.

206 For the restoration, cf. text no. 1 line 365. For possible additional restoration at the end of the line, see text no. 82 v 35’–36’.

207 For possible additional restoration at the end of the line, see text no. 1 line 172; cf. Olmstead, AJSL 47 (1930–31) pp. 267–268.

208 A.T.E. Olmstead (AJSL 47 [1930–31] p. 268) suggests that the land Milqia is mentioned here, but as A. Fuchs (Khorsabad p. 119 line 173 n. 1) points out, that area was part of Assyria.

209 The tentative restoration [<sup>m</sup>a-zu<sup>2</sup>]-uk-tú follows A.T.E. Olmstead (AJSL 47 [1930–31] p. 268) and A. Fuchs (Khorsabad p. 120 line 174); it is based on an assumed connection with text no. 1 line 181. For a possible restoration of the end of the line, see text no. 74 iii 43–47.

210 The restoration is based on text no. 74 iii 48, although that text has 25 rather than 24. The number 24 might be an error on P.E. Botta’s copy for 25.

211 Cf. text no. 74 iii 50.

212 KUR [x] <sup>r</sup>LIM<sup>1</sup>: As already noted by A. Fuchs (Khorsabad p. 120 line 177 n. 1), likely 30•[10/20] <sup>r</sup>LIM<sup>1</sup>, “for[ty tho]usand” or “fif[ty tho]usand,” or KUR-[ud x] <sup>r</sup>LIM<sup>1</sup>, “I conqu[ered; x tho]usand.” Forty/fifty thousand would be an unusually large number of sheep.

213 As suggested by A.T.E. Olmstead (AJSL 47 [1930–31] p. 268), possibly áš-[lu-la], “I car[ried off as booty].” For the restoration at the end of the line, see text no. 1 lines 178.

214 -<sup>r</sup>ni<sup>†1</sup>: The reading is based on text no. 1 line 179. As already noted by A. Fuchs (Khorsabad p. 120 line 179 n. 1), there is not sufficient room for A.T.E. Olmstead’s suggested restoration [ša-a-šú-nu ga-du qin]-ni-šu-nu (AJSL 47 [1930–31] p. 268).

215 See text no. 1 line 180 for the restorations.

216 The restoration is based on text no. 1 line 181. Instead of -<sup>r</sup>iš<sup>1</sup> [a-na], possibly -[iš] <sup>r</sup>a<sup>1</sup>-[na], as read by A. Fuchs (Khorsabad p. 121 line 181).

217 The restoration is based on text no. 1 lines 182–183.

- 218b–224a) [(With regard to) the land Ba'it-ili, a district] of the land Media [that is on the bor]der of [the land Ellipi]; the land[s Absaḥutti, Parnuatti, (and) Utirna; the city Diristānu of the land Uriakku; the land Rimanuti, a district of the land Uppuriya; the lands Uyadaue, Bustis, Agazi, Ambanda, (and) Dananu, far-off districts of the territory of the Arabs in the east; and the district(s) of the powerful Medes, who had thrown off] the yoke of the god Aššur [and roamed about the mountain(s) and desert like thieves – I th]rew f[ir]ebrands [into all the]ir [settlements and turned a]ll [their districts into forgotten (ruin) mounds].
- 224b–226a) [I] re[ceived 4,609 horses, mules], o[xe]n, [(and) sheep and goats, in countless numbers, as tribute from] Ul[lu]s[unu], the Mannean, [D]al[tâ of the land Ellipi, Bēl-aplu-iddina of the land Allabria, (and) from forty-five city lords of] the [powerful] Medes.
- 226b–230a) (As for) Am[bar]is of the land Tabal, [king of the land Bīt-Purutaš, the fam]ily of [whose father] Ḫullî, [a ruler, a predecessor of mine], had brought to Assyria [together with] bo[oty] from his land, [(when) ... the great gods determined the firm establishment of] my [re]ign, they (Ḫullî and his family) were on [my] m[ind. I had] Ḫullî [sit (again)] on [his royal] throne. I gathered together [the people of the land Bīt-Purutaš] and [assign]ed (them) to [his] a[uthority]. In the time of Ḫullî, [his] father, [I had granted him (Ambaris) ...] ... [...], gave him a dau[gh]ter of mine, (along) with [the city] Ḫilakku, and (thus) expa[nd]ed his land.
- 230b–235) However, [that (man) (Ambaris), a Hittite who did not pro]tect [justice, sent to] Ursâ (Rusâ), [ki]ng of [the land U]rartu, Mitâ, king of [the land M]usku, [and the kings of the land Tabal about taking aw]ay terr[itory of mine]. I mustered the troops of the god Aššur and [overwhelmed] the land Tabal [to its] full extent [as if with a net. (Then), I bro]ught in bondage [to Assyria Amba]ri[s], king [of the land Bīt-Pur]utaš, toge[ther with] the (other) offspring of

218–224 The restorations are based on text no. 1 lines 183–192a. The proposed division of the restorations between lines 219–222 must be considered tentative.

**Section 14** = lines 222–238 = V,15:1–17. See Winckler, Sar. Annals lines 162–180; Lie, Sar. lines 188–206; and Fuchs, Khorsabad Annals lines 189–206. Cf. text no. 1 lines 188–206.

225–229 For the restorations, see text no. 1 lines 192b–197. It is possible that KUR.na-gi-šú-nu should go at the end of line 223 rather than at the beginning of line 224. Line 225: There is the trace of a sign (one vertical wedge on top of another) copied by P.E. Botta approximately four or five signs before KUR.ma-da-a-a, but it does not easily fit EN, URU, or MEŠ.

226b–228a See text no. 1 lines 194b–196a and the on-page notes to those lines.

229 Text no. 1 line 197 has ú-man-ni rather than [am]-nu; cf. CAD M/1 p. 227, which reads [im]-nu.

230–238 For the restorations, see text no. 1 lines 198–206/207. For line 230, see also text no. 74 v 20.

his father’s house (and) the nobles of his land, (along) with one hundred of his chariot(s). I had the land[s] Bīt-Pur[ut]jaš (and) Ḫilakku dw[e]ll (as safely) as in a meadow and [(re)se]ttled (there) people from the lands [that the god Aššur, my lord, had conquered]. I set a eunuch [of mine] as provincial governor over them and impos[ed] the yo[ke] of my lordship [upon them].

236–238) [In my tenth regnal year, (as for) Tar]ḫun-azi of the city Me[lid], an evil Hittite who did not fear the words of the [great] g[ods], (and as for) the wi[de] land [Kam]manu, which I had taken [away with the support of the god Aššur, my lord] (and) whose [king] G[unzinā]nu I had driv[en ou]t [and (then) had] h[im (Tarḫun-azi) sit on his (Gunzinānu’s) royal throne ...]

Lines 239–255 are not preserved

256–259a) [I strengthened the garrison(s) (of) the cities Luḫsu, Purṭir, Anmurrū, Kiaka, (and) Anduarsalia against the land Urarṭu. I erected the cities Usi, Usian, (and) Uar]gin on the border [of the land Musku and seized (control of) its/their entry points (lit.: “gates”) so that there should be no escape (lit.: “exit”). (Finally), I constructed] the cit[ies Ellibir] (and) Šindarara [against the people of the land Kasku. I gave his (Tarḫun-azi’s) royal city Melid (...)], as well as the city Kummuhu, [to Mutallu].

259b–267a) [At that time, (everything) that was hi]dde[n in the mountain]s of the land Ḫa[t]ti (Syria) [was revealed (to me). (...) They brou]ght to [me dur]ing my reign ... and I he]laped up the proper[ty of the land Ḫat]ti. [(On) Mount ... was produced refined ..., ap]propriate for a palace; (on) Mounts Laris’u, Šuruman, (and) ... was produced the creation of the god Nudimmu[d (Ea), [shining] copper; on Mount[s] Tušanira, [...]durini, [(and) Elikudurini was produced iron; (the part of) Mount Lammun that is (located) between Mount U... and Mount ...] pro]duced lead, which whit]ens their

234 Text no. 1 line 203 adds a passage about building enclosure walls (*kerḫē*) before the resettlement of the people.

235 It is possible that *ki-šit-ti* should be restored at the end of the previous line. Text no. 1 line 204 has *tup-šik-ki<sup>r</sup> áš<sup>1</sup>-šur-ri*, “(the same) corvée duty (as if they were) Assyrians,” rather than *ni-[ir] be<sup>†</sup>-lu-ti-ia*, “the yo[ke] of my lordship.”

236 SAG<sup>2</sup>-tu-u x (x): F.W. Geers (apud Olmstead, AJSL 47 [1930–31] p. 268 sub line 204) reasonably suggests LÚ.ḫat-tu <sup>r</sup>lemmu<sup>1</sup>, “an evil Hittite”; cf. text no. 1 line 204. <sup>r</sup>DINGIR<sup>1</sup>.[MEŠ GAL.MEŠ] “[great] g[ods]”: The restoration follows text no. 1 line 205. Botta’s copy would suggest that there would be barely room for <sup>r</sup>DINGIR<sup>1</sup>.[MEŠ], so GAL.MEŠ, “great,” may have been omitted; however, Botta’s copies are frequently not accurate with regard to the amount of damage indicated.

Sections 15–16 Section 15 = lines 239–255 = V,14:1–17. Cf. text no. 1 lines 207–217. Section 16 = lines 256–272 = V,13:1–17. See Wincker, Sar. Annals lines 192–214; Lie, Sar. lines 218–248a; and Fuchs, Khorsabad Annals lines 218–220, 220a, and 222–240. Cf. text no. 1 lines 218–248a and text no. 3 lines 1’–6’a.

256 The translation assumes that preceding UGU (either all or partially on line 255) was URU.lu-uh-su URU.pur-ṭir URU.an-mu-ur-ru URU.ki-a<sup>2</sup>-ka<sup>2</sup> URU.an-du-ar-sa-li; see text no. 1 line 217.

259 The squeeze indicates that at the end of the line there is room for only one sign — or two signs written very close together, in contrast to the spacing of other signs — between <sup>r</sup>hat<sup>1</sup>- and -ti and thus that we should read <sup>r</sup>KUR.ḫat<sup>1</sup>-ti rather than <sup>r</sup>hat<sup>1</sup>-[ti ip-pe]-ti, which the spacing on P.E. Botta’s copy would allow.

261 H. Winckler’s copy does not have a “[” to go with the “[” before -ru.

262 It is possible that the first word in the restoration is actually the last word of the previous line. *bi-rit x Ú ...*: Text no. 1 line 226 has <sup>r</sup>bi-rit<sup>1</sup> [KUR.ú-(x)-[x x x x (x)].

dirt[y s]tate; [(the part of) Mount La]mmun [that is (located) facing ... produced pure alabaster; Mount Ammun, a mountain that is (located) facing ... produced] choice [BAR.GÜN].GÜN.NU-(stone), fit for royalty (and) [as white as pale lapis lazuli ...; (and) Mount Ba'il-šapūna], a great [mounta]in, produced at the same time copper. (265) [I then mixed mound(s) of ore] from [those] mountains, [deposited th]em [into furnaces ...], and watch[ed] their smelting. I st[or]ed up [inside my city Dūr-Šarrukīn countless possessions that my ancestors had never received]; as a result, [in Assyria] the excha[n]ge rate for silver is fixed] as if it were for bronze.

267b-273a) [In my eleventh regnal year ... Tarħu-lara of the land Gurgum ... who]se heir [Mu]tallu [had cut (him) down with the sword and taken away ... my ... in ... in order to avenge him (Tarħu-lara) ... Tarħu-lar[a], his [he]ir M[utallu (270) in/with ... of the body before the god Šamaš ... Because of] his [... that ...] he had done, [I/he burned his hands (and) showed (...). I counted as booty his heir Mutallu, together with the (royal) family of the land Bīt-Pa'alla, as many as there] we[re (of them), (along) with] gold, silver, [(and) countless property from his palace. I reorganized (the administration of) the people of the land Gurgum to its full extent, set a eu]nuch of [mi]ne as provinc[ial] governor [(...) over them, (and) consi]dered th[em as] people of [Assyria].

273b-280a) [Azūri, king of the city Ashdod, plotted ... (so as) to no longer (have to)] deliver [tribute (to me) and sent (messages)] h[ostile to Assyria to the kings in] his [enviro]ns. [Thus, because of the evil that he had done, I did away with his lordship over] the people of his land [and set his favorite brother Aħī-Mīti as king] over [th]em. [The Hittites, who (always) speak treachery, hated his rule and ... elevated over the]m [Iadna (lāmānī), ...]

263 There is likely not sufficient room to restore all that is in text no. 1 lines 227b-229a, which have [šá<sup>2</sup>] IGI [x x x (x)] / NA<sub>4</sub>.GIŠ.NU<sub>11</sub>.<sup>r</sup>GAL<sup>1</sup> eb-bu KUR.am-mu-un šá-du-ú pa-ni Û [x x x (x)] <sup>r</sup>IM<sup>1</sup> [TI] HI [x x (x x)] / na-as-qu "[that is (located)] facing [...] ... [produced] pure alabaster; Mount Ammun, a mountain [that is (located)] facing [...] ... [produced] choice [BAR.GÜN].GÜN.NU-(stone)." [BAR.GÜN].GÜN.NU: R. Campbell Thompson (DACG pp. 169-170) assumes it is the name of a type of stone that can change its color in the sun, while E. Reiner (JNES 15 [1956] pp. 132-133 line 24) takes this to be a mountain that produced tin.

267 H. Winckler suggests in a note to his copy that instead of [...] x BAD I, one might have [<sup>m</sup>ħul-li]-i.

268 Text no. 3 line 2' a has [...] -li-ia i-<sup>r</sup>na<sup>2</sup> IGI<sup>2</sup> TE<sup>2</sup> a-na tur-ri gi-mil-li-šú x [...], "[...] my [...] in ... in order to avenge him (Tarħu-lara) [...]."

269 The reading is based on text no. 3 line 3' a.

270 Text no. 3 lines 3' b-4' a have i-na x-ti zu-um-ri ma-ħar <sup>d</sup>fUTU<sup>2</sup> [x x (x)] Û [x x x x x x] / [...] x-šú e-pu-<sup>r</sup>šú<sup>2</sup>, "in/with ... of the body before the god Šam[aš ... Because of] his [...] that] he had done."

271 ba-[šú-u<sup>2</sup> KI<sup>2</sup>]: The copies by Botta and Winckler, as well as the squeeze, suggest that there is not sufficient room to read the expected ba-[šú-ú it-ti]; perhaps read instead ba-[šú-ú] <it-ti>.

Section 17 = lines 273-289 = V,12:1-17. See Winckler, Sar. Annals lines 214-229; Lie, Sar. lines 248b-264a; and Fuchs, Khorsabad Annals lines 240-255, 255a-b, and 256. Cf. text no. 1 lines 248b-264a and text no. 3 lines 6' b-14' a. Due to the damaged state of the inscription on the slab, the exact division of words between lines is uncertain on numerous occasions.

274 Based on text no. 1 line 250 and text no. 3 line 7' one expects ik-pu-ud-ma a-na LUGAL.MEŠ-ni.

277 The ú[...] is only seen on P.E. Botta's copy; text no. 3 line 8' has áš-kun and text no. 1 line 253 has [...] <sup>r</sup>kun<sup>1</sup>.

278-281 For what might be in these lines, cf. text no. 1 lines 254-257 and text no. 3 lines 8' b-10' a.

280b–287a) [Angril]y, [... I quickly] march[ed to his royal city Ashdod. I] then [surrounded (and)] conquered the c[iti]es Ash[dod, Gath, (and) Ashdod-Yam. I counted as booty (both)] the god[s who dw]el[t in them (and) that (man) (Iāmāni)], toge[ther with the people of his land, gold, silver, (and) the prop]erty of [his] pal[ace]. (285) I [re]orga[nized (the administra-tion of) those cities (and) settled there people from the lands that] I [had conquered. I se]t [a eunu]ch of mi[ne] as provincial [governor] over [them] and [con-sidered them as people of Assyria; they (now) pull my y]ok[e].

287b–303a) [I]n [my] twelfth re[gnal year, Mar]duk-apla-iddina (II) (Merodach-Baladan), [descendant of Yakīn, king of Chaldea, who dwelt on the shore of the s]ea [(and) who did not fear the words of the great] [god]s [... had put his tr]ust [in the sea and (its) s]ur[ging waves]. (290) He then broke (lit.: “overturned”) [the tr]ea[ty (sworn) by the] great [god]s and withheld his audience gift. He turned to Ĥumbanigaš (Ĥumban-nikaš I), the Elamite, for aid, made the Ru’u’a (tribe), the Ĥindaru (tribe), the Yadburu (tribe), the Puqudu (tribe), (and) all the Sutians, the people of the steppe, hostile to me, and prepared for battle against me. He proceeded (295) to the land of Sumer and Akkad and, against the will of the gods, ruled and governed [B]abylon, the city of the Enlil of the gods (Marduk), for twelve years. (However), the god Marduk, the great lord, saw the evil deeds of the Chaldeans. Then, (the order for) the removal of his royal scepter and throne was set upon his [l]ips. (300) He duly chose me, Sargon, the reverent king, from among all rulers and exalted me. He made my [weapon]s prevail [in order] to bar the e[v]il enemy Chaldeans from the territory of the land of Sumer and Akkad.

282 Cf. A. Fuchs (Khorsabad p. 134 line 249), who appears to assign these traces to the preceding line on this slab and reads <sup>r</sup>ip<sup>1</sup>?-par<sup>1</sup>? rather than <sup>r</sup>al<sup>2</sup>-lik<sup>2</sup>.

286 -ma<sup>†</sup>: The copies by both P.E. Botta and H. Winckler have -ma<sup>†</sup> (copy ÁŠ); the sign is right at the end of the squeeze and all that is visible are the first parts of three horizontal wedges, one above the other.

287 H. Winckler’s copy has a “j” toward the end of AMAR, but erroneously omits an opening bracket (“[”).

288–289a The text follows text no. 3 lines 13’–14’ rather than text no. 1 lines 263–264 which have following “king of Chaldea”: ša i-na sa-pan tam-tim ši-<sup>r</sup>it<sup>1</sup> <sup>d</sup>UTU-ši šit-ku-nu / da-ád-me-šú, “whose settlements are situated on the (coastal) plain of the Eastern Sea.”

Section 18 = lines 290–306 = V,11:1–17. See Winckler, Sar. Annals lines 230–246; Lie, Sar. lines 264b–274a; and Fuchs, Khorsabad Annals lines 256–266. Cf. text no. 1 lines 264b–274a and text no. 3 lines 14’b–15’. The edition of this section is based solely on Botta’s and Winckler’s copies since the squeeze used by both of them is no longer preserved. All the signs in this section marked with a dagger (†) have an incorrect/abnormal sign on Botta’s copy and a perfectly correct one on Winckler’s copy except as noted below. Winckler also sometimes has a sign fully preserved when Botta’s copy (which is followed here) has it damaged or only partially preserved.

290 H. Winckler’s copy has [a]-de-e DINGIR.MEŠ, while the squeeze has [x]-<sup>r</sup>de<sup>1</sup>-[x x (x)].MEŠ, while text no. 1 line 264 has a-de-e ma-mit DINGIR.MEŠ<sup>3</sup>; see also text no. 3 line 14’ (partially restored).

297 Cf. text no. 1 line 268, which has ep-šet KUR.kal-di lem-né-e-ti.

303b-313) A[t the com]mand of the great lord, the god Marduk, [I got] my (chariot) teams ready, [pre]pared] my (military) camp, (and) or[de]red the march against the Chaldean, a [danger]ous enemy. However, (when) that (man) Marduk-apla-[iddina] (II) (Merodach-Baladan) heard [of the advance] of my expeditionary force, he strengthened his fortresses (and) assembled his (military) contingents. He ...-ed the city Dūr-Abi-ḫāra [...], brought insi[de it] the Gambu[lu] (tribe) who dwell next to it, and at the appr[oa]ch of] my [expeditionary force] strengthened (its) garrison. He gave th[em] six hundred cavalry (and) four [thousand] soldiers, his allies, [the vanguard of [his] army, [and] (310) (thereby) [made] them confide[nt]. They raised their (city) wall higher [tha]n bef[ore], c[ut] a channel [from] the Surappu River, and surrounded [its environs as if with] cresting [flo]od (waters). I surrounded (and) [con]quered [that] city before the day had proceeded half a double-hour. I carr[ie]d off as booty] 18,4[30] people, [together with their prop]er[ty], h[orse]s, mules, donkeys, c[am]els, oxen, and [sheep and goats].

314-324a) Ba[...] ..., Ḫazā-il, Hamd[anu, Z]abīdu, Am-mai[(...), ...]iada[(...), Ab[ḫ]ē-iddina, (and) Aya-Sammu, (a total of) eight sh[ei]khs of [the Gambulu (tribe) who dw]el[l] (along) the Uqnū River, hea[r]d of the con[quest] of that city [and (as a result) their] hea[r]ts] pounded. [Fro]m the U[qnū] River, they brought m[e] oxen, and sheep and goats as their substantial audience gift(s) [and] gr[asp]ed hold of] my feet. Because [...] that land, I disregarded [their] crime(s) and stopped their deportation. I set a eunuch of mine as [provincial governor] over [th]em. (320) I imposed upon them the annual payment of one talent thirty

302 [a]-<sup>r</sup>na<sup>1</sup> LÚ.kal-di: H. Winckler's copy has [a-na] GİR.II LÚ.kal-di, but the GİR.II is not on the squeeze, nor is there room to restore it at the beginning of the line (i.e., [a-na GİR].<sup>r</sup>ii<sup>1</sup> is not possible). It is interesting that the two LÚ signs in the line are written differently, although separated by only two other signs. The first is the normal Neo-Assyrian LÚ, while the second is the abbreviated form that Borger, MZL p. 357 designates LÚ<sup>v</sup> or LÚ\*. In line 304, the LÚ sign has the Neo-Babylonian form. Both P.E. Botta's and Winckler's copies have -A<sup>1</sup> rather than -<sup>r</sup>im<sup>1</sup>- in *parāsimma*.

305 P.E. Botta's copy has -IBILA\*(copy: RA-x) <SUM>.NA (with possibly the SUM being merged into the end of the previous sign) and H. Winckler's -IBILA-SUM.NA; the squeeze has -<sup>r</sup>IBILA<sup>1</sup>-[x x].

Section 19 = lines 307-323 = V, 10:17. See Winckler, Sar. Annals lines 247-263; Lie, Sar. lines 274b-280+; and Fuchs, Khorsabad Annals lines 266, 266a-b, 267-271, 271a, 272, 271a-e, and 271-280. Cf. text no. 1 lines 274b-280+ and text no. 3 lines 31'-41'a.

309 <sup>r</sup>pét<sup>1</sup>: Both P.E. Botta's and H. Winckler's copies omit the *pét*, but there are very faint traces of the sign on the squeeze and certainly room for it, against the two copies.

310 <sup>r</sup>lib<sup>1</sup>-[bi<sup>†</sup>]: P.E. Botta's copy and the squeeze have a trace that might fit this reading; however, H. Winckler's copy has <sup>r</sup>lib<sup>1</sup>-ba [x x] for the end of the line. Text no. 1 line 278 has lib-bi, while text no. 3 line 32' has <sup>r</sup>qé<sup>1</sup>-[reb].

311 *nim*<sup>†</sup>: The squeeze appears to confirm the abnormal form of the sign copied by P.E. Botta, against the normal form on H. Winckler's copy. [ki-ma] <sup>r</sup>ILLU<sup>1</sup>: Botta's and Winckler's copies have <ki-ma> <sup>r</sup>ILLU<sup>1</sup> and <ki-ma> ILLU respectively, but the squeeze shows a damaged area sufficiently large to restore *ki-ma*.

312 a-di <sup>r</sup>1/2<sup>1</sup> KASKAL.GÍD u<sub>4</sub>-<sup>r</sup>mu<sup>1</sup> la šá-<sup>r</sup>qé<sup>1</sup>-e "before the day had proceeded half a double-hour": I.e., within an hour of sunrise.

314 -i[...]: Or -<sup>r</sup>ia<sup>1</sup>[...], -<sup>r</sup>ad<sup>1</sup>[...], or -<sup>r</sup>ši<sup>1</sup>[...]. For a possible reading at the end of the line, A. Fuchs (Khorsabad p. 141 line 272a n. 2) notes <sup>m</sup>sam-si-ia-da-<sup>r</sup>i in text no. 1 line 299.

minas of silver, two thousand <gur> of barley, one ox out of (every) twenty oxen (that they had), (and) one [sheep] out of (every) [twenty sheep (that they had)]. I (also) imposed the annual šibtu-tax on their oxen (and on) their sheep and goats for the god[s Bēl (Marduk) (and) Son of B]ēl (Nabû). I mustered those soldiers and took one sol[dier of theirs] out of (every) three [soldiers (for my own army)]. I resettled (them) in the city Dūr-Abi-ḡhāra, [changed its (the city's) name, (and) (re)na]med it Dūr-[Nabû]. I incorporated (lit.: “led away”) into the territory of Assyria the lands ḡu[ba]qānu, Tarb[ugāt]i, Timassunu, [(...), Pa]šur, ḡHirūtu, (and) ḡHilmu, (a total of) six districts [of the land] Gambulu, together with forty-four fortified settlements that are in them.

324b-331a) (When) the Ru'u'a, ḡHindaru, Yadburu, (and) [Pu]qudu (tribes) heard of (my) conquest of the Gambulu (tribe), they fled during the course of the night [a]nd took (themselves to) the Uqnû River, which was difficult (to ford). I dammed up the ḡTupliyaš River, a river upon which they relied, wi[th p]ile(s) of dirt and reeds. I erected two forts, side by side, and starved them out. They then came out from the Uqnû [Ri]ver and grasped hold of my feet. Iannuqu, the [s]heikh of the city Zāmê, Nabû-ušalla of the city Abūrê, Paššunu (and) ḡHaukānu of the city Nuḡānu, (and) Sa'īlu of the city Ibūli, (a total of) five sheikhs of the Puqudu (tribe); Abi-ḡhatâ of the Ru'u'a (tribe); (and) ḡHunīnu, Sāme', S[a]bḡarru, (and) Rāpi' of the ḡHindaru (tribe) brought horses, oxen, and sheep and goats (330) as their substantial audience gift(s) to the city Dūr-Abi-ḡhāra and kissed my feet. I took hostages from them (and) imposed upon them (the same state) service (and) corvée duty as (was imposed upon) the Gambulu (tribe). I assigned them to the authority of a eunuch of mine, the governor of the Gambulu (tribe).

331b-334a) (As for) the rest of those who had paid attention (lit.: “inclined their cheek”) to Marduk-aplaiddina (II) (Merodach-Baladan) and Šutur-Naḡūndi and taken (themselves) to the Uqnû River, I overwhelmed

318 -ḡšú<sup>1</sup>-. So squeeze; both P.E. Botta's and H. Winckler's copies have -<šú>-.

322 For the restoration at the end of the line, see text no. 3 line 40'; H. Winckler's copy has ú-še-šib-[šú-nu-ti].

323 [am]-ḡbi<sup>1</sup>: For the restoration, see text no. 3 line 40'; H. Winckler's copy has [aq]-bi. There is room at the end of the line to restore the name of a city; however, since the following line refers to a total of six places, we do not expect the name of another place.

Section 20 = lines 324-340 = V,O<sub>1</sub>:1-17. See Winckler, Sar. Annals lines 264-280; Lie, Sar. pp. 48-49 lines 1-6 and n. 5, pp. 50-51 lines 10-14, and pp. 52-53 lines 15-17; and Fuchs, Khorsabad Annals lines 281-297. Cf. text no. 1 lines +317-351 and text no. 3 lines 41'b-60'.

324 [KUR<sup>†</sup>.pa<sup>2</sup>]-ḡšur<sup>†</sup> [KUR<sup>†</sup>].ḡhi-: P.E. Botta's copy has [x]-ḡšur<sup>†</sup> (copy: ḡPAD) [x] ḡhi- and H. Winckler's ḡKUR.šur<sup>†</sup> (copy: ḡPAD) KUR<sup>1</sup>.ḡhi-, while the squeeze currently has [x x x (x)] ḡhi-. The restoration is based on text no. 3 line 41'.

326 lap-lap-tu: Or kal-lap-tu; see text no. 1 line 320.

330 aš<sup>†</sup>: The squeeze appears to support P.E. Botta's copy (as opposed to H. Winckler's copy) in having an extraneous vertical wedge after the ZA in the middle of sign, but what appears to be an extra wedge on the squeeze may conceivably instead indicate damage on the original or a flaw in making the squeeze.

their settlements like the Deluge. I (then) fed my army (the food in) their granaries (and) chopped down the date palm(s) upon which they relied (and) the orchards that were were the pride of their district. I sent my warriors t[o] the Uqnû [Ri]ver, their hiding place, and they (my warriors) inflicted a defeat on them. They (my warriors) carried off as booty (those) people, together with their property.

334b-338a) (The people of) the cities Zāmê, Abūrê, Yaptiru, Maḥīšu, Ḥilipanu, KAL-KAL, Pattiānu, Ḥayamānu, (335) Gadiyāti, [Amate], Nuḥānu, Amā, Ḥiuru, (and) Sa'īlu, (a total of) fourteen fortified cities, together with the settlements in their environs, (located) along the Uqnû River, who(se people) had taken fright at the onslaught of my mighty weapons and whose district I had laid waste, came to me from the Uqnû River, a faraway place, an[d grasped hold of] my [fe]et. I had that district dwell as in meadowland (in greater safety) than previously and assigned (them) to the authority of a eunuch of mine, the governor of the Gambulu (tribe).

338b-344) [Like the on]slaught of a storm, I overwhelmed the cities Sam[<sup>u</sup>]na (and) Bāb-dūri, fortress-es that Šturu-Nahūndi, the Elamite, had constructed facing (lit.: “above”) the land Yadburu, and I carried off as booty Sa...nu (and) Singamšibu, the fortress commanders, together with 7,520 Elamites who were with them and 12,062 people (340) of the [G]urumu (tribe), wago[ns, h]orses, mules, donkeys, (and) camels, together with their abund[ant] property. I reorganized (the administration of) the city Sam'ūna, changed its name, and gave it the name Enlil-iqīša. Mušēzibu, Natnu, Aya-lūnu, (and) Daiššānu of the land Laḥīru, (and) Aya-rimmu (and) Bēl-āli of the city Sulāya — (a total of) six [sh]eikhs of the land Yadburu — brought horses, mules, oxen, and sheep and goats into my (military) camp and grasped hold of my feet in order to do obeissance (to me). I considered the city Laḥīru of the land Yadibiri (Yadburu), the cities Sulā[ya], G[ur]muk, Sam'ūna, (and) Bāb-dūri, fortified cities of the land

333 -<sup>r</sup>te<sup>†</sup>: P.E. Botta's copy has a partially damaged form that might represent either *ti*, *te*, or *tim* (or various other signs), while H. Winckler's copy has *TI*; the proposed reading is based on the squeeze, which indicates there is not sufficient space for *TI* or *TIM*.

334 URU.KAL-KAL: The reading of the name is not certain, but most likely URU.dan-dan or URU.kal-kal; see Zadok, WO 16 (1985) p. 76 no. 81.

335 Text no. 3 line 56' has <sup>r</sup>2<sup>†</sup>[<sup>r</sup>2<sup>†</sup> ME<sup>†</sup> URU.MEŠ-ni], “(and) fo[ur hundred settlements],” instead of *a-di* URU.MEŠ-ni, “together with the settlements.”

338 [LÚ].gam-: H. Winckler's copy has [ša KUR].gam-, but see text no. 3 line 59'.

339 <sup>m</sup>f sa<sup>1</sup>-[x]-nu: So P.E. Botta's copy. H. Winckler's copy has <sup>m</sup>sa-ni-nu, with a note indicating that the *NI* might instead be *DU*. No trace of the sign is currently legible on the squeeze.

340 ANŠE.A.AB.BA.MEŠ: H. Winckler's copy omits the ANŠE, which is present on both P.E. Botta's copy and the squeeze.

Section 21 = lines 341-357 = O<sub>2</sub>:1-17. See Winckler, Sar. Annals lines 281-299; Lie, Sar. pp. 52-55 lines 1-9, pp. 54-55 nn. 3-6, 9, and 11-12, and p. 56 nn. 3-5 and 7; and Fuchs, Khorsabad Annals lines 298-314. Cf. text no. 1 lines 352-376a.

341 <sup>m</sup>da-iṣ-ša-nu: see Dalley and Postgate, CTN 3 p. 36 and Dezsö, SAAB 15 (2006) p. 110.

342 <sup>m</sup>EN-URU “Bēl-āli”: As noted by A. Fuchs (PNA 1/2 p. 285), this may be a title (“city lord”) which has been mistakenly taken for a personal name. <sup>a</sup>-na<sup>†</sup>: P.E. Botta's copy has <sup>a</sup>\*(copy: DIŠ-ŠÚ)-na\*(copy: BAD) and H. Winckler's has <sup>a</sup>-na\*(copy: BAD), where the *A* has a small

Yadburu, the cities Aḫilimmu (Ḫilimmu) (and) Pillatu that are on the border of the land Elam, together with the settlements in their env[ir]ons that are (located) along the Naḫītu River, as (part) of [my] territory.

345-347a) (The people of) the cities Tīl-Ḫu[m]ba, D[un]ni-Šamaš, Bubê, (and) Ḫamānu, fortified cult centers of the land Rāši, took fright at my mighty battle attack and (thus) entered the city Bīt-Imbī. Moreover, that (man), Šu[tur]-Naḫūndi, the[ir] ruler, sought refuge in far-off mountains, away from my weapons, in order to save his life (lit.: “their lives”).

347b-349a) With the suppo[rt] of the gods Aššur, Nabû, and Marduk, I crossed the Euphrates River with the main force of my army and set out for the city Dūr-Ladinni, which is in the land Bīt-Dakkūri. I had the abandoned city [Dūr-L]adinni rebuilt (and) stationed there fighting men of [mi]ne who were skilled in battle.

349b-352a) In Babylon, Marduk-apla-iddina (II) (Mero-dach-Baladan), king of the land Karduniaš (Babylonia), heard of the victories of the gods Ašš[ur], Nabû, and Marduk that I had repeatedly established over those cities. As a result, in the midst of [his (own)] palace (350) his own fear(s) fell upon him; he then went out (from Babylon) during the night together with his allies (and) his battle troops and set out for the land Yadburu, which is (part) of the land Elam. He gave to Šutur-Naḫūndi, the Elamite, a silver bed, a silver throne, a silver chair, a silver table, a silver wash-basin, his royal utensils, (and) his neck ornament as g[if]ts from him in order to get his revenge (on me).

352b-354a) (That) Elamite villain accepted his bribe

Winkelhaken after the first vertical wedge. The squeeze may suggest that NA was initially omitted by the stone carver and had to be added later; the trace inside the A would be the beginning of the NA and the small traces between the A and QÉ the remainder of the NA sign.

343 †gur<sup>2</sup>?. According to the squeeze, the sign is essentially as copied by H. Winckler but with slightly more damage, thus allowing for a possible GUR.

346 -†un<sup>††</sup>?. P.E. Botta’s copy has BI [...], while H. Winckler’s has -†nu<sup>1</sup>; the squeeze is not currently legible at this point. -†zu<sup>2</sup>-ub<sup>1</sup>: Botta’s copy has -BA-†ub<sup>1</sup>\*(copy: †GIŠ<sup>1</sup>-PAP) and Winckler’s -BA-ub. The squeeze is not clear but might allow -†zu<sup>2</sup>-ub<sup>1</sup>, although the reading BA for the first sign cannot be excluded.

347 tukul: P.E. Botta’s copy has tukul\*(copy: LU), while H. Winckler’s has tukul; the squeeze is not clear, but may support Botta’s copy rather than Winckler’s. u: Winckler’s copy omits this sign, but it is clear on the squeeze and Botta’s copy.

349 -[šú]: Or -(x).

351 GIŠ.né-med †KÙ<sup>1</sup>.BABBAR: So P.E. Botta’s copy and squeeze; H. Winckler’s copy has GIŠ.né-med KÙ\*(copy: KUR).BABBAR, which is corrected on pl. 49 to GIŠ.né-med-du KÙ.BABBAR. ša<sup>2</sup>: Botta’s copy has MA-šú, while Winckler’s copy has a-na; the squeeze is damaged at this point. LÚ.ELAM.MA.KI-[i]: Winckler’s copy ends with a LÚ.ELAM.MA.KI.

from him, but took fright at my weapons. [He turned aw]ay and told him (Marduk-apla-iddina) [that he would n]ot [co]me (to help him). (When) he (Marduk-apla-iddina) heard the words of (the one who was to be) [his] avenger, he threw himself [on the ground], ripped his cl[o]ak, wielded (his) razor, and uttered cries of mourning. Together with his allies (and) [his] battle troops, that (man) moved away from [the land Ya]dburu, entered into the city Iqbi-Bēl, and stay[ed] (there) in fear.

354b-356a) The citizens of Babylon (and) Borsippa, the temple personnel, the crafts[men] (355) who know [(their) trade, the lead]ers, (and) administrators of the land, who (up till then) had been his [su]bjects, [brought] be[fore me] in the city Dūr-Ladinni the left-overs of (the sacrifices to) the deities Bē[l, Zar]panitu, Nabû, (and) Tašmētu, [and i]nvi[te]d (lit.: “[sa]id [to]”) m]e to enter Ba[bylo]n, (thus) making [my] heart re-joice.

356b-359a) Happily, I entered [Baby]lon, the city of the Enlil of the gods (Marduk). Then, [I pra]y[ed] t[o the gods who dwelt in E]sagil (and) Ezida, (and) offered pure [vo]luntary offerings bef[ore th]em. Inside [his] palace, [his] royal residence, [...] I received substantial [... from ...] ... Arameans, [the land Bīt-A]mukāni, the lan[d Bīt-D]akkūri, [...].

359b-360a) (With regard to) the former [Borsippa] can[al, which king]s [who preceded me had constructed, I d]ug [a new canal int]o Šuan[na (Babylon)] for [the process]sion of the god Nabû, [my lord].

360b-363a) [I then sent eunuchs of mine], provincial governors, against [the Ḥamarānu (tribe), who had fle]d [from my weapons, ente]red Sippar, [and were constantly, repeatedly robbing] caravan(s) of the citizen(s) [of Ba]b[yl]on while they were en route. They [then] surrounded th[e]m [so that (no one), neither young (nor) old, could escape, (and) struck (them)

353 <sup>1</sup>bi<sup>1</sup>?: The squeeze is not clear, but might allow this reading; P.E. Botta's and H. Winckler's copies have PA-.

355 H. Winckler's copy has mu-de-e šip-ri a-li-kut, but the squeeze currently has only <sup>1</sup>mu-de<sup>1</sup>-[x x x (x)] x. <sup>1</sup>dag<sup>1</sup>?: P.E. Botta's copy has [x] A and Winckler's [da]-a; the squeeze is not clear, but could fit <sup>1</sup>dag<sup>1</sup>.

356 H. Winckler's copy has the whole line completely preserved, but very little of it is currently visible on the squeeze, including nothing before <sup>1</sup>e<sup>1</sup>.

357 The squeeze is not preserved for the beginning of the line. H. Winckler's copy has a-[na DINGIR.MEŠ x x x x]-sag-[x] GIŠ IB [x x (x)] <sup>1</sup>e<sup>1</sup>-ri<sup>1</sup>-da<sup>1</sup>?. For the restorations, cf. F.W. Geers, apud Olmstead, AJSL 47 (1930-31) p. 273. [ŠĀ].GI.GURU<sub>6</sub><sup>1</sup>-e KÙ<sup>1</sup>.MEŠ ma-[ḥar<sup>1</sup>-šú<sup>1</sup>]-un aq-qi: Cf. text no. 8 lines 58-59.

Section 22 = lines 358-374 = V,9:1-17. See Winckler, Sar. Annals lines 299-319; Lie, Sar. lines 376b-404a and pp. 58-59 lines 13-17; and Fuchs, Khorsabad Annals lines 315-331. Cf. text no. 1 lines 376b-404a and text no. 5 lines 1'-3'.

358 x-a-ti: H. Winckler's copy has -ra-a-ti, but the traces currently visible on the squeeze are not clear for this reading. A.T.E. Olmstead (AJSL 47 [1930-31] p. 273 sub line 376) has [bi]-ra-a-ti.

359 na-[ar bár<sup>1</sup>-sípa<sup>1</sup>].KI: The reading is based on P.E. Botta's copy and the squeeze; H. Winckler's copy has na-[a-ar] <sup>1</sup>bár<sup>1</sup>-sípa.KI.

360 H. Winckler's copy has a-na qé-reb šu.AN.AN.KI [aḥ]-re-e-ma for the end of the line, but this cannot be confirmed from the squeeze today.

361 DUMU [KÁ<sup>1</sup>.DINGIR<sup>1</sup>.RA.KI]: H. Winckler's copy has DUMU.<sup>1</sup>MEŠ<sup>1</sup> KÁ<sup>1</sup>.DINGIR.[RA.KI]; the squeeze and P.E. Botta's copy have DUMU<sup>1</sup> [x x x] x [x (x)] and DUMU [x x x] x [x (x)] respectively, where the x could be part of DINGIR or RA, with the signs spread out.

372-383) [In] my [thirteen re]gnal y[ear], in the month Ayyāru (II), I got my (chariot) [te]ams ready [i]n [Šu]anna (Babylon), prepared [my (military) c]amp [...] ... [...] Before [my (arrival), he (*Marduk-apla-iddina*) evacuated] the cities Bīt-[Z]abidāya, Iqbi-Bēl, Ḫu[rsaggalla, ...] ..., carried off as booty the people of (the cities) Ur, [...], Kissik, Nēmed-[Laguda, (and) ...], (375) and brought (them) into the city Dūr-Yakīn. He then strengthened its enclosure walls (and), moving back a distance of (one) measuring rope from the front of its main wall, he made a moat two hundred cubits wide; [he] made (the moat) one and a half *nindanu* deep and reached ground water. He cut a channel from the Euphrates River, (thereby) making (its water) flow (in)to its meadowland. He (thus) filled the city's flat-lands, where battles (are fought), with water and cut the bridges. Together with his allies (and) his battle troops, he pitched his royal tent in a bend of the river (lit.: "between rivers") like a crane and set up his (military) camp.

384-394a) At the command of the gods A[š]šur, Šamaš, and Marduk, I had [m]y fighting men fly over its water channels like eagles and they brought about his defeat. I surrounded him together with his royal (military) contingent and slaughtered his warriors like sheep at his feet. I pierced the horses trained to his yoke [wi]th arrows. Then, (as for) him, (390) I pierced (lit.: "loosened") his hand with the poin[t of an a]rrow and [he (then) entered] the gat[e of] his [city ste]althfully, [like a mongoose. I cut down the Puqudians, his allie(s), (and) the Maršānians, together with the Sutians] who were wi[th him, in front of the gate (of his city) (and) splattered his people with deadly venom. I took away from him his royal tent,

372 [i-na 13<sup>†</sup>] <sup>f</sup>BALA<sup>1</sup>-ia: P.E. Botta's copy has nothing before the IA, while H. Winckler's has [i-na 10]+3 BALA-ia; the squeeze currently has <sup>f</sup>BALA-ia<sup>1</sup>. <<GU<sub>4</sub>>> [i<sup>†</sup>]-<sup>f</sup>na<sup>1</sup>: Winckler's copy has i-na, but the squeeze (and Botta's copy) do not have the I and it is not clear from the squeeze that there is room to restore it, but the traces of the (second, unwanted) GU<sub>4</sub> do look more like that sign than I.

373 [x x] x [x (x)] PA I [x] KA I [x x] <sup>f</sup>IA<sup>1</sup>: The reading mostly follows P.E. Botta's copy; H. Winckler's copy has [x x] x x ÁŠ I KA I [x x] IA A; the squeeze currently appears to have [...] x [(x)] x [(x)] x <sup>f</sup>KA<sup>1</sup> i<sup>1</sup> [x x] <sup>f</sup>IA<sup>1</sup>. A.T.E. Olmstead (AJSL 47 [1930-31] p. 274 line 16) has ... ? .. ? pa i ka-<sup>f</sup>ra<sup>1</sup>-[ši]-<sup>f</sup>ia<sup>1</sup> a. For the restoration at the end of the line, see text no. 74 vi 54.

374 As already noted by A. Fuchs (Khorsabad p. 159 line 331 n. 1), based on passages in several other texts (e.g., text no. 7 lines 8-9, text no. 8 line 4, text no. 13 lines 6-8, text no. 14 lines 6-8, and text no. 74 vi 75-76) we would expect UNUG.KI after ÚRI.KI.

Section 23 = lines 375-391 = V,8:1-17. See Winckler, Sar. Annals lines 320-337; Lie, Sar. lines 404b-412a; and Fuchs, Khorsabad Annals lines 332-348. Cf. text no. 1 lines 404b-412a and text no. 6 lines 1'-3'a.

377 DAGAL<sup>†</sup>: The squeeze appears to confirm P.E. Botta's copy that the form of the sign is slightly anomalous, MAL×BAR, against Winckler's copy of a good DAGAL(MAL×DINGIR).

389 <sup>f</sup>qit<sup>1</sup>: So P.E. Botta's copy; H. Winckler's copy has KIB, but collation of the squeeze by F. Thureau-Dangin confirms Botta's copy (RA 24 [1927] p. 77). The squeeze is currently not clear but would not go against <sup>f</sup>qit<sup>1</sup>.

390-391 For the restorations, see text no. 6 line 3'. Line 390: *rittašu aptur*: The translation "I pierced his hand" follows CAD R p. 384; cf. CAD P p. 289 "I loosened (the grip of?) his hand." A. Fuchs (Khorsabad p. 334) has "ich ... lähmte ihm ... die Hand."

- 399) [...] GU<sub>4</sub><sup>1</sup>.<sup>1</sup>MEŠ<sup>1</sup> *ú* <sup>1</sup>še<sup>1</sup>-*e-ni ša i-na ra-ma-ni-šú-nu in-né*-<sup>1</sup>ez<sup>1</sup>-[*bu ... aš-šu?* *la?* *a-še-e?*] 399) *in-né*-<sup>1</sup>ez<sup>1</sup>-[*bu*]: The restoration was already proposed by A. Fuchs (Khorsabad p. 165 line 356); F.W. Geers (apud Olmstead, AJSL 47 [1930-31] p. 275) suggested *in-ni*-[*zib*].
- 400) [URU-šú<sup>2</sup> *u?* *la?* *na-par-ka-a?* ...] ŠU<sup>2</sup> x [x (x)] *i-ta-at* URU-šú *ak-šur-ma* GIM ŠAḪ *er*-[*re-ti ina qé-reb* URU-šú *šup-šu-qiš e-si-ir-šu*] 400) ŠU<sup>2</sup>: Possibly KI (so Fuchs, Khorsabad p. 165 line 357). Bt<sub>1</sub> (not on Bt<sub>2</sub>) and H. Winckler's copy (pl. 2 no. 45) both have ŠU; the squeeze appears to show a ŠU with a small Winkelhaken above the beginning of the extended lower horizontal wedge. *er*-[*re-ti*]: Or simply *er*-[*ri*]; see AHw p. 244 and Fuchs, Khorsabad p. 165 note 1 to line 357.
- 401) [GIŠ.KIRI<sub>6</sub>.MEŠ-šú *ak-šiṭ* GIŠ.GIŠIMMAR.MEŠ-šú] <sup>1</sup>ak<sup>1</sup>-*kis* [*a-na* A<sup>?</sup>].MEŠ *dan-nu-ti ša ḥa-ri-ši* URU-šú [...] GAL-*ti a-ram-mu*] 401) [*a-na* A].MEŠ: Against F.W. Geer's reading (apud Olmstead, AJSL 47 [1930-31] p. 275) *a-na* <sup>1</sup>e<sup>1</sup>-[*ber* A].MEŠ, for which the squeeze indicates there are no traces of the *a-na* or *e*- and not sufficient room for the reading; see also Fuchs, Khorsabad p. 165 line 358 n. 1. As noted by A. Fuchs (ibid. n. 1), we should possibly restore something like *ú-ri-da-am-ma* in the gap following URU-šú.
- 402) [UGU-šú *ak-bu*]-<sup>1</sup>us<sup>1</sup>-*ma*<sup>1</sup> <sup>1</sup>UGU<sup>1</sup> [BÀD-šú] <sup>1</sup>ú-šaq<sup>1</sup>-[*qi* *ú* šú]-*ú ḥat-tu rama-ni-šú im-qut*-[*su-ma* ...] 402-403a) Line 402: *-ma*<sup>1</sup>: Likely <sup>1</sup>ma<sup>1</sup>; Bt<sub>1</sub> (not on Bt<sub>2</sub>) and H. Winckler's copy both have three horizontal wedges, one above the other, with no final vertical wedge or any indication of damage there; the sign is not preserved on the squeeze. Lines 402b-403a: A.T.E. Olmstead (AJSL 47 [1930-31] pp. 275-276) would read [*šú-ú a-di re-še-e-šu mu-šiš uš-ši*]-*ma* *a*-[*na* KUR.ELAM.MA.KI] between *im-qut*-[*su-ma*] and [*in*]-<sup>1</sup>na<sup>1</sup>-*bit-ma*, which is presumably based on line 350, but we would expect a longer passage and, as already noted by A. Fuchs (Khorsabad p. 166 line 360 n. 1), this is “allzu frei.” For the different accounts of what happened to Marduk-apla-iddina, see the Introduction to this volume, under the section “Military Campaigns.”

**Section 24** = lines 392-408 = V,7:1-17. See Winckler, Sar. Annals lines 337-349; Lie, Sar. lines 412b-416, and pp. 62-63 lines 5-14 and nn. 1 and 6; and Fuchs, Khorsabad Annals lines 349-365. Cf. text no. 1 lines 412b-415+ and text no. 6 lines 3' b-13'/14'.

**392** The reading of the line follows Bt<sub>1</sub>. For the beginning of the line, H. Winckler's copy has instead [...] KÙ.GI, or less likely [...] KÙ.GI. Nothing for this line is currently preserved on the squeeze.

**393** The restoration is based on text no. 1 lines 413-414 and text no. 6 lines 4'-5'. GIŠ.<sup>1</sup>NÁ<sup>1</sup>: Bt<sub>1</sub> has GIŠ followed by ḪAL in the middle of an area of damage. H. Winckler's copy has GIŠ followed by ḪAL [(x)] ḪI U, all in an area of damage. The squeeze shows damage with only a few traces for the area.

**395** <sup>1</sup>MEŠ ANŠE<sup>2</sup>1.MEŠ: H. Winckler's copy has [...] .MEŠ GU<sub>4</sub>.MEŠ. Only the head of a horizontal wedge for the beginning of the middle sign is currently visible on the squeeze.

**396** H. Winckler's copy has [...] -*a-ti* 3 *u<sub>4</sub>-me*, while the squeeze currently has [...] -<sup>1</sup>a-ti 2<sup>1</sup>+<sup>1</sup>x x].

**397** Based on text no. 6 line 8' we expect 90 LIM 5 ME 80 UN.MEŠ at the beginning of the line, but the trace on the squeeze before UN looks more like <sup>1</sup>RIM<sup>1</sup>, [...]<sup>1</sup>20 ME<sup>1</sup>, or just possibly <sup>1</sup>LIM<sup>1</sup> rather than 80. [1]+1: So squeeze; H. Winckler's copy (pl. 21 no. 45) has 2, while Bt<sub>1</sub> has an anomalous form (a horizontal wedge running into the bottom of a vertical wedge). 7 ME: Bt<sub>2</sub> has 6 ME while Bt<sub>1</sub> has 7 ME (as does the squeeze).

**398** *iš-lu-la*: So squeeze and Bt<sub>2</sub>; Bt<sub>1</sub> and Winckler have *uš-lu-la*.

**399** *in-né*-<sup>1</sup>ez<sup>1</sup>-[*bu*]: The restoration was already proposed by A. Fuchs (Khorsabad p. 165 line 356); F.W. Geers (apud Olmstead, AJSL 47 [1930-31] p. 275) suggested *in-ni*-[*zib*].

**400** ŠU<sup>2</sup>: Possibly KI (so Fuchs, Khorsabad p. 165 line 357). Bt<sub>1</sub> (not on Bt<sub>2</sub>) and H. Winckler's copy (pl. 2 no. 45) both have ŠU; the squeeze appears to show a ŠU with a small Winkelhaken above the beginning of the extended lower horizontal wedge. *er*-[*re-ti*]: Or simply *er*-[*ri*]; see AHw p. 244 and Fuchs, Khorsabad p. 165 note 1 to line 357.

**401** [*a-na* A].MEŠ: Against F.W. Geer's reading (apud Olmstead, AJSL 47 [1930-31] p. 275) *a-na* <sup>1</sup>e<sup>1</sup>-[*ber* A].MEŠ, for which the squeeze indicates there are no traces of the *a-na* or *e*- and not sufficient room for the reading; see also Fuchs, Khorsabad p. 165 line 358 n. 1. As noted by A. Fuchs (ibid. n. 1), we should possibly restore something like *ú-ri-da-am-ma* in the gap following URU-šú.

**402-403a** Line 402: *-ma*<sup>1</sup>: Likely <sup>1</sup>ma<sup>1</sup>; Bt<sub>1</sub> (not on Bt<sub>2</sub>) and H. Winckler's copy both have three horizontal wedges, one above the other, with no final vertical wedge or any indication of damage there; the sign is not preserved on the squeeze. Lines 402b-403a: A.T.E. Olmstead (AJSL 47 [1930-31] pp. 275-276) would read [*šú-ú a-di re-še-e-šu mu-šiš uš-ši*]-*ma* *a*-[*na* KUR.ELAM.MA.KI] between *im-qut*-[*su-ma*] and [*in*]-<sup>1</sup>na<sup>1</sup>-*bit-ma*, which is presumably based on line 350, but we would expect a longer passage and, as already noted by A. Fuchs (Khorsabad p. 166 line 360 n. 1), this is “allzu frei.” For the different accounts of what happened to Marduk-apla-iddina, see the Introduction to this volume, under the section “Military Campaigns.”

**403** x MA A: So Bt<sub>1</sub> and H. Winckler's copies; not currently legible on the squeeze. A. Fuchs (Khorsabad p. 166 line 360 n. 1) suggests possibly <sup>r</sup>GIN<sup>1</sup> A. -na<sup>1</sup>: The form is as copied by Winckler (i.e., the end of an archaizing form of the sign NA). [in]-<sup>r</sup>na<sup>1</sup>-bit-ma la in-na-mir a-šar-šú, "[he f]led and his whereabouts have never been discovered": Cf. text no. 6 line 12' a iš-ĥu-ut-ma GIŠ.GIDRU GIŠ.GU.ZA id-di-ma ina pa-an LÚ.A KIN-ia ú-na-šiq<sup>1</sup> qa-q-ru, "He became terrified, laid down (his) scepter (and) throne, and kissed the ground before my messenger."

**405** A ME [(x)] <sup>r</sup>TI<sup>21</sup>: The squeeze may suggest <sup>r</sup>A MEŠ<sup>2</sup> TI<sup>21</sup>. NA<sub>4</sub>.aš-<sup>r</sup>pe<sup>1</sup>-[e]: For the restoration, see text no. 7 line 159.

**406** : Ú (x) x x [x]: This reading follows the squeeze. DIRI: So H. Winckler's copy; the squeeze apparently has <sup>r</sup>DIRI<sup>1</sup>; Bt<sub>1</sub> has SI-A and Bt<sub>2</sub> SI [...]. Ú.ĪL.A.MEŠ: So Bt<sub>2</sub>; Bt<sub>1</sub> has Ú.[x (x)].A.MEŠ and Winckler Ú.A.MEŠ; the squeeze has <sup>r</sup>Ú.ĪL<sup>1</sup>.A.MEŠ. nab-nit A [...]: A. Fuchs (Khorsabad p. 167 line 363) suggests possibly nab-nit A.[AB.BA], "product(s) of the s[ea]." The reading of the sign after nab-nit on the squeeze is not clear.

**407** <sup>r</sup>MEŠ<sup>1</sup>: Or [...] EŠ. H. Winckler's copy does not have any indication of a sign or damage between A and KÙ.

**408** <sup>r</sup>BANŠUR<sup>1</sup>: Bt<sub>1</sub> and H. Winckler, Sar. 2 pl. 21 no. 45 have URU-UM, while Bt<sub>2</sub> and Winckler, Sar. 2 pl. 22 no. 46 have URU-URUDU<sup>12</sup>/UM<sup>2</sup> and URU-URUDU respectively; the squeeze has <sup>r</sup>BANŠUR<sup>1</sup> (URU-<sup>r</sup>URUDU<sup>1</sup>).

**Section 25** = lines 409-425 = V,6:1-17. See Winckler, Sar. Annals lines 358-368; Lie, Sar. pp. 64-65 lines 6-17; and Fuchs, Khorsabad Annals lines 366-382. Cf. text no. 6 line(s 13'-)14', and text no. 7 lines 132b-139.

**409-425** The left end of the slab is not preserved but from line 415 onwards the passage can be restored from text no. 7 lines 134b-139, which allowed H. Winckler to determine how many signs are missing before the start of P.E. Botta's copy and the squeeze.

**410** <sup>r</sup>GAL<sup>2</sup>.MEŠ<sup>21</sup>: or MA [x] EŠ.

**411** A. Fuchs (Khorsabad p. 168 line 368 n. 1) suggests that the trace early in the line might be LÚ.BANŠUR\*: Botta's and Winckler's copies have URU-URUDU and this appears to be supported by the squeeze.

**412** GIŠ<sup>2</sup>: Both P.E. Botta's and H. Winckler's copies have GIŠ, but the squeeze appears to have the end of only one horizontal wedge, running to the middle of the vertical wedge, thus higher than one would expect for GIŠ. As already noted by A. Fuchs (Khorsabad p. 168 line 369 n. 2), the x at the end of the line is two small Winkelhakens, one above the other.

**414** H. Winckler's copy has [...].MEŠ [x x ANŠE.KUR.RA].MEŠ ANŠE.MEŠ ANŠE.A.AB.BA.MEŠ GU<sub>4</sub>.MEŠ še-e-[ni], but the squeeze has ... <sup>r</sup>ANŠE.MEŠ ANŠE.A.AB.BA<sup>1</sup>.MEŠ [...].

**415-425** For the restorations, see text no. 7 lines 134-139. At the end of line 415, H. Winckler's copy has -[šú i-na] GIBIL<sub>6</sub> aq-mu ker-ĥe-e-šú zaq-ru-te ap-pul aq-qur, but this cannot be confirmed from the squeeze today.

**416** KI<sup>†</sup>: The copies by P.E. Botta and H. Winckler both have a LU with an area of damage immediately before it; this fits what is visible on the squeeze, although a trace of what may have been a Winkelhaken is visible before what appears to be a LU, as noted by A. Fuchs (Khorsabad p. 169 line 373 n. 2).

**417** H. Winckler's copy has qer-bi ka-mu-ú (fully preserved); the squeeze currently has <sup>r</sup>qer-bi<sup>1</sup>-[x x]-<sup>r</sup>mu-ú<sup>1</sup>, with room to restore šú. <sup>r</sup>bit<sup>†1</sup>: P.E. Botta's copy has something like UD-<sup>r</sup>3', while Winckler's copy has a good É; the squeeze is basically illegible here, but has nothing that

the light (of day). (With regard to) their fields, [which long ago, while] the land [was in disorder], the Suti-ans had taken away and appropriated for their own, [I struck down] (those) Suti-ans, [the people of the steppe, with the sword]. I restored to their former status the [ter]ritories that had been taken away from them (the citizens). (420) I (re)-established the freedom (from obligations) of (the cities) Ur, [Uruk, Eridu, Larsa, Kissik, (and) Nēmed]-Lag[uda]. Moreover, [I returned] their gods [that had been carried off as booty to their cult centers and] restored [their regular] offe[rings] that had been interrupted.

421b-426a) I [ruled] all toget[her] the land Bīt-Yakīn, [from one end to the other (lit.: “above and below”), as far [as] the cities [Sam’ūna], Bāb-dūri, Dūr-Telīte, Bubê, (and) Tīl-Ḥumba, [which are on the Ela]mite [border]; I se[ttled] there people from the land] Ku[mmuḥu], which is (located) in the land Ḥatti that [I had con]quered with the support of the great gods, [my lords, and] I had (them) occupy its (Bīt-Yakīn’s) abandoned regions. I had Nabû-[damiq-ilāni] construct a fortress on the Elamite border, (425) [at the city Sagbat, in order to b]ar [access to (lit.: “the feet of”) the enemy Elamite(s). I divided up that [land into equal parts and [assigned (them) to the authority of] a eun[uch of mine, the governor of Bab]ylon, [and] a(n)other eunuch of mine, the governor [of the Gam]bu[lu (tribe)].

426b-427) [Up]ēri, king of Dilmun, [who(se) lai]r is situ[ated at a distance of thirty] le[agues] in the middle of the Eastern Sea, heard of my lordly might and brought me [his] audience gift.

428-432a) [While I was bringing ab]out [the defea]t of the Chaldeans and [Arameans] and making my weapons prevail over the people of the land Elam, a eunuch of mine, the governor [of the land Que (Cilicia), ...] marched ...ly three times into the district [of

would go against É. -<sup>r</sup>ma<sup>2†</sup>: Both Botta’s and Winckler’s copies have DU; the squeeze is not clear due to what may have been a crack or fold through the middle of the sign (see also Fuchs, Khorsabad p. 169 line 374 n. 3), but the spacing would fit MA better than DU.

423 *a*[bēlma] “I [ruled]”: The verb here and in other similar passages (e.g., text nos. 12 line 20 and 14 line 26) may be in the present tense rather than the preterite tense. H. Winckler’s copy has “[” before *bel*, but no “[” to go with it.

424 UGU: P.E. Botta’s copy has UGU<sup>†</sup> (copy: KA), H. Winckler’s copy has UGU, and the squeeze currently <sup>r</sup>UGU<sup>1</sup> (with the Winkelhaken at the beginning clearly present).

425 Perhaps URU.sa-ag-be; cf. KUR.É.sa-ga-bi in text no. 117 ii 40. This is the last line on the squeeze and the squeeze is much more damaged/unclear than for the earlier lines. Thus it is more difficult to determine if signs indicated as being abnormal on P.E. Botta’s copy were such or not.

Section 26 = lines 426-442 = V,5:1-17. See Winckler, Sar. Annals lines 369-389; Lie, Sar. pp. 66-67 lines 1-2 and lines 443-468; and Fuchs, Khorsabad Annals lines 383-399. Cf. text no. 1 lines 443-468; note also text no. 7 lines 149b-153a.

426 See text no. 7 line 140 for restorations.

427 H. Winckler’s copy has <sup>d</sup>UTU šit-ku<sup>1</sup>-na-at<sup>1</sup> [nar]-ba-šu, but the squeeze currently has <sup>r</sup>dUTU-š*i*<sup>1</sup> šit-<sup>r</sup>ku<sup>1</sup>-[x x x (x)]-<sup>r</sup>šu<sup>1</sup>.

429 H. Winckler’s copy has [ša] KUR.qu-[e] at the beginning of the line, but nothing of this is currently visible on the squeeze and ša is not found in text no. 1 line 445. <sup>r</sup>I<sup>7†</sup>: Possibly <sup>r</sup>RA<sup>1</sup> or MA. 3-šú: For the reading -šú, see also Thureau-Dangin, RA 24 (1927) p. 77. With regard to šilpu, see the on-page note to text no. 1 line 447.

Mi]tâ (Midas), king of the land Musku, and (430) took away one thousand of [his (Mitâ's) combat] troops [...] (and) their war horses. [He conquered] two fortresses upon which his (Mitâ's) district relied (and) which are (located) on a rugged mountain adjacent to [..., together with] the settlements in [their environs]. He plundered them, (and then) destro[lyed, dem]olished, (and) burned (them) down with fire. [His] messenger, who bore the good news, brought [one] thous[and face-(guards)] (taken) from [his (Mita's) wa]rriors (as trophies) to me [in the city Sama'û]na, which is (located) on the Elamite border, [a]nd (thus) made [my heart] rejoice.

432b-436a) Moreover, [th]at (man), Mitâ of the land Musku, who [had not submitted] to the kings, my ancestors, (and) had never sent his [mounted messenger] to inquire about their well-being, [heard] about the accomplishment of the victo[ri(es) (and) conquest(s)] that the gods Aššur (and) Marduk [had gr]anted me and of the destruction of Bit-Yakîn, [the carrying off of] its [people], (and) the subjugation of Upêri, k[in]g of Dilm[un, which is (located) in the middle of the sea. Then, ...] in his [far-ol]ff land, deathly quiet o[verwhelmed hi]m (and) [he se]nt [his mes]sen[ger] before m[e] a[t the Eastern Se]a to do [obeisa]nce (to me) and to bring (me) [tribute (and) pr]esents.

436b-441a) (As for) Silṭa [of the city Ty]re [... to] Assy[ria, seven] k[ing]s [of the lan]d Yā', a district [of the land Adnana (Cyprus)] — who[se abode(s)] are situated [far away], at a distance of seven da[ys] (journey) in the middle of the [West]ern Sea (and) who [fr]om the dis[tant] pa[st] until now ... all together

431 H. Winckler's copy has [li]-me-ti-[šú-nu] ik-šú-[ud]; there may be a few traces of this on the squeeze, but it is not possible to confirm his reading.

432 H. Winckler's copy has 1 LIM zi-im pa-ni LÚ.qu-ra-di-[x x x x x x (x)]-na <sup>†</sup>ša<sup>21</sup> pa-at, but not all of this is currently legible on the squeeze. His copy restores LUGAL at the end of the line, but the squeeze indicates that there was no room for it.

433 P.E. Botta's copy has <sup>†</sup>AD<sup>1</sup>.DIŠ.MEŠ, but the extraneous DIŠ is not on the squeeze.

434 <sup>†</sup>he<sup>2</sup>-pe<sup>2</sup>-e<sup>21</sup> [(x)] <sup>†</sup>Ē-<sup>†</sup>m<sup>†</sup>ia-kin<sub>7</sub>; The reading is uncertain; cf. text no. 1 line 454 he-pe-e KUR-šú. A reading [Ē-<sup>†</sup>m<sup>†</sup>ia-kin<sub>7</sub>], was already tentatively proposed by A. Fuchs (Khorsabad p. 174 line 391 n. 2).

435 See text no. 7 lines 111 and 153 for restorations. [ru]-<sup>†</sup>uq<sup>21</sup>-ti: As already noted by A. Fuchs (Khorsabad p. 174 line 392 n. 1) perhaps instead <sup>†</sup>SUD<sup>1</sup>-ti.

436 [(x) URU<sup>2</sup>].<sup>†</sup>šur<sup>21</sup>-ra-a-<sup>†</sup>a<sup>21</sup>: The tentative reading follows N. Na'aman (Orientalia NS 67 [1998] p. 242 line 11). H. Winckler's copy has ?-kum-ra-a and A. Fuchs (Khorsabad p. 175 line 393) has [x x] <sup>†</sup>KUM<sup>21</sup> RA <sup>†</sup>m<sup>†</sup>x. P.E. Botta's copy shows an area of damage immediately before two small Winkelhaken, one above the other, followed by -ra-a- and then a vertical wedge immediately before another area of damage. The two small Winkelhaken could be the end of various signs in addition to šur and kum (e.g., bi and ul). Fuchs (Khorsabad p. 175 line 393 n. 1) says that the first A appears to be rather a masculine determinative followed by unclear traces; however, the squeeze would allow -a<sup>1</sup>, although admittedly there is slightly more space than usual in the first A between the initial vertical wedge and the following ones, and all one can see of the second A is the initial vertical wedge (i.e., as copied by Botta). [a-na<sup>2</sup> KUR<sup>2</sup>] <sup>†</sup>aš-šur.[KI<sup>†</sup>]: This tentative reading basically follows Na'aman (Orientalia NS 67 [1998] p. 242 line 11) and cf. text no. 1 line 457. Similar writings exist but are rare, see for example text no. 1 line 234 and Leichty, RINAP 4 p. 72 no. 25 line 1 and p. 130 no. 58 ii 12. Nothing of this is currently visible on the squeeze, thus possibly [a-na<sup>2</sup>] <sup>†</sup>aš-šur [...], "[to/for] the god Aššur." Winckler's copy has [...] <sup>†</sup>aš-šur [ù] 7 LUGAL.MEŠ-ni. See text no. 7 line 145 for the restorations at the end of the line.

437 Following šit-ku-nu H. Winckler's copy has né-[es-sa]-at šu-[ba]-at but the squeeze seems more similar to P.E. Botta's copy. It is not clear that there is sufficient room on the squeeze to allow the restoration šit-ku-nu<sup>1</sup>-[ma šu-bat-su-un né-sa]-at. x x x <sup>†</sup>ŠU<sup>1</sup> MA I<sup>1</sup> <sup>†</sup>kād-ra<sup>1</sup>-[a-šú-un]: Botta's copy has [x] TA ŠU U MA I EN MA IR-[x x (...)]; Winckler's copy has [x (x)] TA [x (x)] ŠU MA I<sup>2</sup> EN<sup>2</sup> MA<sup>2</sup> IR<sup>2</sup>-[x x x (x)]; the squeeze appears to have x x x <sup>†</sup>ŠU MA I kād-ra<sup>1</sup>-[x x x]. A. Fuchs (Khorsabad p. 175 line 394) suggests that before ŠU the squeeze may have UR<sup>2</sup> DU<sup>2</sup>, and correctly notes that the I might instead be <sup>†</sup>AD<sup>1</sup>, <sup>†</sup>IA<sup>1</sup>, or <sup>†</sup>ŠI<sup>1</sup>. The reading <sup>†</sup>kād-ra<sup>1</sup>-[a-šú-un] follows Fuchs (Khorsabad p. 175 line 394); N. Na'aman (Orientalia NS 67 [1998] p. 242 line 12) reads [x]-ta<sup>2</sup>-šú-ma i-x-ma<sup>2</sup> ir<sup>2</sup> [x (x) ŠID<sup>2</sup>], putting kadrāšun in the following line after miḥāriš.

They bro[ught bef]ore me in Babylon gold, sil[ver, (and) utensils of ebony (and) boxwood, product(s) of] the[ir land, an]d (so) I conside[r]ed them] ...

441b-446a) Mutallu [of the lan]d [Kummuḥu – an evil Hittite who did not fe]ar the words [of the gods ... (and)] to [who]m I had entrusted [the c]ity [M]elid, his great city – put his trust in the high mountains, [...] withheld (his) [(...) tri]bute, and [did not se]nd [his] mounted mess[enger] before me in the land Bit-Yakīn to inquire about my well-being. [However, (when) that (man)] (445) heard of [the advan]ce of my expeditionary force, which was (already) in Assyria, and of the deeds I had been doing among the Chaldeans (and in) the land Elam, [fear] overwhelmed [him]. He conferred (lit.: “confers”) with his advisors day and night (lit.: “night and day”) [in order to ...] and to save his (own) life, and ... to take to the rugged mountains.

438 [x x x x] x ŠU  $r^{MA}$ ? RA<sup>21</sup> [x x x] x: N. Na'aman (Orientalia NS 67 [1998] p. 242 line 13) reads: [ $r^{ka}$ -ra<sup>1</sup>]- $r^{a}$ -šú- $r^{un}$ ?  $ú^{\dagger}$ -[šab<sup>2</sup>-ti<sup>2</sup>-lu<sup>2</sup>-(ma)]; however, there is too much room on the squeeze for just  $r^{ka}$ -ra-a between riš and šu, and the traces following ŠU would not allow -un ú-.  $r^{RA}$ ?<sup>21</sup>: Possibly  $r^{AD}$ ? or  $r^{TA}$ ? instead (so Fuchs, Khorsabad p. 176 line 395 n. 1). H. Winckler has ŠU MA TA ik-lu-ú but there is clearly room for several more signs before ik-lu-ú. [x x] x [ $msi^2$ -il<sup>2</sup>]- $r^{ta}$ ?<sup>21</sup>: Na'aman (Orientalia NS 67 [1998] p. 242 line 13) reads here [bi-lat-sún<sup>2</sup> ù  $msi$ -il]- $r^{ta}$  (cf. text no. 1 lines 460-461); while the x might conceivably be  $r^{sún}$ , there would not be sufficient room to restore ù. Na'aman (Orientalia NS 67 [1998] pp. 242-243 line 13) suggests we restore il-[la-at x x x x] at the end of the line. Possibly restore ú-šal-(la)-an-ni at the end of the line; see text no. 1 note to line 462.

439  $r^{e}$ - $r^{i}$ ?<sup>1</sup>-[šá<sup>2</sup>-ni<sup>2</sup> kit-ru<sup>2</sup> LÚ]: The tentative reading basically follows N. Na'aman (Orientalia NS 67 [1998] p. 242 line 14), although his restoration is slightly modified to fit the space available better. Cf. also text no. 1 line 462. The traces at the beginning of the line visible on the squeeze could also fit  $r^{a}$ -na<sup>1</sup>-. $r^{i}$ ?  $gi^{\dagger}$ -. Nothing is visible of these on the squeeze, but as read by A. Fuchs (Khorsabad p. 176 line 396), likely  $r^{ri}$   $gi^{\dagger}$ -, although P.E. Botta's copy shows no damage at this spot.

440 A. Fuchs (Khorsabad p. 176 line 397) reads [x x]  $r^{KUM}$ ?<sup>21</sup> [x x e]-mu-qa-at for the beginning of the line, while N. Na'aman (Orientalia NS 67 [1998] pp. 242-243 line 15) suggests [ $r^{e}$ -ti<sup>2</sup>]- $r^{qu}$ ?<sup>21</sup>-[ $r^{ma}$ ? e]-mu-qa-at (cf. text no. 1 line 464). The squeeze indicates that there is room for three or four signs before the traces of the first sign(s), indicated here as x (x) (possibly  $r^{QU}$ ), and that there would not be room for both MA and E in the space after what could be QU and before the MU.  $r^{ir}$ -ma-a<sup>2</sup>  $i^2$ -da<sup>2</sup>-a<sup>2</sup>-šú-[un]: P.E. Botta's copy has NI  $r^{MA}$ <sup>1</sup> ŠE [x (x)] x x ŠU [x x] and H. Winckler's has NI  $r^{MA}$  ŠE<sup>1</sup> [x x] x  $r^{NIG}$  ŠU<sup>1</sup> [x (x)]; the squeeze has  $r^{ir}$ -x- $r^{a}$ ?<sup>21</sup>-x- $r^{da}$ ?<sup>2</sup>-šú-un<sup>2</sup>?; see text no. 1 line 465.

441b-454 According to the Assyrian Eponym Chronicle, the campaign against Mutallu of Kummuḥu, which is described here and which was led by Assyrian officials while Sargon was in Babylonia, took place in Sargon's fourteenth regnal year (708). Line 441: See text no. 74 vii 36 and text no. 7 lines 148-149 for the restorations at the beginning of the line. H. Winckler's copy has [a-di maḥ]-ri-ia. IL  $r^{KU}$ ?/LU<sup>21</sup> x  $r^{RI}$ ? P.E. Botta's copy has IL MA DIŠ  $r^{RI}$  and Winckler's has IL MA [x] DIŠ  $r^{RI}$ ; as already noted by A. Fuchs (Khorsabad p. 177 line 398 n. 2), the squeeze suggests KU or LU rather than MA.

442 For the restorations, see text no. 7 line 112. zik<sup>†</sup>: P.E. Botta's and H. Winckler's copies both have KIŠ, likely for  $r^{zik}$ , but neither copy has an area of damage immediately before the KIŠ and the squeeze is not helpful at this point.

Section 27 = lines 443-458 = V,4:1-17. See Winckler, Sar. Annals lines 390-406; Lie, Sar. pp. 70-71 lines 1-7 and pp. 72-73 lines 8-17; and Fuchs, Khorsabad Annals lines 400-416. Cf. text no. 7 lines 112/113-119a. It is often not clear how much room was missing at the ends of the lines and as a result some of the proposed restorations must be considered uncertain.

443  $r^{URU}$ . $r^{me}$ <sup>1</sup>-lid-du: The reading follows the squeeze; the copies by Botta and Winckler both have ú-lid-du.

444 The copies by P.E. Botta and H. Winckler do not indicate sufficient room in the gap to restore la after maḥriya, but the squeeze indicates that there was sufficient room.

445  $r^{lak}$ : So squeeze; H. Winckler's copy has UR, while nothing is present on P.E. Botta's copy. For the restoration -šú ḥa-at-tú, see text no. 7 line 111.

- 446b-451a) I sent against him eunuchs [of mine, provincial governors], wi[th] their extensive troops, (along) with my royal (military) contingent. (When there was still) a distance of six leagues [for my] expeditionary force to go, [...] he abandoned his [wi]fe, his sons, (and) his [daught]ers, fled away by himself, and his whereabouts have never been discovered. They (the Assyrian troops) surrounded that city (Melid) and counted as booty his wife, [his] son[s, (and) his daughters], (along) with the people of [his] land, [horses], mules, donkeys, camels, oxen, and sheep and goats. They opened [his treasure house, (450) to]ok [g]old, silver, gar[men]ts with multi-[co]lored trim and linen garments, [blue-purp]le wool, red-purple wool, elephant hide(s), elephant ivory, ebony, (and) boxwood, the treasure [of his palace], and brought (these) befor[e m]e in the city Kalḫu.
- 451b-454) I re[or]ganized that city (Melid) (and) settled there the people of the land Bīt-Ya[kīn that I had conquered]. I s[e]t a eunuch of mine as provincial governor over them. I named him field marshal of the left (wing of the army) (lit.: “field marshal of the house of the left”) and ... [...] I made his throne firm[er than] before. I conscripted [from among them] 150 chariot(s), 1,500 cavalry, 20,000 bowm[en], (and) 10,000 shie[ld and spear] bearers, and entrusted (them) to him. I considered him as (one of) [the] provincial [gov]ernors of my land and ... [...].
- 455-463a) [(At that time), the appointed] moment came [for Daltâ, king of the lan]d Ellipi, who/whom during the course of my previous campaign [...] the god Aššur ... [...], and (so) (his) fate carried him off and [(...)] his [...] he wen[t the way of death]. In [or-

446 H. Winckler's copy has no trace or indication of damage between *i-tam-ma* and *a-na*. P.E. Botta's copy and the squeeze seem to indicate that there was one sign between them, but it is possible that this may simply be damage to the squeeze.

449 Winckler's copy restores DUMU.MUNUS.MEŠ-šú at the beginning of the line, but the squeeze indicates that there is not room for this restoration. Instead of *É ni-šir-ti-šú*, possibly restore *É.GAL É ni-šir-ti-šú* (see text no. 4 line 15'), *É na-kam-te*, or *na-kam-(a)-te/ti* (see text no. 65 lines 274 and 295, and text no. 73 line 21); see also Fuchs, Khorsabad p. 178 line 406 n. 2.

450 The trace at the beginning of the line on the squeeze appears to be somewhat similar to a TI.

451 Winckler's copy restores the *ki-šit-ti* at the beginning of the following line, but based on the squeeze there is not room for it there.

452 The restoration at the beginning of the line is based on text no. 7 line 116. *ina*: P.E. Botta's copy has BE and the squeeze could suggest the same; H. Winckler and A. Fuchs (Khorsabad p. 179 line 409) have *ina*. *ʿLÚ.tur-ʿta<sup>1</sup>-nu É GÜB* “field marshal of the left (wing of the army) (lit.: “field marshal of the house of the left”)”: With regard to the office of *turtānu* and Sargon's institution of the new office of *turtān bit šumēli*, see Dezső, Assyrian Army 1/1 pp. 218–221. As already noted by Fuchs (ibid. n. 2), possibly *mi-ʿih<sup>1</sup>-[rit]* is to be read at the end of the line.

453 Botta's copy has 4 ME, but Winckler's copy and the squeeze have 5 ME. The restoration at the end of the line is based on text no. 7 line 117.

454 The restoration at the beginning of the line is based on text no. 74 iv 11 and text no. 7 line 117. A. Fuchs (Khorsabad p. 179 line 411) suggests possibly DA for the last sign, which is found only on P.E. Botta's copy; H. Winckler's copy ends after *am-nu-šú-ma*.

455 For the restoration at the beginning of the line, see text no. 7 line 117. A. Fuchs (Khorsabad p. 179 line 412) suggests that the trace at the end of the line might be RI.

456 For the restorations, see text no. 7 lines 117–118. It is not clear if there is sufficient room for the full restoration at the end of the line.

der to ascend] his royal [throne, Nibê (and) Ašpa-bara, sons of] his [siste]rs, with [...] ... [...] wa]r[are ...] th[ey were doing battle (with one another). Nibê quickly sent a messe]nger [to Šutur-Na]h[ūndi], the Elamite, in or]der to get [revenge. He (Šutur-Na]h[ūndi] gave him (military) aid (and) ... (460) ... (and) came] to his as-sista[nce]. Aš[pa-bara] took fright at his [...], and in order] to save [his] li[fe], he besought [me with suppli-cations and entreaties and] asked m[e] for (military) ai[d]. I sent [seven of] my [eun]uchs, provincial gover-nors, to avenge him [...]. They inflicted a major [defeat on] Ni[b]ê. As a result, that (man), toge[ther with] four thousand five hundred Elamite bowmen, [fled] in or-der to save their lives [and (...)] went up [to] the city Marubištu.

463b-467a) To the city Marubištu, a fortress that rises up on the peak of a mass[ive] mountain and [(...) reaches up] among the cloud[s, ...]. They (the Assyrian troops) overwhelmed that fortress as with a bird trap and [they (then) brought] bef[ore me] that (man) (Nibê), together with [his] fighting men, [in m]anacles and handcuffs. (465) [I] reorganized (the administration of) his [city] Marubištu (and) stationed garrison troops ... [...] I [had] deathly silence [de]scend over all [the land E]lam. I allowed the people of the land Ellipi, to its [fu]ll extent, to live in peace. I impo[sed] the yoke of my lordship [upon them] (and) they (now) pull my yoke.

457 For the restorations, see text no. 7 line 118. <sup>r</sup>NIN,<sup>?</sup>MEŠ: P.E. Botta's copy has DIŠ MEŠ and H. Winckler's DAM.MEŠ; all that is currently visible on the squeeze is [...] DIŠ.MEŠ.

458 Based on text no. 7 line 79, possibly restore [i]h-šú-hu-ma after <sup>r</sup>tu-qu-un<sup>1</sup>-[tu<sup>?</sup>], "wanted (to offer) battle"; see already A.T.E. Olmstead (AJSL 47 [1930-31] p. 279). The restorations in the line are based on text no. 7 line 118. H. Winckler's copy may suggest that he saw ip-pu-šú ta-ha-zu <sup>m</sup>ni-bé-e áš-šú tur-ri [gi-mil]-li-šú [...] for the end of the line, but he may have meant to indicate that more than just gi-mil was restored (cf. his transliteration in Sar. 1 p. 68 line 405 where this passage is given without any indication of restoration). Although a few traces on the squeeze might support some of this reading, for the most part nothing is clearly legible on the squeeze.

459 The restorations are based on text no. 7 line 119. H. Winckler's copy has -di LÚ.ELAM.MA and DUMU as fully preserved, but nothing of this is currently clear on the squeeze apart from -<sup>r</sup>di<sup>1</sup>.

Section 28 = lines 460-476 = V,3:1-17. See Winckler, Sar. Annals lines 407-423; Lie, Sar. pp. 74-75 lines 1-10 and pp. 76-77 lines 11-17; and Fuchs, Khorsabad Annals lines 417-433. Cf. text no. 7 lines 119b-121a and 153b-162a and text no. 8 lines 27b-28a and 35-37a.

460b-461a Text no. 7 lines 119b-120a have e-<sup>r</sup>te-er na-piš-ti-šú / i-na su-pe-e ù te-me-qi ú-šal-la-an-ni-ma here but it is not clear that there is sufficient room in this text to restore all this. The reading of the beginning of line 461 is uncertain. P.E. Botta's copy has [(x)] <sup>r</sup>ú<sup>1</sup>-[x x x x (x)] <sup>r</sup>e<sup>1</sup>-riš-<sup>r</sup>an-ni<sup>1</sup> and H. Winckler's copy has [x x x (x)] ú-šal-la-an-ni-ma e-riš-an-ni. A. Fuchs (Khorsabad p. 180 line 418) reads [ú] <sup>r</sup>te<sup>1</sup>-me-[qi ú-šal]-<sup>r</sup>la<sup>1</sup>-[an-ni-ma] <sup>r</sup>e<sup>1</sup>-riš-<sup>r</sup>an-ni<sup>1</sup>, but the squeeze would suggest that there is insufficient room for this and it is assumed that ù te-me-qi were at the end of the preceding line. On the squeeze, the traces of the <sup>r</sup>ú<sup>1</sup> at the beginning of line 461 are directly above the <sup>r</sup>ú<sup>1</sup> at the beginning of line 466 and are assumed to be the <sup>r</sup>ú<sup>1</sup> of Botta. Following these, the squeeze has traces of a sign that would fit šal and the beginning of a horizontal wedge, which is assumed to be the beginning of the LA.

462 See already A. Fuchs (Khorsabad p. 180 line 419 n. 1), who tentatively proposed ma<sup>2</sup>-<sup>r</sup>a-at<sup>1</sup>-tú id-du-ku-ma. Cf. text no. 7 lines 120-121.

463 gap-[ši]: So P.E. Botta's copy and the squeeze; H. Winckler's copy has <sup>r</sup>EDIN<sup>1</sup>. For the reading urp[ē]ti following šikin, see Borger, BiOr 14 (1957) p. 192 (šikin urpati) and text no. 65 line 96.

464 H. Winckler's copy has bir-tú, but the spacing and traces on the squeeze suggest bir-<sup>r</sup>tu<sup>1</sup>.

465 Between ka-a-di and ú-še-li, P.E. Botta's and H. Winckler's copies have [x] x PA NU BAR [x (x)] BI; A. Fuchs (Khorsabad p. 181 line 422) has DU<sup>?</sup> x (x) TUR<sup>?</sup> ŠE<sup>?</sup> BI; and the squeeze might have (x) <sup>r</sup>DU<sup>?</sup> [(x)] <sup>r</sup>BA<sup>?</sup> x [x x] <sup>r</sup>BI<sup>?</sup>.

467b-469a) At that time, (using as laborers) en[em]y people whom [I] had ca[ptur]ed (and) [wh]om the gods Aššur, [Nabû], and Marduk had [made bow down] at my feet, (and) [in accordance with] divine will (and) [m]y [heart's] desire, [I bui]lt a city at the [foot of Mount] Muš[ri], a mountain upstream from Nineveh, [and] I [nam]ed it [Dūr]-Šarruk[īn].

469b-472a) The gods Ea, [Sîn], Šamaš, Nabû, Adad, N[inurta], and their [great spo]uses [wh]o were duly born inside [E]hursaggalkurkurra (“House, the Great Mountain of the Lands”), the mountain of the netherworld, gladly took up [residence in resplend]ent [san]ctuaries (and) [artfully-built shrines in]side [the city Dūr-Šarrukī]n. I established innumerable [regular offerings] as their shares (of temple income). [I had nešak]ku-[priest]s, [ramku-priests, surmah]hu-priests], men [well versed in] the[ir (fields of) knowl]edge (and) [initiated in secret rites], (and) na<sup>r</sup>pu-[ecst]atics [serve] them (lit.: “[stand] before them”).

472b-477a) [I built] in[side it (the city) a pa]lce using (lit.: “of”) elep[hant] ivory, [ebony, boxwood, musuk]kan[nu-wood, cedar], cyp[ress, dap]rānu-juniper, juniper, and] terebinth, (namely) the Egalgabarintukua (“Palace That Has No Equal”), to be my royal residence [and laid their foundations up]on inscr[ibed object]s [(made) of gold, silver, lapis lazuli, jas]per, par[ūtu-alabaster], copper, tin, lead, and pieces of aromatic wood[s. Then I established their brickwork (and)] roofed them [with larg]e [cedar beam]s. (475) [I bound the] doors of cypress (and) mus[uk]kannu-wood with band(s) of shining copper and installed (them in)

467 P.E. Botta's copy has *ab-šá-a-x*, where *x* is similar to DU, but with only one lower horizontal wedge, and H. Winckler's copy has *ab-šá-a-ni*; the squeeze appears to have DU for the last sign. Botta's copy has *te-TAB-še-e-<sup>r</sup>ti* and Winckler's copy has *te-né-še-e-ti*, but the squeeze indicates *te-<sup>r</sup>ne<sup>1</sup>-še-e-<sup>r</sup>ti*.

468 Mount Mušri was identified with Čabal Maqlūb by E. Forrer, but it is now generally thought to be Čabal Bāšīqā; see Kessler, RLA 8/7-8 (1997) p. 497 and Bagg, Rép. Géogr. 7/2 p. 433. H. Winckler's copy has at the end of the line URU [DÜ-uš-ma [URU.BĀD<sup>-m</sup>]MAN-[GIN], thus omitting a “]” to go with the “[” before DÜ. From the squeeze, it is not clear that the trace of the last sign is <sup>r</sup>GIN<sup>1</sup> or <sup>r</sup>G<sup>1</sup>.<sup>1</sup>[NA].

469-470a Line 469: H. Winckler's copy has <sup>dr</sup>é<sup>1</sup>-[a d<sub>30</sub> d<sup>1</sup>UTU d<sup>1</sup>AG [d<sup>1</sup>]IŠKUR, thus there is no “[” to match the “[” after <sup>dr</sup>é<sup>1</sup>. Chapels of these five gods (with Ea referred to as Nišiku), as well as the goddess Ningal, were found in the palace complex at Khorsabad (see text nos. 16-21). Lines 469b-470a: According to the Eponym Chronicle, the gods of the city Dūr-Šarrukīn entered their temples on the twenty-second day of Tašrītu (VII) of 707.

470 [nam]-<sup>r</sup>ra<sup>2</sup>-ti: So the squeeze; H. Winckler's copy has [nam-ra-a]-ti. The trace of the sign before TI on the squeeze fits the end of RA better than A and there does not appear to be sufficient room to read [nam-ra]-<sup>r</sup>a<sup>1</sup>-ti.

472b-477a Lines 472-473 refer to the building of a palace (<sup>r</sup>É.GAL<sup>1</sup>), but lines 474-477 refers to this structure in the plural (“their foundations,” “their brickwork,” “roofed them,” “their entrance(s),” and “th[eir gat]es”), as is the case in some other texts (e.g., text no. 7 lines 158b-162a). In some similar passages, we have É.GAL.MEŠ instead of É.GAL (e.g., text no. 9 line 60 and text no. 14 line 33) and this is likely the reason for the lack of agreement; note also text no. 47 lines 14-21, where we have É.GAL.MEŠ and yet UŠ<sub>6</sub>-šú, “its foundations.” É.GAL.MEŠ presumably refers to various sections/rooms within the palace complex and the translation “palatial halls” is used, following Grayson and Novonty, RINAP 3/2 p. 37 no. 39 line 60 and passim. Note that in line 482 of the present text, work is described on [É<sup>†</sup>].GAL.MEŠ šá-ti-<sup>r</sup>na<sup>1</sup>, “these [palat]ial halls.” It is possible that the text means to imply that one section of the palace used ivory as decoration, one ebony, one boxwood, etc., rather than that all were used in each section. In a text of Sennacherib (Grayson and Novotny, RINAP 3/2 p. 93 no. 49 lines 20b-23a [partially restored, but see the note there to lines 20b-23a]), É.GAL is placed before each of the sixteen items mentioned as being used to build/decorate the palace complex (gold, silver, alabaster, *alallu*-stone, cypress, cedar, etc.). It seems unlikely that the author of the Sennacherib text meant to suggest that sixteen different palaces were erected in the same city, but rather that the palace complex included numerous different sections. Cf. also Grayson, RIMA 2 p. 289 A.0.101.30 lines 25b-29a.

473 With regard to the name of the palace, see Battini, NABU 2002/2 p. 27 no. 27. Sennacherib built at Nineveh a palace even larger than Sargon's at Khorsabad and gave it essentially the same name, written slightly differently in Sumerian (*é-gal-zag-du-nu-tuku-a* and *é-gal-zag-di-nu-tuku-a*); see for example Grayson and Novotny, RINAP 3/1 p. 38 no. 1 line 79 and p. 46 no. 2 line 56. H. Winckler's copy has <sup>r</sup>(copy: GAN)-na<sup>\*</sup>(copy: H) *qer-bu-uš-šú ab-ni-ma e]-li* but with no “[” to go with the “[.”

their entrance(s). I had bu|ilt in front of th[eir gat]es  
[a po]rt[ico ([bīt] appāti), a replica of a Hittite palace,  
which is called a bīt ḥilāni in the language of the land  
Amurru].

477b-483a) [Eight t]win [l]ion (colossi) [of shining  
copper] that weigh 4,6[10 full (lit.: “tested”) talents  
(and) that were skill[fully [ca]st [by the craft of  
the god Nin]ag[al] and filled with radiance — upon  
(those) lion colossi I installed four [ma]tching cedar  
columns, [whose diameter(s) are one nindanu ea]ch,  
[the product of Mo]unt Amanus; and I positioned  
cross-beams (upon them) as a cornice for their ga[te]s.  
[I] skill[fully fashioned magnificent mountain] sheep  
[colossi of] massive [mountain] stone [and (480) in] the  
four [dir]ections I had (them) hold their (the gates’)  
respective (lit.: “fitting”) door bolt(s). [I dep]icted [the  
settle]ments that I [had] con[quered] upon [large]  
limestone s[la]bs and surrounded their (the palatial  
halls’) [lower cou]rses (with them). I made (them) an  
object of wonder. I plac[ed in]si[de] these [pala]tial  
halls [represe]ntations — (made) by the craft of the  
sculptor — of the people of every [la]nd that [I] had  
conquered, from ea[st t]o wes[t, by] the strength of  
the god Aššur, my lord.

483b-489a) In a favorable [month], (on) an auspicious  
day, I inv[ited] the god Aššur, the father of the  
gods, [the great lord], (and) the gods and goddesses  
who dwell in Assyria [(to come) inside them and] I  
of[fe]red them (the gods) [gif]ts of red šāriru-gold (and)  
pure si[lv]er, extensive pr[esen]ts as (my) substantial  
audience gift. [I (thus) (485) made the]ir (the gods’)

476 [É] ʾap-pa<sup>1</sup>-[a-ti] “portico”: The translation follows CAD A/2 p. 183 and CDA p. 20; however, it is not impossible that the term refers instead to a structure with windows; see Reade, Iraq 70 (2008) pp. 34–36. É ḥi-la-an-ni “bīt ḥilāni”: The term bīt ḥilāni has generally been thought to refer to a structure with an entry portico, but D. Kertai has recently argued that it refers instead to “the wide internal doors within the monumental suites of Assyria and the new types of ornamentation added within their midst,” the new type of ornamentation being “statues with columns on top of them” and/or “columns standing on column bases” (Iraq 79 [2017] p. 101).

476-481a Cf. Grayson and Novotny, RINAP 3/1 pp. 38–39 no. 1 lines 82–86.

Section 29 = lines 477–493 = V,2:1–17. See Winckler, Sar. Annals lines 424–440; Lie, Sar. pp. 76–77 line 1, pp. 78–79 lines 2–10, and pp. 80–81 lines 11–17; and Fuchs, Khorsabad Annals lines 434–450. Cf. text no. 7 lines 162b–185a and text no. 8 lines 37b–40a and 54–68a.

477 H. Winckler’s copy has [ú-še-pi]-šá mé-eh-ret ba-bi-š<sup>1</sup>in 8 UR.MAḤ.MEŠ tu-<sup>1</sup>a-me .... The term tū<sup>1</sup>ame may refer to pairs of lion colossi instead of to twin (i.e., identical) colossi; see also Fuchs, Khorsabad p. 340. 4,610 full talents are approximately 140,000 kg, assuming the light, rather than the heavy, mina is being used. Despite the distributive TA.ĀM after the number, it seems more likely that this was the weight of all the lion colossi together.

478 [ku<sup>+</sup>-bur-šú<sup>+</sup>-un]: H. Winckler’s copy has ku-[bur]-šú-[un] while nothing of this is indicated on P.E. Botta’s copy and the squeeze only has some indistinct traces.

479 ú-<sup>1</sup>kin<sup>1</sup>-ma: So the squeeze and text no. 7 line 164, contra P.E. Botta’s copy ú-TE-ma, H. Winckler’s copy ú-še-šib-ma, and A. Fuchs’ reading ú-še-šib<sup>1</sup>-ma (Khorsabad p. 183 line 436). ʾUDU<sup>1</sup>.MEŠ šad-dī<sup>1</sup> <sup>d</sup>[LAMMA MAḤ.MEŠ] “[mountain] sheep [colossi]”: See Engel, Dämonen pp. 31–36. Possibly “[mountain] rams,” not “[mountain] sheep.” With regard to the reading <sup>d</sup>LAMMA MAḤ.MEŠ as two words rather than one, see ibid. pp. 7–8. The phrase appears in several of Sargon’s inscriptions, including one occasion when <sup>d</sup>LAMMA is written at the end of one line and MAḤ.MEŠ at the beginning of the following line (Botta, Monument de Ninive 3 pl. 57<sup>c</sup> lines 3–4 = text no. 9 line 75 ex. 19) and two occasions when it is written <sup>d</sup>LAMMA.MEŠ MAḤ.MEŠ (Botta, Monument de Ninive 3 pl. 16<sup>quater</sup> line 117 and pl. 11<sup>quater</sup> lines 88–89 [MAḤ.MEŠ restored on second line] = text no. 13 line 117 exs. 1 and 5 respectively).

480 [a-na] ʾer<sup>1</sup>-bet-[ti šá]-<sup>1</sup>a-ri<sup>1</sup> ú-šá-aš-bi-<sup>1</sup>ta SI<sup>1</sup>.GAR-ši-in as-mu “[in] the four [dir]ections I had (them) hold their (the gates’) respective (lit.: “fitting”) door bolt(s)”: Or “I placed (them) facing their (the gates’) respective (lit.: “fitting”) door bolt(s) [in] the four [dir]ections” (cf. CAD Š/2 p. 409).

(Aššur), [the lord of (all) lands], who dwells in  
E[ḥurs]agga[lkur]kur[ra, and] the (other) gods [who  
d]we[ll in] Assyria had returned [to their] c[ity] amid  
so[ngs of] joy (490) [and hymns of pra]ise, with rul[ers  
from] every [la]nd, provi[ncial gove]rnors of my land,  
overseers, commanders, nob[les, eun]uchs, and [el-  
ders of Assyria], I sat down [in]side my [pal]ace and  
h[e]ld a fes[ti]val. [I received as their substantial]  
tri[bute gol]d, s[ilv]er, ut[ensils] of gold (and) sil[ver,  
produ]ct(s) of the mountain[(s), every kind of aro-  
matic, fine oil], gar[men]ts with multi-colored trim  
and linen garments, blue-[pur]ple wool, red-purple  
wool, [elepha]nt [hide(s)], elep[hant ivory, ebony,  
boxwood, everything valuable, royal treasure], large  
[Egy]ptian [horses] that are trai[n]ed to the yoke,  
[mules, donkeys, camels, oxen, and sheep and goats  
(...)].

495–506a) [May the god Aššur, the father of the gods,  
look steadfastly upon (this) city] that has been d[uly]

485 KUR.GI<sup>1</sup>.MUŠEN.MEŠ [UZ.TUR].MUŠEN.MEŠ: The reading is based on the squeeze and follows text no. 7 lines 168–169. The copy of H. Winckler has GÜ<sup>1</sup>.MUŠEN.MEŠ [UZ].TUR<sup>1</sup>.MUŠEN.MEŠ.

488 H. Winckler's copy has šá-<sup>†</sup>ta-pu na-piš-ti UD.MEŠ SUD.MEŠ na-[da]-nim<sup>†</sup>-ma ù kun-nu.

489 H. Winckler's copy has EN.LÍL EN KUR.KUR a-šib é-ḥur-sag-gal-kur-kur-ra ù DINGIR.MEŠ [a]-šib<sup>†</sup>-bu-ut KUR aš-šur.KI i-na tam-gi-ti.

490 H. Winckler's copy has [ù mar] tak-né-e i-tu-ru URU-[uš-šú-un] it-ti mal-ki ma-ti-tan LÚ.EN pa-ḥa-ti KUR-ia LÚ.ak-li LÚ.šá-pi-ri LÚ.NUN.MEŠ.

491 KÜ.GI KÜ<sup>†</sup>.[BABBAR<sup>†</sup>]; So the squeeze for the end of the line, contra P.E. Botta's copy which has nothing of this preserved, H. Winckler's copy which has KÜ.GI KÜ.BABBAR [NA<sub>4</sub> a-qar-tum URUDU], and A. Fuchs' edition (Khorsabad p. 186 line 448) which has [KÜ.GI] KÜ<sup>†</sup>.[BABBAR NA<sub>4</sub> a-qar-tum URUDU par-zil-lum]. Cf. text no. 7 line 180, which has ú-nu-<sup>†</sup>ut<sup>†</sup> KÜ.GI KÜ.BABBAR NA<sub>4</sub> a-qar-tum URUDU par-zil-lum.

492 For the start of the line, H. Winckler's copy has [par-zil-lum] bi-[nu]-tu, but the squeeze shows that there is insufficient room for all this. [lu<sup>†</sup>-[bul<sup>†</sup>]-[ti<sup>†</sup>]: Winckler's copy has TÚG.lu-bul-ti, but nothing of the TÚG or bul signs are on P.E. Botta's copy or currently visible on the squeeze. Text no. 7 line 181 and text no. 8 line 63 do not have TÚG before lu-bul-ti.

493 H. Winckler's copy has [GIŠ.TÚG] mim-ma aq-ru ni-šir-ti LUGAL-ti ANŠE.KUR.RA.MEŠ KUR.mu-šu-ri, thus there is no "[ to match the "]" between KUR and mu-.

Section 30 = lines 494–510 = V,1:1–17. See Winckler, Sar. Annals lines 441–460; Lie, Sar. pp. 80–81 lines 1–4 and pp. 82–83 lines 5–17; and Fuchs, Khorsabad Annals lines 451–467. Cf. text no. 7 lines 185b–194 and text no. 8 lines 68b–77a and 80b–87.

494 P.E. Botta's copy would allow for four or five signs between the restored US<sub>5</sub>.UDU.ḪI.A and [man-da<sup>†</sup>]-[at-ta-šú-nu]; however, text no. 7 line 185 immediately follows US<sub>5</sub>.UDU.ḪI.A with [man-da<sup>†</sup>]-[at-ta-šú-nu] and the squeeze indicates that the traces of the [man-da<sup>†</sup>]- are much closer to the left end than the copy indicates.

selected by me (lit.: “the ch[oice of the steadfastness of my heart]”) and (upon) this palace with his holy, ra]dia[nt] fa[ce and] may he ordain [the]ir [renovation for future days]. May (the following command) c[ome] from (lit.: “be s[et] in”) [his ho]lly [mouth]: May [the guardian spirit (and) the prot]ect[ive god stay continually] in them, d[a]y and nig[ht, and] may [they] never [leave them. At his command, may] the r[uler] who constructed them [li]ve l[ong (and) reach (500) extreme old a]ge. May [th]eir bu[ilder] remain in good health [for]ev[er]. May (this command) iss[ue] from his (the god Aššur’s) h[ol]y lips]. May [the one who d]wells inside these palatial hall(s) [rejoi]ce th[er]e [in physical well-being, merriment, and h]appiness, [(and) be fully satisf]ied with (his) good fortune. In [...] ... [May I store up] inside [it (the palace) (...)] extensive prop[erty (taken) from] enemy [land]s, [presents from (every) set]t[lement], the yield of the (four) quar[ters (of the world), (and) the wealth] of (both) the mountain(s) and the seas.

506b–509a) In day[s to come], may a future ruler [among the king]s, m[y] descendants, renovate [(any) dilapi]da[ted sections of] this [pal]ace. May he (then) discover [my inscribed object, a]noint (it) with oil, [offer] a sac[rif]ice, [(and) return (it)] to its (original) place. The god Aššur [will (then) listen to his] pra[yers].

509b–510) [(As for) the one who alte]rs my inscri[ption or my name, may] the god Aššur, [my lord, overthrow his kingship. May he (the god Aššur) make his name (and) his descendant(s) disappear from the land and may he have no pity on him].

### 3

The texts on three wall slabs from the western end of Room XIII (slabs 4, 6, and 7) were copied by P.E. Botta and these preserve part of a version of Sargon’s Annals. The room slabs were numbered in clockwise order and each of the three Annals slabs has 15 lines of text. The inscription describes events in Sargon’s eleventh and twelfth regnal years (711–710): campaigns to Gurgum and Ashdod (lines 1’–13’a) and against Marduk-apla-iddina II (Merodach-Baladan) of Babylonia (lines 13’b–60’) respectively. As far as it is preserved, the Annals inscription in this room largely duplicates the version of the Annals in Room II (text no. 1 lines 248–266 and 276/277–340) and Room V (text no. 2 lines 267–292 and 309/310–338), but with some major variations.

2 lines 503–504 Cf. text no. 8 lines 79–80. Line 503: Possibly instead <sup>r</sup>i<sup>1</sup>-na ZI-šú or <sup>r</sup>i<sup>1</sup>-na ZI(-)[x x x]-šú; cf. i-na šap-ti-šú in text no. 8 line 80.

2 line 508 <sup>r</sup>i<sup>1</sup>.<GIŠ>: Or less likely <i>.GIŠ; the squeeze indicates that there was not room for both signs.

2 line 509 šit<sup>†</sup>: P.E. Botta’s copy has šá, which A. Fuchs (Khorsabad p. 188 line 466) reasonably reads as <sup>r</sup>šit<sup>1</sup>, assuming that there was damage at that point. There is a trace of the sign visible on the squeeze, but nothing identifiable.

Botta had squeezes made of the inscriptions on all three slabs and they are still extant, stored in the Louvre (Paris). In addition, a small part of slab 4 (section 1') is preserved today in the Louvre (Paris), on display in its galleries. The forty-five lines on the three slabs are to be associated with Winckler, *Sar. Annals* lines 209–232 and 250–278; Lie, *Sar.* pp. 38–39 lines 1–5, lines 248–266 and 277–280 (see also n. 9 to line 280), p. 48 lines 1–6, line 326 (see also n. 5 to line 326), lines 333–338, and pp. 50–53 lines 11–15; and Fuchs, *Khorsabad Annals* lines 235–258 and 269–295. For a plan of the room, see Figure 12 and Botta, *Monument de Ninive* 2 pl. 139; for drawings of the reliefs on the slabs in the room, see *ibid.* pls. 139–143, in particular 141–143 for the three slabs with the inscription edited here. With regard to the reliefs in Room XIII, see Reade, *JNES* 35 (1976) pp. 96 and 98; and Reade, *Bagh. Mitt.* 10 (1979) p. 83. The slabs found in the room depict the campaign of Sargon's eighth regnal year (714) against Urarṭu and Muṣaṣir. Slab 4 has an epigraph upon it (text no. 36) identifying the scene depicted as being the capture of the city Muṣaṣir.

## COMMENTARY

If one assumes that each wall slab with the *Annals* inscription in this room had fifteen lines of text and that the inscription was in general similar to that in Room II and V, there would presumably have been about fifteen or sixteen inscribed wall slabs before Room XIII slab 4 and about eleven or twelve after slab 7. The drawing of the reliefs in the room by E. Flandin in *Monument de Ninive* 2 pl. 140 indicates that slab 3 was inscribed; it likely preserved the

section of the *Annals* immediately before that found on slab 4.

Section 1' (lines 1'–15'): A small section of the inscription (parts of three lines, 13'–15') on slab 4 is preserved today in the Louvre (AO 19892). The squeeze of section 4 does not include the last approximately ten percent of each line.

Section 3' (lines 31'–45'): Although a squeeze of this section is preserved in the Louvre, it is particu-

larly faint and, except in a few places, unhelpful.

Restorations in lines 1'-5' are based on text no. 2 lines 267b-272a; in lines 6'-15' on text no. 1 lines

248-266a and text no. 2 lines 272b-292; and in lines 31'-60' on text no. 1 lines 276/277-340+ and text no. 2 lines 309/310-338a.

**Section 1'** = lines 1'-15' = XIII,4:1-15. See Winckler, Sar. Annals lines 209-232; Lie, Sar. pp. 38-39 lines 1-5 and lines 248-266; and Fuchs, Khorsabad Annals lines 235-255, 255a-b, and 256-258. Cf. text no. 1 lines 248-266a and text no. 2 lines 267b-292.

**1'-6'a** Cf. text no. 7 lines 83b-89. Line 1': The translation assumes that in the previous line, or possibly at the beginning of this line, was *i-na* 11 BALA-ia (see text no. 1 line 234 and text no. 2 line 267 [restored]). AD: Not seen by H. Winckler or currently on the squeeze, but copied by P.E. Botta. For the tentative restoration "*Tarḫu-lara of the land Gurgum*," see text no. 7 lines 83-84. Possibly [... m<sup>†</sup>tar-<sup>†</sup>hu]-<sup>†</sup>ra<sup>†</sup> (copy: AD) at the beginning of the line.

**2'** i-na<sup>†</sup> IGI<sup>†</sup> TE<sup>†</sup>: P.E. Botta has RA<sup>†</sup> [(x)] IGI TE; H. Winckler has i-na<sup>†</sup> IGI<sup>†</sup> TE<sup>†</sup>; and the squeeze has i-na<sup>†</sup> x x.

**3'** H. Winckler (Sar. 1 p. 36 line 211) and, tentatively, A. Fuchs (Khorsabad p. 131 line 237) read the damaged sign in *x-ti* as LI, but the traces on the squeeze are most uncertain. d<sup>†</sup>UTU<sup>†</sup>: P.E. Botta's and Winckler's copies have no trace of the UTU; the reading is based on the squeeze; Fuchs (ibid.) had d<sup>†</sup>UTU<sup>†</sup>?

**4'** -šú<sup>†</sup>: P.E. Botta's copy has DIŠ, while H. Winckler's copy has two vertical wedges which he suggests in a note may be the remains of a RA sign and which A. Fuchs (Khorsabad p. 131 line 238 n. 1) suggests may be the end of an UŠ; the squeeze just has a vertical wedge preceded by damage. -qam-: Botta's copy has -qam-, but Winckler's copy has KUR or ŠE; not currently preserved on the squeeze. As is often the case, it is not clear from Winckler's copy and edition if he saw KUR.[É-pa-'a-al-la mal] ba-[šú-ú] or KUR.É-[pa-'a-al-la] mal ba-[šú-ú] or even KUR.É-[pa-'a-al-la] mal ba-šú-ú.

Figure 12. Plan of Room XIII of the palace at Khorsabad, whose wall slabs had a version of Sargon's Annals (text no. 3). Plan after Botta, *Monument de Ninive* 2 pl. 139.

and [my] cava[lry] (10') who never leave my side (even) in friendly territory, [I] qu[ic]kly [marched] to his royal city Ashdod. I then surro[unded (and) conquered the cities Ashdod, Gath, (and) Ashdo[d-Yam]. I consi[dered] as booty (both) the gods who dwelt in them (and) that (man) (Iāmāni), together with the people of his land, gold, silver, (and) the posses[sions] of [his] palace. I reor[ganized] (the administration of) their cities (and) settled there [peo]ple from the lands that I had conquered. I set a eunuch of mine as provincial governor over [them] and conside[red them] as people [of Assy]ria. They (now) pull my y[ok]e.

13'b-15') In my twelfth regnal year, Marduk-apla-iddina (II) (Merodach-Baladan), descendant of Yaḫīn, king of Chaldea, [who dwelt] on the shore of the sea, who did not f[e]ar the w[or]d[s] of the [great] gods ... [...] put [his trust] in the sea and (its) surging waves. He then broke (lit.: "overturned") the treaty [sworn by the] great [god]s [and] withheld his audience gift. He turned to Īm[baniga]š (Īm[ban]-nikaš I), the Elamite, for aid, [made] the Ru'u'a (tribe), [the Īn]daru (tribe), the land Yadburu, [the Puqudu (tribe), (and) all the Sutians, the people of the steppe, hostile to me, and prepared for battle against me].

Lines 16'-30' not preserved

31'-34'a) [...] They raised their (city) wall higher than before, cut a channel f[rom] [the Surap]pu [River, and surrounded its environs with cresting flood (waters)]. I surrounded (and) conquered [that city before] the day had proceeded [half] a double-hour. I carried off as booty [18,430 people, together with their] property,

10' [al-lik]-<sup>†</sup>ma<sup>†</sup>? Or [al]-<sup>†</sup>lik<sup>†</sup>. All that is visible on P.E. Botta's copy and the squeeze is a vertical wedge; H. Winckler's copy has [al]-lik, but the spacing on Botta's copy and the squeeze might suggest the proposed reading.

11' [ak-šu]-ud: H. Winckler's copy has [ak-šud]<sup>ud</sup> and the parallel passages in text no. 1 lines 259 and text no. 2 line 283 have 'KUR<sup>†</sup>-ud and KUR-ud respectively; the proposed restoration is based upon the spacing on P.E. Botta's copy. 'eš<sup>†</sup>-[šú<sup>†</sup>-ti<sup>†</sup>]: The reading follows Botta; Winckler's copy has eš-šú-ti, but nothing is currently visible on the squeeze.

13'-15' Line 13': For the restoration [a-šib], "[who dwelt]", see text no. 8 line 18. 'zik<sup>†</sup>-ri<sup>†</sup>? P.E. Botta's copy has 'zik<sup>†</sup>-[x] and H. Winckler's copy has 'zik<sup>†</sup>-ri<sup>†</sup>? (copy: 'IZ'); in both cases the traces of the first sign are similar to DÜ followed by damage. The squeeze currently seems to suggest that in the damaged area following the 'DÜ' are two small Winkelhaken. Cf. text no. 7 line 122, which has la pa-li-ħu zi-kir EN EN.EN, "who does not fear the word of the lord of lords (Marduk)." Lines 13'b-14'a: Cf. J. Nougayrol (RA 54 [1960] p. 206) who suggested [šá] ki-šad tam-tim la a-dir kak<sup>†</sup>-[ki<sup>†</sup>-e<sup>†</sup>] 'DINGIR<sup>†</sup>.MEŠ a-na mi-lik<sup>†</sup>? 'la<sup>†</sup> ku-šir 'uš<sup>†</sup>-[ta<sup>†</sup>-am<sup>†</sup>]-š<sup>†</sup>? and translated "qui est au bord de la mer, ne re[dout]ant pas les ar[mes?] di[vines,] [pri]t? [un parti i]nfortuné." Lines 13'b-15': Cf. text no. 7 lines 121b-123a.

14' The reading of the first part of the line is problematic. Before ÍD.mar-ra-ti, P.E. Botta has [x] KU BU x [x x] AD [x x] and H. Winckler [x] KU BU x [x] AD UGU. Based on his examination of the squeeze, A. Fuchs (Khorsabad p. 136 line 255b) read [GAL.MEŠ x] ŠÚ<sup>†</sup> KU BU x [x] x TAG<sup>†</sup> [x (x)] UGU, with the restoration GAL.MEŠ partially following A.T.E. Olmstead, who suggested [GAL.MEŠ šu-bat]-<sup>†</sup>šú na-da<sup>†</sup>-at for the beginning of the line (AJSL 47 [1930-31] p. 270 sub lines 263f.). Based on the squeeze and AO 19892, the author prefers [GAL<sup>†</sup>?]MEŠ<sup>†</sup> KU<sup>†</sup> BU x [x (x)] TAG<sup>†</sup> [x (x)] 'UGU<sup>†</sup>, although it is not clear that there is actually sufficient room to read [GAL<sup>†</sup>?]MEŠ<sup>†</sup> at the beginning of the line.

15' The translation assumes that at the beginning of the following line was: LÚ.pu-qu-du gi-mir LÚ.su-te-e/su-ti-i ÉRIM.MEŠ EDIN it-ti-ia ú-šam-ki-ma ik-su-ra ta-ħa-zu; see text no. 2 lines 293-294a and cf. text no. 1 line 266.

Sections 2'-3' Section 2' = lines 16'-30' = XIII,5:1-15. Cf. text no. 1 lines 266b-276/277 and text no. 2 lines 293-309/310. Section 3' = lines 31'-45' = XIII,6:1-15. See Winckler, Sar. Annals lines 250-268; Lie, Sar. lines 276/277-280, p. 45 n. 9, and p. 48 lines 1-5; and Fuchs, Khorsabad Annals lines 269-271, 271a, 272, 272a-e, and 275-285. Cf. text no. 1 lines 276/277-323a and text no. 2 lines 309/310-328a.

32' The translation assumes that the preceding line ended with BĀD-šú-nu; see text no. 1 line 277 and text no. 2 line 310 for what may have been in line 31'. 'ul<sup>†</sup>-tu<sup>†</sup>: P.E. Botta's copy has [...] 'ul<sup>†</sup>-tu<sup>†</sup> (copy: LA) and H. Winckler's copy has ul<sup>†</sup>-tu<sup>†</sup>; the squeeze is not helpful at this point.

33' <<NA/TAR>>: P.E. Botta's copy has NA while H. Winckler's copy has TAR; the sign is not currently visible on the squeeze. Winckler restored 4 ME 90, rather than 4 ME 30; the former is how he read the number in text no. 1 line 279 (Sar. 2 pl. 15 no. 31 line 6), although the squeeze has [x]<sup>†</sup>ME<sup>†</sup> 30 in that place.

[hor]s[es, mules], donkeys, camels, oxen, and sheep and goats.

34<sup>b</sup>-42<sup>a</sup>) B[a..., Ḫa]zā-il, Hamdanu, Zabīd[u, Am-mai(...), ..., Aḫḫē]-iddina, (and) Aya-Sammu, (a total of) eight sheikh[s of the Gambu]lu (tribe) who dwell (along) the Uqnû River, [heard of the conquest of that city and] (as a result) their [hea]rts [pounded]. From the Uqnû River, [they broug]ht me [oxen, and] sheep and goats as their subs[tantial audience g]ift(s) an[d gra]s[ped hold of] my [feet]. Because ... that land, [I disregarded their] crime(s) [and stopped their] dep[ortation]. I s[et] [a eunuch of mine as provincial gove]rno[r over them]. I imposed [upon th]em the annual payment [of one] talent thirty [minas of] sil[ver, two thousand <gur> of barley, on]e ox [out of (ev-ery) twenty oxen (that they had), (and) one sheep] out of [(every) twenty sheep (that they had). I (also) imposed] the annual šibtu-tax [on the]ir [oxen] (and) their sheep and goats f[or the god(s) Bēl (Marduk) (and) Son of Bēl (Nabû)]. I mustered [those soldiers] and (40<sup>′</sup>) to[ok] on[e] soldier of [th]eirs out of [(every) three soldier]s (for my own army). I resettled (them) in the city [Dūr]-Abi-ḫāra, chan[ged] its (the city's) name, (and) [(re)na]med it [Dūr]-Nabû. [I incorporated (lit.: "led away") int]o the territory of Ass[yria] the lands [Ḫub]aqaṇu, Tarbugāti, [Timassunu], Pašur, [Ḫirūtu, (and) Ḫilmu], (a total of) six districts o[f] the land [Gambulu, together with forty]-four [fort]ified settle-ments that are in [them].

42<sup>b</sup>-50<sup>a</sup>) (When) the [Ru]’u’a, Ḫindaru, Ya[dbu]ru, (and) Puqudu (tribes) [heard of (my) conqu]est of the Gambulu (tribe), they fled [during the course of the nig]ht an[d] took (themselves to) [the Uqnû River, which was difficult (to ford). I dammed up] the Ṭup-liya[š Riv]er, [a river] upon which they relied, [with pile(s) of] dirt and reed[s. I erected two] fortress[es, side] by si[de, and star]ved them out. (45<sup>′</sup>) [They] then [came o]ut from the Uqnû River an[d] grasped hold [of my feet. Iannuqu], the [sheikh of the city Zāmê, Nabû-ušalla of the c]ity Abūrê, Paššunu [(and) Ḫaukānu] of the c[ity Nu]ḫānu, (and) Sa’[ilu of] the city Ibūli, (a to-

34<sup>b</sup>-37<sup>a</sup> The text follows text no. 2 lines 314-318 rather than text no. 1 lines 280-283.

38<sup>′</sup> [1]: P.E. Botta's copy has <1>, while H. Winckler's copy has [1]; the squeeze is not helpful at this point.

40<sup>′</sup> 1<sup>†</sup>-en<sup>†</sup>: Both P.E. Botta's and H. Winckler's copies have x [...] or GĪŠ [...], which is assumed here to represent the first part of the ligature 1-en. Text no. 1 line 286 has ú-šab-bit, rather than aš-bat, and this is followed by a list of numerous cities (text no. 1 lines 286b-299), presumably the forty-four places mentioned in line 41<sup>′</sup>. Botta's copy has a-<sup>m</sup><x>-na, but Winckler's copy has just a-na. <sup>†</sup>MU<sup>†</sup>-šú <sup>†</sup>am<sup>†</sup>-bi: The squeeze has <sup>†</sup>MU<sup>†</sup>-šú <sup>†</sup>am<sup>†</sup>-[(x)], while Botta's copy has <sup>†</sup>MU<sup>†</sup> (copy: ]Ḫ)-šú<sup>†</sup> (copy: DIŠ) <am>-bi and Winckler's copy has [MU-šú] aq-bi.

41<sup>′</sup> [KUR<sup>†</sup>.ḫu]-<sup>†</sup>ba-qa<sup>†</sup>-nu: P.E. Botta's copy has [...]-<sup>†</sup>ba<sup>†</sup>-qa<sup>†</sup>/x-nu, while H. Winckler's copy has KUR.[(x)]-<sup>†</sup>MAŠ-SI<sup>†</sup>-nu. -ga<sup>†</sup>-ti: Botta's copy has -ga<sup>†</sup>/x-ti, while Winckler's copy has -<sup>†</sup>ga<sup>†</sup>-ti. For the restoration KUR.ti-mas-su-nu (or KUR.ti-bar-su-nu), see text no. 2 line 323; the copies by both Botta and Winckler would suggest that there was room to restore only three or four signs. [40<sup>†</sup>]+4: Winckler's copy has [...] 44, but Botta's copy and the squeeze have [...] +4; see also text no. 2 line 324. The forty-four fortified settlements are listed by name in text no. 1 lines 286-299.

43<sup>′</sup> iš-<sup>†</sup>ba-tu<sup>†</sup>: P.E. Botta's copy has iš-[x (x)]; H. Winckler's copy has iš-ba-tu; and the squeeze has iš-<sup>†</sup>ba<sup>†</sup>-x.

44<sup>′</sup> [a-ḫu] a-<sup>†</sup>na<sup>†</sup> a-[ḫi] “[side] by si[de]”: As noted by A. Fuchs (Khorsabad p. 329), this likely refers to two forts on opposite sides of the river or dam, across from one another.

45<sup>′</sup> -re-[e <sup>m</sup>]pa-: P.E. Botta's copy has -re-<e <sup>m</sup>>pa-, while H. Winckler's copy has -re-<e> <sup>m</sup>pa-; the squeeze currently has -[x x] <sup>†</sup>pa<sup>†</sup>.

## 4

Two separate inscriptions were incised on stone slabs lining the walls of Room XIV of Sargon's palace at Khorsabad: a version of Sargon's Annals (this inscription) and a summary inscription (text no. 8). Only a small portion of the version of the Annals inscription in this room is currently known, attested by P.E. Botta's copies of the texts on three wall slabs and by squeezes of two of them. Surprisingly, this inscription was not written on a continuous sequence of adjoining wall slabs, only separated by occasional doorways. The first two slabs whose Annals inscriptions are known were on adjoining slabs in the southwestern end of the room to the left of Entrance r as you enter the room from Room XIII (Room XIV slabs 1 and 2); the next several slabs had either the Display Inscription of Room XIV (slabs 3, 5, 7, and 9, as well as slabs 3 and 4 from Entrance p; text no. 8) or no inscription (slabs 4, 6, and 8) on them. The Annals text picks up again on the first wall slab (slab 10) to the left of Entrance p as you enter the room from the northeastern terrace (façade N). Parts of the next three slabs (slabs 11–13) were also found by Botta and at least the first two had inscriptions on them based on E. Flandin's drawings, but these were not copied except for an epigraph on slab 12 (text no. 39). Thus, information on only three of the slabs with the Annals text from Room XIV is known. The wall slabs in the room were numbered in clockwise order, beginning at Entrance r, and each of the three Annals slabs has 15 lines of text. As far as it is preserved, the Annals inscription in this room largely duplicates the version of the Annals in Room II (text no. 1 lines 63–99) and the version in Room V (text no. 2 lines 69–92), but with some major variations. The inscription describes events in Sargon's third through sixth regnal years (719–716): campaigns to help the Mannean ruler Iranzi against rebels in the cities Šuandaḥul and Durdukka (lines 1'–6'a), against Kiakki of the city Šinuḥtu in Tabal (lines 6'b–12'), against Pisiris of Carchemish (lines 13'–20'a), and against the Mannean ruler Ullusunū (lines 20'b–45').

The forty-five lines on the three slabs are to be associated with Winckler, *Sar. Annals* lines 37–73; Lie, *Sar. Annals* lines 63–99; and Fuchs, *Khorsabad Annals* lines 63–99. For a plan of the room, see Figure 13 and Botta, *Monument de Ninive* 2 pl. 144; for drawings of the reliefs on slabs in this room, see Botta, *Monument de Ninive* 2 pls. 144–147, in particular pls. 145 and 146 (top) for the three slabs with the text edited here. With regard to the reliefs in the room, see Reade, *JNES* 35 (1976) pp. 96 and 98–99, and Bagh. *Mitt.* 10 (1979) p. 84; he believes that the reliefs in this room depict the campaign of Sargon's seventh regnal year (715) into the Zagros. At least

**3 line 60'** The spacing on P.E. Botta's copy and the squeeze might suggest that the divine determinative was omitted before [*na-ĥu*]-*un-di*; H. Winckler's copy includes it in his restoration of the passage. Winckler restored [LÚ].ELAM.[MA.KI-*i*] at the end of the line, and the spacing on Botta's copy and the squeeze would allow room for *-i*, but text no. 2 line 338 does not have *-i* here. The translation assumes that the following line began with UGU KUR.*ia-ad-bu-ri ir-ku-su ki-ma ti-ib me-ĥe-e as-ĥup-ma*; see text no. 2 lines 338–339.

two or three of the wall slabs in the room with this inscription also had short epigraphs on them: slab 2 (text no. 37) and slab 10 (text no. 38); see also text no. 39 on slab 12.

## COMMENTARY

Assuming that each wall slab with the Annals inscription in Room XIV had fifteen lines of text, there would have been four to six wall slabs with this inscription before slab 1 (presumably to the right of Door r when entering the room) and twenty-five to thirty after slab 10. The drawings by Flandin in Monument de Ninive 2 pls. 144 and 146 indicate that slabs 11 and 12 were also inscribed; it is likely that they preserved the section of the Annals immediately following that on slab 10 (section 3').

J. Oppert, followed by J. Ménéant and H. Winckler, believed that all seven wall slabs copied by P.E. Botta in Room XIV preserved parts of only one inscription and edited them accordingly. F.H. Weissbach (ZDMG 72 [1918] pp. 175-177) was the first to demonstrate that three slabs preserved a version of the Annals and that the four others (slabs 3, 5, 7, and 9), as well as two slabs in Door p, had a different inscription

(text no. 8, the Display Inscription from Room XIV).

In the catalogue, the pieces which Botta collated either from the original or from squeezes before publishing his copies are marked with <sup>c</sup> after the Botta, Monument de Ninive 3-4 plate number; the same is done with the text numbers which Winckler is supposed to have collated from squeezes or originals. No squeeze of section 3' (slab 10) was made by Botta, and so his published copy was presumably based solely on the copy he did on the site at Khorsabad. Winckler's copy is based on Botta's copy and thus does not provide any independent information of what was on the slab; it is not taken into consideration here.

In general, restorations are based on text no. 1 lines 63b-99a, with additional help in lines 19'b-45' from text no. 2 lines 69-92a.

 13’-18’a) [I]n my fifth regnal year, Pisiri(s) of the city Carchemish sinned against the treaty (sworn) by the great gods and repeatedly sent (messages) hostile to Assyria [t]o Mitâ (Midas), king of the land Musku; he held me in contempt. (15’) I threw him, together with his family, in iron fetters. I opened his palace, his treasure house; [I carried off] as booty 10 talents of refined gold, [2,1]00 talen[ts of silver, ... ta]lents of arḥu-copper, tin, ir<on>, elephant hide(s), elepha[nt] ivory[, ...], battle gear, and the gu[il]ty people of the city Carchemish [who] (had sided) with [him, (along) with their possessions], and brought (them) to Assyria. I conscripted 50 [chariot(s), 200 cavalry, (and) 3,000 fo]ot soldiers from among [th]em and [added (them)] to my royal (military) contingent. I [settled Assyri]ans in the city Carchemish [and] imposed [the yo]ke [of the god Aššur, m]y [lord], upon them.

4’ Text no. 1 line 67 omits a-na e-peš ar-du-ti, “to do obeisance (to him).”

6’ Cf. text no. 7 line 57 which has ina URU.di-maš-qi u KUR.ḥat-ti, “in the city Damascus and the land Ḥatti” instead of [i]-na KUR.ḥa-at-ti ša KUR.a-mur-re-e, “[i]n the land Ḥatti (Syria) and (lit.: “of”) the land Amurru.”

8’ <sup>r</sup>ni<sup>2</sup>-id<sup>†</sup>? P.E. Botta’s copy has no trace of the first sign and only a few traces of the second sign, which, however, could fit ID; H. Winckler’s copy has a horizontal wedge for the first sign and the same traces as Botta for the second sign; the traces on the squeeze are not clear but would seem to allow the proposed reading. For the tentative reading, see text no. 1 line 69 and CAD N/2 p. 210.

9’b-10’a Cf. text no. 1 line 70a.

12’ <sup>r</sup>ANŠE<sup>†</sup>? P.E. Botta’s copy has [...] AŠ; H. Winckler’s copy does not have any trace of the sign, although he does restore it; the squeeze has only an indistinct trace.

14’-16’a Line 14’: iš-<sup>r</sup>tap<sup>1</sup>-par-ma: The reading follows the squeeze and matches text no. 1 line 73. The copies by P.E. Botta and H. Winckler both have iš-ID-ma, which was read by Winckler and A. Fuchs (Khorsabad p. 93 line 72a) as iš-pur-ma. Lines 14’b-16’a: Cf. text no. 1 lines 73b-74a.

15’ 10 GUN: Or possibly 10+<1> GUN. Text no. 73 line 21 has 11 GUN. P.E. Botta’s copy has no traces of the number, while H. Winckler’s copy has 10+[1]. The squeeze has a clear 10, but this appears to be immediately followed by the GUN.

Section 2’ = lines 16’-30’ = XIV,2:1-15. See Winckler, Sar. 1 pp. 86-89 lines 43-57; Lie, Sar. lines 73-85, with p. 11 n. 14, pp. 12-13 nn. 1, 7-9, and 11, and pp. 14-15 nn. 2-4 and 6; and Fuchs, Khorsabad Annals lines 72c, 74-83, 83a-b, 84-85, and 85a. Cf. text no. 1 lines 74b-85a and text no. 2 lines 69-76+.

16’ [2 LIM 1] ME “[2,1]00”: The restoration is based on text no. 73 line 21.

17’ 50<sup>†</sup>: P.E. Botta’s copy has 40+[...] ; H. Winckler’s copy has 50; and the squeeze currently has only indistinct traces of the number. See text no. 1 line 75. Text no. 1 line 75 has ak-šur-ma i-na [UGU].

18'b-20'a) The people of the cities Pāpa (and) [Lal]luknu, dogs who had been brought up in my palace, conspired with the land Kak[mê for the purpose of separating (from Assyria)]. I deported them fr]om [their (own) places] and [(re)set]tled [th]em in the city Damascus of the land Amurru.

20'b-26'a) In my sixth regnal year, Ur[s]â (Rusâ), the [Ur]artian, [sent his] mounted messenger [wi]th a mendacious message t[o Bag-dâ]ti of the land U<iš>di[š] (and) KAR[...] of the land of Zikirtu, gov[ernors of the land] Mannea (and) [changed] their mind(s). He made them hostile to me, [Sargon], and to [A]zâ, the s[on of the]ir (former) [lord], and made them [side with] him (Rusâ). They brought about the rout of the Mannians on Mount U[a]uš, a rugged mountain, and threw down [the corpse of] A[zâ, their] lord, (there). I raised my hand(s) (in prayer) to the god Aššur, my lord, in or[der] to ave[ng]e the Mannians and [mustered the nume]rous troops of the god Aššur. [Then, o]n Mount Uauš, the mountain [wh]ere they had thrown down the corpse of Azâ, I flayed the skin from Bag-dâti [and] (then) showed (it) to the people of the land Man[ne]a.

26'b-29'a) (As for) Ullusunu, whom they had set [on] the throne of Azâ and to whom they had entrusted all of the [wide] land Mannea, the [wr]ath of [the god] Aššur was directed against Ullusunu, the [Man]nean,

18'  $\acute{u}^{\dagger}$ -[rad<sup>†</sup>-di<sup>†</sup>] "I ... [added (them)]": H. Winckler's copy has *ú-rad-di* but the squeeze currently does not have any traces of this and P.E. Botta's copy only has  $\acute{u}^{\dagger}$  (copy: KAL)-[...]. LÚ.[KUR.aš]-<sup>†</sup>šur<sup>†</sup>: Text no. 1 line 76 has UN.MEŠ KUR aš-šur.KI.

19' -na-[a<sup>†</sup>-a<sup>†</sup>]: P.E. Botta's copy has -na-, followed a gap with room for the signs a-a, while H. Winckler has -na-a-a; the squeeze just shows damage or illegible traces at this point. na-pa-di-iš "for the purpose of separating (from Assyria)": The restoration is based on text no. 1 line 77; text no. 43 line 28 has na-ba-di-iš. [ul]-tu [áš]-: Winckler's copy has an opening square bracket before áš- but no closing bracket to match it in the remainder of the line, making it uncertain what he actually saw for the end of the line. a-na qé-reb URU.di-maš-qi šá KUR.MAR.TU.KI "in the city Damascus of the land Amurru": The Display Inscription (text no. 7) line 57 has ina URU.di-maš-qi u KUR.ḥat-ti, "in the city Damascus and the land Ḥatti."

20' KUR.[ur]-<sup>†</sup>ar<sup>†</sup>-ṭa-a-a: P.E. Botta's copy has KUR.<ur>-ar<sup>†</sup> (copy: RI)-ṭa-a-a; H. Winckler's copy has KUR.[ur]-<sup>†</sup>ar<sup>†</sup>-ṭa-a-a; the squeeze currently has only indistinct traces. a-[na]: Winckler's copy omits this.

21' H. Winckler's copy has an opening square bracket after KUR.zi-kir-ta-a-, but no closing bracket to match it, although it later puts square brackets around LÚ; thus it is unclear if he saw on the squeeze any part of LÚ.GAR.KUR.MEŠ KUR.man-na-a-a. -a-[a LÚ].<sup>†</sup>GAR<sup>†</sup>.<sup>†</sup>[KUR.MEŠ KUR].<sup>†</sup>man<sup>†</sup>-na-: The spacing on Botta' copy for this section is problematic and we should possibly read instead -a-[a LÚ.GAR.KUR].<sup>†</sup>MEŠ<sup>†</sup>[KUR].<sup>†</sup>man<sup>†</sup>-na- (with the <sup>†</sup>man<sup>†</sup> coming from the squeeze, not Botta' copy).

22' [<sup>m</sup>LUGAL-GI.NA] "[Sargon]": H. Winckler's copy does not indicate that there is anything missing between ittiya and u itti, and A. Fuchs (Khorsabad p. 96 line 80) follows that view; however, both P.E. Botta's copy and the squeeze indicate that there is a damaged area between them that would provide sufficient room to restore Sargon's name.

23' KUR<sup>†</sup>.<sup>†</sup>ú<sup>†</sup>-[a-ú]-uš: P.E. Botta's copy would suggest there was only room to restore A, and this is what Winckler's copy does; however, the squeeze clearly indicates there is room to restore both A and Ú (see also text no. 1 line 80). <sup>†</sup>suḥ-ḥur<sup>†</sup>-ti: P.E. Botta's copy has <sup>†</sup>suḥ<sup>†</sup>-[x-(x)]-ti; H. Winckler's copy has <sup>†</sup>suḥ<sup>†</sup>-ḥur<sup>†</sup> (copy: ḤI-[MA])-ti; and the squeeze currently has <sup>†</sup>suḥ<sup>†</sup>-ḥur<sup>†</sup>-ti.

24'-25'a Line 24': Text no. 1 line 82 adds a-na mi-šir KUR aš-šur.KI tur-ri, "to make (that area part of) the territory of Assyria," after KUR.man-na-a-a. qa-ti, "my hand(s)": H. Winckler's copy has qa-a-ti, but P.E. Botta's copy and the squeeze have qa-ti. Lines 24'-25'a: Text no. 1 line 82 omits um-ma-na-at ... ad-ke-e-ma, "mustered the vast/numerous troops of the god Aššur."

25' H. Winckler's copy has KUR.ú-a-ú-uš, but P.E. Botta's copy and the squeeze indicate that the -ú- is not omitted.

26'b-27'a Cf. text no. 1 lines 83b-84a.

27' [rap-š<sup>†</sup>?] "[wide]": The restoration follows Fuchs, Khorsabad p. 97 line 83b, which is based on text no. 2 line 189, but there it is thought to modify Urartu, not the land Mannea. UGU-<sup>†</sup>šu<sup>†</sup>? P.E. Botta's copy has UGU-[x], but H. Winckler's copy has UGU-šú<sup>†</sup> (copy: KI); the squeeze currently only has indistinct traces of a sign. -[ma (a-na)]: Although Botta's copy would indicate that there is room to restore all three signs, it is not clear from Winckler's copy or an examination of the squeeze that there was room for the a-na; however there also appears to be insufficient room to restore a-na at the beginning line 28'.

(ordaining) the dissolution of his land. [He (Ullusunu) then put his trust in U]rsâ (Rusâ), the Urartian, [...] ... [...] and caused Aššur-lē'i of the land Karalla (and) Ittī of the land Allab[ria] to rebel against me; he persuaded (lit.: “spoke to”) them to do ob[eisance to the land Urartū].

29'b-42'a) Angr[ily, I muster]ed the num[erous] troops of the god Aššur and [set out] to conquer the land Man[nea. ...] ... [... I overwhelmed ... as] with a bird trap. [... I burned down the city Izirtu with fire] and [conquered] the city (Z[ibia and the city Armaet. (As a result) Ullusunu, the Mannean, together with his whole land assembled as one and grasped [hold of my feet. I] then [had mercy on them (and) overlooked Ullusunu's crimes. (35') I had him sit (again) on his royal throne (and)] received [tribute [from him. I deported It]tī [of the land Allabria, together with his family, and] ... the peop[le of the land] Karalla [...] the city Bīt[...], the city [...]lama, the city [Ga]nu[GIŠ... I conquered [(in total) six cities of the land] Niksa[mma. I captured] Šēp-šarri, the city ruler [of] the city Šur[gadía, (and) added those cities to the province of Parsuaš]. I cap[tur]ed [Bēl-šarru-ušur of the ci]ty Ki-<še>sim and [brought him, together with the property of his palace, to] Ass[yr]ia. (40') I set a eunuch of mine as provincial governor over (that) city]. I had the weapon(s) of the gods who go [bef]ore [me] made and installed (them) in[side it (the city Kišesim). I (re)named it (the city Kišesim) Kār-Nergal (and) erected a royal image of myself there]. I added the lands Bīt-Sagbat, Bīt-Ḥi[rmami, (and)] Bīt-Umar[gi], (and) the cities [Ḥarḥubarban, Kilamb]āti, (and) [A]rman[gu to] its [pro]vince.

28' [x x (x)] <sup>r</sup>LU<sup>21</sup> x [x x (x)]-ma: Botta's copy has [x x x (x x x)]-ma and Winckler's copy has [x x (x)] KIL<sup>2</sup>-<sup>r</sup>BE<sup>21</sup>-ma; the squeeze has [x x (x)] <sup>r</sup>LU<sup>21</sup> x [x x x (x)]. Text no. 1 line 84 has it-ta-kil here. The <sup>r</sup>LU<sup>21</sup> x might conceivably be <sup>r</sup>kil-ma<sup>1</sup>, but the first sign looks more like LU than KIL and there is too much space between Urartaya and Aššur-lē'i for just it-ta-kil-ma.

30' Cf. text no. 7 line 40 and text no. 1 lines 85b-86a. The restoration at the end of the line is based on text no. 7 line 40.

Section 3' = lines 31'-45' = XIV,10:1-15. See Winckler, Sar. Annals lines 60-73; Lie, Sar. lines 86-99; and Fuchs, Khorsabad Annals lines 85b-c, 86-94, 94a, 95-96, 96a, and 97-99. Cf. text no. 1 lines 85b-99a and text no. 2 lines +86-92a.

32'-35' Line 32': Assuming that the whole line duplicates text no. 1 lines 86-87 and that the gap between the two parts of the line copied by P.E. Botta was longer than the copy indicates, A. Fuchs (Khorsabad p. 99 line 86 n. 3) suggests that Botta's [...] I RI BI [...] may stand for [URU] LUGAL-ti-šú <sup>r</sup>ša<sup>1</sup> [...], with I for LUGAL, RI for -ti-šú, and BI for <sup>r</sup>ša<sup>1</sup>; see text no. 1 line 86. One might then restore: “[I overwhelmed the city Izirtu, the] royal [city] o[f the land Mannea, as with] a bird trap.” Lines 32'b-35': The tentative restorations in the translation are based upon text no. 1 lines 86-89.

33' P.E. Botta's copy has [...] MAŠ IZ x [...], where the x would fit the beginning of ZI, and the reading -ma URU.<sup>r</sup>zi<sup>1</sup>- follows Fuchs, Khorsabad p. 99 line 87.

34' P.E. Botta's copy has [...] DA MA [...], and the reading proposed above is also assumed by Fuchs, Khorsabad p. 100 line 88.

36' Based on text no. 7 line 56 and text no. 1 line 90 (mostly restored), we might expect in the first part of the line ša <sup>m</sup>d aš-šur-ZU KUR.kar-al-a-a ma-šak-šú a-ku-uš-ma, “I flayed the skin from Aššur-lē'i of the land Karalla and.” F.W. Geers (apud Olmstead, AJSL 47 [1930-31] p. 265) suggests that we read [a-na] kit-ri, [to] the aid of” immediately before UN.[MEŠ], “peop[le].”

37' The reading URU.[ga]-nu-[GIŠ ...] is based on text no. 1 line 92, which has URU.ga-nu-GIŠ [x] KUR x [...]. Text no. 27, an epigraph on a relief, has URU.ga-an-<sup>r</sup>gu<sup>1</sup>-uḥ-tu and thus M. El-Amin (Sumer 9 [1953] p. 53) suggested URU.gu-nu-<sup>r</sup>un-gu<sup>1</sup>-uḥ<sup>2</sup>-[tu] for the passage in text no. 1. See already Fuchs, Khorsabad p. 101 line 92 n. 1.

38' For the restoration at the beginning of the line, see text no. 7 line 58 and text no. 1 line 92 (mostly restored). The restoration at the end of the line follows text no. 1 line 93.

39' [šá-a-šú a-di NÍG.ŠU É.GAL-šú a-na]: P.E. Botta's copy would suggest that there was room for only 6-8 signs.

41' For the tentative restoration URU.kar-<sup>d</sup>MAŠ.MAŠ, “Kār-Nergal,” instead of URU.kar-<sup>d</sup>MAŠ, “Kār-Ninurta,” see the on-page note to text no. 1 line 95.

- Continued on several unpreserved slabs

## 5

A fragment of a wall slab with both a pictorial relief and an inscription was found in the throne room (also referred to as “Court VII”) of Sargon’s palace at Khorsabad. The piece is preserved in the Oriental Institute (Chicago) and the inscription appears to be a section from Sargon’s Annals, in particular his actions against Marduk-apla-iddina II (Merodach-Baladan) in Sargon’s twelfth regnal year (710). Restorations are based on the Annals versions in Room V (text no. 2) lines 369–371; cf. Room II (text no. 1) lines 387–389. The lines preserved are also to be associated with Winckler, *Sar. Annals* lines 315–316; Lie, *Sar. Annals* p. 58 lines 13–14; and Fuchs, *Khorsabad Annals* lines 326–328.

The relief shows four men towing a boat and the excavator thought that it represented a scene in Babylonia, but this remains unproven. For a study of the throne room and its reliefs, see Blocher, *AoF* 26 (1999) pp. 223–50, especially pp. 231–232 no. 3 for this slab; see also Reade, *JNES* 35 (1976) pp. 96–97 “Unknown B”; and Reade, *Bagh. Mitt.* 10 (1979) p. 84.

**4 line 42'** Text no. 1 line 96 has ... URU.ar-ma-an-gu ak-šú-ud-ma UGU pi-<sup>ha</sup>-ti-šú ..., but based upon the size of the gap on the copy, there is not sufficient room for this reading.

**4 line 44'** Text no. 1 line 98 has ... LÚ.šú-ut-SAG-<sup>r</sup>ia<sup>1</sup> LÚ.EN.NAM ..., but based upon the size of the gap on the copy, there is not sufficient room for this reading.

**4 line 45'** šá [É-<sup>m</sup>]<sup>r</sup>ra<sup>1</sup>-ma-tu-a: The reading assumes a larger damaged area between the šá and -ma-tu-a than is indicated on Botta’s copy, which would suggest that both the É and the masculine determinative were omitted. The translation assumes that the following line begins with KUR.ú-ri-ak-ku/ki 6 na-gi-i ak-šú-ud-ma UGU-šú-nu ú-rad-di; see text no. 1 line 99 and text no. 2 line 92.

## COMMENTARY

The original publication of the fragments states that it was found “loose in the debris” of the throne room “in the proximity of doorway C” (Loud, Khorsabad 1 pp. 58–60), but J.E. Reade states that it may have originally come from that room or from one of several other rooms that had contained wall slabs (JNES 35 [1976] pp. 96–97; see also Bagh. Mitt. 10 [1979] p. 84). Parts of the last three lines of the inscribed section on the slab are preserved. The inscription is edited both from the original and from a photograph (P28889) kindly supplied by the Oriental Institute Museum. It is not clear exactly how much is missing at the beginnings and ends

of the lines. Thus, it is not known exactly where the restorations given in the transliteration should be split between the lines, and the division given below must be considered extremely tentative. Since only parts of the last three lines of the inscription on the slab are preserved, it is not possible to determine how many lines of text the slab had originally.

A second inscribed fragment was found loose in the debris in the throne room, near Entrance C'. It “contains a very brief and badly damaged portion of text from the beginning of Sargon’s annals.” Nothing more is known of this piece; see Loud, Khorsabad 1 pp. 58–60 and Blocher, AoF 26 (1999) pp. 231–32 no. 2.

## 6

The inscription on a wall slab found in Sargon’s palace at Khorsabad appears to be from an edition of the king’s Annals. It describes events in Sargon’s thirteenth regnal year (709): a campaign to Babylonia against Marduk-apla-iddina II (Merodach-Baladan) and in particular the siege of the latter’s

5 line 3' Text no. 2 line 371 has LA A after <sup>d</sup>[AMAR.UTU ú-šal]-<sup>r</sup>li<sup>r</sup>-mu.

stronghold Dūr-Yakīn. As far as it is preserved, the inscription largely duplicates the versions of the Annals in Room II (text no. 1 lines 409–415) and Room V (text no. 2 lines 385–402+), but with major variations to those two versions at the end of the passage. The fourteen lines on this slab are to be associated with Winckler, *Sar. Annals* lines 329–348/349; Lie, *Sar. Annals* lines 409–415 and pp. 62–63 lines 5–10, with p. 63 n. 6; and Fuchs, *Khorsabad Annals* lines 342–359 and 359a–c.

## CATALOGUE

Section	Source	Provenance	Fuchs, Khorsabad line	Lines Preserved	cpn
1'	Botta, Monument de Ninive 4 pl. 163	Khorsabad, Palace	342–359, 359a–c	1'–14'	n

## COMMENTARY

It is not known in which room of the palace this slab was discovered. Since it duplicates (with variation) parts of the texts in Rooms II and V, it cannot come from those two rooms, nor is it likely to have come from Rooms XIII or XIV since the extant slabs with Sargon's Annals from those rooms have fifteen lines of text per slab and this one has fourteen. It may have come from the throne room (Court VII) since it is not known how many lines of text were on the slabs in that room (see text no. 5). P.E. Botta did not make a squeeze of this inscription so our knowledge of it comes solely from Botta's copy in Monument de Ninive. Since H. Winckler's copy of the text was totally based on that of Botta, it provides no independent evidence of exactly what was on the slab.

Assuming that this slab inscription comes from a version of the Annals reasonably similar to that in Rooms II and V, there would have been approx-

imately twenty-three inscribed slabs before it and approximately eight inscribed slabs after it in the room.

As noted by J. Renger (see Borger, *HKL* 2 p. 322), the two short lines at the bottom of Botta's and Winckler's copies of this text are actually an epigraph that was presumably on the relief below the inscription. The epigraph is presented as text no. 40.

Restorations in lines 1'–5'a are based on text no. 1 lines 409–414 and text no. 2 lines 385–394a and those in lines 5'b–11'a are based on text no. 1 line 415 and text no. 2 lines 394b–402a. Restoration in lines 11'b–14' receives some help from text no. 2 lines 402b–414, but text no. 2 is poorly preserved at this point and the two versions clearly are not duplicates. Since we are totally dependent upon Botta's copy for this text, all indications of † in the transliteration indicate an abnormal/incorrect sign on his copy.

Continued from several unpreserved slabs

- 1'-5'a) [At the command of the gods Aššur, Šamaš, and Marduk], I had [my] choice [fighting men] fly over [its] water [channel]s like [ea]gles [and they brought about his defeat. I surrounded him together with his royal (military) contingent and] slaughtered [his warriors like sheep a]t his feet. [I pierced] the horses trained to [his] yoke [with arrows. Then, (as for) him, I pierced (lit.: "loosened") his hand with the point of an arrow and] he (then) entered the gate of his city <ste>althfully, like a mongoose. [I cut down] the Puqudians, [his] al[lie(s), (and) the] M[aršanians, together with the Sutians who were with him, in front of the gate (of his city) (and)] splattered his people with deadly venom. I took away from him his royal tent, [his r]oya[l] g[ol]d parasol, [gold scepter, gold bed, gold chair, gold (and) silver objects], ..., his potstands, equipment, (and) battle gear.
- 5'b-11'a) (As for) all his people, the inhabitants of the settl[ements of all of his land, whom *he had ...* from before my weapons *and*] settled in a secret place, together with herds of cattle, camels, donkeys, (and) sheep and goats. [which ...] *that (man)*, the numerous troops of the god Aššur (required) three days (and) night(s) to carry (them) off as (their) countless booty an[d ...] I received inside my military camp [(...)] 90,580 people, 2,080 horses, 700 mules, 6,054 ca[mels, ... and 40+ sheep] that my troops had carried off as booty. In order to prevent (anyone) going out from his city or leav[ing (it) (...)] I constructed ... around his city and] (10') shut him up inside his city in dire circumstances, [like a pig in a pigsty]. I chopped down his orchards (and) cut down his date palms. To [*the mighty waters of the moat of his city ...*] with a great [...] I constructed (lit.: "trod down") a (siege) ramp against it and raised

**Section 1'** = lines 1'-14' = room ?, slab ?;1-14. See Winckler, Sar. Annals lines 329b-348/349; Lie, Sar. lines 409-415, pp. 62-63 lines 5-10, and p. 63 n. 6; and Fuchs, Khorsabad Annals lines 342-359 and 359a-c. Cf. text no. 1 lines 409-415 and text no. 2 lines 385-402+.

**1'-2'** Line 1': The transliteration assumes that *i-na qí-bit* <sup>†</sup>áš-šur <sup>†</sup>UTU u <sup>†</sup>AMAR.UTU/MES LÚ.mun-daḥ-š<sup>†</sup>i-ia was at the end of the preceding line (text no. 1 line 408 and text no. 2 line 384). Lines 1'-2': Or "[I besieged him together with his royal (military) contingent and] slaughtered (them) [like lambs a]t his (own) feet. [I pierced his warriors] (and) the horses (trained to) [his] yoke [with arrows]."

**2'** *i-na*: Winckler restored [i-na] on his copy and the spacing on Botta's copy might allow this. Text no. 2 line 387 has *ina* and if only part of NA is to be restored at the beginning of line 1', we would then expect *ina*, not *i-na* here. [LÚ.qu-ra-di-šu]: Botta's copy would suggest that the damaged area has space for only two signs.

**5'** <sup>r</sup>GIŠ<sup>†</sup> KUR gan-ga-ni-šu "..., his potstands": Possibly <sup>r</sup>si<sup>†</sup>-mat gan-ga-ni-šu, "the appropriate things for his potstands," or GIŠ.<<KUR>>.gan-ga-ni-šu. For the restoration at the end of the line, see text no. 1 line 415.

**6'** ú<sup>†</sup>-šá-aš-bi-ta pa-š<sup>†</sup>i-ru: The tentative translation "settled in a secret place" follows CAD P p. 252. Possibly restore *ša ni-ba la i-šu-ú*, "countless" (cf. text no. 1 line 159 and text no. 3 line 5'). Text no. 2 line 395 has u, "and," before *šēni*. The ancient scribe may have omitted the sign in this passage or possibly P.E. Botta omitted copying it; note that the preceding sign MEŠ ends in three Winkelhaken so one can easily image one or the other indicating only three instead of four.

**9'** *er-re-ti*: See note to text no. 2 line 400. URU-šú u "his city or": Or URU šu-u, "this city (or)," following Fuchs, Khorsabad p. 165 line 357. na-par-<sup>r</sup>ka<sup>†</sup>-[a] "leav[ing]": The reading follows Fuchs, Khorsabad p. 165. Or na-par-<sup>r</sup>šu<sup>†</sup>-[di-šú], "esca[ping]," following van der Speck, JEOL 25 (1977-78) p. 61. The trace of the sign after *par* on Botta's copy is only slightly better for *ka* than *šu*.

**10'** As noted by A. Fuchs (Khorsabad p. 334 n. 367), the felled trees would have been used in the creation of the siege ramp mentioned in the following line. <sup>r</sup>A<sup>†</sup>. [MEŠ dan-nu-ti ša ḫa-ri-š<sup>†</sup>i URU-šú]: The tentative reading of the sign and the following restoration follow text no. 2 line 401. P.E. Botta's copy has a small Winkelhaken before the damaged area, which might be a miscopy by him (perhaps indicating damage to the slab) or an indication that this passage deviated from that in Room V.

	<i>ak-kis a-na</i> <sup>r</sup> A <sup>71</sup> . [MEŠ <i>dan-nu-ti ša ḥa-ri-ši</i> URU-šú ...]	(the ramp) up against its (city) wall.

## 7

This inscription, which is commonly known as the (Khorsabad) Display Inscription (Prunkinschrift), Great Display Inscription (Große Prunkinschrift), Grande inscription des salles de Khorsabad, or Fastes is inscribed on stone wall slabs lining Rooms I, IV, VII, VIII, and X of the palace of Sargon II at Khorsabad. After a brief introductory section giving the ruler's titles and epithets and mentioning the special privileges he had bestowed upon several Babylonian and Assyrian cities (lines 1–13a), the inscription describes his numerous military campaigns, which are arranged in a geographical or associative sequence, rather than in chronological order (lines 13b–153a). It then records the construction of the city of Dūr-Šarrukīn, and in particular its palace (lines 153b–186a), followed by an invocation to the god Aššur (lines 186b–194). The inscription refers to the ruler's fifteenth year (707) in line 23 and to various gods entering their sanctuaries in Dūr-Šarrukīn (lines 155b–157a), which the Assyrian Eponym Chronicle states took place in Tašrītu (VII) of that year. In addition, the text describes a great celebration that took place inside the palace that involved rulers from every land, as well as important Assyrians (lines 177b–186a); this likely refers to celebrations upon the completion of the city that the Assyrian Eponym Chronicle states happened on the sixth day of Ayyāru (II) in Sargon's sixteenth regnal year (706).

E. Frahm (Sanherib pp. 42–43 and ISIMU 6 [2003] pp. 145–149 and 157–160, especially p. 159 n. 63) notes several similarities between this text and Sennacherib's early cylinder texts (Grayson and Novotny, RINAP 3/1 pp. 29–40 no. 1) and suggests that the well-known royal scribe Nabû-zuqup-kēnu may have been the composer of all these inscriptions, as well

**6 lines 11'–14'** For the different accounts of what happened to Marduk-apla-iddina, see the Introduction to this volume, under the section "Military Campaigns." Line 11': *ḥat*<sup>†</sup>-*tú* <sup>r</sup>ra<sup>1</sup>-[*ma-ni-šú*] "[his] o[wn] fear(s)": Or possibly <sup>m</sup>AMAR<sup>†</sup>.UTU-<sup>r</sup>IBILA<sup>1</sup>-[SUM.NA *ḥat-tu ra-ma-ni-šú*], "Marduk-a[pla-iddina's own fear(s)"]; see A.T.E. Olmstead (AJSL 47 [1930–31] p. 275) and R.J. van der Speck (JEOL 25 [1977–78] p. 61), but we would expect both the masculine personal determinative and the divine determinative before AMAR.UTU, not just the former.

**6 line 12'** *iš-ḥu-ut-ma* "he became afraid": Or possibly *iš-ḥu-ut-ma*, "he removed [his royal garment/headdress]"; see CAD Š/1 p. 93 sub *šahātu* B.1.a. Cf. text no. 2 line 403. The restoration at the end of the line is derived from Grayson, RIMA 2 p. 25 A.0.87.1 vi 27–28 and basically follows R.J. van der Speck (JEOL 25 [1977–78] pp. 61–62) and A. Fuchs (Khorsabad p. 167 line 359a).

as possibly other royal inscriptions of Sargon, in particular his Annals from Khorsabad. With regard to the reliefs in the rooms, see Reade, JNES 35 (1976) pp. 96–98; and Reade, Bagh. Mitt. 10 (1979) pp. 78, 81, and 83. For some comments on the connection between the reliefs on the wall slabs and the inscription, see J.M. Russell, Writing on the Wall pp. 111–115.

## COMMENTARY

The pieces which P.E. Botta collated either from the original or from squeezes before publishing his copies are marked with <sup>c</sup> after the Botta, Monument de Ninive 3-4 plate number (e.g., 136<sup>c</sup>); the same is done with the text numbers which Winckler is supposed to have collated from squeezes or originals. Regrettably, some of the squeezes available to Botta are no longer extant and thus not available for consultation (ex. 4: Botta, Monument de Ninive 4 pl. 125<sup>c</sup>; ex. 5: *ibid.* pls. 139<sup>c</sup> and 143<sup>c</sup> top). Most of the fragments still extant of this inscription are small, representing only a tiny portion of the inscription on a particular slab. Thus, even if they have been examined in the original or by means of photographs, for the most part the edition of the text on that slab is based on Botta's copy and/or Botta's squeezes.

In the catalogue, each slab for an individual exemplar has been given a section number, just as is the case for the Khorsabad Annals (text nos. 1-4 and 6) and the Display Inscription from Room XIV (text no. 8); however, since the exemplars all bear the same inscription and have different line arrangements, these section numbers are not mentioned in the edition itself. They have been given simply to facilitate the reader's understanding of where the respective lines of the inscription on an exemplar come from and where missing sections (i.e., sections not copied by Botta) would have been located.

Ex. 1: For the plan of Room X and sketches of the wall slabs, see Botta, Monument de Ninive 2 pl. 122 and Albenda, Palace of Sargon pl. 26. The inscription began on slab 1 (section 1), to the left of Entrance c when entering the room, ran in a clockwise order around the room, and presumably ended on slab 16 (section 16), to the right of Entrance c, although no

copy of the inscription on slab 16 is preserved. Botta, Monument de Ninive 2 pl. 128 (relief) is mislabeled as being Room V 25; see table of contents to *ibid.* 1 p. III. The two slabs on *ibid.* 4 pl. 145 (sections 2-3) are mislabeled as being Room X slabs 1 and 2 instead of Room X slabs 2 and 3 respectively. For the unregistered pieces in the Oriental Institute (OI), Chicago, see Albenda, Palace of Sargon pp. 174-176; the exact placement of some of these may be uncertain. Two British Museum fragments, 47-7-2,32 and 47-7-2,34 (sections 11 and 2 respectively), are shown on BM photo 56550 and two others, 47-7-2,33 and 47-7-2,42 (sections 2 and 11 respectively) on BM photo 56551. The British Museum pieces with the registration numbers 47-7-2,1ff. are part of the Hector collection, items purchased from Mr. Hector, "a merchant at Baghdad, who had himself got them, it appears, by a gleaning made after Botta's excavations had opened up the ruins of the palace" (Gadd, *Stones* p. 160; for this collection in general, see *ibid.* pp. 160-163).

Ex. 2: For the plan of Room I and sketches of the wall slabs, see Botta, Monument de Ninive 1 pl. 48 and Albenda, Palace of Sargon pl. 106. Only a small part of the inscription in this room is known, copies for two wall slabs to the right of Entrance A when entering the room from Court I (slabs 1 and 2; sections 2' and 1' respectively). E. Flandin's sketch drawing of the room (Monument de Ninive 1 pl. 48) indicates that slabs 7 and 8 also had inscriptions on them, and may indicate that slabs 3 and 4 in Entrance A (A<sub>3</sub> and A<sub>4</sub>) were also inscribed, but these were not copied by Botta. The inscription likely began on the northeast wall of the room and ran in a clockwise order around the room, moving to slab 2 and then

slab 1; after slab 1 the inscription either carried on onto the two slabs in Entrance A ( $A_3 > A_4$ ) or directly across the doorway to slabs 8 and then 7.

Ex. 3: For the plan of Room IV and sketches of the wall slabs, see Botta, *Monument de Ninive* 1 pls. 79–80 and Albenda, *Palace of Sargon* pls. 79–80. The inscription began on slab 13 (section 1), to the left of Entrance T when one entered the room from Room VIII, and apparently carried on in a clockwise order, ending on slab 14 (section 5'), located to the right of Entrance T. Botta, *Monument de Ninive* 4 pls. 96, 95, and 94 (sections 4, 5, and 6 respectively) are mislabeled as being Room IV slabs 9, 8, and 7 respectively; see Weissbach, *ZDMG* 72 (1918) p. 169 and look at Botta, *Monument de Ninive* 1 pl. 80. Botta's hand copies of seven slabs are preserved in the Archives of the Institut de France (Botta-Cotta II 2976 folio I sheets 318 [D<sub>3</sub>; section 7], 320 [D<sub>4</sub>; section 8], 324 [IV,8; section 6], 326 [IV,9; section 5], 327 [IV,10; section 4], and 330–331 [IV,2–3; section 10]). These copies and the copies published in *JA* 4/3–4 (1844) (pls. XXVIII [D<sub>4</sub>] and XLVII–XLVIII [IV,2–3]) are occasionally referred to in the score and list of variants when they provide a better reading or a more extensive text than the copies in *Monument de Ninive*. The arrangement of the text as copied on Botta, *Monument de Ninive* 4 pl. 99<sup>c</sup> – section 1; lines 1–15 of the inscription – is misleading. The text is in three fragments (left = A; middle = B; right = C) which are to be read C-A-B, with C having two lines instead of just one between its first line (GAL-ú) and the third line of the copy (J-<sup>r</sup>us<sup>1</sup>-su). On Botta, *Monument de Ninive* 4 pl. 100 (section 5'; lines 181–194), the section to the extreme right of the copy is placed two lines too high. See also Fuchs, *Khorsabad* pp. 21–22.

Ex. 4: For the plan of Room VII and sketches of the wall slabs, see Botta, *Monument de Ninive* 2 pl. 107 and Albenda, *Palace of Sargon* pl. 84. The inscription began on slab 1 (section 1), to the left of Entrance R when entering the room from Room IV, and then ran in a clockwise order around the room, ending on slab 13 (section 13), to the right of Entrance R. The museum number for slab 8 (section 8) follows P. Albenda (*Palace of Sargon* p. 178), rather than E. Guralnick (*Assur* 1/5 [1976] p. 2 n. 5). The Oriental Institute museum numbers for Room VII slabs 11–13 (sections 11–13) follow Loud, *Khorsabad* 1 pp. 76–77 figs. 88–89 captions (confirmed by R.T. Tindel, against Guralnick, *Assur* 1/5 [1976] p. 2). The sections preserved on the two pieces in the Iraq Museum have been collated, but IM 60971/2 (sections 7–8) and IM 60971/3 (section 1) only preserve parts of 3–6 signs each. A 58101 and A 58116 (section 1) also only preserve all or parts of only a few signs (10 and 21 respectively). One BM

fragment, 47-7-2,44 (part of Room VII slab 5; section 5) is shown on British Museum photo 56550.

Ex. 5: For the plan of Room VIII and sketches of the wall slabs, see Botta, *Monument de Ninive* 2 pls. 115–116 and Albenda, *Palace of Sargon* pls. 72–73. The inscription began on slab 9 (section 1), to the left of Entrance Q when entering the room from Court VIII, and ran in a clockwise order around the room, ending on slab 8 (section 25), to the right of Entrance Q. Botta, *Monument de Ninive* 4 pl. 137<sup>c</sup> (section 3) shows two parts of inscription, an area on the left (lines 18b–20a) and an area on the right (lines 20b–23a); the two sections are separated by the large damaged section on the plate. Botta, *Monument de Ninive* 4 pl. 135 bottom (section 6) is said to be on slab 14 in the table of contents, but (correctly) on slab 16 on pl. 135. Botta, *Monument de Ninive* 4 pl. 141<sup>c</sup> (section 11) appears to represent four fragments that are not properly put together. It is likely that the MEŠ of line 2 should go at the end of line 1 (line 67) or that it is a miscopy for <sup>r</sup>šat<sup>1</sup>-t[i- of line 67 (a possible reading based on the squeeze). It is also likely that the MA at the end of line 3 should have more space between it and the KUR sign (line 69). Although the squeeze of pl. 141<sup>c</sup> is almost totally illegible, it is clear that the signs at the beginnings of lines 4–7 on the copy should be moved up one line (lines 68–71), leaving a gap of one line between them and line 8, and that the new line 7 begins with a-<sup>r</sup>di<sup>1</sup> of line 71. Botta, *Monument de Ninive* 4 pl. 133 bottom (section 22) shows three sections of the text (parts of lines 149–156); the section on the right should be raised by one line in relation to the other sections. Botta *Monument de Ninive* 4 pl. 134<sup>c</sup> bottom (section 25) shows three sections (parts of lines 173–194); the section in the middle must be raised by one line in relation to the other two sections and the first line of this section (line with no signs preserved) must be deleted. See also Fuchs, *Khorsabad* pp. 24–25.

Parts of the reliefs on exemplars 1, 4, and 5 are preserved today in the British Museum, Iraq Museum, Louvre, Metropolitan Museum of Art, Musée Borely (Marseille), and Oriental Institute (Chicago). The museum numbers for these have not been included in the catalogue unless the piece also included part of the inscription.

A small stone fragment of an additional exemplar may be an item offered for sale as lot no. 660 on September 26, 1998 by Hanzel Galleries (Chicago). Information on this fragment and a photograph of its inscription were kindly provided by J.A. Brinkman. The piece measures 5(+ inches (height) × 14.5(+ inches (width) × 5.5(+ inches (thickness) and the individual signs have an average height of 1 3/8 inches. The inscription reads:

## Lacuna

- 1'. [...] <sup>r</sup>áš-kun<sup>1</sup>-ma GUN ma-[da-at-tu ...] (= line 32)  
 2'. [...] <sup>r</sup>URU.ar-pad<sup>1</sup>-da URU.<sup>r</sup>ši-mir<sup>1</sup>-[ra ...] (= line 33)  
 3'. [...] URU.qar]-<sup>r</sup>qa-ri<sup>1</sup> URU na-<sup>r</sup>ram-i<sup>1</sup>-[šú ...] (= line 34)

## Lacuna

The placement of the signs does not fit Botta's copies for exs. 1, 3, or 4. No copies of this section exist for exs. 2 and 5, but, rather than assuming that this piece comes from a new exemplar, it is possible that the fragment was so small that it was simply not copied by Botta with the other more substantial pieces that he found in Rooms I (ex. 2) and VIII (ex. 5).

Note that while <sup>c</sup> in the catalogue may indicate that the original of a section has been collated, the original may only preserve a tiny portion of the inscription originally on a slab (e.g., ex. 3 IM 60971/3 [Room VII,1] actually only preserves and can be relied upon for all or parts of three signs).

While the basic text of this inscription is clear, as noted in the introduction to this volume, there is no completely satisfactory way to edit this inscription and indicate the variously clear and/or possible variants (in particular possible abnormally written signs) in the various exemplars without providing lengthy notes for numerous signs. This is because most of the original slabs no longer exist (or exist in only a very fragmentary state) and there are varying (and at times contradictory) sources of information for the individual exemplars, with the reliability of some of the sources being open to question. The transliteration for each individual exemplar in the online score is based on the author's assessment of the various sources of information, although it would have been possible to produce a score for each exemplar in itself, as is done for text nos. 1–4 and 8, where, however, each text is represented by only a single exemplar. The master line is based upon ex. 1, but at times makes use of other exemplars.

- 1–3a) Pal[ac]e of Sargon (II), great king, strong king, king of the world, king of Assyria, governor of Babylon, king of the land of Sumer and Ak[k]ad, favorite of the great gods.
- 3b–5a) The gods Aššur, Nabû (and) Marduk granted me a reign without equal and exalted my good reputation to the heights.
- 5b–12a) I continually acted as provider for (the cities) Sippar, Nippur, Babylon, and Borsippa (and) I made restitution for the wrongful damage suffered by the people of privileged status, as many as there were (of them); I abolished corvée duty for (the cities) Dēr, Ur, Uruk, Eridu, Larsa, Kullaba, Kissik, (and) Nēmed-Laguda, (and) gave relief to (10) their people. I restored the exemption (from obligations) of (the city) Baltil (Aššur) and the city Ḫarrān, which had fallen into oblivion in the distant past, and their privileged status that had lapsed.

- ba-til-ta ú-ter<sup>1</sup>*
- 12) *áš-ru-uš-ša* DINGIR.MEŠ GAL.MEŠ *ina ku-un lib-bi-šú-nu ip-pal-su-ni-ma* 12b–13a) The great gods looked upon me, among all rulers, with their steadfast hearts, granted manly strength to me, and made my stature exceedingly great.
- 13) *i-na nap-ḥar ma-li-ki dun-nu zik-ru-ti iš-ru-ku-nim-ma ú-ša-te-ru ši-kit-ti ina u<sub>4</sub>-um be-lu-ti-ia mal-ku gaba-ra-a-a ul ib-ši-ma ina e-peš* MURUB<sub>4</sub> u MÈ ul *a-mu-ra mu-né-ḥu* 13b–15) Since the (first) day of my reign, there has been no ruler who could equal me and I have met no one who could overpower (me) in war or battle. I smashed all the enemy lands like pots and put halters on (all) rebels in the four (quarters of the world). I opened up innumerable distant mountainous areas whose pass(es) are difficult and I visited their remotest region(s). In a grandiose manner, I traversed inaccessible, difficult paths in terrifying location(s) (and) crossed every swamp.
- 14) *KUR.MEŠ na-ki-ri ka-li-šin kar-pa-niš ú-ḥap-pi-ma ḥa-am-ma-mi ša ar-ba-’i ad-da-a šer-re-e-ti ḥur-šá-a-ni bé-ru-ti šá né-reb-šú-nu áš-tu la mi-nam*
- 15) *ú-pat-ti-ma a-mu-ra du-ru-ug-šú-un tu-da-at la a’-a-ri pa-áš-qa-a-ti ša a-šar-ši-na šug-lud-du ra-biš e-te-et-ti-qa e-teb-bi-ra na-gab be-ra-a-ti*
- 16) *i-na li-i-ti u da-na-ni šá* DINGIR.MEŠ GAL.MEŠ EN.MEŠ-*ia* ša GIŠ.TUKUL.MEŠ-*ia* *ú-šat-bu-ma ú-ra-as-si-ba na-gab ga-re-ia iš-tu* 16–23a) With the power and might (granted me) by the great gods, my lords, who mobilized my weapons, I cut down all my foes. I ruled all together from the land Yادنانا (Cyprus), which is in the middle of the Western Sea, as far as the border(s) of Egypt and the land Musku, the wide land Amurru, the land Ḥatti (Syria) in its entirety, all of (the land) Gutium, the distant Medes (who live) on the border of Mount Bikni, as far as the land Ellipi (and) the land Rāši on the border of the land Elam, those who (live) beside the Tigris River — the Itu’u, Rubu’u, Ḥaṭallu, Labdudu, Ḥamrānu, Ubulu, Ru’u’a, (and) Li’ta’u (tribes) — those who (live) beside the Surappu River (and) the Uqnū River — the Gambulu, Ḥindaru, (and) Puqudu (tribes) — the Sutians, the people of the steppe of (20) the land Yadburu, as many as there are, as far as the cities Sam’ūna, Bāb-dūri, Dūr-Telīte, Ḥilimmu, Pillatu, Dunni-Šamaš, Bubê, (and) Tīl-Ḥumba, which are on the border of the land Elam, the land Karduniaš (Babylonia) from one end to the other (lit.: “above and below”), the lands Bīt-Amukāni, Bīt-Dakkūri, Bīt-Šilāni, (and) Bīt-Sa’alli, all of Chaldea, as much as there is (of it), (and) the land Bīt-Yakīn, which is on the shore of the sea, as far as the border of Dilmun. I then set eunuchs of mine as provincial governors over them and I imposed the yoke of my lordship upon them.

15 Possibly *miṭ-<sub>7</sub>-ra-a-ti* (*miṭirtu*, a type of canal or ditch) rather than *be-ra-a-ti* (*berātu*, swamp). See also text no. 43 line 11.

17 Ex. 5 omits KUR before *ḥat-ti*.

21 Exs. 4 and 5 have LÚ.KUR and <sup>r</sup>LÚ<sup>1</sup>.[KUR] before *kal-di* respectively.

23–25a Line 23a: Ex. 4 has LÚ before ELAM.MA.KI. Sargon’s defeat of the Elamite Ḥumbanigaš (Ḥumban-nikaš I) took place in Sargon’s second regnal year (720), although text no. 1 lines 18b–20a assigns it to his first regnal year; see the introduction to the volume. *re-bit* “outskirts”: The basic meaning of *rebitu/ribūtu* is “street, main street, thoroughfare” (CAD R p. 317) and “square, piazza, open space” (CDA p. 300), but this meaning does not fit this passage (also found in text nos. 43 line 17, 73 line 7, 105 i’ 14’, and 129 line 18) or in passages dealing with Sargon’s building of Dūr-Šarrukīn in the *re-bit* of Nineveh (text nos. 41 line 16, 43 line 44, 44 line 27, 45 line 9, and 47 line 8). The CAD gives “mng. uncert.” for these passages (CAD R p. 320) and the CDA a secondary meaning “district, precincts” (CDA p. 300). Some prefer to read *tal-bit*, rather than

- fifteenth regnal year: I brought about the defeat of Ĥumbanigaš (Ĥumban-nikaš I), the Elamite, on the outskirts of (the city) Dēr. I surrounded (and) conquered the city Samaria. I carried off as booty 27,290 of its inhabitants, conscripted fifty chariots from among them, and allowed the remainder to practice their (normal) occupations. I set a eunuch of mine over them and imposed upon them (the same) tribute (as) the former king (had paid).
- 25b–26) Ĥanūnu (Hanno), king of the city Gaza, with Rē’e, the field marshal of Egypt, rose up to do war and battle against me at the city Raphia. I brought about their defeat. Rē’e took fright at the clangor of my weapons and fled; his whereabouts have never been discovered. I captured Hanūnu, king of the city Gaza.
- 27) I received tribute from Pir’ū (Pharaoh), king of Egypt, Samsi, queen of the Arabs, (and) It’amar, the Sabaeen, (namely) gold ore from the mountain(s), horses, (and) camels.
- 28–29a) (As for) Kiakki of the city Šinuḫtu, who had thrown off the yoke of the god Aššur and withheld his audience gift, I counted him as booty, together with thirty of his chariots (and) 7,350 of his fighting men. I gave his royal city Šinuḫtu to Kurtī of the land (A)tuna and imposed upon him (Kurtī) (the payment of a tribute in) horses (and) mules that was higher than his previous tribute.
- 29b–32) I gave to Amris (Ambaris) of the land Tabal, whom I had seated upon the throne of his father Ĥullī, a daughter of mine, (along) with the land Ĥilakku, which had not been part of his ancestors’ territory, and I (thus) expanded his land. However, that (man), who did not protect justice, sent a messenger to Ursâ (Rusâ), the Urartian, and Mitâ, king of the land Musku, about taking away territory of mine. I took Amris (Ambaris) to Assyria, (along) with (his) family, (his) relatives, the (other) offspring of his father’s house, (and) the nobles of his land, (along) with one hundred of his chariots. I settled there Assyrians who respect my authority. I set a eunuch of mine as provincial governor over them and I imposed tribute and payment(s) upon them.

re-bit, and to derive the noun from the verb lamû/lawû, “to move in a circle, surround” (e.g., Postgate, Royal Grants pp. 117–118). Lines 23b–25a: Text no. 1 lines 12b–17a assigns Sargon’s conquest of Samaria to his accession year (722).

24 27,290: So ex. 1 — 27 LIM 2 ME 90<sup>m</sup> (copy: MEŠ; original: 90<sup>m</sup>). Ex. 4 has 27,280 — 27 LIM 2 ME 80 — and ex. 5 appears to have 24,280 — 24 [x] 2<sup>m</sup> ME 90. The translation of the word inūšunu, “their (normal) occupations” is uncertain; see Dalley, Iraq 47 (1985) p. 35 “their own skills.” M. Cogan (Raging Torrent pp. 82 and 84) translates the passage si-it-tu-ti i-nu-šú-nu ú-šá-ḫi-iz as “I instructed the rest of them in correct procedure” and S.Z. Aster (JAOS 139 [2019] p. 602) as “I trained the remnant in their crafts.” The current tentative translation of the verb in the passage is based on CAD A/1 p. 182.

25b–26 This took place in Sargon’s second regnal year (720); see text no. 1 lines 53–57.

27 According to text no. 1 lines 123b–125a, this occurred in the seventh regnal year (715). Exs. 3 and 5 have LÚ instead of KUR before a-ri-bi. Ex. 3 has LÚ instead of KUR before sa-ba-’a-a-a. Ex. 5 has ANŠE.A.AB.BA.MEŠ instead of ANŠE.GAM.MAL.

28–29a See the account of Sargon’s fourth regnal year (718) in text no. 1 lines 68b–71 and text no. 117 ii 17–19.

29b–32 Ambaris was defeated during Sargon’s ninth regnal year (713) in text no. 1 (lines 194b–204a) and text no. 2 (lines 226b–235).

31 Ex. 3 adds u, “and,” after kim-ti, “(his) family.”

33–36a) Iaū-bi'dī (ilu-bi'dī) of the land Hamath, a member of the lower class who had no right to the throne, an evil Hittite, plotted to become king of the land Hamath. He then incited the cities Arpad, Šimirra, Damascus, (and) Samaria to rebel against me, made (them) act in unison, and prepared for battle. I mustered the numerous troops of the god Aššur; I surrounded him, together with his fighting men, in Qarqar, the city where he resided (lit.: “the city of his dwelling”), (and) I captured him. I burned the city Qarqar down with fire (and) I flayed the skin from him. I killed the guilty people inside those cities and imposed peace. I conscripted 200 chariots (and) 600 cavalry from among the people of the land Hamath and added them to my royal (military) contingent. 36b–39) When fate carried off Iranzi, the Mannean, a submissive subject who pulled my yoke, and (after) I had seated his son Azâ on his throne, Ursâ (Rusâ), the Urartian, spoke treacherous and mendacious words to (the rulers of) the lands of Uišdiš, Zikirtu, Missi, (and) Andia, (and to) the governors of the land Mannea, the important men, and (as a result) they threw down the corpse of Azâ, the son of their lord, on Mount Uauš, a rugged mountain. Ullusunu, the Mannean, whom they had seated on the throne of his father (Azâ), put his trust in Ursâ (Rusâ), the Urartian, and gave him twenty-two of his fortresses as a gift.

40–42a) Angrily, I mustered the numerous troops of the god Aššur, became enraged like a lion, and set out to conquer those lands. Having seen the cloud of dust (kicked up) by my expeditionary force, Ullusunu, the Mannean, went out from his city and in fear stayed in hiding on a rugged mountain. I conquered his royal city Izirtu (and) the cities of Izibia and Armaet, his strong fortresses, and I burned (them) down with fire. 42b–44a) I inflicted a defeat upon Ursâ (Rusâ), the Urartian, at Mount Uauš, a rugged mountain, and

33–36a) The campaign against Iaū-bi'dī took place during Sargon's second regnal year (720); see text no. 1 lines 23b–26, text no 81 lines 4b–20, and text no. 117 lines ii 4–13a. Also, ex. 3 has LUGAL-<ut KUR>.

34) URU na-ram-i-šú “the city where he resided (lit.: “the city of his dwelling”): This assumes that na-ram-i-šú comes from the noun *narmû* as opposed to the noun *narāmu*, which would result in the translation “his beloved city” (see CAD N/1 p. 345).

35) su-lum-mu-u ú-šá-áš-kin “I imposed peace”: Or “I imposed a peace treaty” following CAD S p. 372, but see Fuchs, Khorsabad p. 345 n. 438.

36b–53) Sargon's campaigns involved Ullusunu and Mannea in his sixth through eighth regnal years (716–714), with prominence given to the sixth campaign; see for example text no. 1 lines 78b–96a, 101–109a, and 127–137, text no. 2 lines 70b–76, 86–102, and 188–195a, text no. 4 lines 20' b–45', and text no. 117 ii 22b–70a. Only those events mentioned in these lines that are clearly not dated to the sixth regnal year (716) are normally indicated in the on-page notes. Line 48 also refers to events in the third regnal year (719), see below.

37) LÚ.KUR.mi-si-an-di-a-a is assumed to be an error, running together the names of the two countries Misi and Andia; see Gadd, Iraq 16 (1954) p. 177.

42b–43) Assyrian forces won victories on Mount Uauš during two different campaigns. They battled the troops of Azâ (Ullusunu's father and predecessor as king of Mannea) and his Urartian allies in Sargon's sixth regnal year (716) and those of the Urartian ruler Rusâ in his eighth regnal year (714); see for example text no. 1 lines 78b–83a and 133b–136a, text no. 2 lines 70b–74, and text no. 65 lines 96–145. This passage seems to refer to the latter battle.

54) ša <sup>m</sup>ia-an-zu-ú MAN KUR.na-'i-i-ri ina
- captured two hundred and fifty members of his royal family. I conquered fifty-five fortified cities (and) fortresses in eight of his districts, together with eleven fortresses that were difficult (to conquer), and I burned (them) down with fire. I took away from him (Rusâ) the twenty-two fortresses of Ullusunu, the Mannean, and made (them part of) the territory of Assyria.  
44b-49) I conquered eight fortresses of the land Tuāyadi, a district belonging to Telusina of the land Andia; I carried off as booty 4,200 people, together with their property. Mitatti of the land Zikirtu took fright at my weapons and he, together with the people of his land, fled into the mountains; his whereabouts have never been discovered. I burned his royal city Parđa down with fire. I conquered twenty-three fortified settlements in its environs and carried off booty from them. I conquered the Mannean cities Šuandaĥul (and) Zurzukka that had put their trust in Mitatti and I took booty from them. I flayed the skin from Bag-dāti of the land Uišdiš. I deported Dayukku together with his family and settled (them) in the land Hamath.  
50-53) In (his) rugged mountain (region), Ullusunu, the Mannean, heard of the deeds I had been doing, flew to me like a bird, and grasped hold of my feet. I pardoned (lit.: “overturned”) his innumerable sins and disregarded his crime. I had pity on him and had him sit on his royal throne. I gave (back) to him the twenty-two fortresses, together with two of his fortified cities, which I had taken away from the hands of Ursâ (Rusâ) and Mitatti, and I brought order to his disturbed land. I made a royal image of myself and inscribed upon it the victorious deed(s) of the god Aššur, my lord. I erected it for all time in his royal city Izirtu.  
54) I received tribute from Ianzû, king of the land

43 Ex. 3 has [x]+6 for 55.

44-45a Line 44a: Sargon claims to have annexed these twenty-two cities during his seventh regnal year (715) in the Khorsabad Annals (text no. 1 line 103 and text no. 2 lines 97b-98a). Lines 44b-45a: The conquest and looting of the land Tuāyadi is mentioned in Sargon's account of his seventh regnal year (715); see text no. 1 lines 106b-107a and text no. 2 line 101.

45b-47 The flight of Mitatti, king of Zikirtu, from Assyrian troops and the burning down of the city Parđa took place during Sargon's eighth regnal year (714); see for example text no. 1 lines 132b-133a and text no. 65 lines 84-90 and 141-142.

48 The capture of the cities Šuandaĥul and Zurzukka took place in Sargon's third regnal year (719); see text no. 1 lines 58-65 (with Zurzukka called Durdukka), text no. 4 lines 1'-2', and text no. 117 ii 13b-16 (with Zurzukka called Durdukka).

49b The deportation of Daiukku and his family took place during Sargon's seventh regnal year (715); see text no. 1 lines 101-104a and text no. 2 lines 95b-98. ú-še-šib comes from ex. 5. P.E. Botta's and H. Winckler's copies of ex. 1 appear to have ú-šar<sup>2</sup>-me, with the ŠAR consisting of 6 Winkelhaken (3 on top of 3) followed by two horizontal wedges, one on top of the other; the squeeze appears to support these copies. Ex. 3 has ú-še-[x], but the ŠE could conceivably be the beginning of ŠAR.

52 These twenty-two cities were mentioned in lines 39 and 44; see also the account of Sargon's seventh campaign (715) in text no. 1 lines 101-103a and text no. 2 lines 95b-98a.

53 The royal image was erected in Izirtu during Sargon's seventh regnal year (715); see text no. 1 lines 108b-109a.

54 The receipt of tribute from Ianzû is recorded in Sargon's seventh and eighth regnal years (715 and 714); see text no. 1 lines 104b and 146-148 and text no. 2 line 99.

MU-šú-nu ab-bi a-na šuk-nu-uš KUR.ma-da-a-a

Na’iri, in his fortified city Ḫubuškia, (namely) horses, oxen, and sheep and goats.

55–56) (As for) Aššur-lē’i of the land Karalla, (and) Ittī of the land Allabria who had thrown off the yoke of the god Aššur (and) held me in contempt, I flayed the skin from Aššur-lē’i, deported the people of the land Karalla, as many as there were, and Ittī together with his family, and settled (them) in the land Hamath.

57) I deported the people of the cities Sukkia, Bāla, Abitikna, Pappa, (and) Lalluknu from their (own) places and (re)settled them in the city Damascus and the land Ḫatti (Syria).

58) I conquered six cities of the land Niksamma (and) captured Šēp-šarri, the city ruler of Šurgadia. I added those cities to the province of the land Parsuaš.

59–60) (As for) Bēl-šarru-ušur of the city Kišesim, I brought him, together with (his) property (and) possessions, the treasure of his palace, to Assyria. I set a eunuch of mine as provincial governor over his city (and) (re)named it Kār-Nergal. [I m]ade a royal image of myself and erected it inside (that city). I conquered six settlements in its neighborhood and added (them) to its province.

61–64a) I surrounded Kibaba, the city ruler of Ḫarḫar, (and) conquered (that city). I counted him as booty together with the people of his land. I reorganized (the administration of) that city. I settled there people from the lands that I had conquered (and) set a eunuch of mine as provincial governor over them. I (re)named (that city) Kār-Šarrukīn, set up the weapon of the god Aššur, my lord, there, (and) erected a royal image of myself inside (that city). I conquered six districts neighboring it and added (them) to his (or: its) province.

64b–65a) I surrounded (and) conquered the cities of Kišēšlu, Qindāu, Bīt-Bagāya, (and) Anzaria. I restored (them) and reorganized (their administration). I (re)named them the cities of Kār-Nabû, Kār-Sîn, Kār-Adad, (and) Kār-Ištar (respectively).

65b–67a) In order to subjugate the land Media in the environs of the city Kār-Šarrukīn, I strengthened (its) garrison. I conquered thirty-four districts of the land

55–56 Aššur-lē’i and Ittī were captured and punished during Sargon’s sixth regnal year (716); see text no. 1 lines 83b–90, text no. 4 lines 28’–ca. 35’ and text no. 117 lines 23–32a.

57 It was during Sargon’s third regnal year (719) that the people of these cities were deported; see text no. 1 lines 66–68a and text no. 4 lines 3’–6’a.

58–64a These lines refer to events dated to Sargon’s sixth regnal year (716). For the capture of Šēp-šarri and the cities of Niksamma (line 58), see text no. 1 lines 92–93a and text no. 4 lines 37–39’a; for the capture of Kišesim (lines 59–60), see text no. 1 l lines 93b–95, text no. 2 lines 86–87a, text no. 4 lines 39’b–42’a, and text no. 117 ii 35b–41a; and for the episode involving Kibaba and Ḫarḫar (lines 61–64a), cf. text no. 1 lines 96b–100 and text no. 117 ii 41b–46a.

64b–67a According to the Khorsabad Annals, these episodes took place in the seventh regnal year (715); see text no. 1 lines 113b–117a.

65 ú-ter-ma a-na eš-šu-ti aš-bat “I restored (them) and reorganized (their administration)”: Possibly translate instead “I again reorganized (their administration)”; see also the note to text no. 64 line 6’.

Media and made (them part of) the territory of Assyria. I imposed upon them the annual payment of horses (as tribute).

67b–70a) I surrounded (and) conquered the city Erištana, together with the settlements in its environs, belonging to the district of Ba'it-ili. I carried off booty from them. I destroyed, demolished, (and) burnt down with fire the lands Agazi, Ambanda, (and) Media, which border on the Arabs in the east, who had withheld their tribute.

70b–72a) (As for) Daltâ of the land Ellipi, a submissive subject who pulled the yoke of the god Aššur, five districts in his neighborhood revolted against him and no longer obeyed him as (their) lord. I went to his aid and surrounded (and) conquered those districts. I carried off to Assyria as substantial booty the people, together with their property, (along) with innumerable horses.

72b–76a) (As for) Urzana of the city Mušašir, who had put his trust in Ursâ (Rusâ), the Urartian, and disregarded (his) position as vassal (to me), I enveloped the city Mušašir with the main force of my army like locusts. However, that (man) fled away by himself to save his life and took to the hill(s). I entered the city Mušašir in triumph and counted as booty his wife, his sons, his daughters, (his) property (and) possessions, the treasure of his palace, as much as there was (of it), (along) with 20,170 people, together with their property, (and) his deities Ḫaldi (and) Bagbartu, along with their numerous possessions.

76b–78a) Ursâ (Rusâ), king of the land Urartu, heard of the destruction of the city Mušašir (and) the carrying off of his god Ḫaldi and by his own hands brought an end to his life with the iron dagger from his belt. I caused there to be mourning over the land Urartu, to its full extent. I imposed lamentation and dirge (singing) upon the people who lived there.

78b–83a) Tarhun-azi of the city Melid wanted (to offer) battle, broke (lit.: “overturned”) the treaty (sworn) by the great gods, and withheld his audience gift. Angrily, I smashed his royal city Melid, together with the settlements in its environs, like pots. I brought him out of his fortified city Til-Garimme, together with his wife, his sons, his daughters, the

**67b–70a** The capture of territory belonging to Ba'it-ili and the burning of several cities took place during Sargon's ninth regnal year; see text no. 1 lines 184b–191a and text no. 2 lines 218b–224a.

**70b–72a** The campaign to help Daltâ of Ellipi is dated to Sargon's ninth regnal year (713); see text no. 1 lines 172b–184a and text no. 2 lines 207b–218a.

**72b–78a** The capture and looting of Mušašir took place during Sargon's eighth regnal year (714); see in particular text no. 1 lines 149–165a, text no. 2 lines 188–195a, text no. 63 iii 1'–12', text no. 65 lines 309–414, and text no. 82 iv 1'–v 6.

**78b–83a** The Assyrian campaign against Tarhun-azi of Melid occurred during Sargon's tenth regnal year (712); see text no. 1 lines 204b–221 and text no. 2 lines 236–259a. According to the Assyrian Eponym Chronicle, Sargon stayed “in the land” that year, so the campaign must have been led by officials of his despite the statements in this text.

treasure of his palace, as much as there was (of it), (along) with five thousand of his captured warriors, and I considered him as booty. I reorganized (the administration of) the city Til-Garimme. I had Sutiens — bowmen whom I had captured — occupy the land Kammanu in its entirety and I (thus) expanded my territory. I assigned that land to the authority of a eunuch of mine and imposed upon him (the same state) service (and) corvée duty as (in the time) of Kunzinānu (Gunzinānu), the previous king.

83b–89) (As for) Tarḫu-lara of the land Gurgum, whose heir Mutallu had cut him down with the sword, sat upon his (Tarḫu-lara's) throne without my permission, and governed his land — furiously, I quickly marched to the city Marqasa with (only) my personal chariot and my cavalry who never leave my side (even) in friendly territory. I counted his heir Mutallu as booty, together with the (ruling) family of the land Bīt-Pa'alla, as many as there were, (along) with gold, silver, (and) the countless property of his palace. I reorganized (the administration of) the people of the land Gurgum, to its full extent. I set a eunuch of mine as provincial governor over them and considered them as people of Assyria.

90–96) Azūri, king of the city Ashdod, plotted (so as) to no longer (have to) deliver tribute (to me) and sent (messages) hostile to Assyria to the kings in his environs. Because of the evil that he had done, I did away with his lordship over the people of his [lan]d. I set his *favorite* [brother] Aḫī-Mīti as king over them, but (95) the Hittites, who (always) speak treachery, hated his rule and elevated over them Iāmānī, who had no right to the throne (and) who, like them, did not know how to respect (any) authority.

97–109a) Furiously, I neither assembled the main force of my army nor organized my (military) camp. I marched to the city Ashdod with (only) my warriors who (100) never leave my side (even) in [fri]endly territory. However, that Iāmānī heard from afar of the approach of my expeditionary force and fled to the (far) edge of Egypt, on the border with the land Meluḫḫa; his whereabouts have never been discovered. (105) I

83–89 Line 83: Ex. 4 inserts ù, “and,” after *il-ku*, “corvée duty.” Lines 83b–89: The campaign against Tarḫu-lara of Gurgum is dated to Sargon's eleventh regnal year (711); see the Khorsabad Annals (text no. 1 lines 248–249a, text no. 2 lines 267b–273a, and text no. 3 lines 1'–6'a).

90–109a The campaign to Ashdod took place in Sargon's eleven regnal year (711); see the Khorsabad Annals (text no. 1 lines 249b–262a, text no. 2 lines 273b–287a, and text no. 3 lines 6'b–13'a).

102–103 With regard to the translation of *a-na i-te-e KUR.mu-šu-ri ša pa-aṭ KUR.me-luḫ-ḫa* (also found in text no. 8 line 12), see Frame, *Orientalia* NS 68 (1999) p. 52 n. 24. W. Mayer (UF 28 [1996] p. 480) translates it as “in das benachbarte Ägypten, das zu Nubien gehört.”

surrounded (and) conquered the cities Ashdod, Gath (and) Ashdod-Yam. I counted as booty his gods, his wife, his sons, his daughters, (his) property (and) possessions, the treasure of his palace, (along) with the people of his land. I reor[ganized] (the administration of) those cities, [settled] there people from the lands that I had conquered ... [... in the east, [and set a eunuch of mine as [pro]vincial [governor] over [them]. I considered them [a]s people of Assyria and they (now) pull my yoke.

109b–112a) The king of the land Meluḫ[ḫa] — who in ... the land U[r]izzu, an inaccessible place, (whose) route [... who]se ancestors [from the] distant [past] until now had nev[er s]ent their mounted messenger(s) to the kings, my ancestors, in order to inquire about their well-being — [h]e[ar]d from a[far] of the might of the gods Aššur, [Nabû], (and) Marduk. [Then, fe]ar of (my) royal brilliance overwhelmed him and terror overcame him. He threw him (Iāmāni) in manacles and handcuffs, (in other words in) iron [fe]tters, and they brou[ght] (him) the long journey to Assyria, into my presence.

112b–117a) Mutallu of the land Kummuhu — an evil Hittite who did not fear the words of the gods, plotted evil, (and always) spoke treachery — put his trust in Argišti, king of the land Urartu, (his) ally, who (nevertheless) could not save him, stopped his annual delivery of tribute (and) payment(s), and withheld his audience gift. Angrily, I set out against him with (only) my personal chariot and my cavalry who never leave my side (even) in friendly territory. He saw the cloud of dust (kicked up) by my expeditionary force, went out from his city, and his whereabouts have never been discovered. (115) I surrounded (and) conquered that city, together with 62 fortified settlements in its environs. I carried off as booty his wife, his sons, his daughters, (his) property (and) possessions, everything valuable, the treasure of his [palace], (along) with the people of his land; I did not spare anyone. I reorganized (the administration of) that district. I settled there people of the land Bit-Yakin that I had conquered. I set a eunuch of mine as provincial [gove]rnor over them. I imposed the yoke of my lordship upon them. I conscripted from among them

109–112 Line 109: As suggested by A. Fuchs (Khorsabad p. 221), the traces after *qé-reb* on ex. 1 might suggest <sup>r</sup>šid<sup>1</sup>-[di]. Lines 109b–112: Iāmāni was extradited by Šapataka' (Shebitko), a member of Egypt's Twenty-Fifth Dynasty, at some point between 711 and 706; see the Introduction to the volume and text no. 116.

110 <sup>r</sup>reb LUM<sup>1</sup>: This is only found on P.E. Botta's copy for ex. 4. Comparing it to a-<sup>r</sup>lu<sup>4</sup>-uš-šú in line 132, possibly read [...] a-<sup>r</sup>lu<sup>4</sup>-[...] here, as suggested by A. Fuchs (Khorsabad p. 221). KUR.ú-<sup>r</sup>ri<sup>1</sup>-IZ-ZU: Ex. 4 has KUR.ú[...] and ex. 1 has [...] <sup>r</sup>ri<sup>1</sup>-IZ-ZU (with the trace before IZ being visible on the squeeze but not indicated on Botta's copy). With regard to the land Urizzu (or Uriššu) as possibly deriving from the Egyptian term for Upper Egypt, see Fuchs, Khorsabad p. 469.

112b–117a) The Assyrian Eponym Chronicle states that Kummuhu was captured and a governor appointed over it in Sargon's fourteenth regnal year (708). Note that the Khorsabad Annals indicates that the actions against Mutallu were led by officials of Sargon and not by the king himself; see text no. 1 lines 467b–468 and text no. 2 lines 441b–454.

150 chariots, 1,500 cavalry, 20,000 bowmen, (and) 1,000 shield and spear bearers and made (them) subject to him (the new governor).

117b–121a) At that time, the appointed moment came for Daltâ, king of the land Ellipi, a submissive subject who pulled my yoke, and he went the way of death. Nibê (and) Ašpa-bara, sons of h[is] sisters, jointly divided up his wide land (with regard to the right) to sit on his royal throne and (then) were doing battle (with one another). Nibê quickly sent a messenger to Šutur-Naḫūndi, the Elamite, in order to get revenge. He (Šutur-Naḫūndi) gave him aid and came to his assistance. In order to get revenge and to save his life, Ašpa-bara (120) besought me with supplications and entreaties and asked me for (military) aid. I sent seven of my eunuchs, together with their troops, to avenge him. They brought about the defeat of Nibê, together with the Elamite army, his allies, at the city Marubištu. I seated Ašpa-bara on his throne, brought order to the disturbed land Ellipi, and made (it) subject to him.

121b–124a) Marduk-apla-iddina (II) (Merodach-Baladan), descendant of Yakīn, king of Chaldea, a murderer (lit.: “seed of murder”) (and) the (very) image of a gallû-demon, who does not fear the word of the lord of lords (Marduk), put his trust in the sea (and its) surging waves, broke (lit.: “overturned”) the treaty (sworn) by the great gods, and withheld his audience gift. He turned to Ḫumbanigaš (Ḫumban-nikaš I), the Elamite, for aid, caused all the Sutiens, the people of the steppe, to rebel against me, and prepared for battle. He proceeded to the land of Sumer and Akkad and for twelve years he ruled and governed Babylon, the city of the Enlil of the gods (Marduk), against the will of the gods.

124b–129a) At the command of the god Aššur, the father of the gods, and of the great lord, the god Marduk, I got my (chariot) teams ready (and) prepared my (military) camp. I ordered the march against the Chaldean, a dangerous enemy. However, that Marduk-apla-iddina heard of the approach of my expeditionary force. His own fear(s) then fell upon him and he fled away from Babylon to the city Iqbi-Bêl during the night like a bat. He gathered together the inhabitants of his cities (lit.: “his inhabited cities”) and the

117–121a Line 117: 1 LIM, “1,000,” is likely an error for 10 LIM, “10,000,” as in text no. 2 line 453 (see also Fuchs, Khorsabad p. 349 n. 465). The 1 is only found on ex. 4. P.E. Botta’s copy of ex. 1 has <1> LIM, while H. Winckler’s has 1 LIM; the squeeze would seem to allow [1] LIM. Lines 117b–121a: The campaign against Nibê of Ellipi took place during Sargon’s fifteenth regnal year (707), or just possibly in the preceding year; see text no. 2 lines 455–467a.

118 -<sup>r</sup>šú<sup>1</sup> [a]-<sup>r</sup>na<sup>1</sup> is based on the squeeze of ex. 1, as opposed to the Monument de Nineve copy which has [x (x)]; H. Winckler’s copy for this exemplar has simply -šú (fully preserved). The passage is not preserved on any other exemplar.

121b–145a The conquest of Babylonia took place in Sargon’s twelfth and thirteenth regnal years (710–709), although Sargon did not return to Assyria until 707. See in particular text no. 1 lines 262b–444a, text no. 2 lines 287b–427, text no. 3 lines 13’b–60’, text no. 5 lines 1’–3’, and text no. 6 lines 1’–14’.

gods dwelling in them (his cities), and he brought them into the city Dūr-Yakīn. Then, he strengthened its enclosure walls. He formed the Gambulu, Puqudu, Damūnu, Ru'u'a (and) Ḥindaru (tribes) into bands, brought (them) inside it (Dūr-Yakīn), and made preparations for battle. Moving back a distance of one measuring rope from in front of its main wall, he made a moat two hundred cubits wide; he made (the moat) one and a half *nindanu* deep and reached ground water. He cut a channel from the Euphrates River, (thereby) making (its water) flow (in)to its meadowland. He filled the city's flatlands, where battles (are fought), with water and cut the bridges. Together with his allies (and) his battle troops, he pitched his royal tent in a bend of the river (lit.: "between rivers") like a crane and set up his (military) camp.

129b–132a) I had my fighters fly [o]ver his canals like eagles and they brought about his defeat. With the blood of his warriors, they dyed the water of his canals as red as red wool. I cut down like sheep the Sutians, his allies, who had gone over to his side and come to his aid, together with the Maršānians, and I splattered the remainder of the people who survived with deadly venom. However, that (man) abandoned [his] royal tent, gold bed, gold throne, gold chair, gold scepter, silver chariot, gold parasol, and his neck ornament inside his (military) ca[m]p and fled off by himself; like a cat, he hugged the side of his (city's) wall and entered his city.

132b–134a) I surrounded (and) conquered the city Dūr-Yakīn. I rounded up that man, together with his wife, his sons, his daughters, gold, silver, property (and) [possess]ions, the treasure of his palace, as much as there was (of it), (along) with substantial booty from his city and the survivor(s), the remainder of his people who had fled before my weapons, and I counted them as booty. I burned his fortified city Dūr-Yakīn down with fire. I destroyed (and) demolished its high enclosure walls; I tore out its foundation. I made it like a (ruin) mound left by the Deluge.

134b–137a) (As for) the citizens of (the cities) Sippar, Nippur, Babylon, and Borsippa who through no fault of their own had been held captive in it (Dūr-Yakīn), I put an end to their imprisonment and let them see the light (of day). (With regard to) their fields, which long ago, while the land was in disorder, the Sutians had taken away and appropriated for their own, I struck down (those) Sutians, the people of the steppe, with the sword. I (re)assigned to them

126b–127a Due to lack of space, it appears that exemplar 4 omitted *ú-dan-ni-na ... ú-še-rib-ma*, "He strengthened its enclosure walls. He formed the Gambulu, Puqudu, Damūnu, Ru'u'a (and) Ḥindaru (tribes) into bands and brought (them) inside it (Dūr-Yakīn)."

132 Or *ki-ma šu-ra-ni ṭe-ḥi BÀD-šú iz-ziz-ma*, "Like a cat, he kept (lit.: "stood") beside his (city's) wall."

133–134a For differing accounts of what happened to Marduk-apla-iddina, see the Introduction to this volume, under the section "Military Campaigns."

(the citizens) their territories, (whose boundaries) had been forgotten (and) fallen into disuse during the troubled period in the land. I (re)-established the freedom (from obligations) of (the cities) Ur, Uruk, Eridu, Larsa, Kullaba, Kissik, (and) Nēmed-Laguda. Moreover, I returned their gods that had been carried off as booty to their cult centers and restored their regular offerings that had been discontinued.

137b–140a) I ruled all together the land Bīt-Yakīn, from one end to the other end (lit.: “above and below”), as far as the cities Sam’ūna, Bāb-dūri, Dūr-Telite, Bubê, (and) Tīl-Ḫumba, which are on the Elamite border; I settled there people from the land Kummūḫu, which is (located) in the land Ḫatti, that I had conquered with the support of the great gods, my lords, and I had (them) occupy its (Bīt-Yakīn’s) abandoned regions. I had Nabû-damiq-ilāni construct a fortress on the Elamite border, at the city Sagbat, in order to bar access to (lit.: “the feet of”) the enemy Elamite(s). (140) I divided up that land into equal parts and assigned (them) to the authority of a eunuch of mine, the governor of Babylon, and a(nother) eunuch of mine, the governor of the Gambulu (tribe).

140b–144a) Happily, with a joyful heart (and) a radiant face, I entered Babylon, the cult center of the Enlil of the gods (Marduk); I grasped hold of the hands of the great lord, the god Marduk, and brought (him) safely along the the road to the akītu-house. (With regard to) 154 talents, 26 minas, (and) 10 shekels of red gold, 1,604 talents (and) 20 minas of pure silver, copper (and) iron in immeasurable quantities, obsidian, lapis lazuli, banded agate, blue turquoise, green turquoise, ... of banded agate (and) muššaru-stone in large quantities, blue-purple wool, red-purple wool, garments with multi-colored trim and linen garments, boxwood, cedar, cypress, (and) every kind of aromatic, the products of Mount Amanus, whose scent(s) are pleasant – from the beginning of my kingship until (my) third year, I presented (these things) as gifts to the deities Bēl, Zarpanītu, Nabû, Tašmētu, and the (other) gods who dwell in the cult centers of the land of Sumer and Akkad.

144b–145a) Upēri, king of Dilmun, who(se) lair is situated (at a distance of) thirty leagues in the middle of the Eastern Sea, like (that of) a fish, heard of the might of the gods Aššur, Nabû, (and) Marduk and brought me his gift.

141 Ex. 4 has 1 ME 64 GUN, “164 talents,” for 1 ME 54 GUN, “154 talents,” and 1 LIM 8 ME 4 GUN, “1,804 talents,” for 1 LIM 6 ME 4 GUN, “1,604 talents.” Text no. 64 line 9’ and text no. 103 iv 7 also have 1,804 talents.

144 Text no. 74 vii 19 has MU.4.KĀM, “(my) fourth year.”

145b–149a This episode is connected with the sending of help to Silṭa, king of Tyre, against these rulers in the Khorsabad Annals; see text no. 1 lines 456b–467a and text no. 2 lines 436b–441a. The gifts likely reached Sargon in Babylon in 709, in 708, or in 707 before he returned to Assyria.

145b–149a) Moreover, seven kings of the land Yā', a region of the land Yadnana (Cyprus) — whose abode(s) are situated far away, at a distance of seven days (journey) in the middle of the Western Sea (and) the name of whose land, from the distant past until now, none of the kings, my ancestors, neither in Assyria nor in the land Karduniaš (Babylonia), had ever heard — heard from afar, in the middle of the sea, of the deeds I had been doing in Chaldea and the land Ḥatti (Syria). Their hearts then pounded and fear fell upon them. They brought before me in Babylon gold, silver, (and) utensils of ebony (and) boxwood, products of their land, and they kissed my feet.

149b–153a) While I was bringing about the defeat of the land Bit-Yakin and all of the Arameans and of making my weapon prevail over the land Yadburu on the border of the land Elam, a eunuch of mine, the governor of the land Que (Cilicia), marched ...ly three times into the territory of Mitâ (Midas) of the land Musku. He destroyed, demolished, (and) burned down his cities with fire. He carried off substantial booty from them. Moreover, that (man), Mitâ of the land Musku, who had not submitted to the kings who preceded me and had never changed his mind (about doing so), sent his messenger before me at the Eastern Sea to do obeisance (to me) and to bring (me) tribute (and) presents.

153b–155a) At that time, using (as laborers) people from the lands that I had conquered, whom the gods Aššur, Nabû, (and) Marduk had made bow down at my feet, and who (now) pull my yoke, (and) in accordance with divine will (and) my heart's desire, I built a city at the foot of Mount Mušri, upstream from Nineveh, and I named it Dūr-Šarrukin.

155b–158a) The gods Ea, Sîn, Šamaš, Nabû, Adad, Ninurta, and their great spouses who were duly born inside Eḥursaggalkurkurra ("House, the Great Mountain of the Lands"), the mountain of the netherworld, gladly took up residence in resplendent sanctuaries (and) artfully-built shrines inside the city Dūr-Šarrukin. I established innumerable regular offerings as their shares (of temple income). I had *nešakku*-priests, *ramku*-priests, *surmaḥḥu*-priests, men well versed in their (fields of) knowledge (and) initiated in secret rites, (and) *naṭpu-ecstatics* serve them (lit.: "stand before them").

158b–162a) I built inside [it (the city)] a palace using (lit.: "of") elephant ivory, ebony, boxwood, *musukannu*-wood, cedar, cypress, *daprānu*-juniper, juniper

147 P.E. Botta's copy of ex. 4 copy omits the u, "nor," after aš-šur.KI, "Assyria," but the photo of the squeeze suggests that it is present. Botta's copy of ex. 4 also omits the u, "and," after kal-di, "Chaldea," but the squeeze is not clear if his copy is correct or not.

149b–153 For this episode, which the Khorsabad Annals indicate took place while Sargon was active in Babylonia (710–708), see also text no. 1 lines 444b–456a and text no. 2 lines 428–436a.

155b–158a Cf. text no. 2 lines 469b–472a.

158b–162a See the on-page note to text no. 2 lines 472b–477a.

and terebinth, (namely) Egalgabarinutukua (“Palace That Has No Equal”), to be my lordly residence, and I laid their foundations upon inscribed objects (made) of gold, silver, lapis lazuli, jasper, *parūtu*-alabaster, copper, tin, iron, lead, and pieces of aromatic woods. Then, I established their brickwork (and) roofed them with large cedar beams. I bound the doors of cypress (and) *musukkannu*-wood with band(s) of shining copper and installed (them in) their entrance(s). I had built in front of their gates a portico (*bit appāti*), a replica of a Hittite palace, which is called a *bit ḫilāni* in the language of the land Amurru.

162b–166) Eight twin lion (colossi) of shining copper that weigh 4,610 full (lit.: “tested”) talents (and) that were cast by the craft of the god Ninagal and filled with radiance – upon (those) lion colossi I installed four matching cedar columns, whose diameter(s) are one *nindanu* each, the product of Mount Amanus, and I positioned cross-beams (upon them) as a cornice for their gates. I skillfully fashioned magnificent mountain sheep colossi of massive mountain stone and in the four directions I had (them) hold their (the gates’) respective (lit.: “fitting”) door bolt(s). I depicted the settlements that I had conquered upon large limestone slabs and surrounded their (the palatial halls’) lower courses (with them). I made (them) an object of wonder. I placed inside these palatial halls representations – (made) by the craft of the sculptor – of the settlements of every land that I had conquered, from east to west, by the strength of the god Aššur, my lord.

167–175a) In a favorable month, (on) an auspicious day, I invited the god Aššur, the father of the gods, the great lord, (and) the (other) gods and goddesses who dwell in Assyria (to come) inside them and, in a grandiose manner, I offered them (the gods) gifts of red *šariru*-gold (and) pure silver, extensive presents as (my) substantial audience gift. I thus made their (the gods’) moods joyful. I offered before them prize bulls in prime condition, fattened sheep, geese, ducks, *dormice*, strings of fish and birds, the wealth of the Deep (*apsū*) that never (170) lessens, *kurunnu-beer* (and) white honey, products of the pure mountains, the best of the lands that I had conquered, which the progenitor of the gods, the god Aššur, had added to my royal share, (along) with pure voluntary sacrifices, pure food offerings, splendid incense offerings, (and) innumerable libations. Reverently, I knelt (and) prayed before him that he preserve (my) life, grant (me) a long life, and firmly establish my reign.

162 Ex. 4 has <1>, or less likely [1].

168 Ex. 4 has <GAL>-iš, or possibly [GAL]-iš based on squeeze.

175–177a) The great mountain, the god Enlil, the lord of (all) lands, who dwells in Eḥursaggalkurkurra, (and) the (other) gods and goddesses who dwell in Assyria returned to their city amid songs of joy and hymns of praise.

177b–186a) With rulers from every land, provincial governors of my land, overseers, commanders, nobles, eunuchs, and elders of Assyria, I sat down inside my palace and held a festival. [I recei]ved as their substantial tribute (180) gold, silver, utensils of gold (and) silver, valuable stone(s), copper, iron, utensils of co[pp]er] (and) ir[o]n, every kind of aromatic, fine oil, garments with multi-colored trim and linen garments, blue-purple wool, red-purple wool, elephant hide(s), elephant ivory, antimony, ebony, [box]wood, [la]rge Egyptian horses that are tr[ai]ned to the yoke, mules, donkeys, camels, ox[en, (and) sheep and goats].

186b–194) May the god [Aš]šur, the father of the gods, lo[ok] steadfastly upon (this) city that has been duly selected [by me] (lit.: “the choice of the steadfastness of [my] hea[rt]”) [and] (upon) this palace with his holy, radiant face and may he ordain their renovation for future days. May (the following commands) come from (lit.: “be set in”) his holy mouth: May the guardian spirit (and) the protective god (190) stay continually in them, day and night, and may they never leave them. [At his] comma[nd], may the ruler who constructed them live long (and) reach extreme old age. May their builder remain in good health forever. May (this command) issue from his (the god Aššur’s) holy lips. May the one who dwells inside them rejoice there in physical well-being, merriment, and [hap]piness, (and) be fully satisfied with (his) good fortune.

## 8

This inscription is found on a series of wall slabs from the southwest end of Room XIV and Entrance p in the palace at Khorsabad. (A version of Sargon’s Khorsabad Annals is found on other wall slabs in the room [text no. 4].) The number of lines of text on an individual slab with this inscription varies from twelve to eighteen. After the introduction with the king’s titles and epithets, and the mention of his grant of special privileges to selected Babylonian and Assyrian cities (lines 1–5) and a summary description of his numerous

military successes (lines 6–27a), the inscription describes the construction of the city Dūr-Šarrukīn, and in particular its palace and city wall (lines 27b–69a). The text then concludes with blessing and curse formulae (lines 69b–87). Since the text mentions the celebration held upon the completion of the city (lines 59b–69a), it must have been composed after that event, which took place in the second month of the king's sixteenth regnal year (706) according to the Assyrian Eponym Chronicle. The inscription is sometimes referred to as the Display Inscription of Room XIV (Die Prunkinschrift des Saales XIV), the Small Display Inscription (Die Kleine Prunkinschrift), the Small Summary Inscription, and the Annals of Room XIV. With regard to the reliefs on the slabs in the room, which are thought to depict events in the king's seventh regnal year (715), see Reade, *Bagh. Mitt.* 10 (1979) p. 84.

## COMMENTARY

For a plan of Room XIV and Door p, see Figure 13, as well as Botta, *Monument de Ninive* 2 pl. 144; and Albenda, *Palace of Sargon* pl. 135; the latter two also have drawings of the reliefs on the relevant slabs. H. Winckler thought that all of the wall slabs in Room XIV preserved parts of only one inscription and edited them accordingly (Sar. 1 pp. 80–95). F.H. Weissbach (*ZDMG* 72 [1918] pp. 175–177) was the first to demonstrate that the slabs represented two different inscriptions (this text and text no. 4) and he divided the slabs correctly between the two.

Two fragments of this inscription are found in

the British Museum: BM 115034 (47-7-2,41; 34.3×21.3 cm), which preserves a small part of the first slab (XIV,3; parts of lines 1–8, and a trace from line 9), and 47-7-2,46+51 (15×15 cm), which preserves a small part of the second slab (XIV,5; parts of lines 18–24 and traces of line 25). These pieces are part of the Hector collection in the British Museum and were apparently found by an English merchant in Baghdad by the name of Hector, who carried out some digging at Khorsabad, likely after P.E. Botta had finished work at the site in November 1844 and before A.H. Layard began work in November

1845 (see Reade in Fontan, Khorsabad pp. 121–122). The fragments have been collated in the British Museum and are also shown on BM photos 56549 and 56545. (Background information on these pieces was furnished by C.B.F. Walker.)

Botta indicates that he either collated his copies of the passages on five of the slabs (sections 1–3 and 5–6) from squeezes or from the originals. Squeezes of sections 1–2 and 5–6 are preserved in the Louvre and photographs of these squeezes have been examined. Some spot-checking of the original squeezes was also carried out. These squeezes are at times damaged or unclear and they do not always cover the whole section copied by Botta, in particular the edges. Winckler indicates that he examined squeezes of sections 1–2 and 5–6 when he made his copies of these; he also states that the right end of section 1 is not preserved on the squeeze. Since he could not collate sections 3–4, his copies of these sections (Sar. 2 pl. 29 nos. 61–62) are solely reliant upon Botta's copies and Winckler's personal judgment of what should have

been on those sections, and therefore they provide no independent evidence of what was actually on those slabs.

It has been thought advisable to provide a score for this text on Oracc, with the sigla “Bt” (Botta, Monument de Ninive copy), “Wi” (Winckler, Sar. 2 copy), “Sq” (Louvre squeeze), and “BM” (original fragments in the British Museum) being used to denote the various sources of information. Since there are no squeezes or originals available for the text on wall slabs 7 and 9 of the room, the master line for that section (lines 28–52) is totally based on Botta's copies.

Unusually, the slabs with this inscription do not all have the same number of lines; they may have 12 (XIV,9), 13 (XIV,3 and XIV, 7), 14 (XIV,5), 17 (p,4), or 18 (p,3) lines each. The slabs in this room with a version of the Annals all have fifteen lines each (see text no. 4). Restorations are based primarily upon text nos. 9 and 43 and, for the most part, mirror those given by Weissbach.

## TEXT

1) É.GAL <sup>m</sup>LUGAL-GI.NA LUGAL GAL-ú LUGAL

1) Palace of Sargon, great king, strong king, king of

**Section 1** = lines 1–13 = XIV,3:1–13.

**1** M. Worthington (Textual Criticism p. 195) calls the unexpected nominative forms here (LUGAL GAL-ú LUGAL *dan-nu*) “honorific nominative[s]”; these occur in several texts of Sargon (e.g., text no. 7 line 1, text no. 10 lines 1–2, and text no. 44 line 2). H. Winckler's copy omits the unwanted *u* found on P.E. Botta's copy after *mi-gir*; however, as Winckler's own copy indicates, the squeeze seen by him did not cover that section of the line. Thus, he had no independent evidence as to whether or not the sign was actually on the original.

- the world, king of Assyria, governor of Babylon, king of the land of Sumer and Akkad, king of the four quarters (of the world), favorite of the [great] god[s].
- 2) The gods Aššur, Nabû, (and) Marduk, the gods, my helpers, granted me a reign without equal and exalted my [go]od reputation to the h[eights].
- 3–5) I continually acted as provider for (the cities) Sippar, Nippur, Babylon, and Borsippa (and) [I made restitution for] the wrongful damage suffered by the people of privileged status, as many as there were (of them); I (re)-established the [šuba]rrû-privileges of (the cities) Dēr, Ur, Uruk, Eridu, Larsa, Kullaba, Kissik, (and) Nēmed-L[ag]uda and [gave relief to] their people. I resto[red] the exemption (from obligations) of (the city) Baltil (Aššur) and the city Ĥarrān, which had fallen [into oblivion] in the distant past, [and] their [privil]eged status that had lapsed.
- 6–11a) With the support of the great gods, I regularly advanced and made uncompliant lands (and) insubmissive mountain regions bow down at my feet; I made [...]. I dispersed the forces of Ĥumbanigaš (Ĥumbanikaš I), the Elamite. I destroyed the land Karalla, the land Šurda, the city Kišesim, the city Ĥarħar, the land Media as far as the border of [Mount Bikni], (and) the land Ellipi, (and) imposed the yoke of the god Aššur (upon them). [I laid] waste to the land Urartu, plundered the city Mušašir, slaughtered the lands Andia (and) Zikirtu, (and) allowed the distur[bed] people of the land Mannea to live in peace. I struck down the rulers of the land [Ha]math, the city [Ca]rchemish, (and) the city Kummuħu. I depor[ted] Gunzinānu of the land Kammanu from the city Melid, (10) his royal city, [and] set officials [over all] these lands. I did away with the kingship of Tarħu-lara of the city Marqasa (and) at the sa[me] time made the wide land Gurgu[m],

4 ÚRI\*, UNUG\*, ARARMA\*, and -aba<sub>4</sub>\*: The squeeze has ŠEŠ.MURUB<sub>4</sub>, MURUB<sub>4</sub>, UD.MURUB<sub>4</sub>, and -MURUB<sub>4</sub> respectively. H. Winckler's copy has -<sup>d</sup>la-gu<sup>1</sup>-da [an-du]-ra-šu-un. Based upon text no. 14 line 9, one might expect *andurāršun* rather than *šubarrāšun*, but no AR is present on the squeeze after the RA. Or possibly [an-du]-ra-<ar>-šu-un.

6 H. Winckler's copy has *la pa-du-ti*, "merciless," rather than *la kan-šu<sup>1</sup>-ti*, "insubmissive," but the squeeze supports the latter reading. Possibly *e-pu-šá* †kiš<sup>1</sup>-[šu-tu], "I exercised wo[rld] dominion," at the end of the line (Fuchs, Khorsabad p. 75), although this phrase is not otherwise attested in the inscriptions of Sargon II.

7–8 While it is clear that Karalla must go with *u'abbit*, "I destroyed," it is not clear if any or all of the immediately following places (Šurda, Kišesim, Ĥarħar, Media, and Ellipi) should also go with that verb as opposed to being restricted to the following phrase *ēmidu nīr aššur*, "I imposed the yoke of the god Aššur" (see also text no. 13 lines 15–18 and text no. 104 Frgm. B lines 2–4). F.H. Weissbach and D.D. Luckenbill understand all the places except Ellipi to go with "I destroyed." A. Fuchs (Khorsabad p. 308 and n. 181) states that of all the cities mentioned in the passage only Karalla was really destroyed, as known from other texts; thus, he would prefer "I destroyed the land Karalla. I imposed the yoke of the god Aššur upon the land Šurda ... Ellipi." However, in a similar passage, text no. 116 line 16 omits the phrase about imposing the god's yoke, thus stating that Sargon destroyed all the places following "I destroyed." Note also text no. 84 line 13' and text no. 103 ii 29–32 which replace the phrase about imposing the god's yoke with one about not leaving (alive) any of the people of the cities (*lā ēziba pirħišun/piri[šunu]*); in the former case the presence of a *šá* before KUR.*ma-da-a-a* could indicate that only the Median land and Ellipi were to be connected with the second phrase. Line 7b: The squeeze supports H. Winckler's copy (against P.E. Botta's copy) that all three A signs in *ma-da-a-a a-di* were found on the text.

8 One expects *ēmid* rather than *ēmidu*. Possibly *dal-pa<sup>2</sup>-†a<sup>2</sup>-[te]*, "the troub[led] people of the land Mannea" (see text no. 65 line 61).

9 P.E. Botta's copy has KUR.[x]-at-te and H. Winckler's copy has KUR.ħa-at-te, "the land Ĥatti," but the squeeze supports the reading KUR.[a]-†ma<sup>1</sup>-at-te.

10 H. Winckler's copy has *as-suh-ma* UGU *gi-mir* KUR.MEŠ *šá-ti-na* fully preserved.

to (its) full extent, (part of) the terr[itory of Assy]ria.

11b–14) Iāmānī of the city Ashdod took fright at my weapons, abandoned his wife, his sons, (and) his daughters, fled to the (far) edge of Egypt, on the border with the land [M]e[luḫ]ḫa, and lived (there) stealthfully (lit.: “like a thief”). I set a eunuch of mine as provincial governor over all of his wide land and his prosperous people, and (thereby) expanded the territory of the god Aššur, the king of the god[s]. Fear of the brilliance of the god Aššur, my lord, overwhelmed [the king of the land M]eluḫḫa; they put iron fetters on his (Iāmānī’s) hand(s) and feet and he (the king of Meluḫḫa) had him (Iāmānī) brought to Assyria (and) into my presence.

15–18a) [Moreover], I plundered the city Šinuḫtu, the city Samaria, and all of the land Bīt-Ḫumria (Israel). I caught the Ionians who (live in) the middle of the Western Sea like fish and [depo]rted (the people of) the lands Kasku, Tabal, (and) Ḫilakku. I drove out Mitâ (Midas), king of the land Musku. I brought about the defeat of Egypt at the city Raphia and counted Ḫanūnu (Ḫanno), [king of the city G]aza, as booty. I subjugated seven kings of the land Yā’, a region of the land Yadnana (Cyprus) — whose abode [is situ]ated at a distance of seven days (journey) in the middle of the Western Sea.

18b–20a) Moreover, [my] great [hand] conqu[er]ed Marduk-apla-iddina (II) (Merodach-Baladan), king of Chaldea, who dwelt on the shore of the sea (and) who exercised kingship over Babylon against the will of the gods. I divided up all of his (Marduk-apla-iddina’s) wide land into equal parts, assi[gn]ed (them) to the authority of a eunuch of mine, the governor of the land of Babylon, and a(nother) eunuch of mine, the governor of [the] Gambulu, [and I imposed] the yoke of the god Aššur (upon them).

20b–21a) Upēri, king of Dilmun, who(se) lair is situated at a distance of thirty leagues in the middle of the sea, like (that of) a fish, [heard] of my lordly mi[gh]t [and brought me] his audience gift.

21b–27a) With the strength of the gods Aššur, Nabû,

**Section 2** = lines 14–27 = XIV,5:1–14.

14 ŠU u: We expect ŠU.II u; P.E. Botta’s and H. Winckler’s copies have ŠU u and ŠU.II u respectively, while the squeeze currently has ... ŠU (x) [...]. *id-du-šú-ma*: The squeeze supports Winckler’s copy in indicating that the text has *id-du-šú-ma*, not the *id-du-šú* of Botta’s copy. The ruler who sent Iāmānī back to Sargon was Šapataku’ (Shebitko); see text no. 116 lines 20–21.

15 The squeeze indicates that there was room for one or two signs at the beginning of the line; see line 18 for one example of ù beginning a passage. In view of the mention of Samaria and Bīt-Ḫumria (Israel) here and of the known deportation of the “ten lost tribes of Israel,” it is worth noting that the verb *ašlu*, translated here as “I plundered,” can also mean “I carried off as booty/captives.”

18 Instead of translating *ik-šu-[da]* as “defea[ted]” one might translate “captu[red]” (also text no. 7 lines 133–134 and text no. 74 vi 45–46). For differing accounts of what happened to Marduk-apla-iddina II, see the Introduction to this volume, under the section “Military Campaigns.”

19 [qa-(a)-ti]: The restoration follows text no. 116 line 25; text no. 13 line 49 has *qa-as-su*; H. Winckler’s copy has [ŠU.II-ia]. [LÚ<sup>?</sup>].*gam-bu-li*: Winckler’s copy has *KUR.gam-bu-li*, but nothing of the *KUR* was seen by Botta or is currently visible on the squeeze, where the spacing would seem to fit LÚ better than *KUR*; parallel passages (e.g., text no. 7 line 140 and text no. 87 line 11’) have LÚ here.

20 [e-mid]: H. Winckler’s copy has [e-mi-du].

(and) Marduk, the great gods, my lords, who mobilized my weapons, I cut down a[ll my] f[oes]. I ruled as if (they were) one (people) from the land] Yadnana (Cyprus), which is in the middle of the sea, as far as the border(s) of Egypt and the land Mus[ku], the land Kummuhu, the city Melid, the wide land Amurru, the land Ḥatt[i (Syria) in its entirety, all of the land G]jutium, the distant Medes (who live) on the border of Mount Bikni, the land Rāši (and) [the land E]l[lip]i on the border of the land Elam, the A[rameans who live beside the Tigris, Sur]appu, (and) Uqnû rivers, together with the Sutians, the people of the steppe of the land Ya[dburu, as many as] th[ere are, from the city Sam’ūna, as far as (25) the city Bub]ê (and) the city Tīl-Ḥumba, which are on the border of the land Elam, the land Karduniaš (Babylonia) from one end [to the other (lit.: “above [and below]”), all of Chaldea, as much as there is (of it), the land Bīt-Yakīn, which is on the shore of the sea, as far as the border of Dil]mun, and I [made (them part of) the ter]ri[tory] of Assyria. [I set eunuchs of mine as provincial governors over them and] imposed [the yoke of m]y [lordship] upon them.

27b-28a) At that time, using (as laborers) enemy pe[ople whom I had captured, whom the gods Aššur, Nabû, and Marduk had made bow down at my feet, and who] (now) pull my yoke, (and) in accordance with [divine] will [(and) my heart’s desire, I built a city] at the foot of Mount <M>uṣri, upstream from Nineveh, [and I na]med it [Dūr-Šarrukīn].

28b-29a) [I created around it] a [botanical] garden, a repl[ica] of Mount Amanus, [in] which [were gathered] every kind of aromatic plant from the land Ḥatti (Syria) (and) every type of fruit-bearing mountain tree.

29b-31a) Not [o]ne of [the three hundred and fifty previo]us [rulers] who had exercised [lor]dship over Assyria before my time and had [go]verned the subj[ects of the god E]n[lil had noted its (the city’s)] site [or come to know how to make it habitable]; nor [had one ordered] the digging of its canal] or the planting of orchards there. [Day (and) night I planned earnestly how to settle that city] (and) to have built [a great shrine — a cella] for the great gods — and palatial [halls to be my lordly abode], and I (then) ordered its construction.

31b-32a) In a favorable month, (on) an [auspicious] day — [in the month of the god Ku]lla, (on) the day of an eššēšu-festival [...] — I had (workmen) [wiel]d [ho]e(s) an[d make bricks].

27 Based upon text no. 14 lines 29-30, the translation assumes that the end of the line reads ki-[šit-ti ŠU.II-ia ša <sup>d</sup>aš-šur <sup>d</sup>AG ù <sup>d</sup>AMAR.UTU a-na GÌR.II-ia ú-šak-ni-šú-ma].

Section 3 = lines 28-40 = XIV,7:1-13.

28 Probably the original had KUR.[mu]-uṣ-ri, as indicated on H. Winckler’s copy (Sar. 2 pl. 29 no. 61); however, P.E. Botta’s copy indicates no damage at this point and Winckler was not able to consult a squeeze for this section when making his copy.

30 Instead of restoring *il-ma-du* (following text no. 9 line 46), possibly restore *i-de-ma* (following text no. 43 line 46).

- 41) [zaq-ri ú-šar-ši-da] te-[em-me-en-šú i-na re-e-ši
- 32b–34a) [In the month of Abu (V) – the month for the one who lay]s the foundation of citi(es) and house(s) (and in) which a[ll the black-headed people construct] shelter(s) [for] the[ir dwelli]ng(s) – I plac[ed its limestone masonry] on top of (foundation deposits of) gold, [silver], copper, pre[cious stone]s, (and) [pieces (of aromatic woods) from Mount Amanus]. I laid its foundations and [established its brickwork].
- 34b) I had built [ins]ide [it (the city) for] the gods E[a, Šin, Ningal], Šamaš, [Nabû, Adad, Ninurta, and] their great [spou]ses [awe-inspiring daises which] were made as firm [as the mountains].
- 35–37a) [At their august command], I built [palatial halls using (lit.: “of”) elephant ivory, ebony, boxwood, musukkannu-wood, ce]dar, cypress, *daprānu*-juniper, [juniper, and terebinth to be my royal residence and I roofed them] with large ce[dar] beams. I [bou]nd [the doors of cypress (and) *musukkannu*-wood] with band(s) of [shi]ning [cop]per and [installed (them in) their] entr[ance(s)]. I had built in front of] their gates [a portico (*bīt appāti*), a replica of a] Hittite [palace], which [is called a *bīt ḥilāni*] in the language of the land [Amur]ru.
- 37b–40a) Eight [tw]in lion (colossi) [of shin]ing [cop- per] that weigh 4,610 [full (lit.: “tested”) talents] (and) that [were c]ast by the cr[aft] of the god Ninaga[l and filled with radiance – upon (those) [lion colossi] I installed four mat]ching [cedar columns], whose [diameter(s) are one *nindanu*] each, the product of Mount Amanus; and] I [positioned cross]-beams (upon them) [as a cornice] for their gates. I skillfully fash- ioned [magnificent mountain sheep colossi of mass]ive [mountain stone] and in the four directions I had (them) hold their (the gates’) door bolt(s). [I depicted] the settlements that [I had con]quer[ed upon] large lime[stone slabs and] surrounded their (the palatial halls’) lower courses (with them). I made (them) [an object of wo]nder.
- 40b–49a) I made [the leng]th of its wall 16,2[80 cubits] and [I made its] fo[undation secure] u[pon (blocks of) massive] mountain [stone. In front (and) in ba]ck, on both sides, [facing the four directions, I opened] eight [gates (in the city wall)]. I named the gate(s) of the gods Šamaš and Adad that face the east “The God Šamaš

32 Based upon text no. 43 line 59, one would expect “an eššešu-festival for the god Nabû” or “an eššešu-festival for the son of the god Bēl”; however, the traces following do not appear to support either reading.

33 The passage “[construct] shelter(s) (in the fields) [for] the[ir dwelli]ng(s)” presumably refers to the erection of temporary shelters for protection against the summer sun.

34 Possibly restore *pa-rak-ki ra-áš-du-ti*, “firmly-founded daises” (following text no. 43 line 62), instead of *pa-rak-ki ra-áš-bu-ti*, “awe-inspiring daises” (following text no. 9 line 57).

39 With regard to UDU.MEŠ šad-di<sup>d</sup> LAMMA MAḤ.MEŠ, “mountain sheep colossi,” see the note to text no. 2 line 479.

40 The restoration of the number follows text no. 9 lines 79–80; see the on-page note to text no. 9 lines 79–80.

Section 4 = lines 41–52 = XIV,5:1–12.

Is the One Who Makes] Me [Triu]mph” (and) “The God Adad Is the One Who Establishes My Prosperity” (respectively). I called [the gate(s) of the god Enlil and the goddess Mullissu that fa]ce the north “[The God] Enlil Is the One Who Establishes the Foundation of My City” (and) “[The Goddess Mullissu Is the One Who Restores Abundance” (respectively). I made] the na[me(s) of the gate(s) of the god Anu [and the goddess Ištar that face the we]st (45) “[The God Anu Is the One Who Makes My Undertakings Successful” (and) “The Goddess Ištar Is the One Who Makes] Its [People Flourish” (respectively). I pronounced the names of the] gate(s) [of the god] E[a and the goddess Bēlet-ilī that face the south (to be) “The God Ea Is the One Who Keeps Its Spring(s) in Good Order” (and) “The Goddess Bēlet-ilī Is the One Who [Incr]eases [Its (Animals’) Offspring” (respectively). Its (city) wall was (called) “The God Aššur Is the One] Who Prolongs [the Reign of] Its [Royal Build]er (and) Protects [His Troops].” Its [outer] wall was (called) “[The God Ninurta Is the One Who Establishes the Foundation of His City for (All)] Days to Come.”

49b-53) Peop[le from the four (quarters of the world), (speaking) foreign language(s) (and of) diverse speech, those who had dwelt in (both) mountain(s) and (low)land(s), as many as [the “Light of the Gods” (Šamaš), the lord of all, shepherded, whom I had carr]ied off [as booty by the power of my staff at the command of the god Aššur, my lord], I [made act] in con[cert and I (re)settled (them) inside it (the city)]. I commissioned [native] Assyria[ns, masters of] ev[ery craft, as] over[seers (and) comm]anders [to instruct (the settlers) in correct behavior (and how) to revere god and king].

54-59a) [Af]ter I had completed work on their city [(and)] my palace, I invited the god Aššur, [the father of the] gods, the great lord, (and) the (other) gods and goddesses who dwell [in Assy]ria (to come) inside it. [I] offered them (the gods) extensive presents, substantial [audi]ence gift(s), (and) innumerable gifts, and I offered [befor]e them sacrifices as pure voluntary offerings.

42-47 With regard to the city gates, and in particular those on the northern side of the city, see the section on Sargon’s building activities at Khorsabad in the Introduction to this volume.

42 -mu-kin- “Establishes”: See the on-page note to text no. 9 line 83.

47 4mu<sup>1</sup>-šal-bir “Who Prolongs”: See the on-page note to text no. 9 line 90.

48 With regard to the restorations um-ma-ni-šu “His Troops” and a-li-šu “His City,” see the on-page note to text no. 9 line 91.

51 [áš-lu]-4la<sup>†1</sup> pa<sup>†</sup>-a<sup>†</sup>: The reading is based on text no. 9 lines 94-95; P.E. Botta’s copy has [...] UD AM. Instead of me-tel, “power,” possibly me-zez, “fury”; see CAD M/2 pp. 43 and 46.

52 a-na šu-ħu-uz ši-bit-ti pa-laħ DINGIR ù LUGAL “to instruct (the settlers) in correct behavior (and how) to revere god and king”: A less literal translation would be “to instruct (the settlers) in (their) correct behavior (and) reverence toward god and king.”

Section 5 = lines 53-69 = p.4:1-16.

53 Text no. 9 line 97 and text no. 43 line 74 have LÚ.šá-pi-ri after LÚ.ak-li in similar passages (cf. also text no. 7 line 178 and other texts of Sargon). There is not sufficient room to allow the reading [LÚ].ak-4li LÚ<sup>1</sup>.[šá-pi-ri mu-ma]-4e<sup>1</sup>-ru-tum suggested by H. Spieckermann (Juda unter Assur p. 318).

55 H. Winckler’s copy omits the u after DINGIR.MEŠ, but the squeeze confirms its presence.

58 -hir\*-. The squeeze has- SAR-.

59b–69a) With rulers from the four quarters (of the world), provincial governors of my land, nobles, eunuchs, and elders of Assyria, I sat down inside my palace and held a festival. I received as their substantial [tr]ibute gold, silver, utensils of gold (and) silver, valuable stones, copper, iron, garments with multi-colored trim, (and) linen garments, blue-purple wool, red-purple wool, antimony, (65) elephant hides, elephant ivory, ebony, boxwood, everything valuable, royal treasure, large horses from Egypt trained to the yoke, mules, donkeys, camels, oxen, (and) sheep and goats, [...].

69b–81a) May the god Aššur, the father of the gods, look steadfastly upon (this) city and this palace that have been du[ly] selected by me (lit.: “the choice of the steadfastness of my heart”) with his holy, radiant face and may he ordain that it be inhabited for future days. May (the following commands) come from (lit.: “be set in”) his holy mouth: May the guardian spirit (and) the protective god stay continually in them, day and night, and may they never leave (75) them. At his command, may the ruler who constructed them live long (and) reach extreme old age. May their builder remain in good health forever. (As for) me, Sargon, the one who dwells inside this palace, may he (the god Aššur) determine as my fate good health, a long life (lit.: “distant days”), physical well-being, joy of heart, and happiness. (80) May (the following command) issue from his holy lips. May I store up inside it (the city) extensive property (taken) from the enemy, presents from (every) settlement, the yield of the (four) quarters (of the world), (and) the wealth of (both) the mountain(s) and the seas.

82b–85) In days to come, may a future ruler among the kings, my descendants, renovate (any) dilapidated

63 NA<sub>4</sub>.MEŠ a-qar-tú: For the use of MEŠ to mark a sumerogram, as opposed to the plural, see Worthington, Textual Criticism pp. 284–287; he also cites three other examples in text no. 65 (lines 189, 219, and 274).

68 Collation of the squeeze indicates that H. Winckler’s copy of the first part of the line, which has ANŠE.A.AB.BA.MEŠ GU<sub>4</sub>.MEŠ še-e-ni, “camels, oxen, (and) sheep and goats,” is likely, but not certain.

69 For the end of the line, H. Winckler’s copy has šá-a-tu [x]-tu-ut.

Section 6 = lines 70–87 = p.3:1–18.

75 Or ši-bu-tú, but, as noted by A. Fuchs (Khorsabad p. 81), text no. 7 line 191 and text no. 13 line 142 have ši-bu-ta in similar passages.

80 For the end of the line P.E. Botta’s copy has NÍG.[x].MEŠ NA [x] and H. Winckler’s copy has NÍG.ŠU [x].MEŠ NA x, where the final traces suggest <sup>1</sup>KU-ri<sup>1</sup> written close together and thus possibly <sup>1</sup>ki<sup>?</sup>-ri<sup>?</sup>. This passage has generally been read NÍG.[ŠU KUR].MEŠ na-[ki-ri], “prop[erty from the land]s of ... en[emies]”; see Weissbach, ZDMG 72 (1918) p. 184 and Fuchs, Khorsabad p. 81 (who also refers to text no. 2 line 504, a very poorly preserved passage). The squeeze suggests that there was only one sign (possibly ŠU) between NÍG and MEŠ. The traces after NA on the squeeze are not clear, but are not incompatible with KI-R1 written closely together. Cf. also text no. 65 line 178.

## 9

Numerous bull colossi from Khorsabad bear an inscription recording the construction of that city by Sargon II. In most cases the inscription is found split between two bulls, one bull placed on either side of the same doorway, but the two bulls (exs. 4–5) from Entrance M (the middle doorway leading from the northeast terrace at the back of the palace into Room VIII) each appears to have had (at least originally) the full inscription. After a brief section giving the ruler's titles and epithets (lines 1–5a) and mentioning the various Babylonian and Assyrian cities to which he had granted special privileges (lines 5b–10), the inscription gives a summary of his conquests, arranged in a geographical rather than chronological sequence (lines 11–39a). It then describes at length the construction of the new city Dūr-Šarrūkīn, and in particular its palace and city wall (lines 39b–97a), and records a celebration that took place when the gods came to the city in the seventh month of 707 (lines 97b–99a) and the king's receiving gifts from various (vassal) rulers (lines 99b–100), which occurred during the festival when the city was inaugurated in the second month of Sargon's sixteenth regnal year (706). The inscription ends with a brief section giving blessings and curses (lines 101–106). With regard to bull inscriptions in Sargon's palace and in Assyria in general, see J.M. Russell, *Writing on the Wall* pp. 103–108 and Senn.'s Palace pp. 10–16.

## COMMENTARY

Each bull had two rectangular inscribed panels, one below the bull's belly and the other between its two hind legs. Two bulls were normally required

for each inscription, with each bull having one half of the inscription and being placed on one side of a doorway. Each bull has been given a separate

exemplar number, but the various pairs have been cited one after the other when they can be identified (exs. 1–2, 6–7, 8–9, 10–11, 12–13, 14–15, 16–17, 18–19, 20–21, and 24–25). For the bull that would have been paired with ex. 3, see Albenda, *Palace of Sargon* p. 130 and pl. 51. Two bulls (exs. 4 and 5) would have each had the complete inscription and these were placed opposite one another in Entrance M of the palace. For a plan of the palace showing the original emplacement of most of the exemplars, see Botta, *Monument de Ninive* 1 pls. 6 and 6<sup>bis</sup>. Flandin's drawings indicate that several bulls had inscriptions not copied by Botta (e.g., façade n, 54 and 56; see *ibid.*, pl. 1 pl. 30); some of these may be exs. 26 and 29–31.

When making his copies for exs. 1–15 and 18–21 (*Monument de Ninive* 3 pls. 22–51 and 54–61), P.E. Botta states that he collated them either from the originals or from paper squeezes (“estampages”). There are at present in the Louvre squeezes for the following exemplars: 1, 2 (first section), 3–7, 10–11, 12 (second section), 13–14, 15 (first section), and 18–21; these are Botta, *Monument de Ninive* 3 pls. 22–31, 36–39, 41–46, 48–50, and 54–61. As with most of Botta's squeezes, they often do not cover all the inscription copied by Botta or are so damaged in places as to be unreadable; as a result, the transliterations in the score must often rely on Botta's copy.

As was mentioned, the inscription on any one bull was divided into two sections, a larger one placed under the belly of the bull and a smaller one placed between the hind-legs of the bull. In the scores for this text, // has been indicated in the scores where the inscription on an exemplar begins a new section. When the inscription required two bulls, the inscription began on the bull on the left side of the doorway (the bull facing into the room) with the first section located under the belly of the bull and the second section between the hind legs of that bull. The inscription then moved to the section between the hind legs of the bull on the right side of the doorway and ended in the section under the belly of that bull.

Under the column “cpn” in the catalogue, p indicates that the exemplar was collated from a photo of a squeeze; however, it must be noted that a squeeze may not be fully preserved today or cover all of an inscription copied by Botta. Since the inscription on each exemplar is generally split up into two sections, this column often has two entries. For example, ex. 12 has “n, p”; this indicates that the first section (Botta, *Monument de Ninive* 3 pl. 40<sup>c</sup>) has not been collated, while the second (*ibid.* pl. 41<sup>c</sup>) has been collated from a photograph of the squeeze. The second section of ex. 15 (Botta, *Monument de Ninive* 3 pl. 47<sup>c</sup>) has the indication “p”. Pieces comprising

about eighty percent of this section are preserved in various museums and the pieces in Geneva, the Vatican, and (formerly) Jerusalem have been collated by means of published photographs. The transliteration of the remaining parts of the section is based on Botta's copy.

Ex. 2: The squeeze in the Louvre identified as being Botta, *Monument de Ninive* 3 pl. 51<sup>c</sup> (i.e., the second section on this bull) is actually a squeeze of the inscription on the back of the bull (see text no. 41 ex. 21).

Exs. 4 and 21–22: As noted by Fuchs, *Khorsabad* pp. 16–17 and 60, Botta's copies of exs. 4 and 21–22 are wrongly put together. The left and middle portions of the 16th–34th lines on Botta, *Monument de Ninive* 3 pl. 25<sup>c</sup> (ex. 4) must be moved one line down. On Botta, *Monument de Ninive* 3 pl. 60<sup>c</sup> (ex. 21), the lower portion of the copy (the last four lines) must be moved up five lines; thus, for example, the line marked 85 on the copy is actually the right-hand portion of the line numbered 80. On Botta, *Monument de Ninive* 3 pl. 62 (ex. 22), the lower portion of the copy must be moved up one line.

Ex. 5: The squeeze for the first section of ex. 5 (Botta, *Monument de Ninive* 3 pl. 26<sup>c</sup>) is torn in several places and the photo shows that parts of the squeeze are misaligned. The upper right portion is positioned one line lower than the upper left portion.

Exs. 10 and 14–15: Photographs of the four pieces in St. Petersburg were kindly supplied by the State Hermitage Museum. C. Bezold published collations of the inscription on ex. 10 (*Literatur* pp. 86–88), but examination of the squeeze and of a photograph of the original indicates that at times Botta's copy must be accepted over Bezold's readings. The section of ex. 15 once belonging to the Convent of Les Dames de Sion (Jerusalem) was stolen and thus its current location is not known (information courtesy M. Sigrist). R. de Vaux reports that the piece had supposedly been found in 1859 (or possibly 1857) “au cours des travaux du Père Ratisbonne à l'Ecce Homo” (*JPOS* 16 [1936] p. 129; cf. Lewis, *PEFQ* [1890] p. 266).

Ex. 12–13: J. Oppert's copies of exs. 12–13 are based upon Botta's copies; thus, Botta's copies are used here and no references are made to differences between the two sets of copies.

Ex. 22: Botta, *Monument de Ninive* 3 p. II (table of contents) indicates that ex. 22 is Façade n, 48, but on pl. 62 of that work it is said to be Room N, bull 47; the piece must be Façade n, 47 since there is no Room N, since Façade N has no slabs or bulls 47 or 48 (see Botta, *Monument de Ninive* 1 pls. 24–28), and since Façade n, 48 is not a bull, while Façade n, 47 is (see Botta, *Monument de Ninive* 1 pl. 30).

Exs. 24–25: The museum numbers for these two

exemplars given on Albenda, Palace of Sargon figs. 3 and 4 must be interchanged. The pieces were “obtained from Khorsabad by Sir H.C. Rawlinson in 1849” (BM Guide p. 41).

Exs. 29–30: In Borger, HKL 2 p. 7, the two fragments of this inscription in Florence published by A. Archi (OrAnt 11 [1972] pl. X nos. 10a and b) are identified with parts of Botta, Monument de Ninive 3 pls. 44<sup>c</sup>–45<sup>c</sup> (ex. 14), following a suggestion by J. Renger. A comparison of the published photos of these pieces to the photos of the squeezes of the Botta piece in the Louvre (see also the photos of the squeeze published by Ménant in Notice Lottin, pl. 3 and by Fontan in Khorsabad p. 179) indicates that this identification cannot be maintained. The signs on the pieces in Florence are spaced in a different manner to those on the bull seen by Botta. Thus, these fragments are kept separate and presented as exs. 29–30.

Ex. 31, now in the Musées d’Art et d’Histoire in Geneva was purchased in Paris in 1897.

V. Place (Ninive et l’Assyrie 2 pp. 266 and 268) states that the bull colossi from city gate 6 had the inscription painted on them in black paint and he proposes that this was a preliminary step to having the inscription incised in the stone and thus that the work on these bulls had never been finished. No further information is known about these exemplars of this inscription.

As is the case with most of the inscriptions found upon wall slabs in the palace at Khorsabad, many of the exemplars of this inscription found and copied by Botta either no longer exist or their whereabouts are unknown (exs. 3–9, 12–13, and 16–22). Thus, they are unavailable for collation. Although squeezes of some of these (as well as some of those exemplars still existing) made by Botta can be examined in the Louvre (exs. 3–7, 10, 13, and 18–21, as well parts of exs. 12 and 15), the exact reading of the text on these exemplars is at times in question due to the unreliability of Botta’s copies and due to the poor state of preservation of the squeezes and/or the originals from which the squeezes were made. Nevertheless, the basic text of the inscription is clear due to the large number exemplars and it is really just a matter of the variants on the individual exemplars that remains at times uncertain.

The line arrangement is based upon exs. 1 and 2. The master line is, for the most part, based upon exs. 1 and 2, though there are slight deviations from these in lines 1, 19, 21, 23–24, 26, 28, 32, 38, 41, 44, 62, 67, 70–73, 75, 81, 92–93 98–99, and 105–106. The signs are generally Neo-Assyrian, but at times Babylonian or archaizing forms appear.

Large portions of this inscription either duplicate or are very similar to passages in other inscriptions of Sargon II. For example, lines 39b–98a are similar to text no. 8 lines 28b–54a.

splendor (and) whose weapons are raised to strike down (his) enemies; who brought about the defeat of Ḥumbanigaš (Ḥumban-nikaš I), the Elamite; who subjugated the lands Mannea, Karalla, Andia, (and) Zikirtu, the cities of Kišesim (and) Ḥarḥar, (and) the lands Media (and) Ellipi; (15) who imposed the yoke of (the god) Aššur (upon them); who laid waste to the land Urarṭu (and) the city Mušašir; in great fear of whom Ursâ (Rusâ), the Urartian, brought an end to his life with his own weapon; who carried off as booty the rulers of the city Carchemish, the land Hamath, the land Kummuhu, (and) the city Ashdod — evil Hittites, who do not fear the words of the gods (and always) speak treachery; who (20) set eunuchs of his as provincial governors over all their lands and considered them as people of Assyria; who overwhelmed the city Samaria, all of the land Bīt-Ḥumria (Israel), (and) the land Kasku; who conquered the land Tabal, all of the land Bīt-Purutaš, (and) the land Ḥilakku; who brought about the defeat of Egypt at the city Raphia and counted Ḥanūnu (Hanno), the king of the city Gaza, as booty;

13–15 See the on-page note to text no. 8 lines 7–8. In this case, A. Fuchs (Khorsabad p. 303 and n. 142) keeps the lands Mannea, Karalla, Andia, and Zikirtu with *mušakniš*, “who subjugated,” and Kišesim, Ḥarḥar, Media, and Ellipi with *ēmidu nīr aššur*, “who imposed the yoke of the god Aššur,” basing the division upon geographical reasons.

19 Exs. 10 and 14 have *e-pi-šú* and exs. 16 and 22 (mostly restored) *e-pi-šu* for *da-bi-du*, “practice” instead of “speak.” Ex. 1 omits UGU.

21 Exs. 10 and 16 omit *KUR.kas-ku* “(and) the land Kasku.”

22 Exs. 10 and 16 omit *KUR.ḥi-lak-ku*, “(and) the land Ḥilakku.”

- 24–30a) who plundered the city Šinuḥtu; who drove out Mitâ (Midas), king of the land Musku; who brought back (to Assyrian control) the fortress(es) of the land Que (Cilicia) (25) that had been taken away (by the enemy); who caught the Ionians who (live in) the middle of the sea like fish; who deported Gunzinānu of the land Kammanu and Tarḥu-lara of the land Gurgum, who took away all of their lands, and made (them part of) the territory of Assyria; who subjugated seven kings of the land Yā' — a region of the land Adnana (Cyprus) — whose abode is situated at a distance of seven days (journey) in the middle of the Western Sea; who conquered the land Rāši; who subjugated the Puqudu (and) Damūnu (tribes) as far as the city Laḥīru of the land Yadburu (and) imposed his yoke (upon them);
- 30b–36a) who brought about the defeat of Marduk-apla-iddina (II) (Merodach-Baladan) — king of Chaldea, an evil enemy who exercised kingship over Babylon against the will of the gods — and whose great hand conquered (him); who eradicated the city Dūr-Yakīn, the great city upon which he (Marduk-apla-iddina) relied; who heaped up the corpses of his (Marduk-apla-iddina's) fighting men in piles on the coastal plain — Upēri, king of Dilmun (35) who(se) lair is situated at a distance of thirty leagues in the middle of the Eastern Sea, like that of a fish, heard (of this) and brought me his audience gift;
- 36b–39a) the wise king who occupies himself with good matters (and) who turned his attention to (re)settling abandoned pasture lands, opening up unused land, (and) planting orchards.
- 39b–41a) At that time I built a city above the spring at the foot of Mount Mušri, a mountain upstream from (the city) Nineveh, and I named it Dūr-Šarrukīn.
- 41b–42) I created around it a botanical garden, a replica of Mount Amanus, in which were gathered every kind of aromatic plant from the land Ḥatti (Syria) (and) every type of fruit-bearing mountain tree.

23 Exs. 10 and 22 have KUR “land” instead of URU “city” before Gaza.”

24 Ex. 14 has URU “city” instead of KUR “land” before “Que.”

25 Ex. 22 has KUR “land” instead of URU “city” before “Ionians.”

28 Ex. 6 has URU “city” instead of KUR “land” before “Adnana.”

29 Ex. 5 omits KUR “land” before “Rāši.” Exs. 10, 22 have KUR “land” instead of LÚ before Puqudu.

30 Ex. 14 has KUR “land” instead of URU “city” before Laḥīru.

33–34 W. Heimpel (ZA 77 [1987] p. 88) argues that *ina sapān tâmti* (currently translated “coastal plain”) refers instead to the extent of the region (i.e., “along the sea”).

35 P.E. Botta's copy of ex. 16 has 20, not 30; no photo or squeeze of the original exists in order to check this.

- 43) *ša 3 ME 50.ÀM mal-ki la-bi-ru-ti ša el-la-mu-u-a be-lu-ut* 43–49a) Not one of the three hundred and fifty previous rulers who had exercised lordship over Assyria before my time and had governed the subjects of the god Enlil (45) had noted its (the city’s) site or come to know how to make it habitable; nor had one ordered the digging of its canal (or) the planting of its orchards. Day (and) night I planned earnestly how to settle that town (and) to erect (there) a great shrine — a cella for the great gods — and palatial halls to be my lordly abode, and I (then) ordered its construction.

- 49b–52a) In a favorable month, (on) an auspicious day — in the month of the god Kulla, (on) the day of an *eššēšu*-festival — I had (workmen) wield hoe(s) and make bricks.
- 52b–57a) In the month of Abu (V) — the month for the one who lays the foundation of citi(es) and house(s) (and in) which all the black-headed people construct shelter(s) for their dwelling(s) — (55) I placed its limestone masonry on top of (foundation deposits of) gold, silver, copper, precious stones, (and) pieces (of aromatic woods) from Mount Amanus. I laid its foundation and established its brickwork.
- 57b–60a) I built inside it (the city) for the gods Ea, Sîn, Ningal, Šamaš, Nabû, Adad, (and) Ninurta awe-inspiring daises that were made as firm as the mountains.
- 60b–69) At their august command, I built palatial halls using (lit.: “of”) elephant ivory, ebony, boxwood, *musukkannu*-wood, cedar, cypress, *daprānu*-juniper, juniper, and terebinth to be my royal residence and I roofed them with large cedar beams. (65) I bound the doors of cypress (and) *musukkannu*-wood with band(s) of shining copper and installed (them in) their entrance(s). I had built in front of their gates a portico (*bīt appāti*), a replica of a Hittite palace, which is called a *bīt ḥilāni* in the language of the land Amurru.
- 70–79a) Eight twin lion (colossi) of shining copper that weigh 4,610 full (lit.: “tested”) talents (and) that were cast by the craft of the god Ninagal and filled with radiance — upon (those) lion colossi I installed four matching cedar columns, whose diameter(s) are one *nindanu* each, the product of Mount Amanus; and I positioned cross-beams (upon them) as a cornice

48 Ex. 23 omits *-ia* “my” in “my lordly abode.” See Worthington, *Textual Criticism* p. 185 for the suggestion that “there has probably been crisis: *urru u mūšu > /urru mūšu/*.”

59 Ex. 15 has <sup>d</sup>IŠKUR <sup>d</sup>AG “Adad, Nabû.” Ex. 27 inserts ù “and” between “Adad” and “Ninurta.”

60 With regard to the translation of É.GAL.MEŠ as “palatial halls,” see the on-page note to text no. 2 line 472.

70 P.E. Botta’s copy of ex. 4 has 40 not 50; the number is not clear on the squeeze.

73 Ex. 2 omits KUR “Mount” before “Amanus.”

for their gates. (75) I skillfully fashioned magnificent mountain sheep colossi of massive mountain stone and in the four directions I had (them) hold their (the gates’) door bolt(s). I depicted the settlements that I had conquered upon large limestone slabs and surrounded their (the palatial halls’) lower courses (with them). I made (them) an object of wonder.

79b-92a) I made the length of its wall 16,280 cubits and I made its foundation secure upon (blocks of) massive mountain (stone). In front and in back, on both sides, facing the four directions, I opened eight gates (in the city wall). Then, I named the gate(s) of the gods Šamaš and Adad that face the east “The God Šamaš Is the One Who Makes Me Triumph” (and) “The God Adad Is the One Who Establishes My Prosperity” (respectively). I called the gate(s) of the god Enlil and the goddess Mullissu that face the north “The God Enlil Is the One Who Establishes the Foundation of My City” (85) (and) “The Goddess Mullissu Is the One Who Restores Abundance” (respectively). I made the name(s) of the gate(s) of the god Anu and the goddess Ištar that face the west “The God Anu Is the One Who Makes My Undertakings Successful” (and) “The Goddess Ištar Is the One Who Makes Its People Flourish” (respectively). I pronounced the names of the gate(s) of the god Ea and the goddess Bēlet-ilī that face the south (to be) “The God Ea Is the One Who Keeps Its Spring(s) in Good Order” (and) “The Goddess Bēlet-ilī Is the One Who Increases Its (Animals’) Offspring” (respectively). (90) Its (city) wall was (called) “The God Aššur Is the One Who Prolongs the Reign of Its Royal Builder (and) Protects His Troops.” Its outer wall was (called) “The God Ninurta Is the One Who Establishes the Foundation of His City for (All) Days to Come.”

92b-97a) People from the four (quarters of the world), (speaking) foreign language(s) (and of) diverse speech, those who had dwelt in (both) mountain(s) and (low)land(s), as many as the “Light of the Gods” (Šamaš), the lord of all, shepherded, whom I had car-

75 With regard to <sup>d</sup>LAMMA MAḤ.MEŠ, see the on-page note to text no. 8 line 479.

79-80 ŠÁR ŠÁR ŠÁR ŠÁR GÉŠ.U GÉŠ.U GÉŠ.U 1 UŠ 1 1/2 NINDA 2 KÜŠ: The number also appears in text no. 8 line 40 (partially restored), text no. 43 line 65, and text no. 44 line 47 (partially restored). The latter two texts have 3 qa-ni instead of 1 1/2 NINDA and indicate that the number must be regarded as a cryptogram for the name Sargon, although how it is to be explained has as yet not been determined. See the Introduction to this volume, under the section “Name.”

83 -mu-kin- “Establishes”: See also text no. 8 line 42; text no. 43 line 67 has -mu-kil- “Maintains.”

90 Ex. 13 omits the divine determinative before “Aššur.” mu-šal-bir “Who Prolongs”: See also text no. 8 line 47; text no. 43 line 71 has mu-lab-bir “Prolongs.”

91 um-ma-ni-šu “His Troops” and a-li-šu “His City”: See also text no. 8 line 48 (restored); text no. 43 line 71 has NUNUZ-šú “His Offspring” and a-du-uš-ši “the Wall” respectively. The reading um-ma-ni may have been based upon an ancient misreading of ERIM.HI.A for NUNUZ; see also Fuchs, Khorsabad p. 296 no. 95.

94 For the same passage in text no. 43 line 72, Liverani (Assyria p. 206) assumes that it is the god Aššur who is being called nūr ilāni bēl gimri “the ‘Light of the Gods’ [Liverani: ‘the divine light’], the lord of all”; however, the epithet nūr ilāni normally refers to the sun god Šamaš (see for example CAD N/2 p. 348) and some of the exemplars having this text also have text no. 41 on their back, which in lines 25-26 refers to settling in Khorsabad “people of the lands that I had conquered — as many as the god Šamaš shepherded.” Ex. 27 omits i-na “at.” Exs. 11, 13, 15, 17, and 28 omit the divine determinative before “Aššur.” me-tel “power”: See the on-page note to a duplicate passage in text no. 43 line 73.

- ried off as booty by the power of my staff at the command of the god Aššur, my lord, (95) I made act in concert and I (re)settled (them) inside it (the city). I commissioned native Assyrians, masters of every craft, as overseers (and) commanders to instruct (the settlers) in correct behavior (and how) to revere god and king.
- 97b–100) After I had completed work on the city and my palatial halls, I invited the great gods who dwell in Assyria (to come) inside them and I held a celebration for them. From rulers from the east and the west, I received as their substantial audience gift(s) gold, silver, (and) everything valuable befitting these palatial halls.
- 101–102) May every work of my hands be acceptable to the gods who dwell in this city. May they then forever decree that (they will) inhabit their shrines and that my reign will be firmly established.
- 103–106) (As for) the one who alters the work of my hands, mutilates my features (on a relief), obliterates the reliefs that I have engraved, or effaces my own representation(s), may the gods Šîn, Šamaš, Adad, and the great gods who dwell there remove his name (and) his descendant(s) from the land and make him live in bondage under his enemy.

## 10–15

Many of the stone thresholds or pavement slabs in the main area of the palace at Khorsabad bear inscriptions of Sargon II. P.E. Botta published copies of the inscriptions found on 21 or 22 slabs (Botta, Monument de Ninive 3 pls. 1-21 and likely 4 pl. 181<sup>c</sup> no. 5 [probably from Entrance P; see text no. 14 ex. 3]). J.M. Russell (Writing on the Wall p. 108) has noted that several more doorways in the main part of the palace had inscriptions on their thresholds: Entrances D, F, V, X, Z, b, e, and r (see E. Flandin's detailed plans of the palace in Botta, Monument de Ninive 1–2 pls. 11, 51, 79, 121, 137, and 139) and possibly Entrance C'' of the throne room (see Loud, Khorsabad 1 fig. 71, p. 65, and p. 139 sub thresholds, which appears to indicate that the threshold described on p. 65 was inscribed).

Five different inscriptions (text nos. 10–14) are attested on the thresholds of the main part of the palace and a sixth such inscription may be text no. 15. The inscriptions vary in length from 23 lines (text no. 10) to 150 lines (text no. 13). In two, or more likely three, inscriptions (text no. 12, text no. 14, and likely text no. 15) the king is described in the first person,

9 line 97 Ex. 13 omits -ia “my” with “palatial halls.”

9 line 98 Ex. 2 inserts ITI.DU<sub>6</sub> after i-na (i.e., “in the month of Tašritu (VII), I invited ...”). See the section on building activities at Dūr-Šarrukīn in the Introduction to the volume with regard to this date.

9 line 99 Ex. 19 omits ù “and” between “the east” and “the west.”

while in the other three (text nos. 10, 11, and 13) the third person is used for him. The mention of Karduniaš (Babylonia), Chaldea, and “Bīt-Yakīn, which is on the shore of the sea, as far as the border of Dilmun,” in the areas ruled by Sargon in text nos. 10–14 would suggest that those inscriptions were composed after the king’s Babylonian campaigns in his twelfth and thirteenth regnal years (710–709). Moreover, the mentions of the gods being invited into the city Dūr-Šarrukīn in text no. 13 and of the festival that took place when the city was completed in text nos. 12 and 15 indicate that these texts were composed no earlier than the seventh month of 707 and the second month of 706 respectively (see the Introduction, under “Building Activities” at Khorsabad).

Short inscriptions are also found on paving slabs in the entrances to several chapels within the palace (text nos. 16–21). In addition, several copies of an inscription invoking the god Nabû have been found in the nearby temple of that god (text no. 22). With regard to inscribed threshold slabs in Sargon’s palace in general, see J.M. Russell, *Writing on the Wall* pp. 108–111; see also J.M. Russell, *Senn.’s Palace* pp. 17–19.

## 10

Four exemplars of the first threshold inscription — an inscription that simply gives the king’s name, several titles, and a description of the extent of his realm — are attested. Three were found in the royal palace at Khorsabad and the fourth comes from Palace F. This is the shortest of the inscriptions found on thresholds in the main part of the palace (as opposed to the chapel area).

## COMMENTARY

Exs. 1–3 are edited from the copies published by P.E. Botta in *Monument de Ninive*; no paper squeezes of these were made by him. The copy of ex. 1 published by H. Winckler has not been used since it was based solely upon Botta's copy. It should be noted that he states (Sar. 1 p. X) that he only indicates the most important variants for the inscriptions on the paving stones, bulls, and backs of reliefs in his work. The present whereabouts of these three exemplars are not known. Presumably they were either left in situ or lost in the Tigris disaster in 1855. Botta sent initial copies of exs. 2 and 3 to J. Mohl in Paris and these were published in *Journal asiatique* in 1843; these original copies are currently preserved in the Institut de France (Botta-Cotta II 2976 folio I sheets 311 [ex. 3], 340 [ex. 3], and 341 [ex. 2]). References to differences between the copies in *Monument de Ninive* and the earlier copies are noted where it has been thought useful.

Ex. 4 was found during the Oriental Institute

(Chicago) excavations at Khorsabad, but was left in situ. A high resolution scan of the original photo of ex. 4 published in Loud and Altman, *Khorsabad 2* (pl. 40E) was kindly supplied to the author by K. Neumann (curator, Oriental Institute), but some parts of the inscription remain unclear; thus the edition presented for this exemplar in the score is not fully complete.

The line arrangement and master line are based upon ex. 1; however, if Botta's copy indicates that a sign on that exemplar is abnormal in form (e.g., LUGAL in line 1), suspiciously incorrect (e.g., KUR for ŠE in line 11), omitted (e.g., RA in line 3), or damaged while another exemplar has the correct sign, the latter reading is given. Ex. 2 has the inscription on 32 lines, ex. 3 on 31 lines, and ex. 4 on 17 lines. In the scores, "copy" refers to Botta's copies in *Monument de Ninive*, not to Winckler's later copy. Abnormal and incorrect sign forms on Botta's copies are noted with a dagger (†).

all the Arameans who live beside the Tigris, Surappu, (and) Uqnû Rivers, all the Sutians, the people of the steppe (15) of the land Yadburu, as many as there are, from the city Tīl-Ḫumba which is on the border of Elam, the land Karduniaš (Babylonia) from one end to the other (lit.: “above and below”), all of Chaldea, (and) the land Bīt-Yakīn, which is on the shore of the sea, as far as the border of Dilmun; (20) (who) set eunuchs of his as provincial governors over them, and imposed the yoke of his lordship upon them.

## 11

The second of the five inscriptions on stone thresholds in doorways in the main part of the palace at Khorsabad was found on two exemplars. Following the king's name and titles, and a description of the extent of the king's realm, it records the construction of the new city Dūr-Šarrukīn and, in particular, the construction and decoration of its palace.

### CATALOGUE

2	Botta, Monument de Ninive 3 pl. 5 <sup>c</sup> Louvre squeeze	Khorsabad, Palace, Entrance G	1–40, 42–46	yes	n p

### COMMENTARY

The exemplars come from two of the three doorways leading from the palace terrace into Room II; the third (middle) doorway also had an inscription, but nothing further is known about it (see the introduction to text nos. 10–15). The present whereabouts of these exemplars are not known. They were probably either lost in the Tigris disaster in 1855 or left in situ. Both exemplars have the inscription on 46 lines,

but the line division is not the same. Ex. 1 is edited from the copy by P.E. Botta in Monument de Ninive, although differences to his earlier copy published in Journal Asiatique in 1843 and currently found in the Archives of the Institute de France (Botta-Cotta II 2976 folio I sheet 314) are noted where it has been thought useful. Botta's copy of ex. 2 in Monument de Ninive has been collated by means of photographs

10 line 12 Ex. 4 has *i-te-e* for *pa-aṭ*.

10 lines 14–15 Exs. 2–4 replace *gimir ... ultu*, “all the Sutians, the people of the steppe of the land Yadburu, as many as there are, from,” with *a-di URU.dun-ni-[<sup>d</sup>]šá-maš* (copy: AŠ) *URU.bu-bé-e* (ex. 2), *a-di<sup>†</sup> URU.dun-ni-<sup>d</sup>šá-maš [URU].<sup>†</sup>bu<sup>1</sup>-bé-e* (ex. 3), and *a-<sup>†</sup>di<sup>†</sup> URU.dun-ni-<sup>d</sup>UTU<sup>1</sup> URU.bu-bé-e* (ex. 4), “as far as the cities Dūnni-Šamaš, Bubê, (and).”

10 line 16 Exs. 2–4 have KUR.ELAM.MA.KI, “the land Elam.”

10 line 18 Exs. 3–4 have LÚ.*kal-di*, “the Chaldeans,” rather than “Chaldea.” Exs. 2–4 insert *mal ba-šu-ú*, “as much as there is (of it),” after *kaldi*, “Chaldea.”

10 line 23 *e-mid-su-nu-ti*: See the note to text no. 1 line 12.

of the squeeze in the Louvre. H. Winckler only provides a copy of ex. 1, which is solely based on Botta's copy since there was no squeeze of it to be consulted by him. He does indicate with that copy variants in ex. 2.

The line arrangement and master line are based upon ex. 1, with some minor help from ex. 2 at various places in the text. Abnormal and incorrect sign forms on Botta's copies are noted with a dagger (†) in the score, but are only indicated in the master transliteration when neither of the exemplars has the correct form.

Traces of an inscription were found upon the

backs of three stone wall slabs facing the terrace outside Room 15 of Palace F at Khorsabad and T. Jacobsen, who saw the pieces, has identified the inscription as this one. As noted by G. Loud and C.B. Altman, these wall slabs may have been re-used thresholds. They are the only orthostats found by the Chicago expedition in Palace F and on the middle of the three orthostats, the lines of the inscription are vertical rather than horizontal. These slabs were left in situ and no further details are known about their inscriptions. For these additional exemplars, see Loud and Altman, Khorsabad 2 pp. 77, 104 no. 5, and pl. 41D.

he built a city at the foot of Mount Muşri, upstream from Nineveh, and named it Dūr-Şarrukīn.

21b–30) He built inside it a palace using (lit.: “of”) elephant ivory, ebony, boxwood, *musukkannu*-wood, cedar, cypress, *daprānu*-juniper, juniper, and terebinth to be his royal residence and (25) he roofed it (lit.: “them”) with large beams of cedar. He bound the doors of cypress (and) *musukkannu*-wood with band(s) of shining copper and installed (them) in its (lit.: “their”) entrance(s). He had built in front of its (lit.: “their”) gates a portico (*bīt appāti*), a replica of a Hittite palace, which is called a *bīt ḫilāni* in the language of Amurru.

31–46) Eight twin lion (colossi) of shining copper that (weigh) 4,610 full (lit.: “tested”) talents (and) that were cast by the craft of the god Ninagal and filled with radiance — upon (those) lion colossi he installed four matching cedar columns, (35) whose diameter(s) are one *nindanu* each, the product of Mount Amanus; and he positioned cross-beams (upon them) as a cornice for its (lit. their) gates. He skillfully fashioned magnificent mountain sheep colossi of massive mountain stone and in the four directions he had (them) hold their door bolt(s). (40) He depicted the settlements that he had conquered upon large limestone slabs and surrounded its (lit. their) lower courses (with them). He made (them) an object of wonder. He pl[ac]ed inside these palatial halls [representa]tions — (made) by the craft of the sculptor — of the settlements of every land that he had conquered, from east to west, by the strength of the god Aššur.

## 12

The third inscription on stone thresholds in doorways of the palace at Khorsabad was found on five exemplars. After recording the name, titles, and extent of the king’s realm, the text briefly records the construction of the city Dūr-Şarrukīn and its palace, as well as a festival to commemorate its completion. The reference to the festival, which is also mentioned in text no. 15, may be connected to the statement in the Assyrian Eponym Chronicle that the city of Dūr-Şarrukīn was inaugurated on the sixth day of Ayyāru (II) in the eponymy of Mutakkil-Aššur (706).

11 line 37 With regard to LAMMA MAḪ.MEŞ, see the on-page note to text no. 2 line 479.

11 line 39 Ex. 2 inserts *as-mu* after *şigarşin*, thus “their respective (lit.: “fitting”) door bolt(s).”

11 line 44 Ex. 2 has <sup>d</sup>a-şur *be-l[ia]*, “the god Aššur, [my] lord.”

## COMMENTARY

The current location of these exemplars is not known. They were probably either lost in the Tigris disaster in 1855 or left in situ. No squeezes of any of the originals exist and the transliterations of the various exemplars are based upon Botta's copies in Mon-

ument de Ninive. The line arrangement and master lines come from ex. 1, with some minor help from ex. 2 in lines 21, 24, and 35-38. Exs. 2-5 have the inscription on 72, 30, 36, and 38 lines respectively.

which are on the border of the land Elam, the land Karduniaš (Babylonia) from one end to the other (lit.: “above and below”), all of Chaldea, as much as there is (of it), (and) the land Bīt-Yakīn, which is on the shore of the sea, as far as the border of Dilmun; (20) I set eunuchs of mine as provincial governors over them and imposed the yoke of my lordship upon them.

23b–29) At that time, using (as laborers) enemy people that I had conquered, whom the gods Aššur, (25) Nabû, (and) Marduk had made bow down at my feet, and (who) (now) pull my yoke, (and) in accordance with divine will (and) my heart’s desire, I built a city at the foot of Mount Mušri, upstream from Nineveh, and named it Dūr-Šarrukīn.

30–45) I built inside it (the city) a palace using (lit.: “of”) elephant ivory, ebony, boxwood, *musukkannu*-wood, cedar, cypress, *daprānu*-juniper, juniper, and terebinth to be my royal residence. I then invited the god Aššur, the great lord, and the (other) gods who dwell in Assyria, (35) (to come) inside it, and I offered pure, honorific sacrifices before them. I received substantial audience gift(s) from rulers from the four quarters (of the world), who had submitted to the yoke of my lordship and (thereby) saved their lives, (along) with (gifts) from the provincial governors of my land, (40) overseers, commanders, nobles, eunuchs, and temple administrators. I had them sit down for a banquet and held a festival.

## 13

This is by far the longest of the five texts found upon stone thresholds in various doorways of the palace at Khorsabad. Following Sargon’s name, titles, and epithets (lines 1–13a), it presents a summary of the major military accomplishments of the king’s reign (lines 13b–59a) — including laying waste to the land Urartu and plundering the city Mušašir (lines 18b–19), conquering Samaria and Israel (lines 31b–32), defeating Marduk-apla-iddina II of Babylonia (lines 45b–54a), and receiving a gift from Upēri, the ruler of Dilmun (lines 54b–59a) — as well as a description of the full extent of his realm (lines 59b–89). The text then records the building of the city Dūr-Šarrukīn, including the construction and decoration of its palace, and the entry of (the statues of) gods into the palace (lines 90–130). It concludes with an invocation to the god Aššur to look with favor upon the palace’s builder

12 line 20 We would expect the verbs here and in lines 22 and 23 to be in the subjunctive in view of the *ša* in line 4.

and the one who dwells in it (lines 131–150). The reference to gods being invited into the palace and receiving offerings there may be connected to the statement in the Assyrian Eponym Chronicle that “the gods of the city Dūr-Šarrukīn entered their temples” on the twenty-second day of Tašrītu (VII) in the eponymy of Ša-Aššur-dubbu (707).

## COMMENTARY

The present location of these exemplars is not known. They were likely left in situ or lost in the Tigris disaster in 1855. The exemplars are edited from the copies published by P.E. Botta and made by him at the site of Khorsabad; no squeezes of any of the exemplars were made by him. As a result, the exact reading of individual exemplars at numerous points is not certain. Since H. Winckler made his copy of the inscription directly from Botta’s copies, without having access to any of the originals or to paper squeezes of them, no reference to his copy is

made in the on-page notes.

The line arrangement follows ex. 1. The master line is based on ex. 1 for the most part, but preference is sometimes given to what is found in other exemplars when ex. 1 appears to be the only exemplar or one of only two exemplars to have a particular reading. Ex. 3 is actually a slightly abbreviated version of this inscription in that it omits lines 71–75a, 76, 82b–84a, and 105b–123a. According to the published copies, the exemplars use both Babylonian and Assyrian sign forms.

1–4) Palace of Sargon (II), great king, strong king, king of the world, king of Assyria, governor of Babylon, king of the land of Sumer and Akkad, favorite of the great gods;

5–13a) who provides for (the cities) Sippar, Nippur, (and) Babylon; who abolished corvée duty for (the cities) Dēr, Ur, Uruk, Eridu, Larsa, Kullaba, Kissik, (and) Nēmed-Laguda (and) who gave relief to their people; who (re)-established the privileged status (10) of (the city) Baltil (Aššur) that had lapsed; who extended his protection over the city Ḫarrān and recorded their exemption (from obligations) as if (its people were) people of the gods Anu and Dagān;

13b–31a) the valiant man who brought about the defeat of Ḫumbanigaš (Ḫumban-nikaš I), the Elamite; (15) who destroyed the land Karalla, the land Šurda, the city Kišesim, the city Ḫarḫar, the land Media, (and) the land Ellipi, (and) imposed the yoke of the god Aššur (upon them); who laid waste to the land Urarṭu, plundered the city Mušašir, (20) slaughtered the lands Andia (and) Zikirtu, (and) pacified the land Mannea; who made the rulers of the land Hamath, the city Carchemish, and the land Kummuḫu tremble (and) plundered the land Kammanu; who deported Gunzinānu from (25) the city Melid, his (Gunzinānu's) royal city, and set officials over all of their lands; who did away with the kingship of Tarḫu-lara of the city Marqasa (and) who made all of the land Gurgum (part of) the territory of Assyria;

31b–45a) who conquered the city Samaria and all of the land Bīt-Ḫumria (Israel); who plundered the cities Ashdod (and) Šinuḫtu; who caught the Ionians who

8 Exs. 4 and 6 omit URU “city” before Nēmed-Laguda.

12 Ex. 2 omits ù, “and.”

15–18 See the on-page note to text no. 8 lines 7–8.

17 Ex. 1 has KUR.*ḫar-ḫar*, thus “land Ḫarḫar” for “city Ḫarḫar.”

23 Exs. 2–6 have URU before *kummuḫi* instead of KUR; thus “city Kummuḫu” for “land Kummuḫu.”

25 Ex. 7 has KUR before *meliddi* instead of URU; thus “land Melid” for “city Melid.”

(live in) the middle of the sea (35) like fish; who deported (the people of) the land Kasku, all of the land Tabal, and the land Ḫilakku, (and) drove out Mitâ (Midas), king of the land Musku; who brought about the defeat of Egypt in the land Raphia and counted (40) Ḫanūnu (Hanno), king of the city Gaza as booty; who subjugated seven kings of the land Yā' — a region of the land Yadnana (Cyprus) — whose abode is situated at a distance of seven days (journey) in the middle of the sea;

45b-59a) moreover, (who)se great hand defeated Marduk-apla-iddina (II) (Merodach-Baladan), king of Chaldea, who dwelt on the shore of the sea (and) who exercised kingship over Babylon against the will of the gods; (50) (who) divided up all of his (Marduk-apla-iddina's) wide land into equal parts, assigned (them) to the authority of a eunuch of his (Sargon's), the governor of Babylon, and a(nother) eunuch of his, the governor of the land Gambulu, and imposed his yoke (upon them) — Upēri, (55) king of Dilmun, who(se) lair is situated at a distance of thirty leagues in the middle of the sea, like that of a fish, heard of his (Sargon's) lordly might, and brought (him) his audience gift;

59b-89) (the one who) with the power and might (granted him by) the great gods, his lords, mobilized his weapons and cut down all his foes; (who) ruled all together from the land Yadnana (Cyprus), which is in the middle of the Western Sea, as far as the border(s) of Egypt (65) and the land Musku, the wide land Amurru, the land Ḫatti (Syria) in its entirety, all of the land Gutium, the distant Medes (who live) on the border of Mount Bikni, the lands Ellipi (and) Rāši on the border (70) of the land Elam, those who (live) beside the Tigris River — the Itu'u, Rubu'u, Ḫaṭallu, Labdudu, Ḫamrānu, Ubulu, Ru'u'a, (and) Li'ta'u (tribes) — (75) those who (live) beside the Surappu and Uqnû Rivers — the Gambulu, Ḫindaru, (and) Puqudu (tribes) — the Sutians, the people of the steppe of the land Yadburu, as many as there are, from the land Sam'ūna (80) as far as the cities Bubê

34 Exs. 2-4 and 6 have URU instead of KUR; thus “Ionians” (lit.: “people of the city Ionia”) for “Ionians” (lit.: “people of the land Ionia”).

36 Ex. 7 have URU before *kasku* instead of KUR; thus “the city Kasku” for “the land Kasku.”

37 Ex. 4 omits *ù*, “and.”

38 Exs. 3, 4, 7, 9, and possibly 2 (mostly restored) have URU before *raḫi* instead of KUR; thus “city Raphia” for “land Raphia.”

42 Ex. 1 has 6 for 7 (error of modern copyist?).

51 Ex. 1 has LÚ.*šu-ut* SAG-*ia*, “a eunuch of mine,” for LÚ.*šu-ut* SAG-*šú*, “a eunuch of his.”

52 Ex. 1 has LÚ.*šu-ut* SAG-*ia*, “a(nother) eunuch of mine,” for LÚ.*šu-ut* SAG-*šú*, “a(nother) eunuch of his.”

53 Ex. 6 has LÚ.*gam-bu-li*, “the people Gambulu,” for KUR.*gam-bu-li*, “the land Gambulu.”

58 Ex. 1 has *be-lu-ti-ia*, “my lordly” for *be-lu-ti-šú*, “his (Sargon's) lordly.”

61 An alternate translation making the gods the subject of the verb *ú-šat-bu-ma* would be “the one who with the power and might (granted him by) the great gods, his lords, who raised up his weapons, cut down all his foes.”

65 Ex. 7 omits *ù*, “and.”

67 Exs. 2-3 and 5-6 omit KUR, “land,” before “Gutium.”

71-75a Ex. 3 omits LÚ.*i-tu-ú* ... *ša a-aḫ*, “the Itu'u ... (those) who (live) beside.”

(and) Til-ḫumba which are on the border of the land Elam, the land Karduniaš (Babylonia) from one end to the other (lit.: “above and below”), the lands Bīt-Amukāni, Bīt-Dakkūri, Bīt-Šilāni, (and) Bīt-Sa’alli, all of (85) Chaldea, as much as there is (of it), the land Bīt-Yakīn, which is on the shore of the sea, as far as the border of Dilmun; (who) set eunuchs of his as provincial governors over them and imposed the yoke of his lordship upon them.

90–97a) At that time, using (as laborers) enemy people whom he had captured, whom the gods Aššur, Nabû, and Marduk, his divine helpers, had granted (to him) as his lot, in accordance with divine will (95) (and) his heart’s desire, he built a city at the foot of Mount Mušri, upstream from the city Nineveh, and named it Dūr-Šarrukīn.

97b–108a) He built inside it (the city) palatial halls using (lit.: “of”) elephant ivory, ebony, boxwood, *musukkannu*-wood, cedar, cypress, *daprānu*-juniper, juniper, and terebinth (100) to be his royal residence and he roofed them with large beams of cedar. He bound the doors of cypress (and) *musukkannu*-wood with band(s) of shining copper and installed (them) in (105) their entrance(s). He had built in front of their gates a portico (*bīt appāti*), a replica of a Hittite palace, which is called a *bīt ḫilāni* in the language of Amurru.

108b–123a) Eight twin lion (colossi) of shining copper that weigh 4,610 (110) full (lit.: “tested”) talents (and) that were cast by the craft of the god Ninagal and filled with radiance — upon (those) lion colossi he installed four matching cedar columns, whose diameter(s) are one *nindanu* each, the product of (115) Mount Amanus; and he positioned cross-beams (upon them) as a cornice for their gates. He had magnificent

76–77 Ex. 3 has <sup>g</sup>gi<sup>2</sup>-mir<sup>21</sup> su-te-e, “all the Sutians,” for LÚ.gam-bu-lum LÚ.ḫi-in-da-ru LÚ.pu-qu-du LÚ.su-te-e, “the Gambulu, ḫindaru, (and) Puqudu (tribes) — the Sutians.”

79 Only exs. 1 and 3 have KUR before *sam’una* (“land Sam’ūna”). Ex. 2, 4, 6, and 9 have URU (“city Sam’ūna”) and ex. 5 has LÚ (“people Sam’una”).

81 Ex. 5 omits KUR, “land,” before Elam.

82–84 Ex. 3 omits KUR.É-<sup>m</sup>a-muk-ka-ni ... KUR.É-<sup>m</sup>sa-’a-al-la, “the lands Bīt-Amukāni ... (and) Bīt-Sa’alli.”

83 Ex. 2 omits KUR, “land” before Bīt-Šilāni.

85 Ex. 7 omits KUR, “land,” before Bīt-Yakīn.

92 Exs. 3, 6, and 8 add <sup>d</sup>UTU, “Šamaš,” before <sup>d</sup>AG, “Nabû.” Exs. 3–9 omit ù, “and,” after Nabû; only ex. 1 has ù there. Ex. 7 has ù between <sup>d</sup>AMAR.UTU and DINGIR.MEŠ ti-ik-le-šú, thus “Marduk, and the gods, his helpers.”

93 Ex. 7 has iš-qu-uš-šin, “their (feminine) lot,” for is-qu-uš-šú, “his lot.”

95 Exs. 2, 4, 6, and 9 have NINA.KI, “Nineveh,” for URU.NINA, “city Nineveh.” Exs. 3–4 have -ia for -šú (“my heart’s desire” for “his heart’s desire”).

97 Ex. 7 has az-ku-ra, “I named,” for iz-ku-ra, “he named.”

99 Ex. 1 omits ù, “and.”

100 Ex. 7 has i-na for a-na.

105–123 Ex. 3 omits É ap-pa-a-ti ... ú-šá-lik, “He had built ... object of wonder.”

106 Ex. 5 omits KUR, “land,” before ḫat-ti.

109 Instead of 4,610, some exemplars appear to have other amounts, possibly due to errors of the modern copyist: 4,600 (exs. 2 and 4), 4,620 (ex. 9), and 4,730 (ex. 8).

mountain sheep colossi of massive mountain stone skillfully made and in the four directions he had (them) hold their (the gates') door bolt(s). He depicted the settlements that he had conquered upon large limestone slabs and surrounded their (the palatial halls') lower courses (with them). He made (them) an object of wonder.

123b-130) He invited the god Aššur, the great lord, and the great gods who dwell in Assyria (to come) inside them (the palace halls), and he offered pure sacrifices before them. He offered them gifts of red šārīru-gold (and) pure silver as (his) substantial audience gift, and (thus) made their (the gods') moods joyful.

131-150) May the god Aššur, the father of the gods, steadfastly look upon this palace with his holy, radiant face and (135) may he ordain its renovation for future days. May (the following commands) come from (lit.: "be set in") his holy mouth: May the guardian spirit (and) the protective god stay continually in it, day and night, and (140) may they never leave it. At his command, may the ruler who constructed it live long (and) reach extreme old age. May its builder remain in good health forever. May (the following command) issue (145) from his (the god Aššur's) holy lips. May the one who dwells inside it (the palace) rejoice there in physical well-being, merriment, and happiness, (and) may he be fully satisfied with (his) good fortune.

## 14

Following the king's name, titles, and references to his good treatment of several Babylonian cities and of the Assyrian cities Aššur and Ḫarrān (lines 1-11), the fifth threshold inscription from the palace at Khorsabad records the extent of the king's realm (lines 12-28a). Although the end of this fifth inscription is not fully preserved, the text clearly records the construction of the city of Khorsabad and in particular the erection and decoration of its palace (lines 29a-47).

13 line 117 With regard to <sup>d</sup>LAMMA.MEŠ MAḤ.MEŠ (<sup>d</sup>LAMMA MAḤ.MEŠ on exs. 4 and 6-9), see text no. 2 on-page note to line 479.

13 line 121 Ex. 5 has ŠU.II-ia ("that I had conquered" for "that he had conquered").

13 line 124 Exs. 6 and 9 omit GAL.MEŠ (thus, "the gods" rather than "the great gods").

13 line 125 Exs. 4 and 9 have qer-bi-šá, "inside it," instead of qer-bi-šin, "inside them."

13 line 137 Ex. 7 has <sup>d</sup>LAMMA for <sup>d</sup>ALAD (or error of modern copyist?).

13 line 144 The reading *li-* in *li-bur* comes from exs. 2, 5, and 6, while ex. 1, the only other exemplar preserved here, has *li<sub>x</sub>(LIL)-bur*, or *lil-bur* if we assume the verb is from *labāru*, "to be/become old." With regard to the understanding of the word (translated here "remain in good health") as coming from *bāru*, see Borger, BAL<sup>2</sup> p. 132 and CAD B p. 126.

13 line 145 Ex. 6 has *a-na* for *ina*.

## COMMENTARY

The present whereabouts of exs. 1-3 are not known. It is likely that they were either left in situ or lost in the Tigris disaster in 1855. P.E. Botta states that ex. 3 is one of several “inscriptions détachées” which he collated either from the original or from paper squeezes and that it is a fragment coming from “Salle VIII.” Thus, it is not clear if ex. 3 is on a threshold/pavement slab or not. The inscription on the piece, however, appears to fit here. As noted by A. Fuchs (Khorsabad pp. 271-272), it is possible that this exemplar comes from Door P since this is the only doorway in Room VIII whose threshold is not otherwise known and since E. Flandin’s detailed drawing of this doorway (Botta, Monument de Ninive 1 pl. 26) indicates that there was an inscription there. No squeezes of the exemplars exist today and if one of ex. 3 once existed, it is no longer preserved with the other squeezes in the Louvre. Exs. 1-3 are edited

from the copies published by Botta. H. Winckler’s copy of the inscription, which was made from Botta’s copies of exs. 1 and 2, provides no independent evidence although it is sometimes mentioned in the list of minor variants. It is clear, however, that at times he restored signs without giving any indication that they were restored. Ex. 4 (formerly in the collection of the Royal Geographical Society, London) has been described as a “limestone relief,” but it is more likely a fragment from a threshold.

The line arrangement follows ex. 1 for lines 1-41 and ex. 3 for lines 42-47. The master line for lines 1-41 is a composite from the various exemplars, with preference given to ex. 1 for lines 1-41; lines 42-47 follow ex. 3. The restorations in lines 28-47 are based upon text no. 11 lines 18-41, text no. 12 lines 23-33, and text no. 13 lines 93-122.

Lacuna

with divine will (and) my [hea]rt's desire, I built a city  
 a[t the foo]t of Mount Mušri, upst[ream from Nineveh],  
 and [nam]ed it Dūr-Šarru[kīn].

33b–40) I built inside it (the city) palatial halls using  
 (lit.: “of”) elephant ivory, ebony, [boxwood], *musuk-*  
*kannu*-wood, cedar, cypress, *daprānu*-juniper, juniper,  
 and terebinth [to be] my [roy]al [residence] and I  
 [roofed] them with large [ce]dar [beams]. I [bound  
 the doors] of cypress (and) *musukkannu*-wood [with  
 band(s)] of shi[ning] copper [and installed (them)] in  
 their entrance(s). (40) I had built in front of th[eir  
 [gates a po]rtico ([bīt] *appāti*), a replica of a [Hittite]  
 pal[ace, which is] called a bīt *ḫilāni* [in the language of  
 the land Amurru].

41–47) [Eight tw]in [lion (colossi) of shining copper]  
 that weigh 4,[610 full (lit.: “tested”) talen]ts (and)  
 [that] were cast [by the craft of the god N]inagal  
 [and filled with radiance – upon (those) lion colossi  
 I instal]led [four match]ing [cedar columns], whose  
 [diameter(s) are] one *nindanu* [each, the product of  
 Mount Amanus]; and [I positioned] cross-beams (upon  
 them) as a cornice [for their gates]. I [had magnificent  
 mountain sheep colossi of mass]ive [mountain stone]  
 skillfully [made and in the four directions I had (them)  
 hold] their (the gates') [door] bolt(s). [I] depicted  
 [the settlements that I had conquered upon large  
 limestone] s[labs; [...].

(Lacuna)

## 15

Part of an inscription is found on a stone fragment in the Musée Auguste Grasset, the municipal museum in Varzy (France), that may once have been part of a threshold or pavement slab from the palace at Khorsabad. The fragment is made of gypseous alabaster and was given to the museum in

14 lines 41–47 Exactly how much should be restored at the beginnings and ends of these lines is not certain. The arrangement given here would, however, seem reasonable. Line 41b: Or [... 50].<sup>†</sup>ĀM<sup>1</sup>, with the copy of ex. 1 (the only exemplar with this section) having [...].A\*(copy: ZA).<AN>.

14 line 44 Or restore *ur-maḫ-ḫe-e* instead of *pirig-gal-le-e*; see text no. 13 line 115.

14 line 46 Or possibly [... SI].GAR-šin<sup>†</sup> <sup>†</sup>as<sup>†</sup>-[mu as-kup-pi ...], “[...] their resp[ective (lit: “fit[ting]”) door] bolt(s) ... slabs [...]”; see for example text no. 11 line 39 (variant on ex. 2) and text no. 7 line 164.

1867 by A. Grasset. The inscription likely records the holding of a celebration upon the completion of the building of Dūr-Šarrukīn. The inscription is edited from the published photograph. Restorations are based upon text no. 7 lines 178–79 and cf. text no. 12 lines 39–45.

## 16–21

Stone thresholds from the entrances to six chapels within the palace complex at Khorsabad bear brief inscriptions, each invoking a particular deity and allowing the identification of the deities honored in the respective chapels: Ninurta, Ninšiku (Ea), Sîn, Adad, Ningal, and Šamaš. The first two thresholds were found during V. Place's excavations in 1852, but were left in situ. These two and all the other thresholds were uncovered in the 1930s during excavations conducted by the University of Chicago's Oriental Institute. According to J. Larson (Museum Archivist, Oriental Institute), none of the records from Chicago's excavations indicate that any of these thresholds were given field registration numbers or were removed from the site. Thus, the thresholds were presumably again left in situ. Five of the chapels were entered from Court XXVII and one, that of the goddess Ningal, from Court XXXI. The three larger chapels (those of the deities Sîn, Ningal, and Šamaš) comprised several rooms, while the others (those of the gods Ninurta, Ninšiku, and Adad) appear to have comprised only one or two rooms each. The fully preserved inscriptions have either seven (text no. 20), eight (text nos. 16–17 and 19) or nine (text no. 18) lines. Place thought that the area where he found the first two texts was the harem of the palace and thus these texts have at times been called the Harem Inscriptions.

## 16

The first of these threshold inscriptions from the religious quarter of the palace at Khorsabad is addressed to the warrior god Ninurta. It has sometimes been called Harem Inscription A.

## COMMENTARY

This inscription and text no. 17 were originally found by V. Place in 1852 and were thought to have been lost in the Tigris in 1855 while on their way to Basra to be shipped to Europe (see for example Bezold, *Literatur* p. 93). J. Oppert initially published the inscriptions making use of paper squeezes that had been taken to Paris. Both inscriptions, however, were left in situ and were rediscovered during American excavations at Khorsabad in the early

1930s. The findspot of this threshold is indicated in Loud, *Khorsabad* 1 fig. 98. The inscription is edited from the copy by T. Jacobsen published in Loud, *Khorsabad* 1, which indicates that the piece is now somewhat less well preserved than when it was originally found by Place (as indicated by the copy by Oppert). H. Winckler's copy of the text is based on Oppert's copy.

## 17

This inscription upon a stone threshold leading into one of the chapels within the palace at Khorsabad indicates that this particular chapel was dedicated to the god Ninšiku (Ea), the god of wisdom and subterranean fresh water. This inscription has sometimes been referred to as Harem Inscription B because V. Place thought that the area in which he found it was the harem of the palace.

Sumer and Akkad, the one who constructed your cella, intercede for him in the presence of the god Sîn, your beloved husband. (5) Say good thing(s) about him for the [firm] establishment of his reign. May he (Sîn) determine as his fate good health (and) a long life (lit.: “distant days”). May his (Sargon’s) descendants rule every inhabited region forever.

## 21

An inscription dedicated to Šamaš, the sun god, was found upon a limestone threshold near the entrance leading into one of the chapels within the palace at Khorsabad. Unfortunately, the inscription was “so badly weathered as to be undecipherable except for the first line, which fortunately gives us the name of the deity.” The threshold was found during excavations in the palace at Khorsabad by the Oriental Institute (Chicago) in the early 1930s and was discovered in Court XXVII, near Door Z’’ leading into Room 172, an anteroom to one of the three larger chapels in the palace (see Loud, Khorsabad 1 pp. 102 and 104, and figs. 98 and 111). The threshold appears to have been left in situ by the excavators. Nothing further is known of the inscription. See also Fuchs, Khorsabad pp. 281 and 370 no. 3.2.4.

### CATALOGUE

## 22

Numerous copies of an inscription referring to the building of the cella of the god Nabû — a god of wisdom and writing — were found upon thresholds and upon and near steps in the temple of that god at Khorsabad. This is the only independent temple within the citadel area and the largest one discovered at the city.

**20 line 4** One expects *nāramiki abbūssu šabtī* (or similar).

**20 line 5** With regard to the reading [ku]-ʾun<sup>1</sup>-ni, cf. Leichty, RINAP 4 p. 98 no. 43 rev. 15’ and Borger, Asarh. p. 120, commentary to 80-7-19,44 rev. 15.

## COMMENTARY

For plans showing the findspots of exemplars 1-9, see Loud and Altman, *Khorsabad 2* pls. 79 and 83-84. These exemplars were left in situ by the American archaeologists. M. Müller-Karpe provided the author with photos of ex. 10, which were taken by him at the site in 1994; the slab had been exposed by Iraqi archaeologists led by M. Subhi Abdullah. Dr. K. Salim, who kindly provided additional photos of the slab, informs me that the piece was probably found in an "entrance of court 2 (the central court)" and likely "in the southern entrance of the court." Thus it is possible that ex. 10 is to be identified with either ex. 8 or ex. 9.

The inscription is written in a mixture of Assyrian

and Babylonian script, with an occasional archaic sign form. The master line and line arrangement follow ex. 1. All exemplars were left in situ and thus none could be collated from the original. Since there are no individual copies or legible photos of exs. 2-4 and 6-9, only the variants for exs. 2-4 noted by Jacobsen in Loud and Altman, *Khorsabad 2* that are not simple variant sign forms (e.g., a Babylonian form of LUGAL instead of the Assyrian form) are included in the score.

The inscription on the threshold from Court I into Room 13 is reported to be illegible (Loud and Altman, *Khorsabad 2* p. 59), but it may well be a further duplicate of this inscription.

1–14) O god Nabû, the scribe of all (the universe), who makes opposing forces agree, with regard to Sargon (II), king of the world, king of Assyria, governor of Babylon, (and) king of the land of Sumer and Akkad, the one who constructed your cella, (5) duly look at him with your steadfast heart and direct your just countenance upon him. Grant him a long life (lit.: “distant days”) of physical well-being. Determine as his fate years of happiness. Make his reign last as long (10) as heaven and netherworld. May he continually exercise the shepherdship of all lands. May his foundation be as firm as (this) edifice (lit.: “place”) and (its) platform.

4 The copy by Jacobsen in Loud and Altman, *Khorsabad 2* p. 103 has *ba-nu-KID*, but the transliteration there has *ba-nu-ú*, which is also found on ex. 10.

5–11 These lines are also found in an inscription directed to the god Sîn (see text no. 18 lines 4–8), which has *e-li-šú* instead of *še-ru-uš-šu*.

13 With regard to *aš-ri u kiġalli* “(this) edifice (lit.: “place”) and (its) platform,” the former term can also stand for “heaven” and the latter for “netherworld.” On this matter, see Fuchs, *Khorsabad* p. 370 n. 611.

14 Or possibly “its (the city’s/reign’s) foundation” instead of “his foundation”; see Fuchs, *Khorsabad* p. 370 n. 610.

## 23–40

A number of epigraphs are found on the stone reliefs from the palace of Sargon II at Khorsabad, sometimes on reliefs that also bear part of the king's Annals (text nos. 1–4 and 6) and sometimes on ones that bear part of his Display Inscription (text no. 7). They have been gathered together here (text nos. 23–40). The epigraphs are presented in order by the room from which they come. For the most part, the editions are based upon P.E. Botta's copies, although on a few occasions E. Flandin's copies have been given precedence. Botta claims to have based his copies of all except text no. 40 upon collations of the originals or squeezes. Squeezes of text nos. 23–30 and 36–37 are preserved in the Louvre and photographs of these have also been utilized.

Text nos. 23–32 and 36–40 are found on slabs which also contained part of Sargon's Annals (see text nos. 1–4 and 6), while text nos. 33–35 are on slabs which also preserved part of Sargon's Display Inscription (see text no. 7 ex. 5).

It has been argued that the reliefs in any one room often depict the events of only one campaign, and in particular that Room II illustrates events of Sargon's sixth regnal year (716), Room V events of his second regnal year (720), Room XIII events of his eighth regnal year (714), and Room XIV events of his seventh regnal year (715). (See in particular the items in the bibliography by M. El-Amin, J.E. Reade, and A. Fuchs.) With regard to epigraphs on Sargon's reliefs and Assyrian reliefs in general, see J.M. Russell, *Writing on the Wall* pp. 115–122 and Senn.'s Palace pp. 22–31.

Rather than have a detailed bibliography for each individual epigraph, it has been thought preferable to provide one bibliography for the epigraphs as a group, as well as two charts listing the major publications of the epigraphs and the reliefs associated with them. In the latter chart, the first plate number listed for each relief in the columns for Flandin in Botta, *Monument de Ninive* and Flandin in Albenda, *Palace of Sargon* shows the relief in small scale and in relation to the other reliefs in the room; any other plates listed show the relief in much larger scale. The plates cited in parentheses in both columns are drawings of the relief with the text omitted (or, in the case of reliefs depicted in small scale, totally illegible). Those without parentheses show both the text and the relief.

## 23

This epigraph is the first of six found on wall slabs from Room II of the palace at Khorsabad and an adjacent doorway (text nos. 23–28). The reliefs in this room are thought to depict Sargon's campaign to the east in his sixth regnal year (716); see the introduction to text no. 1. The lower register of slab 7 shows Assyrian soldiers attacking a large city and this epigraph is placed within the city. The main inscription on the slab is part of Sargon's Annals (text no. 1 lines 66–78). For bibliography on the epigraph, see the introduction to text nos. 23–40. The transliteration is based on Botta, Monument de Ninive 4 pl. 180<sup>c</sup>, although earlier copies can be found in *Journal Asiatique* 4/2 [1843] pls. 25 and 31, 1. (See also in particular El-Amin, Sumer 9 [1953] fig. 8 [following p. 58].) The initial copy of the inscription made by P.E. Botta is found in the Archives of the Institut de France (Botta-Cotta II 2976 folio I sheet 310). A photo of the squeeze of the inscription

in the Louvre might suggest that the 𐎶𐎵𐎲 is slightly damaged. E. Flandin's copy of the epigraph (Monument de Ninive 1 pl. 55) appears to be somewhat confused (see Walker in Albenda, Palace of Sargon p. 108). Sargon put down a rebellion in 𐎶𐎵𐎲𐎶, located in western Media, during his sixth regnal year (716) and renamed the city Kār-Šarrukīn (see text no. 1 lines 96b–100, text no. 2 lines 89–95a, and text no. 4 lines 42<sup>b</sup>–45<sup>ʿ</sup>). A rebellion broke out in that area already in the following year (see text no. 1 lines 109b–114a).

1) The city 𐎶𐎵𐎲𐎶.

# 24

This epigraph is placed on slab 14 from Room II of the palace at Khorsabad. The lower register of the slab depicts Assyrian soldiers attacking a city. The main inscription on the slab is part of the king's Annals (text no. 1 lines 157–169). For bibliography on the epigraph, see the introduction to text nos. 23–40. The transliteration is based on Botta, Monument de Ninive 4 pl. 180<sup>c</sup>; a photo of the squeeze in the Louvre would suggest that the URU is partially damaged. (See also in particular El-Amin, Sumer 9 [1953] fig. 13 [following p. 58].) The city of Qindāu, located in the area near 𐎶𐎵𐎲𐎶, was captured in the king's seventh regnal year (715) and renamed Kār-Sîn (see text no. 1 lines 109b–114a).

## 25

The exact placement of the epigraph on slab 17 from Room II of the palace at Khorsabad is not known, but the lower register of the slab depicts Assyrians attacking a city. The main inscription on the slab is part of the Khorsabad Annals (text no. 1 lines 196–208). For bibliography on the epigraph, see the introduction to text nos. 23–40. The transliteration is based on Botta, *Monument de Ninive* 4 pl. 180<sup>c</sup>; a photo of the squeeze in the Louvre would suggest that the URU and KA signs are partially damaged. (See also in particular El-Amin, *Sumer* 9 [1953] fig. 12 [following p. 58].) Tikrakka is possibly to be identified with the city Šikrakki (see Tadmor, *Tigl. III* p. 166 note to line 37 for references). For the possible location of that city at Tapeh Sialk in Iran, see most recently Alibaigi and Rezaei, *JNES* 77 (2018) pp. 15–30.

## 26

The lower register of slab 22 from Room II of the palace at Khorsabad shows Assyrian soldiers attacking a large city. This epigraph is placed on the city wall. The main inscription on the slab is part of the Khorsabad Annals (text no. 1 lines 287–299). For bibliography on the epigraph, see the introduction to text nos. 23–40. The transliteration is based on a photo of the squeeze in the Louvre. (See also in particular El-Amin, *Sumer* 9 [1953] fig. 10 [following p. 58].) According to P.E. Botta (*Monument de Ninive* 4 pl. 180<sup>c</sup>), the KI is fully preserved, but E. Flandin's copy (*ibid.* 1 pl. 68<sup>bis</sup>) and the squeeze indicate it is not. The Median city of Kišesim was captured in 716, Sargon's sixth regnal year (see text no. 1 line 93). See also text no. 117, an inscription on a stone stele that records the campaign in that year and that appears to state that it had been erected at Kišesim.

**24 line 1** -da\*-. H. Winckler's copy (Sar. 2 pl. 49 no. 2b) has a good DA, but the squeeze is unclear. Winckler's copy omits the second to last sign (A).

**25 line 1** ᵀti<sup>ᵀ</sup>-. H. Winckler's copy has ᵀu<sup>ᵀ</sup>-. The spacing on the photo of the squeeze would suggest we have the end of the sign, and thus ᵀti<sup>ᵀ</sup>- is proposed rather than ᵀši<sup>ᵀ</sup>.

## 28

This epigraph is found on slab 1 from Door H (between Room II and Room VI) of the palace at Khorsabad. The right side of the lower register shows a structure (fortress?) that may be on fire. The epigraph is placed on the wall of the structure. The main inscription on the slab is part of Sargon's Annals (text no. 1 lines 261–273). For bibliography on the epigraph, see the

27 line 1 The copy by P.E. Botta indicates that the form of the end of the sign GU is anomalous, but H. Winckler's copy (Sar. 2 pl. 49 no. 2e) has a good GU sign. A photo of the squeeze might suggest that the sign is slightly damaged, obscuring the exact formation of the end of the sign.

introduction to text nos. 23–40. The transliteration is based on a photograph of the squeeze in the Louvre; see also E. Flandin’s copy in Botta, *Monument de Ninive* 1 pl. 76. P.E. Botta’s copy (*ibid.* 4 pl. 180<sup>c</sup>) omits one wedge of the BA sign. (See also in particular El-Amin, *Sumer* 9 [1953] fig. 11 [following p. 58].) With regard to the city name, see Walker in Albenda, *Palace of Sargon* p. 109. Bīt-Bagaya is also mentioned in text no. 7 line 64 and is likely to be identified with Bīt-Gabaya, which was located in western Media and was captured in Sargon’s seventh regnal year (715) and renamed Kār-Adad or Kār-Ištar (compare text no. 1 lines 113–114 and text no. 7 lines 64–65).

# 29

This epigraph is the first of four found on wall slabs from Room V of the palace at Khorsabad (text nos. 29–32). The reliefs in this room are thought to represent events from Sargon’s campaign in his second regnal year (720); see the introduction to text no. 2. The right side of the lower register of slab 5 shows Assyrian soldiers attacking a fortress on a hill and the epigraph is placed next to an individual on the wall of the fortress. The main inscription on the slab is part of the king’s Annals (text no. 2 lines 69–85). For bibliography on the epigraph, see the introduction to text nos. 23–40. The transliteration is based on a photo of the squeeze in the Louvre. See also Botta, *Monument de Ninive* 4 pl. 180<sup>c</sup>; on E. Flandin’s copy (*ibid.* 1 pl. 89), the URU has a double final vertical wedge. (See also in particular El-Amin, *Sumer* 9 [1953] fig. 3 [following p. 58].)

Gabbutunu has often been identified with Gibbethon in southern Palestine (see El-Amin, *Sumer* 9 [1953] p. 37 and Tadmor, *JCS* 12 [1958] p. 83 n. 243), for which the modern sites Tēl-Malot and Ra’s Abū Ḥamīd have been proposed (see Bagg, *Rép. Géogr.* 7/1 p. 68). G. Schmitt, however, believes Gabbutunu was located in the area of Raphia, modern Rafah in the Gaza strip (*ZDPV* 105 [1989] pp. 56–69).

1) URU.*gab-bu-tú-nu*

1) The city Gabbutunu.

## 30

This reading of the epigraph found on slab 10 from Room V of the palace at Khorsabad is open to question. The lower register of the slab shows Assyrian soldiers attacking a city and the epigraph is placed on the city. The main inscription on the slab is part of the king's Annals (text no. 2 lines 307–323). For bibliography on the epigraph, see the introduction to text nos. 23–40. The transliteration is based on Botta, Monument de Ninive 4 pl. 180<sup>c</sup> and examination of the squeeze in the Louvre. (See also El-Amin, *Sumer* 9 [1953] fig. 4 [following p. 58].)

The name of the city has often been read URU.ʼ*a-am-qa-[(ár/ar)]-ru-na*, ʼAmqa(r)rūna, and been identified with Biblical Ekron, modern Tēl Miqne. See, for example, Luckenbill, *ARAB* 2 p. 66 §125f; El-Amin, *Sumer* 9 (1953) pp. 37–40 no. 3 and fig. 4; Tadmor, *JCS* 12 (1958) p. 83 n. 243; Fuchs, *Khorsabad* p. 421; and Baggs, *Rép. Géogr.* 7/1 pp. 10–11. C.B.F. Walker (in Albenda, *Palace of Sargon* p. 110) states “Given the number of attestations of the name Amqarruna in Late Assyrian historical texts there can be no doubt that it is the name to be read here.” However, as noted by Walker, P.E. Botta's copy has ŞU for the last sign, not NA; E. Flandin's drawing also indicates a partially damaged ŞU, and not NA. Since the squeeze does not support the reading of the final sign as NA, but would allow ŞU, and since no other royal inscription of Sargon's mentions Ekron, it is tentatively assumed that the name in this epigraph does not refer to Ekron. For the reading with ŞU, see also Naʼaman, *Zion* 59 (1994) pp. 13–14 [in Hebrew], who connects the first part of the name with the Hebrew word ʼemeq, meaning “valley.”

1) The city 'Amqa[...]*rušu*.

## 31

The exact placement of this epigraph on slab 15 from Room V of the palace at Khorsabad is not known, but the lower register of the slab does show Assyrian soldiers attacking a city and it is possible that the epigraph was located on the walls of that city. The main inscription on the slab is part of the king's Annals (text no. 2 lines 222–238). For bibliography on the epigraph, see the introduction to text nos. 23–40. The transliteration is based on Botta, *Monument de Ninive* 4 pl. 180°; see also in particular El-Amin, *Sumer* 9 (1953) fig. 5 (following p. 58). For attempts to locate the city Ba'il-gazara, see El-Amin, *Sumer* 9 (1953) pp. 41–43 no. 5 (Ghasir); Wäfler, *AOAT* 26 p. 285

**30 line 1** The squeeze would suggest that the AM sign is slightly damaged. C.B.F. Walker (in Albenda, *Palace of Sargon* p. 110) does not believe that there was a sign between QA and RU, basing this upon the assumption that name of the city was Amqarruna (Ekron) and that the scribe would not have written a reduplicated R in the name; however, as he notes, the final sign must be emended in order to get NA. Based upon the spacing of the signs, we would expect there to be a sign between QA and RU, although, as Walker notes, this is not certain. -šu: P.E. Botta's copy has -šU; E. Flandin's copy (*Monument de Ninive* 2 pl. 93) has a form that does not fit NA but fits a partially damaged šU; and H. Winckler's copy (*Sar.* 2 pl. 49 no. 2f) has 'KUR'. The traces on the squeeze are not easily compatible with NA but would fit the beginning of šU. (A copy of the traces visible on the squeeze is found in the minor variants section.)

## 33

Slab 12 from Room VIII of the palace at Khorsabad has a relief depicting the king receiving the submission of three captives, whom he holds by cords attached to their lower lips, and (apparently) the blinding of one of those captives. This epigraph appears to have been placed above the three captives. The main inscription on the slab is part of the king's Display Inscription (text no. 7 ex. 5) and this slab has line 18–23 of that text. For bibliography on the epigraph, see the introduction to text nos. 23–40. The transliteration is based on Botta, *Monument de Ninive* 4 pl. 181<sup>c</sup> no. 4. P.E. Botta's copy suggests that there was at least one line after line 4.

## 34

The exact placement of this badly damaged epigraph on slab 17 from Room VIII of the palace at Khorsabad is not known. The slab shows an official<sup>?</sup> followed by two prisoners; a third prisoner appears on the adjoining slab 18. The main inscription on the slab is part of the king's Display Inscription (text no. 7 ex. 5) and this slab has lines 45–52 of that text. For bibliography on the epigraph, see the introduction to text nos. 23–40. The transliteration is based on Botta, *Monument de Ninive* 4 pl. 181<sup>c</sup> no. 3; see also in particular El Amin, *Sumer* 10 (1954) fig. 22 (following p. 42). H. Winckler's copy of the epigraph (*Sar.* 2 pl. 49 no. 2i) suggests that there was originally a fourth line that is no longer preserved. A somewhat similar passage is found in the Aššur Prism in connection with the campaign in 716 (text no. 63 i' 16'–17'); see also text no. 117 ii 31–33.

## 36

Only one wall slab from Room XIII of the palace at Khorsabad, slab 4, is known to have had an epigraph. The lower register of the slab shows soldiers sacking a temple inside a city and this epigraph is placed above the city. The main inscription on the slab is part of the king's Annals (text no. 3 lines 1'-15'). For bibliography on the epigraph, see the introduction to text nos. 23-40. Part of the first sign of the inscription is preserved on AO 19892 (see the photographs in Nougayrol, RA 54 [1960] p. 205; André-Leicknam, Naissance de l'écriture p. 330 no. 275; and Albenda, Palace of Sargon fig. 90) and a squeeze of the inscription made by P.E. Botta is preserved in the Louvre. The transliteration is based on the squeeze and E. Flandin's copy in Botta, Monument de Ninive 2 pl. 141. (See also in particular El-Amin, Sumer 9 [1953] fig. 19 [following p. 228].) Sargon's capture and plunder of the Urukian city Mušāšir in his eighth year (714) is described in detail in text no. 65. For a study of the temple depicted on the relief, see Franke, AoF 45 (2018) pp. 156-167.

## CATALOGUE

Botta, Monument de Ninive 4 pl. 180 <sup>c</sup>	Khorsabad, Palace, Room XIII, slab 4	yes		p

## TEXT

- 1) URU.mu-ša-šir al\*-me\* [(x x)] KUR-ud                      1) I surrounded (and) conquered the city Mušāšir.

**35 line 1** H. Winckler's copy (Sar. 2 pl. 49 no. 2k) indicates that the -ú- of the personal name is present.

**35 line 2** H. Winckler's copy shows the line as being: ma-šak-šú a-[ku]-uš. <sup>r</sup>uš\*<sup>1</sup>. P.E. Botta's copy has the heads of two slanted wedges (instead of one) before the final vertical.

**36 line 1** A photo of the squeeze suggests URU.<sup>r</sup>mu-ša-šir<sup>1</sup> x (x) [(xx)] KUR-<sup>r</sup>ud<sup>1</sup>. al\*-me\*: E. Flandin's copy indicates DU-BAR<sup>2</sup>-DIŠ-NU and P.E. Botta's copy (Monument de Ninive 4 pl. 180<sup>c</sup>) has al-DIŠ-NU. C.B.F. Walker (in Albenda, Palace of Sargon p. 111) suggests that "It seems likely therefore that we should accept Flandin's indication of the spacing as correct, but follow Botta in reading DU as al!; the BAR is likely to be only cracks on the sculpture, as is the slanting wedge which appears to turn ME into DIŠ-NU." The trace(s) on Botta's squeeze are too uncertain at this point to provide any help for the reading. For the reading, see also text no. 39.

Figure 17. Flandin's drawing of the relief on Room XIII, slab 4, published in Botta, *Monument de Ninive* 2 pl. 141 (text no. 36) and depicting the conquest of the city Muṣaṣir.

## 37

This epigraph is the first of three found on wall slabs from Room XIV of the palace at Khorsabad. The lower register of slab 2 shows Assyrian soldiers attacking a large city and the epigraph is placed on the city walls. The main inscription on the slab is part of Sargon's Annals (text no. 4 lines 16'-30'). For bibliography on the epigraph, see the introduction to text nos. 23-40. The transliteration is based on E. Flandin's copy in Botta, *Monument de Ninive* 2 pl. 145. (See also El-Amin, *Sumer* 9 [1953] fig. 17 [following p. 228].) A photo of the squeeze in the Louvre would suggest that the epigraph had a third line; below the BI of line 2 is the trace of what might be a NA sign and below the TA may be the trace of a sign. Since both P.E. Botta and Flandin saw the original and neither gave any indication that there was a third line,

it has been tentatively assumed that the squeeze was done in such a way that some signs from a different inscription found their way onto the squeeze.

The city name at the beginning of line 1 has been read Unši (URU.un-<sup>ʿ</sup>ši) and Izzar (URU.iz-za-<sup>ʿ</sup>ar), but M. El-Amin's reading of Pazaši — and its identification with the city Panziš, which was located on the border between Mannea, Zikirtu, and Andia, and which is mentioned in the account of Sargon's eighth campaign (714; text no. 65 lines 76 and 79) — seems more probable (El-Amin, *Sumer* 9 [1953] pp. 219–225 no. 3 and fig. 17, followed by Walker in *Albenda, Palace of Sargon* p. 112, and Fuchs, *Khorsabad* pp. 278–279). Note also *Tadmor, Studies Mikasa* pp. 421–422 and Mayer, *Assyrien und Urartu* 1 p. 64.

## 38

A fortified Assyrian camp is depicted on the left side of the lower register of slab 10 from Room XIV of the palace at Khorsabad and this epigraph is placed across the middle of the camp. The main inscription on the slab is part of the king's Annals (text no. 4 lines 31'–45'). For bibliography on the epigraph, see the introduction to text nos. 23–40. The transliteration is based on E. Flandin's copy in *Botta, Monument de Ninive* 2 pl. 146. The personal name at the end of line has also been read: <sup>m</sup>[MAN]-GIN, “[Sar]gon” (see Winckler, *Sar.* 2 pl. 49 no. 2n) and <sup>m</sup>NUMUN-DÛ<sup>1</sup> [LÚ.tur-ta-nu], “Zēra-ib[ni, the *turtānu*” (see El-Amin, *Sumer* 9 [1953] pp. 216–219 and fig. 16). The reading given below is based upon a proposal by J.N. Postgate (apud Reade, *JNES* 35 [1976] p. 99), a reading also accepted by C.B.F. Walker (in *Albenda, Palace of Sargon* p. 111) and A. Fuchs (*Khorsabad* p. 279). J.M. Russell (*Writing on the Wall* p. 116 n. 44) points out that the name Taklāk-ana-Bēl (the eponym for 715) is always written with the sign *tak*, not *tāk*, in the eponym lists; however, one does find [tāk]- in eponym list A1 v 9 (Millard, *SAAS* 2

**37 line 1** <sup>ʿ</sup>pa<sup>ʿ</sup>1: E. Flandin's copy and P.E. Botta's copy (*Monument de Ninive* 2 pl. 145 and 4 pl. 180<sup>c</sup> respectively) have -IZ; the photo of the squeeze is unclear, but might suggest -<sup>ʿ</sup>PI<sup>1</sup>. H. Winckler's copy (*Sar.* 2 pl. 49 no. 2l) indicates for the beginning of the line URU<sup>1</sup>IZ<sup>2</sup>ḪA<sup>2</sup>ME GUR<sup>1</sup>ḪAL.ŠU .... The missing horizontal wedge on Flandin's -šī is indicated as being present on Botta's copy and the squeeze would also suggest -<sup>ʿ</sup>šī<sup>1</sup>, rather than -ME for the fourth sign.

**37 line 2** For the beginning of the line, following the URU, H. Winckler's copy has *ki-bi*, while his transliteration has “Ki-?-bi” (*Sar.* 1 p. 191 and 2 pl. 49 no. 2l). The photo of the squeeze would suggest <sup>ʿ</sup>šá IGI<sup>2</sup> ne<sup>1</sup>-[re]-bi. KUR\*: E. Flandin's copy has šE, while P.E. Botta's copy and H. Winckler's copy both have KUR; the squeeze is not clear about the matter.

p. 47). For information on this individual, see Pruzsinszky, PNA 3/2 p. 1304 sub Taklāk-ana-Bēl 1.

## 39

The lower register of the relief on slab 12 from Room XIV of the palace at Khorsabad shows Assyrian soldiers attacking a city. This epigraph is placed on the city wall. The main inscription on the slab was not copied by P.E. Botta, but would presumably have been part of the king's Annals (text no. 4). Based upon the number of lines missing between slabs 10 and 12 and in comparison to text no. 1, the text on slab 12 would likely have recorded the campaign in Sargon's seventh regnal year (715). For bibliography on the epigraph, see the introduction to text nos. 23–40. The transliteration is based on Botta's copy in Monument de Ninive 4 pl. 180<sup>c</sup>. (See also in particular El-Amin, Sumer 9 [1953] fig. 15 [following p. 228].) According to the Khorsabad Annals, the city Kišešlu was located near Ḫarḫar, was conquered in Sargon's seventh regnal year (715), and was renamed Kār-Nabû (text no. 1 lines 109b–114a).

**38 line 1** P.E. Botta's copy (Monument de Ninive 4 pl. 180<sup>c</sup>) has an extra vertical wedge in the uš.

## TEXT

- 1) URU.ki-šeš-lu al-me KUR\*-ud    1) I surrounded (and) conquered the city Kišešlu.

## 40

Two lines were copied by P.E. Botta immediately after a section of Sargon's Annals coming from an unknown room of the palace (Botta, Monument de Ninive 4 pl. 163 and Winckler, Sar. 2 pl. 26 no. 55; see the commentary to text no. 6). J. Renger, however, identified these lines as an epigraph (see Borger, HKL 2 p. 322 sub Winckler, Sargon n55). Neither the original placement of the slab nor anything about what the relief on the slab depicted are known. A. Fuchs suggests that the slab may have come from the throne room of the palace (Khorsabad p. 279). For bibliography on the epigraph, see the introduction to text nos. 23-40. The transliteration is based on Botta's copy.

## 41

An inscription on the back of a large number of the stone slabs and a few winged bulls from Khorsabad records the building of that city, and in particular its palace, by Sargon II. The text is less carefully inscribed than those texts found on the front of the slabs and winged bulls and mistakes and abnormal sign forms are often encountered. Since Sargon is not given the titles "governor of Babylon" and "king of the land of Sumer and Akkad," it is likely that the inscription was composed before his defeat of Marduk-apla-iddina II and his assumption of the throne of Babylon in his twelfth year (710). The inscriptions on the front of the pieces often refer to Sargon's

**39 line 1** E. Flandin's copy (Botta, Monument de Ninive 2 pl. 147) omits the two vertical wedges of URU, indicates that the KI is partially damaged, omits one of the two final Winkelhaken of ŠEŠ, and indicates that the AL is defective. KUR\*: P.E. Botta's copy (Monument de Ninive 4 pl. 180°) and Flandin's copy (ibid. 2 pl. 147) have NU, while H. Winckler's copy (Sar. 2 pl. 49 no. 2m) has KUR.

**40 line 1** A. Fuchs (Khorsabad p. 279) tentatively suggests that the line might have read originally URU.áš/ma-gu-ru-ú, but points out that neither place is attested.

**40 line 2** al\*:- P.E. Botta's copy omits one wedge head.

defeat of Marduk-apla-iddina II. Thus, J.M. Russell has suggested that while the reverses of the slabs were inscribed and placed against the palace walls before the ruler's twelfth year, the texts on their fronts were inscribed after the twelfth year (J.M. Russell, *Writing on the Wall* p. 103). Because museums have generally placed these reliefs against walls, it has not been possible to collate many exemplars of this inscription from the originals. When the Louvre recently rearranged its Near Eastern galleries, photographs of the inscriptions on the backs of the reliefs were made and these have been kindly made available to the author by B. André-Salvini. For a study of this inscription and how it was written, see André-Salvini in Caubet, *Khorsabad* pp. 15-45, and note also J.M. Russell, *Writing on the Wall* pp. 101-103 for the general context of the inscription.

### COMMENTARY

Exs. 5, 18, and 21 are found on the backs of winged bull colossi; all the remaining exemplars are from the backs of wall slabs. The provenances given for exs. 1-9 and 11-17 are those stated by P.E. Botta in *Monument de Ninive* 4. There is some question, however, about the accuracy of the statements for exs. 6 and 14 and thus their identification with pieces in the Louvre; see below.

With regard to exs. 1-17 and 21-37 in the above catalogue, “p” indicates that the exemplar was collated by means of either photographs of the inscription made when the relevant wall slab was moved for relocation in the Louvre, photographs of squeezes of the inscription, photographs of casts of the inscription, examination of casts of the inscription, or (most commonly) by a combination of these methods.

Ex. 1: AO 19862 has been collated from photographs of the original and from casts in the Louvre.

The piece is now broken in two and most of line 26 is no longer preserved; in the score Botta’s copy has been followed for the missing section.

Exs. 5, 9, 14, and 21: The squeezes of these exemplars have been examined by means of photographs. Regrettably, the squeezes are often damaged or indicate damage to the original in the places where Botta’s copies have abnormal sign forms. The squeeze in the Louvre identified as being Botta, *Monument de Ninive* 3 pl. 51<sup>c</sup> — part of text no. 9 on k,1 (AO 19858) — is actually of the inscription on the back of k,1 (ex. 21).

Exs. 6 and 14: According to Botta, *Monument de Ninive* 3 p. III and 4 pls. 169 and 177<sup>c</sup> (exs. 6 and 14 respectively), the two exemplars of the inscription copied on those plates were found on the backs of Façade L slabs 26 (=AO 19881) and 12 (=AO 19773-19874) respectively. However, Botta’s copies do not

match the inscriptions actually found on the backs of those two slabs (see also André-Salvini in Caubet, Khorsabad pp. 22 and 29 nn. 14–15). The transliterations for these exemplars are based on Botta's copies.

Ex. 7: AO 19887 is made up of one complete wall slab (Room X, slab 6) and part of an adjoining wall slab (Room X, slab 7). Each is inscribed and each is listed separately above (exs. 7 and 36 respectively). The inscription on the back of Room X, slab 6 was copied and published by Botta as being on slab 8 (Botta, Monument de Ninive 4 pl. 170). Note that Flandin's original drawing misnumbered the reliefs for slabs 6–7 as being on slabs 5–6; see Albenda, Palace of Sargon p. 162. It is not clear to which slab de Longpérier, Notice<sup>3</sup> no. 616 belongs; he seems to indicate that it should be AO 19887, but he says the inscription is on twenty-two lines.

Exs. 8 and 46: Although ex. 8 is said by Botta to come from the back of Façade n, slab 37, and ex. 46 comes from Façade n, slab 36 (= Court VIII, slab 24), comparison of their variants and line arrangement might suggest that they are the same text. The differences noted may simply be the result of miscopying by Botta, but because of these, the two have been kept separate here.

Ex. 10: Botta made a squeeze of the text of Monument de Ninive 4 pl. 173<sup>c</sup>, but it is no longer extant. Only the right half of ex. 10 as shown on Botta's copy can be checked by means of casts or photographs of the original. For the provenance of ex. 10, see Albenda, Palace of Sargon p. 160.

Exs. 11 and 44: Although ex. 11 is reported to come from the back of Façade n, slab 34 on Botta, Monument de Ninive 4 pl. 174, and ex. 44 is said to be on the back of Façade n, slab 33 (the front being depicted on Monument de Ninive 1 pl. 30), it is likely that they represent the same exemplar. The line arrangement is the same on both pieces and both have a number of otherwise unique variants (e.g., omitting *ša* <sup>dé-a</sup> <sup>d</sup>*be-let-DINGIR.MEŠ*, “that the god Ea (and) the goddess Bēlet-ilī” in line 14; a *Ši* lacking the horizontal wedge in line 27 *a-ši-bu-ut*; and *ana* for *a-na* in line 28). The differences noted between the two may be due to inaccurate copying by Botta. Nevertheless, because of these differences, the two have been kept separate here.

Ex. 18: The inscription on the back of the winged bull colossus A 7369 in the Oriental Institute (Chicago) was collated from photos supplied by J. Renger and by photos of the lower section of the inscription taken by the author. Due to the location of the bull close to the wall of the gallery, it is possible to see only a small part of the inscription clearly.

Ex. 19: C.B.F. Walker kindly supplied a photograph of, and information on, BM 118835A. Since

there is a blank space below line 21 on this exemplar, the inscription presumably continued onto the back of another slab or was in a second column.

Ex. 20: According to Botta (JA 4/3 [1844] p. 102 [pl. XXII = Monument de Ninive 1 pl. 12]), the text of ex. 20 is found on the back of Façade L, slab 12 (ex. 14). The copy of ex. 20 (ibid. pl. XXXI no. 2; see also Institut de France Botta-Cotta II 2976 folio I sheet 310), however, cannot be identified with the copy of ex. 14 (Monument de Ninive 4 pl. 177<sup>c</sup>). Thus, either Façade L, slab 12 had the inscription twice, or one of the provenances is incorrect.

Ex. 24: The back of AO 119869 is damaged and smeared with (modern) plaster, making it impossible to read the inscription located there.

Ex. 25: A section running across the middle of slab AO 19870 has been removed at some point. The missing section contained parts of master lines 18–19.

Exs. 32, 34, and 35: The inscriptions on the backs of these exemplars are upside down in relation to the inscriptions and reliefs on the fronts of those slabs. This would indicate that the inscriptions on the backs had been incised off-site, before the slabs were positioned in the palace, and that the material on the fronts was carved after the slabs had been put in place. See also André-Salvini in Caubet, Khorsabad pp. 22–24.

Exs. 39–47: Information on these exemplars and photographs of some of them were kindly supplied by J.A. Brinkman and K. Neumann. Brinkman also provided the author with his own transliterations of exs. 39, 41–43, and 45 and has allowed him to use them here. Only parts of the inscription on ex. 47 are visible on the photos and thus the edition of this exemplar must be considered incomplete and preliminary.

Exs. 48 and 49: These inscriptions were found on stone fragments discovered at Khorsabad by Botta and are edited from copies made by him and preserved in the Institut de France (Botta-Cotta II 2976 folio I sheet 316). He proposes that they come from the same inscription. While this is certainly possible, it has been thought best to edit them separately here. It is possible that they are to be identified with two of the other exemplars about which nothing is known.

Faint illegible traces of additional lines are sometimes visible immediately before the lines indicated in the catalogue. For example, about 8 and 2–3 additional lines are found on exs. 25 and 37 respectively.

In the edition presented below, the arrangement of lines follows ex. 5, but the master line itself is a conflation from several exemplars. The exemplars often exhibit a mixture of sign forms (Babylonian, Assyrian, and archaizing) within the same exemplar

and sometimes within the same line.

This inscription is often written very poorly, with numerous signs, and at times words, omitted, or not fully carved, with the lines at times quite slanted, and with numerous mistakes or incorrect sign forms (e.g., KID for É, I-ZA for IA, DIŠ for LIŠ, and ŠŪ for ŠI). Based upon an examination of photographs and/or casts and/or squeezes of the original inscriptions on exs. 1, 5, 7, 9–10, and 14, it is clear that many, but not all, of the abnormal/incorrect sign forms in Botta's copies in Monument de Ninive do not represent what is on the originals. It would be of little value to indicate in the on-page notes every instance when an exemplar omitted a word or had an unimportant difference (e.g., ex. 28 omitting *dan-nu* "strong" in line 1; ex. 3 omitting MAN "king" before KUR *aš-šur.KI* in line 1; and ex. 34 having *a-na* for *i-na* in line 26) and thus these are normally found in the list of minor variants at the back of the book. It would also be of little value to indicate all abnormal sign forms (particularly when many are only known from Botta's copies and cannot be confirmed by examination of the original) or cases of abnormal sign forms in Botta's copies that can be seen to have the correct form from the squeezes or originals; for these, see the scores on Oracc where these are indicated. The casts sometimes show more than is currently preserved on the originals and sometimes

the casts and/or squeezes represent only a portion of the inscription copied by Botta.

Several wall slabs (exs. 1\*–12\*) and at least one winged bull (ex. 13\*) preserved in the Oriental Institute (Chicago) or Iraq Museum (Baghdad) have inscriptions on their backs, although this is rarely, if ever, noted in publications. The chart of likely additional exemplars above lists the relevant pieces known to the author to have inscriptions on their backs although it has not been possible to see them or provide information on the individual inscriptions.

The information on the pieces in Chicago (including both exs. 39–47 and exs. 1\*–2\*) was kindly supplied by J.A. Brinkman. He notes, however, that while this list includes all the major pieces with inscriptions on their backs in the Oriental Institute, it may not include all the small fragments. The list of the pieces in the Iraq Museum (exs. 3\*–13\*) is also unlikely to be complete and is based upon a quick personal examination of some of the pieces on display in that museum. It has not been possible to examine the pieces in the Oriental Institute or to transliterate those in the Iraq Museum in order to ascertain whether or not the inscriptions found on their backs are duplicates of this text. For general information on these pieces and their findspots, see Albenda, Palace of Sargon pp. 171–180.

## TEXT

- 1) É.GAL <sup>m</sup>MAN-GI.NA GAR <sup>d</sup>BAD NU.ÈŠ *aš-šur* MAN  
*dan-nu* MAN ŠÚ MAN KUR *aš-šur*.KI 1-2a) Palace of Sargon (II), appointee of the god Enlil,  
*nešakku*-priest of (the god) Aššur, strong king, king of  
the world, king of Assyria, king of the four quarters  
(of the world), favorite of the great gods;
- 2) MAN *kib-rat* LÍMMU-*i mi-gir* DINGIR.MEŠ 2b-8a) who (re)-established the *šubarrû*-privileges  
of (the cities) Sippar, Nippur, (and) Babylon, (and)  
GAL.MEŠ *šá-kin šu-ba-re-e* protects the weak among them (lit.: “their weak  
ones”); who provides food for the destitute (and) made  
3) ZIMBIR.KI NIBRU.KI KÁ.DINGIR.RA.KI *ha-a-tin* restitution for the wrongful damage suffered by them;  
*en-šu-te-šú-nu* who (re)established (5) the privileged status of (the  
4) *e-pir a-ke-e mu-šal-li-mu hi-bil-ti-šú-un ka-šir* city) Baltil (Aššur) that had lapsed, who abolished  
5) *ki-din-nu-ut bal-til*.KI *ba-ti-il-tu mu-šá-áš-ši-ik* corvée duty for (the city) Dēr (and) gave relief to  
*tup-šik-ki* their weary people; (most) capable of all rulers, who  
6) BÀD.AN.KI *mu-šap-ši-ḥu* UN.MEŠ-*šú-un* extended his protection over the city Ḥarrān and  
*an-ḥa-a-ti le-’i DÙ mal-ki* recorded its exemption (from obligations) as if (its  
7) *šá* UGU URU.ḥar-ra-na AN.DÙL-la-šú *it-ru-šu-ma* people were) people of the gods Anu (and) Dagān;  
*ki-i ša-ab* <sup>d</sup>*a-nim* 8b-13a) the king, who since the (first) day of his  
8) <sup>d</sup>*da-gan iš-tu-ru za-kut-su* MAN *šá ul-tu u<sub>4</sub>-mi* reign, has had no equal and has met no one who  
*be-lu-ti-šú* could overpower (him) in war or battle; (10) (who)  
9) *gaba-ra-a-šú la ib-šu-ma i-na qab-li ù ta-ḥa-zi* smashed all (enemy) lands as if (they were) pots and  
*la e-mu-ru* put halters on (all) rebels in the four (quarters of the  
10) *mu-né-ḥu* KUR.KUR DÙ-*ši-na ki-ma ḥaš-bat-ti* world); (who) set eunuchs of his as governors over  
*ú-da-q-qi-qu-ma ḥa-am-ma-mi* them and imposed upon them (the same) tribute (and)  
11) *šá ar-ba-’i id-du-ú šer-re-e-ti* LÚ.šú-*ut* payment(s) as if (they were) Assyrians.  
*SAG.MEŠ-šú LÚ.GAR-nu-ti*
- 12) UGU-šú-nu *iš-tak-ka-nu-ma bil-tu ma-da-at-tú*  
*ki-i šá aš-šu-ri* 13b-16) With my wide knowledge and broad intelli-  
13) *e-mid-su-nu-ti i-na mé-re-ši-ia* DAGAL ù gence that the god Ea (and) the goddess Bēlet-ili had  
*hi-is-sa-at* GEŠTU.II-*ia* made greater than those of the kings, my ancestors,  
14) *pal-ka-a-ti šá* <sup>d</sup>*é-a* <sup>d</sup>*be-let*-DINGIR.MEŠ UGU (15) (and) in accordance with my heart’s desire, I built  
MAN.MEŠ-*ni* AD.MEŠ-*ia* a city at the foot of Mount Mušri, a mountain on the  
15) *ú-šá-te-ru ḥa-sis-si i-na bi-bil lib-bi-ia i-na* outskirts of Nineveh, and I named it Dūr-Šarrukīn.  
GÌR.II KUR.mu-uš-*ri* KUR-*i*
- 16) *i-na re-bit* NINA.KI URU *e-pu-uš-ma*  
URU.BÀD-<sup>m</sup>MAN-GIN MU-šú *ab-bi*
- 17) *pa-rak-ki ra-áš-du-ti a-na* <sup>d</sup>*é-a* <sup>d</sup>30 <sup>d</sup>UTU <sup>d</sup>IŠKUR 17-18a) I had firmly-founded daises skillfully built  
*ù* <sup>d</sup>*nin-urta* inside it for the gods Ea, Šin, Šamaš, Adad, and Ninurta.  
18) *i-na qer-bi-šú nak-liš\* ú-šab-ni-ma* É.GAL ZÚ 18b-26a) I built a palace using (lit.: “of”) elephant  
AM.SI GIŠ.ESI GIŠ.TÚG ivory, ebony, boxwood, *musukkannu*-wood, cedar, cy-  
19) GIŠ.MES.MĀ.KAN.NA GIŠ.ere-IGI GIŠ.ŠUR.MÌN press, *daprānu*-juniper, juniper, (and) terebinth (20) to

1 The copy of ex. 2 has the sign MAŠ on a line immediately before the inscription. Ex. 17 has NU.ÈŠ *aš-šur*.KI<sup>21</sup> “*nešakku*-priest of Assyria.” NU.ÈŠ normally stands for *nešakku/nešakku*, for which CAD N/2 p. 190 gives the meaning “(a dignitary)” and CDA p. 251 “(a priest; a dignitary).” CAD N/2 p. 191, however, states: “The royal title NU.ÈŠ <sup>d</sup>Aššur, attested only for Sargon II, e.g., Lyon, Sar. 25:2 [=text no. 46] represents a scribal conceit, based on the similarity of the two words [*nešakku* and *iššakku*], to render the traditional title *iššak* <sup>d</sup>Aššur, as can be seen from the writings ÉNSI (PA.TE.SI) <sup>d</sup>Aššur Lyon, Sar. 27:2 and Winckler, *Sammlung* 2 1:12 [text nos. 47 and 89, respectively], see Seux, *Épithètes* [=ERAS] 114.” Nevertheless, it has been thought best to translate NU.ÈŠ as “*nešakku*-priest” here.

6 Ex. 42 omits *mu-šap-ši-ḥu*.

7 Exs. 1, 3, 8-16, 27, 29-31, 34-35, and possibly 2 (restored, via spacing) add ù after <sup>d</sup>*a-nim*, thus “Anu and” rather than “Anu (and)”; ù in ex. 27 appears to omit the first horizontal wedge; exs. 17 and 22 add u after <sup>d</sup>*a-nim*.

12 Ex. 32 Inserts <sup>u</sup>?, “and,” after *bil-tu*, “tribute.” The phrase *ki-i šá aš-šu-ri*, “as if (they were) Assyrians,” means “comparable to that paid by Assyrians.” We might expect the *plene* writing *aš-šu-ri-i*, but the inscriptions of Sargon are consistent in using this writing in this phrase. The *plene* writing only appears in text no. 89 line 3, where it describes the god Enlil (<sup>d</sup>EN.LÍL<sup>1</sup> *aš-šu-ru-u*).

14 Exs. 11 and 44 omit *šá* <sup>d</sup>*é-a* <sup>d</sup>*be-let*-DINGIR.MEŠ, “that the god Ea (and) the goddess Bēlet-ili.” Ex. 22 omits <sup>d</sup>*é-a*, “the god Ea.”

16 *re-bit* “outskirts”: See the note to text no. 7 line 23.

18 *-liš\**: P.E. Botta’s copies and all exemplars examined where the sign is clear have -DIŠ.

19 Exs. 1 and 22 insert ù\* and u respectively before GIŠ.bu-uš-*ni*, “and terebinth” for “(and) terebinth.” The ù\* in ex. 1 omits the horizontal wedge following the first vertical wedge.

- GIŠ.dáp-ra-ni GIŠ.LI GIŠ.bu-ut-ni  
 20) a-na mu-šab MAN-ti-ia ab-ni-ma É ħi-la-an-ni

- 28) šul-bur qer-bi-šú iš-ru-ku-in-ni a-na da-riš
- be my royal residence; I fashioned a *bīt ḫilāni*, a replica of a Hittite palace, at their gates and roofed them with beams of cedar (and) cypress. I erected at their entrances animals made of shining stone in the image of creatures of the mountain and sea and installed doors of cypress (and) *musukkannu*-wood in their gates. I made its wall as secure as a mountain massif (25) and settled there people of the lands that I had conquered — as many as the god Šamaš shepherded.
- 26b–28) The great gods who dwell in heaven (and) netherworld, and the gods who dwell in this city, have granted me the eternal (privilege of) building (this) city (and) growing old in it.

## 42

A text found on the back of a wall slab from Khorsabad depicting a left-facing winged genie gives a summary of Sargon's conquests. Similar accounts are found on other texts, in particular ones found on palace thresholds (text nos. 10–15; see also text no. 7 lines 16–23 and text no. 8 lines 21–27). The inscription is both unlike and better written than the one found on the backs of other wall slabs from Khorsabad (text no. 41). The inclusion of Chaldea and Bīt-Yakīn “as far as the border of Dilmun” in the area ruled by Sargon (lines 14–17) would suggest that the text was composed after the Babylonian campaigns in king's twelfth and thirteenth regnal years (710–709).

Museum Number	Provenance	Dimensions (cm)	cpn
IM 72131?	Khorsabad, Gate A of the inner city wall	—	(c)

### COMMENTARY

The museum number is likely IM 72131, but there is some uncertainty about this and it might be IM 72129. It was not possible to ascertain if the matching stone slab (IM 72130) across the entryway from this one has a similar inscription on its reverse or if it even has an inscription there. The edition is

based on a photograph and a brief examination of the original.

For photographs showing the discovery of the slab and/or the relief on the front, see Basmachi, *Treasures* p. 263 fig. 141 and Loud and Altman, *Khorsabad* 2 pp. 53–54 and pls. 9–10.

41 line 20 Ex. 47 has e-<sup>r</sup>pu<sup>1</sup>[uš-ma] instead of ab-ni-ma.

## 43

Numerous prismatic clay cylinders from Khorsabad, as well as one from Nineveh, bear an inscription commemorating the construction of the city Dūr-Šarrukīn, and in particular the building of its palace and city wall. Following an introductory section giving the name of the king and his main epithets (lines 1–3), the text describes in summary fashion the major actions and achievements of Sargon’s reign (lines 4–38) and then records the building of the city (lines 39–75), concluding with a curse on anyone who “alters the work of my hands, mutilates my features (on a relief), obliterates the reliefs that I have engraved, (or) effaces my own representation(s)” (lines 76–77). The latest events mentioned in the inscription (the deportation of the people of Bīt-Purutaš, lines 23–24) date to the king’s ninth regnal year

42 line 19 We would expect *ēmiduṣunūti*, not *ēmissunūti*, to match *ibiluma* and *ištakkanuma* in lines 17 and 18 respectively.

(713). V. Hurowitz states that this inscription “is marked by an especially high literary level and character” (Exalted House p. 72). The inscription appears in two forms, one that was sixty-seven lines in length (lines 1–33 and 44–77) and an apparently later one that added a further ten lines (lines 34–43). These ten lines dealt with the good things done by the king for the benefit of his land (e.g., resettling abandoned areas, opening up new agricultural land, providing abundant water for irrigation, and attempting to ensure that crops were abundant and food could be purchased cheaply). (With regards to the two versions, see Baruchi-Unna and Cogan, *IMSA* 9 [2018–2019] p. 47.) The inscription is often referred to as the Khorsabad Cylinder.

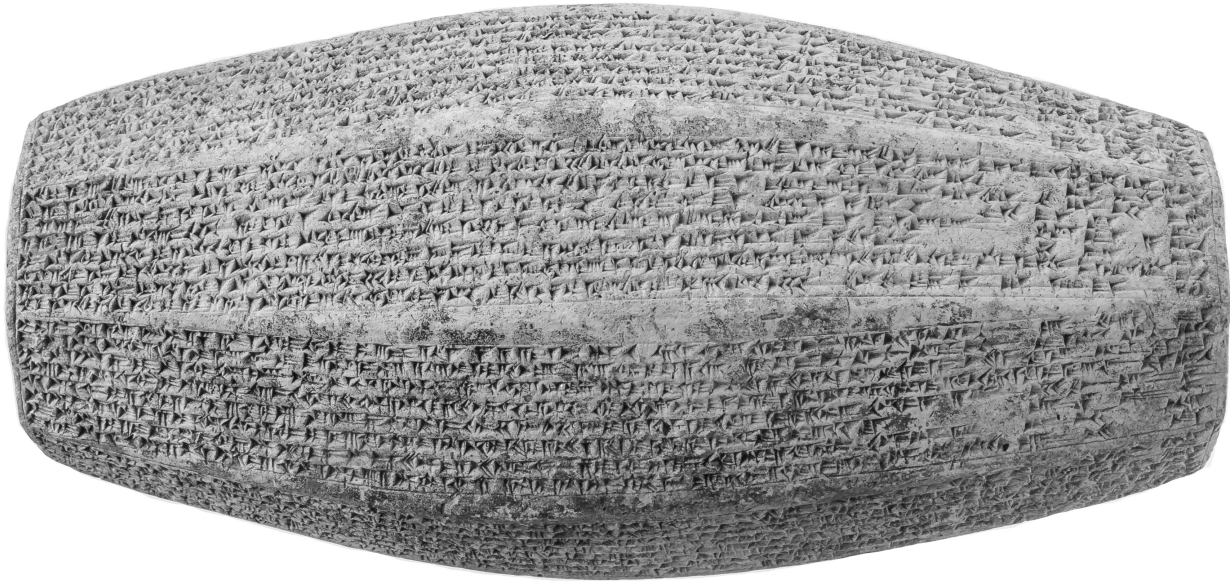

Figure 18. A 17587 (text no. 43 ex. 16), a prismatic clay cylinder from the palace at Khorsabad. Courtesy of the Oriental Institute of the University of Chicago.

## COMMENTARY

The longer, and likely later, form of the inscription (including lines 34-43) is only known on a few exemplars (exs. 1, 19, 35, 42, and 45), although some of the exemplars about which little or nothing is known (e.g., exs. 21-23 and 51-54) may also have the longer form, as may some of the exemplars that are very poorly preserved (e.g., exs. 10, 29, and 41). Based on the shape of ex. 49 and its arrangement of signs, this exemplar probably originally had the long form.

When known, complete cylinders have either eight (ex. 58), nine (exs. 1, 3-5, 16, 18-19, 28, 42, 45, 47, 48, and 57) or ten (exs. 2 and 17) faces, each of which has 7-9 lines of inscription (except at times for the final face on each exemplar which often has fewer lines). At the end of the inscription there is often a single or a double line ruling.

During his excavations, V. Place found two cylinders in the wall between Rooms 18 and 20 and fourteen in Façade P and P' (Ninive et l'Assyrie 1 pp. 61-62 and 111-112); four of these are apparently exs. 1-4 and one ex. 57. (Although ex. 3 has a Kuyunjik number, it was probably found by Place.) One exemplar (ex. 5) was found at Nineveh and one (ex. 55) is reported to come from Chenchi, presumably Tepe Chenchi, which is located near Khorsabad.

A number of the cylinders preserved in the Oriental Institute (especially exs. 6-9, 33, and 42) need to be cleaned and if this is done the reading of several

passages on them could be improved. It is unclear from the wording of Loud and Altman, Khorsabad 2 p. 105 no. 49 whether DŠ 1298 and 1302 (exs. 21 and 24) are pieces of the same prism or of different prisms; they have arbitrarily been considered separate exemplars here. Records in the Oriental Institute indicate that the dimensions of DŠ 1298 and 1302 are “.072 dia.” and “.067×.125” respectively. Ex. 27 (DŠ 32-2) is made up of about twelve fragments (nine of which are inscribed), all stored in the same box. Only a few of the pieces clearly join and it is possible that not all of the fragments come from the same cylinder. Nevertheless, all the pieces have been attributed to this exemplar. The findspots of the two fragments making up ex. 28 are suspect since they come from buildings approximately 1.3 km apart. Ex. 35 (DŠ 32-30) is made up of about seven fragments, only two of which join; all the fragments have been included in the score; it is not clear that all actually come from the same exemplar although none of the pieces have overlapping text. Ex. 43 (DŠ 32-45B) has about eight small fragments in the same box as the main fragment. Some of these small pieces preserve all or parts of one or more signs; these have not been included in the score for the text.

J.A. Brinkman, who has worked with both the Chicago excavation records and the cylinders, has identified the following pieces listed by G. Loud with

the above exemplars: Loud and Altman, Khorsabad 2 p. 105 no. 48 with possibly DŠ 1000 (ex. 8); no. 50 with DŠ 32-12 (ex. 32); no. 52 with probably DŠ 32-46 (ex. 44); no. 53 with DŠ 32-2 and 32-3 (ex. 27 and part of ex. 28); no. 54 with DŠ 32-31, 32-33, 32-34, and 32-36 (exs. 28 [part], 36-38 and 40-41); no. 55 with DŠ 32-35 (ex. 39), no. 56 with possibly DŠ 32-6 (ex. 31), no. 57 with DŠ 32-5 (ex. 30); no. 58 with DŠ 32-48 (ex. 46) and also DŠ 32-32 (an Esarhaddon prism); no. 59 with DŠ 32-45 (exs. 42 and 43); no. 60 with DŠ 32-19 (ex. 33), no. 63 with DŠ 32-21 (ex. 34); and no. 64 with DŠ 32-4A (ex. 29).

Ex. 56 is part of the right end of a prismatic cylinder and preserves parts of four faces. It was kindly collated by S. Borkowski, who notes that the museum number is FMB 50, and not FMB 48 as cited at CDLI P427649.

Ex. 57 was purchased by the Romanian government from a descendant of Place in 1987 (see <http://www.sharinghistory.org/database/item.php?id=object;AWE;rm;29;en> [accessed July 10, 2017]) and was kindly collated by J. Taylor.

Ex. 58 was purchased by the British Friends of the Israel Museum at auction from Sotheby and Co. on July 9, 1973 and had previously been owned by Mrs. E.L.E. Corsin. The exemplar was kindly collated by A. Baruchi-Unna.

A photo of ex. 59 was kindly supplied to the author by E. Jiménez, who had identified the piece as being a duplicate of Sargon's Khorsabad cylinder.

Regrettably, the copies by E. Norris (1 R pl. 36)

and H. Winckler are of limited value since they often do not indicate from which exemplar particular readings come and since they contain numerous errors (often readings coming from different inscriptions). A number of the incorrect readings (sometimes given as variants) are noted in the list of minor variants at the back of this volume. (For the problems with regard to Norris' and Winckler's copies, see also Fuchs, Khorsabad pp. 30-31.) D.G. Lyon's copy (Sar. no. 1) is based on ex. 1 and uses the following abbreviations for variants: P<sub>1</sub> = Nap. III 3156 [ex. 1], P<sub>2</sub> = Nap. III 3155 [ex. 2], L<sub>1</sub> = BM 22505 [ex. 3], and L<sub>2</sub> = BM 108775 [ex. 4]. A. Fuchs (Khorsabad pp. 29-30) uses the same abbreviations (without using subscript for the numbers) and adds the following: L<sub>3</sub> = BM 123413 + 123422 [ex. 5], C<sub>1</sub> = DŠ 1294 = A 17590 [ex. 19], C<sub>2</sub> = DŠ 32-47 [ex. 45], C<sub>3</sub> = DŠ 32-45A [ex. 42] and C<sub>4</sub> = DŠ 1293 = A 17589 [ex. 18].

The line arrangement is the same on all exemplars. The master line normally follows ex. 1; however, where ex. 1 is either damaged, the only exemplar to have a particular reading (e.g., omission of *ù* in lines 8 and 38; omission of MEŠ following UN in line 30; omission of *-e* after EŠ.BAR in line 57; É for LÍL in <sup>d</sup>EN.LÍL in line 58; omission of *-šú* in line 77), or only one of two exemplars with an obviously incorrect or 'unusual' reading (e.g., omission of *-ba-* in line 2; *-tí* for *-tí* in line 23; *-ú-* for *-saḥ-* in line 76), another exemplar is followed, normally ex. 2 or ex. 19.

no one who could overpower (him) in war or battle; (who) smashed all (enemy) lands as if (they were) pots and put halters on (all) rebels in the four (quarters of the world); (10) (who) opened up innumerable distant mountainous areas whose pass(es) are difficult and visited their remotest region(s); (who) traversed inaccessible, difficult paths in terrifying location(s) and crossed every swamp;

12–16) (who) ruled from the land Rāši on the border of the land Elam, the Puqudu (and) Damūnu (tribes), the cities Dūr-Kurigalzu (and) Rapiqu, the entire desert as far as the Brook of Egypt, the wide land Amurru, (and) the land Ḫatti (Syria) in its entirety; (who)se great hand conquered (the area) from the land Ḫašmar to the land Šibar — which borders on the distant Medes in the east — the lands Namri, Ellipi, (15) Bīt-Ḫamban, Parsua(š), Mannea, Urartu, Kasku, (and) Tabal, as far as the land Musku; (who) set eunuchs of his as governors over them and imposed upon them (the same) tribute (and) payment(s) as if (they were) Assyrians;

17–21) the valiant man who met Ḫumbanigaš (Ḫumban-nikaš I), king of the land Elam, (in battle) on the outskirts of (the city) Dēr and brought about his defeat; who deported the Tešian (king) (and) cut down his elite troops; who plundered the land Tu’umuna, who(se) people had arrested their sheikh and brought (him) before the king of Chaldea; who made the wide land Bīt-Ḫumria (Israel) tremble, brought about the defeat of Egypt at the city Raphia, and brought Ḫanūnu (Hanno), king of the city Gaza, to the city Aššur in bondage; (20) who conquered the Tamudu, Ibādidi, Marsimani, (and) Ḫayappa (tribes), whose remnants were transferred here and (whom) I (re)settled in the land Bīt-Ḫumria (Israel); skilled in war, who caught the Ionians in the middle of the sea like fish, as a fowler (does), and pacified the land Que (Cilicia) and the city Tyre;

22–24) the heroic king who cut through the fruit trees of the city Šinuḫtu, laid waste its settlements, (and) kept Kiakki, their king, in check as if with a clamp; who deported (the people of) the land Bīt-Purutaš, whose

11 be-ra-a-ti “swamp”: See the on-page note to text no. 7 line 15.

13 The “Brook of Egypt” has been identified with Wadi el-Arish in the eastern Sinai Peninsula (e.g., Tadmor, JCS 12 [1958] p. 78 n. 194) or with Nahal Besor, a wadi in southern Palestine (Na’aman, Tel Aviv 6 [1979] pp. 68–90 and in Liverani, Neo-Assyrian Geography pp. 111–112). See also Bagg, Rép. Géogr. 7/1 p. 291.

14 Exs. 2–4, 10, 16–17, 39, 42, 48, and 58 have URU, “city,” instead of KUR, “land,” before ši-bar.

23–24 It is not certain if *idān paglāte*, which is in the dual locative, should be taken by itself, as indicated in the above translation, or with what follows — i.e., “who with (his) powerful arms drove out Mitā ...”; CAD P p. 11 takes this with the end of line 22 — “had relied on the king(s) of the lands Urartu and Musku with (their) powerful forces” — but this is unlikely since new lines tend to begin new ideas in this section of the inscription.

king, Ambaris, had forgotten the kindness (shown to him) by Sargon and had put his trust in the king(s) of the lands Urartu and Musku; (*the one with*) powerful arms, who drove out Mitâ (Midas), king of the land Musku, brought back (to Assyrian control) the fortress(es) of the land Que (Cilicia) that had been taken away (by the enemy), (and) expanded their borders;

25–26) the brave one, fearless in battle, who eradicated the land Hamath (and) dyed the skin of the rebel Ilu-bi'di as red as red wool; who plundered the land Carchemish of the evil Hittite (king) (and) whose great hand conquered Pisiri(s), *their* subject who (always) spoke treachery;

27–29) who laid waste to the land Urartu (and) plundered the city Mušasir; in great fear of whom Ursâ (Rusâ), king of the land Urartu, brought an end to his life with his own weapon; who (deported and) settled elsewhere (the people of) the cities Pâpa, Lalluknu, Sukkia, Bâla, (and) Abitikna who had conspired with the land Kakmê *for the purpose of separating (from Assyria)*; who overwhelmed the lands Andia (and) Zikirtu, slaughtered all their people like sheep, and splattered all (his) enemies with deadly venom;

30–33) *the victorious one* who is perfect in strength and power (and) who subjugated the insubmissive Medes; who slaughtered the people of the land Ḥarḥar (and) enlarged the territory of Assyria; who gathered (back together) the scattered land Mannea (and) brought order to the disturbed land Ellipi; who established (his) kingship over both (these) lands and made his name glorious; who trampled down the land Ḥabḥu, (a land) of stepped mountains, a dangerous enemy; who ousted (lit.: “ousts”) the rebel Itti of the land Allabria from his city; who destroyed the land Karalla, dyed the skin of Aššur-lē'i, their city ruler, red like the *illūru*-plant, and imposed the yoke of (the god) Aššur upon Adâ of the land Šurda;

34–37) the wise king who occupies himself with good matters, (who) turned his attention to (re)settling abandoned pasture lands, opening up unused land, (and) planting orchards; (35) (who) conceived the idea of raising crops on high mountain(-slopes) where no

24 Exs. 2–3, 5, 17–18, 25, 36, 40, and 47 have -šú for -šu-un; exs. 16, 19, 35, 42, and 57 -šu for -šu-un; thus “his/its borders” instead of “their borders.”

26 *na-bi-i'*: Cf. *na-pi-i'* in text no. 13 line 23. Exs. 2–3, 7, 16–19, 45, 47–48, and 58 have URU, “city,” instead of KUR, “land,” before *gar-ga-miš*, “Carchemish.” *da-gil pa-ni-šú-nu*: It is not clear to whom the “their” of “*their* subject” refers (see also text nos. 76 line 17' and 105 i' 26'). A. Fuchs (Khorsabad p. 291 n. 48) suggests that it may be an error for “his” and refer to Sargon.

27 Exs. 2–4, 7, 16–19, 42, 48, and 57–58 have URU, “city,” for KUR, “land,” before *mu-ša-ši-ri*. With regard to the ‘suicide’ of Rusâ, see the on-page note to text no. 65 lines 411–413.

30 *ma-a-'u*, “*the victorious one*”: The tentative translation follows Marchesi, JNES 78 (2019) pp. 16–17. Exs. 2–4, 16–19, 28, 42, 47–48, and 57–58 omit KUR, “land,” before *ḥar-ḥar.KI*; only exs. 1 and 45 have KUR.

31–33 A. Baruchi-Unna and M. Cogan (IMSA 9 [2019–2019] pp. 44 and 47) suggest that an early, unattested draft of this inscription had omitted lines 31–33 (“who gathered (back together) ... the land Šurda”), as well as lines 34–43.

33 Exs. 2–3, 5, 16, 18, 28, 35–36, 40, 42, 47, and 57–58 have <sup>d</sup>a-šur, “the god Aššur,” for aš-šur, “(the god) Aššur.”

34–43 These lines are omitted on those cylinders with the shorter (likely earlier) version of this inscription; see the catalogue and introduction to this text.

vegetation had ever sprouted; (who) was minded to provide with rows of furrows the waste land which had known no plow under previous kings, to have (the plowmen) sing the *alálu*-work song, to open up for watering place(s) the springs of a meadowland without wells, and to irrigate all around (lit.: “above and below”) with water as abundant as the surge at the (annual) inundation;

38) the king, intelligent (and) skilled in every craft, equal to the sage (Adapa), who grew great in intelligence and wisdom and matured in understanding — 39–43) In order to provide the wide land of Assyria with fully sufficient nourishment, with well-being, (and) with *tillenû* befitting a king, (through) making their canals flow with water, (40) (and) to save humanity from famine (and) want, so that the destitute will not collapse at the bringing in of the grape (harvest), that there will be no interruption in what is desired by the sick, that oil — the pride of mankind that makes (tired) muscles relax — does not become expensive in my land, and that sesame might be purchased on the market as (cheaply as) barley, in order to provide lavish meal(s) fit for the table of god and king, to ... the land, (and) to make the fields around it reach (their) full value, day and night I planned to build this city. I ordered that a sanctuary be constructed within it for the god Šamaš, the great judge of the great gods, the one who makes me triumph.

44–49) (With regard to) the town Maganubba, which is situated like a tower at the foot of Mount Mušri, a mountain (rising) above the spring and (on) the outskirts of Nineveh, (45) not one of the three hundred and fifty previous rulers who had exercised lordship over Assyria before my time and had governed the subjects of the god Enlil had noted its (the city’s) site or come to know how to make it habitable; nor had one ordered the digging of a canal for it. With my broad knowledge that was abundantly provided with understanding and full of cleverness by the command of the divine “King of Deep (*apsû*)” (Ea), the lord of wisdom, and with my broad intelligence that the goddess Ninmenanna, the creator of the gods, had made greater than that of the kings, my ancestors, I planned earnestly day and night how to settle that city (and) how to erect (there) a great shrine — a cella

37 All exemplars that preserved this part of the line (exs. 1, 19, and 45) have *la* following *ta-mir-ti*. The copies by D.G. Lyon (based on ex. 1) and H. Winckler both have šu, and CAD K p. 550 reads *tamirtišu*, “of this region,” although note the correct reading in CAD T p. 120. With regard to the uncertain meaning of the passage, and the uncertain word *karattu*, see most recently Bagg, *Assyrische Wasserbauten* pp. 151–154.

38 Ex. 1 omits ù, “and” between *mil-ki* “intelligence” and *né-me-qi* “wisdom.”

39 The meaning of *tillenû* is not known. A. Fuchs suggests it may refer to a type of beer (Khorsabad p. 292 n. 62).

40 The translation “humanity” for *atmû rēšēti* follows CAD A/2 pp. 498–499; see also CDA p. 302 sub *rēštu(m)*. *na-ḥar-šú-še* “collapse”: See Mayer, *Orientalia* NS 86 (2017) p. 31. *bibil libbi*, “what is desired by”: Or following CAD B p. 221 “the voluntary offering of.”

42 The meaning of the end of the line remains uncertain. CAD S p. 146 sub *sangāni* reads *sān-ga-ni*, but notes that the passage is difficult. A. Fuchs (Khorsabad p. 293) translates: “um das ganze ... seiner Grenzen aufzustellen” (or “zu errichten” in n. 74).

44 Maganuba is only mentioned clearly in texts from the reigns of Sargon and Sennacherib; see Bagg, *Rép. Géogr.* 7/2 pp. 380–381. Ex. 7 omits ĞIR.II, “foot” (lit.: “feet”).

48 Exs. 3, 16–18, 28, 42, and 48 omit *-an-* in <sup>d</sup>*nin-men-an-na*.

for the great gods — and palatial halls to be my lordly abode; I ordered its construction.

50–52) In accordance with the saying of my name that the great gods had given to me — to protect truth and justice, to guide the powerless, (and) to prevent the harming of the weak — I reimbursed the owners (of the expropriated fields) with silver and bronze, the price for the (expropriated) fields of that town being in accordance with the (original) purchase documents (of those fields); in order that there should be no wrongdoing, I gave to those who did not want (to take) silver for (their) field(s), field(s) corresponding (in value) to (their own) field(s) (and located) wherever they chose.

53–56) Facing east, I raised my two hands in entreaty to the gods Sigga (“Gracious One”) and Lugal-dingira (“King of the God(s)”), the judges of humanity, with regard to building it (the new city); to the west, I raised up my hand(s) (in supplication) to the goddess Šauška, the awe-inspiring one of Nineveh that in the future I might enter into it (Dūr-Šarrukīn) with happiness and in good health. (55) The just word(s) of my mouth were as pleasing as the finest oil to the august deities, my lords, and they commanded me to build the city (and) to dig a canal (for it). I put my trust in their command that cannot be changed, mustered my numerous people, and had (them) take up the hoe (and) the work basket.

57–60) In the month Šitaš (III) — the month of the son of the god Daragal, the one who renders decisions (and) reveals (ominous) signs, the divine light of heaven and netherworld, the hero of the gods, the god Šîn — which by the decree of the gods Anu, Enlil, and prince Ea was called the month of the god Kulla, (the month appropriate) for making bricks (and) building citi(es) and house(s), on the day of an eššešu-festival for the son of the god Bēl — the exceedingly wise god Nabû, the scribe of all (the universe), who gives orders to all the gods — I had its brickwork made. I offered a sacrifice to the god Kulla, the lord of foundations (and) brickwork, and to the god Mušda, the master builder of the god Enlil. I strewed aromatic offerings, and recited a šuilakku-prayer.

50 zi-kir šu-mi-ia, “saying of my name”: Perhaps better “meaning/wording of my name” in this context.

52 With regard to Sargon’s providing new fields to the owners of expropriated fields, see also Kataja and Whiting, SAA 12 no. 19, dated to the eponymy of Aššur-bāni (713).

53–54 For the understanding of these lines, see Cavigneaux, *Orientalia* NS 76 (2007) pp. 169–173. Sigga and Lugal-dingira refer to the gods Šamaš and Adad; see Lambert in RLA 7/1–2 (1987) p. 133. Šauška is the Hurrian name of the goddess Ištar. Ex. 11 has <<ba-ni>> ba-ni-i-šu. Exs. 2, 4, 17–18, and 48 omit ù, “and” between “Sigga” and “Lugal-dingira.”

54 ra-ši-bat, “the awe-inspiring one,” might have been an error for a-ši-bat, “who dwells in”; see Beckman, JCS 50 (1998) p. 8.

57 Šitaš was one name for the third month of the year (May–June). The god Daragal is Enlil.

58 Ex. 11 inserts an unwanted u, “and,” between <sup>d</sup>a-nim and <sup>d</sup>EN.LÍL.

60 Kulla is the god of bricks (see Lambert, RLA 6/3–4 [1981] p. 305) and Mušda(m) is a builder god (see Krebernik, RLA 8/5–6 [1995] p. 453). Ex. 58 omits the divine determinative before EN.LÍL in both this line and line 68.

61 Gibil is the god of fire. As noted by A. Fuchs (Khorsabad p. 41 line 61 nn. 1 and 2), there is no textual justification to emend mu-uš-pil/bil am-ba-te to mu-ub-bil qar-ba-te as proposed in CAD Q p. 212. Ex. 3 has še-ru-uš-šin, “upon them,” for lib-na-su, “its brickwork.” The copyist may have written the end of line 64 here by mistake; see Fuchs, Khorsabad p. 41 line 61 n. 4.

61) In the month Abu (V) — the month of the descent (from heaven) of the god Gibil, who *dries out the moist field(s)* (and) lays the foundation of citi(es) and house(s) — I laid its foundation and established its brickwork.

62) I built inside it for the deities Ea, Sîn and Ningal, Adad, Šamaš, (and) Ninurta firmly-founded daises which were made as firm as the mountains.

63–64) At their august command, I built a palace using (lit.: “of”) elephant ivory, ebony, boxwood, *musuk-kannu*-wood, cedar, cypress, *daprānu*-juniper, and terebinth to be my royal residence; I fashioned a *bit-ḫilāni*, a replica of a Hittite palace, in front of their gates and roofed them with beams of cedar (and) cypress.

65–71) I made the length of its wall 16,280 cubits, (corresponding to) the rendering of my name, and I made its foundation secure upon (blocks of) massive mountain stone. In front and in back, on both sides, facing the eight winds, I opened eight gates (in the city wall). I named the gate of the god Šamaš and the gate of the god Adad that face the east “The God Šamaš Is the One Who Makes Me Triumph” (and) “The God Adad Is the One Who Maintains Its Prosperity” (respectively). I called the gate(s) of the god Enlil and the goddess Mullissu that face the north “The God Enlil Is the One Who Establishes the Foundation of My City” (and) “The Goddess Mullissu Is the One Who Restores Abundance” (respectively). I made the name(s) of the gate(s) of the god Anu and the goddess Ištar that face the west “The God Anu Is the One Who Makes My Undertakings Successful” (and) “The Goddess Ištar Is the One Who Makes Its People Flourish” (respectively). (70) I pronounced the names of the gate of the god Ea and the gate of the goddess Bēlet-ilī that face the south (to be) “The God Ea Is the One Who Keeps Its Spring(s) in Good Order” (and) “The Goddess Bēlet-ilī Is the One Who Increases Its (Animals’) Offspring” (respectively). Its (city) wall was (called) “The God Aššur Is the One Who Prolongs the Reign of Its Royal Builder (and) Protects His Offspring.” Its outer wall was (called) “The God Ninurta Is the One Who Establishes the Foundation of the Wall for (All) Days to Come.”

72–74) People from the four (quarters of the world), (speaking) foreign language(s) (and of) diverse speech, those who had dwelt in (both) mountain(s) and (low)land(s), as many as the “Light of the Gods”

64 Ex. 17 omits *ap-tiq-ma*, “I fashioned ... and.”

65 With regard to the number and the translation of *nibit šumiya* as “(corresponding to) the rendering of my name,” see the Introduction to the volume, under the section “Name,” and the on-page note to text no. 9 lines 79–80.

67 *-mu-kil*. “Maintains”: See the on-page note to text no. 9 line 83.

68 Ex. 18 has *zík-ri* <<*zík-ri*>>. See also the on-page note to line 60.

71 *mu-lab-bir* “Who Prolongs,” NUNUZ-šú “His Offspring,” and *a-du-uš-ši* “the Wall”: See the on-page notes to text no. 9 lines 90–91.

72 See the note to text no. 9 line 94 with regard to Šamaš being the god referred to with the epithets “the ‘Light of the Gods,’ the lord of all.”

73 *mé-tel*, “power,” (CAD M/2 p. 43) or *mé-zez*, “fury” (Fuchs, Khorsabad p. 43). K.L. Younger (JBL 117 [1998] p. 224) translates *pa-a 1-en ú-šá-áš-kin* literally as “I made them of one mouth” and takes this to mean that “the Assyrians instructed some deportees in Assyrian or some common language.” For the phrase *pā ištēn šušunu* meaning “to make act in concert,” see CAD Š/1 p. 141.

## 44–47

During the excavations of V. Place in 1854, several texts inscribed on metal and stone tablets were found inside a stone box with an inscribed lid in the wall between Rooms 17 and 19 of the palace at Khorsabad. The number and material of the tablets found in the coffer has been a matter of confusion for many years. J.A. Brinkman re-examined the problem and showed that five tablets were found: four of metal and one of stone. One of the metal tablets was lost in the boat disaster on the Tigris near Qurna in 1855. The three remaining metal tablets are made of bronze, silver, and gold (text nos. 44–46, respectively). These and the stone (magnesite) tablet (text no. 47) are conserved in the Louvre. The missing tablet was likely made of lead. See Brinkman in Curtis, *Bronzeworking Centres* pp. 144–150 and 158–159, and note also Bjorkman, *OLP* 18 (1987) pp. 87–97. The four inscriptions record the construction of the city Dūr-Šarrukīn, and all, in particular text nos. 45–47, have close similarities.

## 44

The bronze tablet found together with four other metal and stone tablets at Khorsabad (see the introduction to text nos. 44–47) bears a poorly preserved inscription of Sargon II recording the construction of the city of Dūr-Šarrukīn, its sanctuaries, and palace.

## CATALOGUE

Museum Number	Registration Number	Provenance	Dimensions (cm)	cpn
AO 21370	Nap. III 2900	Khorsabad, Palace, in the wall between Rooms 17 and 19, inside a stone box with an inscribed lid	19×12×0.5	c

## COMMENTARY

The inscription is written in Babylonian script and was collated over a period of several days from the original. The tablet, and in particular its reverse, is in a poor state of preservation and it is unlikely that any scholar would see the traces exactly the same way on different days or that any two scholars would read the traces in exactly the same way. When D.G. Lyon examined the tablet in the nineteenth century he saw some signs or traces of signs that were not visible to the author. Since the tablet may have been in a better state of preservation at that time, these have been indicated in notes to the transliteration although it has not been thought necessary to indicate every case where he copies a perfect sign and the author has put it in half brackets

or vice versa. In view of difficulties in reading the inscription, in particular the first half of the reverse (lines 31–47), the number of on-page notes is more numerous than normally the case in this volume.

It has sometimes been stated that this tablet is made of copper, but a chemical analysis of the tablet performed in the 1880s by M. Berthelot has shown that it is made of bronze. With regard to the question of the metal; see Brinkman in Curtis, *Bronzeworking Centres* pp. 144–150.

Lines 36–39 are similar to text no. 43 lines 63–64 and text no. 46 lines 26–32. Lines 47–60 are similar to text no. 43 lines 65 and 72–77 and text no. 9 lines 79–81, 92–97, and 102–106.

had surround ... [...] ... I made their foundation secure [...] ... [...] ... [...] ... [...] ... [...] ... [musukkannu-wood, lapis lazuli (45) [...] ... I bound and [...] ... [...] ...] I made [the length] of its wall [16,28]0 cubits, (corresponding to) the rendering of [m]y [na]me, and [I] made its foundation se[cu]re upon mountain stone.

49b-54) People from the four (quarters of the world), those who [had dw]elt in (both) [mount]ain(s) and (low)land(s), as many as the “Light of the Gods” (Šamaš), [the lord of al]l, shepherded, ... and I (re)settled (them) [inside] it (Dūr-Šarrukīn). I commissioned native Assyrians, masters of [eve]ry craft, as overseers (and) commanders to instruct (the settlers) in correct behavior (and how) [to revere god and ki]ng.

55-57a) [The gods who dwe]ll in heaven (and) netherworld, and in this city, [we]re [ame]nable to [my prayer and granted] me the eternal [(privilege of) bu]ilding (this) city and growing old in it.

57b-60) (As for) the one who alters the wo[rk of] my [hands], mutilates my [features] (on a relief), (or) obliterates [the rel]iefs that I have e[ngrave]d, [may the god Aššur], the goddess Ningal, the god [Adad, and th]e gre[at gods who dw]ell there [rem]ove his name (and) his descendant(s) [from the land] and make him live in bondage under his enemy.

38 D.G. Lyon’s copy has 𒀭ap-tiq<sup>71</sup>-ma.

39 D.G. Lyon’s copy has 𒀭ú-kin<sup>1</sup>. H. Winckler’s copy erroneous has NA<sub>4</sub>.<I>.UDU.MEŠ for NA<sub>4</sub>.KUN<sub>4</sub>.MEŠ.

40 H. Winckler’s copy has [...] 𒀭ú-šal-di-da [...] ŠI SIK, but the author cannot confirm the -di-da.

41 D.G. Lyon’s copy has [x x] x [(x)] GIŠ x U before ú<sup>-i</sup>-šar-šī<sup>1</sup>-da.

42 D.G. Lyon’s copy would suggest [...] 𒀭šú<sup>1</sup> x 𒀭A<sup>71</sup> x [x x x (x)] 𒀭i<sup>2</sup>-na<sup>1</sup> and A. Fuchs (Khorsabad p. 47) read [x x x x] ŠÚ<sup>2</sup> AŠ ZU<sup>2</sup> x x [x x x] i-na.

43 D.G. Lyon’s copy has [x x x] x x 𒀭BE-ma ŠAR<sup>2</sup> RI<sup>71</sup> [...] and A. Fuchs (Khorsabad p. 47) read [x x x x] x MA<sup>2</sup> ŠÚ<sup>2</sup> SAR<sup>2</sup> 𒀭HU<sup>71</sup> [x] x x.

44 For the beginning of the line, D.G. Lyon’s copy might suggest [x] 𒀭DINGIR<sup>71</sup> [(x)] 𒀭MEŠ<sup>1</sup> [x x] and A. Fuchs (Khorsabad p. 47) has [x x x] NU<sup>2</sup> [x x].

45 D.G. Lyon’s copy has [x (x)] 𒀭še<sup>71</sup> [x (x)] for the beginning of the line; A. Fuchs (Khorsabad p. 47 line 45 nn. 1 and 2) suggests that this might possibly be [x] 𒀭LI DA<sup>1</sup>.

46 D.G. Lyon’s copy has 𒀭NI<sup>71</sup> after A.

47 With regard to the number, see the on-page note to text no. 9 lines 79-80.

50 D.G. Lyon’s copy of the beginning of the lines has [a-ši]-𒀭bu-te KUR<sup>1</sup>-i.

51 Based upon text no. 9 line 95 and text no. 43 lines 72-73, one expects pa-a 1-en ú-šá-áš-kin-ma, “I made act in concert and,” at the beginning of the line. The -ri<sup>71</sup> could conceivably be read 𒀭1-en<sup>1</sup>, but the traces following this do not seem to fit ú-šá-áš-kin and there would not sufficient room for this reading before MA.

52 D.G. Lyon’s copy and A. Fuchs’ reading (Khorsabad p. 48) have [qé-reb-šú] at the beginning of the line.

56 D.G. Lyon’s copy has [qí-bi-ti]-𒀭im<sup>2</sup> GUR<sup>2</sup>-ú<sup>1</sup>-ma e-peš for the beginning of the line and H. Winckler’s copy erroneously has [...] ul-bur towards the end of the line.

58 D.G. Lyon’s copy has [bu-un-na-ni]-𒀭ia ú-saḫ<sup>1</sup>-ḫu-u e-šur-at e<sup>1</sup>-[še]-𒀭ru<sup>1</sup> for the beginning of the line. Note that Lyon thought he saw traces of e-šur-at. Although the author could see no clear traces of the first two signs, we would expect ušurāt not ešurāt.

59 D.G. Lyon’s copy has [da-šur] 𒀭d<sup>1</sup>nin<sup>2</sup>-gal<sup>2</sup> IŠKUR u DINGIR.MEŠ GAL.MEŠ a-ši-bu-te ina<sup>1</sup> ŠÀ-šú MU-šú NUMUN-šú but much of this is now illegible or uncertain and the tablet clearly had i-na not ina even though the traces are indistinct today.

## 45

An inscription of Sargon II recording the construction of the city of Dūr-Šarrukīn, its sanctuaries, and its palace is found on a silver tablet discovered at Khorsabad in an alabaster coffer together with four other metal and stone tablets (see the introduction to text nos. 44–47). The silver tablet is preserved in the Louvre and weighs 435 grams. Text no. 48 may be a duplicate of this inscription since it preserves parts of lines 11–20 of this text. This inscription and the one on the gold tablet (text no. 46) refer to the gods Ea, Šin, Šamaš, Adad, and Ninurta being installed on their daises and this may be connected to the statement in the Assyrian Eponym Chronicle that “the gods of the city Dūr-Šarrukīn entered their temples” on the twenty-second day of Tašrītu (VII) in the eponymy of Ša-Aššur-dubbu (707).

1-7) Palace of Sargon (II), appointee of the god *Enlil*, *nešakku*-priest of the god Aššur, strong king, king of the world, king of Assyria; king who ruled the four quarters (of the world), from east to west, and set governors (over them).

8-12a) At that time, in accordance with my heart's desire, I built a city on the *outskirts* of Nineveh, at the foot of Mount Mušri, and named it Dūr-Šarrukīn.

12b-18) I erected dwelling(s) for the gods Ea, Šin, Šamaš, Adad, (and) Ninurta, the great gods, my lords, (15) inside it. I had images of their great divine majesties skillfully made and installed (them) on (their) eternal dais(es).

19-44a) I built inside it (the city) palatial halls using (lit.: "of") elephant ivory, ebony, boxwood, *musukannu*-wood, cedar, cypress, *daprānu*-juniper, juniper, and terebinth. I then enhanced their gates with a *bīt ḫilāni*, a replica of a Hittite palace. (25) Through the art of the god *Nin[zadim]*, I had animals of the mountain and sea made from (blocks of) massive mountain stone; I made (them) as secure as a mountain inside them (the palatial halls) and made their entrances as bright as the moon. (30) I roofed them with beams of cedar (and) cypress and installed doors of ebony, boxwood, (and) *musukannu*-wood in their gates. (35) I raised its strong walls like a mountain massif, made (them) ten large cubits thick, and constructed their crenellations on top of one hundred and eighty layers of brick. (40) I wrote my name upon tablets of gold, silver, copper, tin, lead, lapis lazuli, (and) alabaster and placed (them) in their foundations.

44b-48) May a future prince renovate its dilapidated sections, write his own commemorative inscription,

2 dʳBAD<sup>21</sup>: There does not appear to be sufficient room to read dʳEN.LÍL, but the traces do not conform well to BAD.

6 H. Winckler's copy correctly indicates the presence of the penultimate sign (U) that is omitted on the copies by J. Oppert and D.G. Lyon.

26 Ninzadim was a god of craftwork, including stone cutting (see Cavigneaux and Krebernik, RLA 9/7-8 [2001] pp. 471-473 sub Nin-muga, Nin-zed, Ninzadim); the tentative restoration follows Fuchs, Khorsabad p. 50 sub line 26 n. 1.

## 46

An inscription of Sargon II on a gold tablet from Khorsabad records the construction of the city of Dūr-Šarrukīn, its sanctuaries, and its palace. It was found in 1854 during the French excavations of the city together with four other metal and stone tablets (see the introduction to text nos. 44–47). The gold tablet weighs 167 grams.

1-9a) Palace of Sargon (II), appointee of the god Enlil, *nešakku*-priest of the god Aššur, strong king, king of the world, king of Assyria; (5) king who ruled the four quarters (of the world), from east to west, and set governors (over them).

9b-13) In accordance with my heart's desire, I built a city at the foot of Mount Mušri and named it Dūr-Šarrukīn.

14-21) I erected dwelling(s) for the gods Ea, Šin, Šamaš, Adad, and Ninurta inside it. The god Ninšiku (Ea), the creator of everything, fashioned images of their great divine majesties and they occupied (their) daises.

22-36) I built inside it (the city) palatial halls using (lit.: "of") elephant ivory, ebony, boxwood, *musukkannu*-wood, cedar, cypress, *daprānu*-juniper, (25) juniper, and terebinth. I then fashioned a *bit ḫilāni*, a replica of a Hittite palace, in front of their gates (30) and roofed them with beams of cedar (and) cypress. I wrote my name upon tablet(s) of gold, silver, copper, tin, lead, lapis lazuli, (and) alabaster and placed (them) in their foundations.

37-40) (As for) the one who alters the work of my hands (or) effaces my own representation(s), may (the god) Aššur, the great lord, make his name (and) his descendant(s) disappear from the land.

10 Possibly <ina> ĞIR.II, but the *ina* is also omitted in text no. 44 line 26, text no. 45 line 9, and text no. 47 line 8.

## 47

A short inscription of Sargon II recording the construction of the city of Dūr-Šarrukīn, its sanctuaries, and its palace is found on a magnesite tablet from that city. The tablet was found in the palace in 1854 together with four metal tablets (see the introduction to text nos. 44–47).

## COMMENTARY

It has often been stated that this tablet is made of antimony, but a chemical analysis of the tablet performed in the nineteenth century by M. Berthelot showed that it is made of magnesite. With regard to the question of the stone, see Brinkman in Curtis, *Bronzeworking Centres* pp. 144–150. J. Bjorkman (OLP 18 [1987] pp. 91–97) accepts the identification of the type of stone by Berthelot and argues that the

tablet of *gišnugalli* (generally translated “alabaster,” as in line 20 below) mentioned in these texts is this particular tablet.

The engraver made several of the signs slightly abnormal in form: URU (line 10), SI (line 14), KA (line 15), and KUN (line 24); these signs are marked with \* in the transliteration below.

## 48

A fragment of the left side of a clay tablet found in 1932 bears an inscription of Sargon II that duplicates part of the inscription on the silver tablet from Khorsabad (text no. 45) and records the construction of sanctuaries and the royal palace at Dūr-Šarrukīn. Since it is not certain that the clay tablet originally had the whole inscription found on text no. 45, it is arbitrarily treated separately here. Only one side of this fragment is inscribed; the Neo-Assyrian signs are written clearly and are large in size. The restorations in the transliteration are based upon lines 12–20 of text no. 45. The provenance of the piece is not certain. Although no mention is made in Loud and Altman, Khorsabad 2 pp. 104–105 of any item not coming from Khorsabad, T. Jacobsen indicated on the excavation card for this piece that it may have come from Chenchi instead of Khorsabad.

## 49

This inscription dedicated to the Sebetti (“the divine Seven”), a group of seven beneficent deities, is found upon a large number of stone altars from Khorsabad. Most or all of these altars come from a temple dedicated to the Sebetti. With regard to the Sebetti, see Wiggermann, *RLA* 12/5–6 (2010) pp. 459–466 sub “Siebengötter.”

## COMMENTARY

P.E. Botta states that he found two stone altars at Khorsabad (*Monument de Ninive* 5 p. 171), although he only published the piece that is now in the Louvre (ex. 1). Botta apparently made a squeeze of the inscription on ex. 1, but it is either no longer extant or not kept in the Louvre. The original copy of ex. 1 is currently preserved in the Archives of the Institut de France (Botta-Cotta II 2976, folio I, sheet 325). A.H. Layard (*Discoveries* p. 131) states that his workmen found at Khorsabad “inscribed altars or tripods, similar to that in the Assyrian collection of the Louvre”; one of these may have been the second altar found by Botta. The present location of these pieces is not known. Ex. 2 was acquired by B. Bey at Basra in 1904 and it entered the museum in Istanbul in 1910. As noted by E. Nassouhi (*RA* 22 [1925] p. 85), it is possible that this exemplar is the second altar found by Botta. However, a fair portion of the inscription is preserved on ex. 2 while Botta states that only a few cuneiform characters remained on the second altar seen by him (*JA* 4/2 [1843] pp. 211–212). In addition to ex. 3, the Oriental Institute expedition found another altar at Khorsabad (DŠ 1194, now in the Oriental Institute, Chicago); however, the section of this altar which would have borne the inscription is not preserved (see Loud and Altman, *Khorsabad* 2 p. 96 and pl. 48 no. 19). As noted by F. Safar (*Sumer* 13

[1957] pp. 220–221), the two exemplars found by the Oriental Institute excavations may come from the Sebetti temple.

Thirteen exemplars with this text (exs. 4–16) were found in the Sebetti temple as the result of Iraqi excavations prompted by the discovery of three of them during leveling operations for a highway. The bottom part of one further altar, presumably without an inscription, was found in the courtyard of that temple. Although Safar states in the English version of his article that thirteen altars were found in the temple’s antecella, only eleven (exs. 4–14) actually come from that room (see *Sumer* 13 [1957] p. 194 and fig. 1 following p. 196 [Arabic version] against p. 220 [English version]). At least some of these altars were left in situ. All thirteen altars found by the Iraqi excavations are said to have the same inscription, but none of the inscriptions are fully legible from the published photographs. F. Basmachi (*Treasures* p. 251) states that fourteen were found in the temple, arranged in two rows of seven (thus two altars for each of the seven deities), and that one is IM 67886. In the score, there is no transliteration for exs. 5–16 and what appears for ex. 4 follows the copy published by Safar.

The top of each altar is circular and is placed above a tripod base; the bottom of each of the three

corners of the base is in the form of a lion's paw. The inscription is incised around the edge of the circular

top of each altar. The master line is a composite made from the various exemplars.

- 1) To the Sebetti, warrior(s) without equa[l], Sargon (II), king of the world, king of Assyria, governor of Babylon, king of the land of Sumer and Akkad, set up and presented (this object).

## 50

This short brick inscription of Sargon II that simply gives his name with several titles and epithets has been found at numerous sites in addition to Khorsabad: Nimrud, Nineveh, Karamles (ancient Kār-Ninlil/Kār-Mullissi), Tag, and possibly Djigan. The text is sometimes stamped on the brick and sometimes inscribed. On the basis of Sargon's titulary in the text, A. Fuchs (*Khorsabad* p. 372 and n. 620) suggests that this inscription is to be dated before the king's twelfth year (710).

## COMMENTARY

A. Ungnad (VAS 1 p. X) states that the inscription on ex. 6 is stamped and that the area stamped measures 6×15.5 cm. No museum numbers are found on the two bricks with this inscription in the Louvre (exs. 7–8), but museum records indicate that N 8076 and N 8078 bear this inscription and the measurements recorded for these fit the bricks indicated. One brick in the Louvre (ex. 7) is the only one known so far to match the exact text of the brick copied by P.E. Botta as Monument de Ninive 4 pl. 183<sup>c</sup> no. 2. However, museum records state that N 8078 came from Nineveh while Botta says that the brick he copied came from Khorsabad. Botta's original copy of ex. 8 is found on the Institut de France manuscript 2976 sheet 56.

C.B.F. Walker (CBI p. 117) notes that although the brick published by A.H. Layard in ICC pl. 82 [D] (and listed above as ex. 9) is said to come from Karamles and to have both this inscription and text no. 53 on it (see also Layard, Nineveh 1 p. 52), no brick in the British Museum has both inscriptions and the only brick in the British Museum registered as coming from Karamles has only text no. 53 (ex. 5). Since Layard gives variant forms for two signs in line 2, it is likely that the copy published by him represents

more than one brick. This is supported by the fact that on Layard notebook MS A p. 320 (Department of the Middle East, British Museum) there are two copies of this inscription and the label for these says "on bricks from Karamles."

According to Thompson, Arch. 79 (1929) p. 124 and pl. XLV no. 72, two bricks with this inscription (exs. 10–11) were found at Tag, near 'Ain Sefna (Ain Sifni, in the Shekhan district of northern Iraq); they are said to have the inscription on the face of the brick and to measure 14.25"×6.25"×4.75". However, elsewhere he refers to only one brick with this inscription from 'Ain Sefna (*ibid.* p. 109).

Ex. 13 is edited from the photo in Loud and Altman, Khorsabad 2 pl. 65 (top right) and Oriental Institute photograph 31189.

Exs. 14–20 are depicted on photographs taken by Gabriel Tranchand of items found by V. Place and published by M. Pillet (exs. 14–19) and N. Chevalier and B. Lavédrine (ex. 20). Exs. 14–17 and 20 likely come from Khorsabad, although this is not explicitly stated in the publications. According to Pillet, Pionnier pl. XXIV, exs. 18 and 19 come from Djigan, located about 25 km west of Khorsabad (see also *ibid.* p. 116), but Place does not refer to having found

any bricks of this ruler at Djigan (Place, Ninive et l'Assyrie 2 pp. 150–151). Ex. 16 and ex. 19 may be the same exemplar, but this is not absolutely clear from the published photographs.

Information on exs. 21–23 comes from the excavation field cards for the objects. Ex. 21 is noted as not having been kept; exs. 21 and 23 are each noted as having a “brick-mark” (maker’s mark?) in their upper right hand corner. Copies of these cards were kindly supplied by K. Neumann, who informs me that the bricks were likely found in the 1930–31 excavation season.

Ex. 24 was found on the site of the palace by Shatha Almashadany and was handed over to the directorate of Nineveh.

The line arrangement is the same on all exemplars known, except for ex. 24, which has the text on four lines (with the third line of the master text split into two, following MAN ŠÚ). The master line follows ex. 6. As is the practice with RINAP, no score for this brick inscription is given on Oracc, but the minor variants are listed at the back of the book.

Z. Niederreiter (Iraq 70 [2008] pp. 77–78 and 85)

notes that the brick with ex. 13 has the impression of a bull stamped on it, the one with ex. 14 has the figure of the head of an arrow (or spearhead) on it, and the one with ex. 20 has a figure in the form of an amulet on it.

Various references are made in the literature to bricks of Sargon II being found at Khorsabad that do not specify which Sargon inscription(s) was present. These are likely to be text nos. 50–55. See for example de Longpérier, Notice<sup>3</sup> p. 44 no. 46 (quite likely text no. 50); Frankfort, OIC 16 pp. 87 and 89 (Palace F); Loud and Altman, Khorsabad 2 p. 14 (“Bricks bearing identical inscriptions [text nos. 50–55] are employed in the construction of every building so far investigated. In the Nabu temple or in any of the several residences near or distant from the palace are therefore encountered innumerable bricks on which is stamped the ubiquitous inscription beginning ‘Palace of Sargon ...’”); and Safar, Sumer 13 (1957) p. 220 (Temple of the Sebetti). See also Frankfort, OIC 16 p. 99 fig. 64 and Loud, Khorsabad 1 p. 104 fig. 111 (pavement in front of the chapel of Šamaš in the main palace).

## TEXT

- 1) É.GAL <sup>m</sup>MAN-GIN
- 2) GAR <sup>d</sup>BAD NU.ÈŠ aš-šur
- 3) MAN *dan-nu* MAN ŠÚ MAN KUR AŠ

1–3) Palace of Sargon (II), appointee of the god Enlil, *nešakku*-priest of (the god) Aššur, strong king, king of the world, king of Assyria.

## 51

This short brick inscription of Sargon II has been found at both Khorsabad and Nineveh. The titulary employed for Sargon and the fact that the text records the construction of Dūr-Šarrukīn indicate that the inscription should date to 710 or later.

## COMMENTARY

The inscription is found on the face of the bricks and is inscribed, not stamped. The present location of ex. 2 is not known and the inscription on ex. 6 is badly worn. Information on the museum num-

bers and measurements of exs. 5-8 was provided by A. Dix. The master line follows ex. 1. No score is given on Oracc, but the minor variants are listed at the back of the book.

4	—	DŠ 34	Khorsabad, Palace, Throne Room (Court VII)	26×31×10	1-5	n

## COMMENTARY

It is possible that ex. 1 and ex. 4 are the same brick since both were found by the American excavations in the throne room at Khorsabad and since the differences in the published copy of ex. 1 and the transliteration of ex. 4 on the excavation find card are relatively minor. Information on ex. 4 comes from that card for DŠ 34, kindly supplied by K. Neumann, who informs me that that brick was likely found in the 1930–31 excavation season. A note on that card states that a duplicate of the text was found in 1929 and that that exemplar had *ab-ni* preserved at the end of line 5, in contrast to ex. 4 (and also in contrast to the copy of ex. 1).

Ex. 3 is attested by a copy by P.E. Botta now preserved in the Archives of the Institut de France (Botta-Cotta II 2976 folio I, sheet number 355). A notation with the copy states that the inscription is “Sur le milieu d’une grande brique venant de Nahrawan à 6 heures de Mossul.” The copy, if correct, would suggest that several of the sign forms on that exemplar are abnormal. A comparison of ex. 2 with Botta’s copy of ex. 3 would suggest that they represent different exemplars.

The line arrangement is the same for all exemplars and the edition is a composite one. There are no variants and no score in given on Oracc.

## COMMENTARY

Additional information on exs. 1–10 was provided by C.B.F. Walker. The exemplars found in the British Museum (exs. 1–10) are impressed with a stamp measuring 10.2/9.2×22.8/20.6 cm. Walker (CBI p. 118) notes that “George Smith’s note-book of his 1873 excavations (Add. MS. 30413 fol. 35) has a copy of a broken duplicate (beginnings of lines 3–5 lost) which is not in the British Museum.” This is treated as ex. 11. Walker (CBI p. 117) notes that although the brick published by A.H. Layard as ICC pl. 82 [D] is said to come from Karamles and to have both this inscription and text no. 50 on it, no brick in the British Museum has both inscriptions. The only brick in the British Museum registered as coming from Karamles is BM 90237, which does come from Layard’s work in Iraq. It is assumed here that BM 90237 (ex. 5) is the brick copied by Layard. Two copies of this inscription (one damaged and one complete) are found in Layard MS A p. 320 and labeled as being from Karamles.

Ex. 12 is only known from P.E. Botta’s copy in Monument de Ninive (4 pl. 183<sup>c</sup> no. 5). A copy by Botta of this inscription is also found in the Archives of the Institut de France (Botta-Cotta II 2976, folio I, sheet 315), but it depicts an exemplar less well preserved than ex. 12 and is not taken into consideration here. Exs. 13–17 are reported to be N 8069–73 in the Louvre, but it is not clear which exemplar has which particular museum number.

Ex. 19 is in a museum in Tiflis (Tbilisi) according to C.F. Lehmann-Haupt (Mat. p. 49 no. 28).

It is possible that ex. 23 (known via a photograph

taken by G. Tranchard published by M. Pillet) is to be identified with one of the bricks in the Louvre (exs. 13–17). It may come from Khorsabad since it derives from the work of Place.

Exs. 24–27 were found during excavations at Nebi Yunus in 1954, but their exact findspots are not known; see Scott and MacGinnis, Iraq 52 (1990) pp. 65–66. Ex. 28 was collated by J. Novotny.

Ex. 30, which is a private collection, is said to come from Khorsabad (Cogan, Bound for Exile p. 48), but that provenance may simply be based upon the fact that the text deals with work at that city.

The Nimrud field catalogue states that ND 2050 (ex. 31), as well as some unregistered duplicate fragments, have a Sumerian inscription of Sargon “recording his building of the Palace at Khorsabad: duplicate of published inscription.” This text is the only inscription which fits this description. The field catalogue also states that the brick was baked and had one edge glazed (information courtesy J.N. Postgate).

Information on exs. 32–35 comes from the excavation field cards for the objects. Exs. 32 and 33 are noted as not having been kept, and ex. 35 has “In town office building” in the section for where the brick was found. Copies of these cards were kindly supplied by K. Neumann, who informs me that the bricks were likely discovered during the 1930–31 excavation season. The transliterations on the cards have DIM instead of DÍM in line 5, but this is assumed to be an error here (or a different understanding of

which sign is DIM).

According to British Museum records, BM 92182 was found in the North-West Palace at Nimrud, possibly by A.H. Layard. The piece has a glazed rosette (remains of five white petals around a yellow center on a blue background) on one side and the inscription stamped on another side. The piece is currently listed under the numbers BM 92182 and BM 92192 on the British Museum website (August, 2019), with the latter number indicating that the piece may have come from Khorsabad. According to J. Taylor, the correct number for the piece is BM 92182.

The two exemplars from Nimrud (exs. 31 and 36) each have one edge glazed. A copy of a brick with this inscription reportedly discovered at Nimrud (SE corner of the tell?) is found in Layard's notebook MS A p. 322 (Department of the Middle East, British Museum). That copy appears to have been poorly

executed and is not taken into consideration here.

The copies of Botta, Layard, A. Amiaud, P. Jensen, H. Winckler, and R. Campbell Thompson indicate that the forms of several signs are somewhat abnormal (variously line 1: GI, LUGAL, KI, and ŠÁR; line 2: GIN; line 3: MU, BÍ, IN, and SA<sub>4</sub>; line 4: GAL and TUK; and line 5: TA, MU, UN, and DÍM). These have not been noted as variants. Winckler notes that some exemplars have KU for KI in line 1; however, it is more likely that the signs are simply poorly copied and/or misread. For ex. 22, A. Pohl (RPARA 19 copy and transliteration) has bí-in-na-sa<sub>4</sub>-a in line 3, but the photo of the original shows the piece has the expected bí-in-sa<sub>4</sub>-a. The transliteration of ex. 29 published in NABU 2010 erroneously omits the masculine determinative at the beginning of the first line (collocation courtesy A. Miglio). There are no variants for this inscription and no score is provided on Oracc.

|---|--|
| <p>1) <sup>m</sup>MAN-GI.NA lugal ki-šár-ra</p> <p>2) uru an-dù URU.BÂD-MAN-GIN</p> <p>3) mu-bi bí-in-sa<sub>4</sub>-a</p> <p>4) é-gal-bi gaba-ri nu-tuku</p> <p>5) šà-bi-ta mu-un-na-dím</p> | <p>1–5) Sargon (II), king of the world, built a city (and) named it Dūr-Šarrukin. He constructed inside it its palace that has no equal.</p> |
|---|--|

2–3 In view of the -a at the end of line 3, we should possibly take these lines as a subordinate clause and translate them as "who built a city (and) named it Dūr-Šarrukin." The current translation assumes that the scribe had in mind such Akkadian passages as text nos. 52 lines 2b–3 and 54 lines 2–3a.

4 é-gal-bi gaba-ri nu-tuku "its palace that has no equal": Or take this as the name of the palace, as in text no. 2 line 473 and text no. 7 line 159, which have the name written as é-gal-gaba-ri-nu-tuku-a ("Palace That Has No Equal"). Cf. also text no. 52 lines 4–5.

## 54

The building of the city of Dūr-Šarrukīn and the construction of a temple for the gods Sīn and Šamaš are recorded on this inscription of Sargon II. Bricks with this inscription have been found at Khorsabad, Nineveh, and Nimrud; the ones from Nineveh and Nimrud may have been taken there from Khorsabad when Sennacherib moved the capital following the death of Sargon (Scott and MacGinnis, *Iraq* 52 [1990] p. 65). The inscription may refer to the chapels of Sīn and Šamaš in the royal palace at Khorsabad rather than to an independent temple (see also text nos. 18, 21, and 55).

## COMMENTARY

Exs. 1 and 3 are inscribed on the face, while ex. 2 is stamped on the face with a stamp measuring 10.5×21 cm. Additional information on exs. 1–3 was provided by C.B.F. Walker. H. Winckler states that he made his copy of this inscription from an original in London (*Sar.* 1 p. 194); Walker (*CBI* p. 117) identifies this original with BM 90245 (ex. 1).

Ex. 5 is known from a copy by P.E. Botta preserved in the Archives of the Institut de France (Botta-Cotta II 2976, folio I, sheet 315). The copy would suggest that a number of the signs on that exemplar are defective in form.

The unpublished Nimrud field catalogue states that ND 2051 (ex. 6), as well as duplicate fragments, has an Akkadian inscription of Sargon “recording his building of Dur-Sharrukin (Khorsabad) and the temples of the gods Sin and Shamash there: duplicate of published inscription” (information courtesy J.N. Postgate). This inscription is the only text that fits

that description.

Ex. 7 was likely found during the Oriental Institute’s 1930–31 excavation season and is known from the excavation field card for the piece, a copy of which was kindly supplied by K. Neumann.

Winckler’s copy of ex. 1 indicates that the form of 30 in line 3 is abnormal and looks more like GAM; however, Walker does not note this with regard to any of the bricks in the British Museum. A copy of a brick with this inscription reportedly discovered in debris of the Nabû temple is found in L.W. King’s notebook “Kuyunjik: Notes on Sculpture & Inscriptions” (Department of the Middle East, British Museum) and has a GAL sign in place of ŠÚ in line 1. The copy, however, has shading over the GAL and thus likely simply indicates that King was unable to read the sign and assumed that it was GAL.

No variants to the inscription are known and no score for this brick inscription is provided on Oracc.

2	Thompson, Arch. 79 pl. XLV no. 80	Nineveh, Temple of Nabû, XXVIII 12	10.8 thick	—	1–7	n

## COMMENTARY

P.E. Botta's copy of ex. 1 indicates that several of the sign forms are abnormal or incorrect, but collation of the exemplar indicated that these signs were either correct or slightly damaged. The line arrangement is the same for both exemplars and the master line is a conflation of the two.

According to Winckler, Sar. 1 p. 194, there is a

brick with this inscription in London; however, no such brick was found by C.B.F. Walker in the British Museum.

No score for this brick inscription is given on Oracc, but the variants are listed at the back of the book.

## 56

The Khorsabad excavation field card in the Oriental Institute (Chicago) for DŠ 39 records an inscribed brick found in city gate 7. The card has a copy of the cuneiform text on the brick; however, the inscription was either badly written or badly copied and thus the edition given here must be considered tentative. The inscription does not appear to be a duplicate of any other known brick inscription of Sargon II. Information on the brick was kindly supplied by K. Neumann, who states that the brick was probably found during the Oriental Institute's 1930–31 excavation season.

## COMMENTARY

Pieces of several glazed bricks from Khorsabad with cuneiform characters are known and these have been gathered here. It is unlikely, however, that they come from only one inscription since some bricks have one line of characters in white glaze (Frgms. I–J) while others have two lines of smaller characters in yellow glaze (Frgms. B–H, and possibly A), and since Frgm. K was found in Sargon's palace at Khorsabad, while Frgms. L–M come from Palace F at that site.

Frgms. A–B: These two pieces were found by P.E. Botta (*Monument de Ninive* 2 pl. 156 nos. 11 [Nap. III 2924] and 9 [Nap. III 2925] respectively). (These are cited as *Inv. Nap.* 2994 and 2995 in Albenda, *Palace of Sargon* p. 113.) Each has traces of two lines of characters, those of frgm. A being white on a green background and those of Frgm. B being yellow on a green background.

Frgms. C–H: Each fragment has traces of two lines of yellow characters on a green background. Most or all of Frgms. C–H are likely to be identified with de Longpérier, *Notice*<sup>3</sup> nos. 61–67.

Frgms. I–J: These fragments have a single line of white characters on a green background and are

likely to be identified with de Longpérier, *Notice*<sup>3</sup> nos. 59–60.

Frgm. K: The fragment was found on February 3, 1931. The signs are reported to be in yellow on a light blue background and the transliteration is based on a copy of the text on the excavation catalogue card for the piece in the Oriental Institute. See also Walker in Albenda, *Palace of Sargon* p. 113.

Frgm. L: The fragment has traces of a single sign and was found on March 26, 1931. The transliteration is based on a copy of the text on the excavation field card for the piece in the Oriental Institute. See also Walker in Albenda, *Palace of Sargon* p. 113 n. 37.

Frgm. M: This fragment of a glazed brick has white signs on a blue-green background. The piece was found on March 25, 1931. The transliteration is based on examination of the fragment in 2012 and on a copy of the text on the excavation catalogue card. The fragment no longer preserves the trace of the first sign indicated on the copy.

At least two pieces were given the number DŠ 5 by the Oriental Institute archaeologists at Khorsabad. One is Frgm. K and the other is a nail that has

the Oriental Institute number A 7067. Information on Frgm. M and on Frgms. K–L that is not found in Albenda, *Palace of Sargon* was kindly provided by K. Neumann. C.B.F. Walker (in Albenda, *Palace of Sargon* p. 113) suggests that the throne room, where Frgm. K was found, may also have been the original location of Frgms. A and B. V. Place refers to having found glazed bricks and glazed inscriptions mixed in the debris at Khorsabad (*Ninive et l'Assyrie* 1 pp. 89 and 233–234; and 2 p. 86). Frgms. C–J are likely some of these.

With regard to the fragments in the Louvre having two lines, de Longpérier, *Notice*<sup>3</sup> sub nos. 61–67 noted the presence of two geographical names: Media (KUR.ma-da-a-a) and an incomplete name which might be “Amardi de l’Atropatène.” The former place

may have been found on Frgm. H, where the trace of the sign at the end of the second line could be the beginning of DA (i.e., KUR.ma-<sup>r</sup>da<sup>1</sup>-[a-a]). Possibly the Amatti (Hamath) on Frgm. C is the “Amardi” of de Longpérier.

Since the inscription(s) would have run across several bricks it is assumed in the transliteration below that each fragment (except Frgm. D) was continuing the inscription from a previous brick and that the inscription continued onto another brick. Frgm. D likely preserves the beginning of an inscription since there is some decoration on the brick to the left of the cuneiform signs and since numerous other royal inscriptions of Sargon begin with “Palace of Sargon ...” (e.g., text no. 8).

## 58

In an inscription on some clay prisms from the reign of Esarhaddon (Leichty, RINAP 4 pp. 200–201 no. 104 vii 10–12) is the phrase *lumāšē tamšil šitir šumīya ēsiq*, which E. Leichty translates as “I depicted hieroglyphs representing the writing of my name.” This passage has been understood by many scholars to refer to figures/symbols that are found upon three clay prisms and one stone monument of Esarhaddon; they are taken to be a cryptographic writing of the royal name Esarhaddon and some of his titles/epithets. Thus, those symbols have been interpreted to be Assyrian hieroglyphs or astroglyphs and to have been possibly influenced by Egyptian hieroglyphs. For possible interpretations of the symbols, see Leichty, RINAP 4 pp. 238–243 no. 115. (For the connection of some of the various figures with particular constellations, see for example Miglus, *Studies Hrouda* p. 189.) Beginning with C.J. Gadd in 1948 (*Ideas of Divine Rule* pp. 93–95), a series of figures depicted on glazed brick friezes at Khorsabad have similarly been interpreted to be a cryptographic writing of the name and title(s) of Sargon II. The friezes are found on both sides of some major doorways in the chapels of the deities Sîn, Šamaš, and Ningal within Sargon’s palace complex and in the temple of Nabû.

In addition to these glazed brick friezes, there are nineteen fragments of bronze bands/fittings from sanctuaries at Khorsabad that have depictions of various figures (e.g., lions, bulls, fig trees, ploughs, bulls, bull-men, fish-men, and men holding spears) and some of these may have been used to indicate the name and titles of Sargon (see in particular Miglus, *Studies Hrouda*, pp. 182–183; Finkel and Reade, *ZA* 86 [1996] pp. 251–253 and 267–268 figs. 3–5;

57 Frgm. M line 1 The trace after LUGAL would fit ᵀKAL<sup>1</sup> or ᵀdan<sup>1</sup>-[nu], among various other possibilities.

J.E. Curtis in Curtis and Tallis, *Balawat Gates* pp. 79–81; Guralnick, *CRRAI* 51 pp. 389–404; and Niederreiter, *Iraq* 70 [2008] p. 58 fig. 7 and p. 80 I.d.6–8). L. Morenz (*AoF* 30 [2003] pp. 24–25) has suggested that the representations on the royal throne of Sargon may also have represented the king’s name. The ends of two prisms of Sargon II (text no. 82 and text no. 63) have symbols cut or impressed onto them, but I. Finkel and J.E. Reade suggest that it is “more probable that the ... designs were related to the identities of the gods for whose temples the prisms were made” rather than being “hieroglyphs” (*ZA* 86 [1996] pp. 246–247 and figs. 7–8 following p. 268). Note also the image of a lion on several vases (text no. 77), a scorpion on a gold bowl and an electrum mirror of the queen Atalia (text no. 2001 exs. 1 and 3), and a dromedary and an omega on the macehead of Sargon’s brother *Sîn-aḫu-uṣur* (text no. 2003).

## COMMENTARY

These “inscriptions” are located in pairs, on the façades of platforms that jut out on each side of a major doorway, and are “read” beginning at the doorway and then going either left or right. Thus each inscription of a pair is in effect a mirror image of the other. The condition of the individual reliefs when first found appears to have varied a great deal and for the most part all that we know about these glazed brick reliefs comes from general statements about what was found, a few partial and/or unclear photographs, and, most importantly, the drawings published by V. Place.

It has also been stated that there was a wall

painting with similar figures in the cella of the chapel of the god *Adad* in the palace complex (Room 166; see in particular Place, *Ninive et l’Assyrie* 1 p. 128 and 3 pl. 25 no. 5, but the information on this is somewhat unclear and Place states that the reconstructed drawing of the figures was based upon the glazed brick panels. Thus, it will not be dealt with here.

Inscription A is made up of seven symbols in the following order: a king (1), a lion (2), a bird (3), a bull (4), a fig tree (5), a plough (6), and a man holding a spear pointed towards the ground (7). Inscription B is a shorter variant of this, omitting the third and

fourth symbols (bird and bull). In each case, the first symbol (king) and the last symbol (man holding a spear) are located on opposite sides of a platform, with the remaining symbols on the front of the platform. (The king faces into the chapel, towards the cella, and the man holding a spear faces toward the courtyard.) Thus, if one looked at a platform directly from the front, one would not see the first and last symbols of an “inscription.” In addition, as pointed out by A. Zgoll and M. Roaf, the figures on the front of a platform are placed within a frame of rosettes, in effect separating them from what is on the sides. As a result, some scholars (e.g., Reade [1979]; Zgoll and Roaf; and E. Frahm) do not consider the first and last symbols, or perhaps just the last symbol, to be part of the “inscription,” although Zgoll and Roaf do take the first symbol, the image of the king, to stand for the king and thus “Sargon.” In 1979, J.E. Reade suggested that the man with the spear might represent one of Sargon’s earlier namesakes (Larsen, *Power and Propaganda* p. 342), although he later appears to have changed his mind about this.

J.E. Reade (in Caubet, Khorsabad pp. 234–236) was perhaps the first to offer a real interpretation of these figures/symbol, but more recently, several scholars have proposed various different interpretations. These interpretations seek to identify the symbols with Akkadian words or with the signs of the underlying cuneiform script. In general, scholars think that the lion (2) and bull (4) both stand

for “king” (*šarru*), since both animals appear as symbols of royalty and strength in Mesopotamian texts, with the kings sometimes called a wild bull (*rīmu*) or a lion (*labbu*); see in particular Roaf and Zgoll, *ZA* 91 (2001) pp. 277–280 and Watanabe, *Animal Symbolism*, particularly pp. 42–68. Note also the presence of the figure of the lion on the Assyrian royal seal and on several objects with inscriptions of Sargon (see for example text no. 77). The view that the lion and the bull have the same meaning might be supported by the fact that A has a bull before the fig tree while B has a lion before the fig tree; see also Leichty, *RINAP* 4 no. 115 ex. 1 versus exs. 2–4 for the animal placed before the image of a mountain. There is also a general assumption that the final title is “king of Assyria” (“king of the land of Aššur”). The interpretations (and reasoning for similar interpretations) of the other symbols can vary. For full explanations of the various proposals, see the relevant items listed in the Bibliography.

In the past, the symbols have also been thought to be divine symbols (e.g., the lion for the goddess Ištar and the bull for the god Adad); see for example Unger, *RLA* 2/4 (1936) p. 252.

For a study of the analysis and conservation of the bricks in the façade of the chapel of the god Šin, see Whyte, Muros, and Barack in Greene and Griffin, *Proceedings OSG* 32 pp. 172–189. For a study of Assyrian bricks with high relief from Nineveh that might have a rebus writing for the name Esarhaddon, see Nadali, *Iraq* 70 (2008) pp. 87–104.

Figure 22. Diagram showing the arrangement of glazed brick figures representing Assyrian “hieroglyphs” (text no. 58). Diagram courtesy of M. Roaf.

## TEXT A

(1) King, (2) Lion, (3) Bird, (4) Bull, (5) Fig tree, (6) Plough, (7) Man holding a spear

## TEXT B

(1) King, (2) Lion, (5) Fig tree, (6) Plough, (7) Man holding a spear

## INTERPRETATIONS AND TRANSLATIONS

Reade (1995) and Finkel and Reade: **A** (1–7) “Sargon, great king, king of the land of Assyria”; (1) “Sargon,” (2) “king,” (3) “great,” (4) “king,” (5) “land” (6) “Aššur,” (7) determinative for place names.

**B** (1–2, 5–7) “Sargon, king of the land of Assyria”; (1) “Sargon,” (2) “king,” (5) “land,” (6) “Aššur,” (7) determinative for place names.

Zgoll and Roaf: **A** (1) “Sargon.” (2–6) “king of totality, king of the land of Aššur”; (2) “king,” (3) “totality,” (4) “king,” (5) “land,” (6) “Aššur,” (7) uncertain.

**B** (1) “Sargon.” (2, 5–6) “king of the land of Aššur”; (2) “king,” (5) “land,” (6) “Aššur,” (7) uncertain.

Morenz 1: **A** (1–7): “Sargon, great king, king of the land of Assyria”; (1) “Sargon,” (2) “king,” (3) “great,” (4) “king,” (5) “land,” (6) “Aššur,” (7) determinative for place names.

**B** (1–2, 5–7) “Sargon, king of the land of Assyria”; (1) “Sargon,” (2) “king,” (5) “land,” (6) “Aššur,” (7) determinative for place names.

Morenz 2: **A** (1–7): “He praises/reveres (the god ...): Sargon, great king, king of the land of Assyria”; (1) “He praises/reveres (the god ...): Sargon,” (2) “king,” (3) “great,” (4) “king,” (5) “land,” (6) “Aššur,” (7) determinative for place names.

**B** (1–2, 5–7) “He praises/reveres (the god ...): Sargon, king of the land of Assyria”; (1) “He praises/reveres (the god ...): Sargon,” (2) “king,” (5) “land,” (6) “Aššur,” (7) determinative for place names.

Frahm: **A** (2–6) “Sargon, king of the land of Assyria”; (2) *šarru*, (3) *ukīn*, (4) “king,” (5) “land,” (6) “Aššur.”

**Zgoll and Reade** do not take (1) and (7), in particular (7), as being really part of the inscription; see the commentary.

**Morenz** His translation actually has “starker König” rather than “great king” even though he is taking the figure for *rabû* (in Morenz and Bosshard-Nepustil, *Herrscherpräsentation* p. 210 n. 95). He does not exactly indicate how he gets Assyria in the translation for the plough (6), but he does state that his work builds on that of Finkel and Reade, Scurlock, and Zgoll and Roaf (*ibid.* p. 204).

**Frahm** does not take (1) and (7) as part of the inscription; see the commentary.

## 59

Seven fragments of a clay bowl (possibly a *sikkatu?*) were found in the Sîn chapel of the palace at Khorsabad and are preserved in the Oriental Institute (Chicago). According to Oriental Institute records, the pieces were found in December 1932. Three adjoining pieces have this brief inscription.

## 60

Three fragments of a clay bowl with a brief inscription in the Oriental Institute (Chicago) were found at Khorsabad. It is possible that these fragments are to be identified with Loud and Altman, Khorsabad 2 p. 105 no. 33, which Oriental Institute records indicate was found outside the northwest wall of the Nabû temple in March 1934 and which bears the field register number DŠ 101. Although the text does not mention Sargon, since it was found at Khorsabad and since Sargon did use the titles “strong king, king of the world,” it has been assigned to him here.

## 61

An eye-stone that likely comes from Khorsabad has a short dedicatory inscription of Sargon to the goddess Ningal.

## CATALOGUE

Museum Number	Registration Number	Provenance	Dimensions (cm)	cpn
Louvre —	Nap. III 3400	Possibly Khorsabad	2.3×2.4×1.0	c

## COMMENTARY

The eye-stone was acquired by V. Place, and thus may well come from his work at Khorsabad, although this cannot be considered certain. The piece is made of banded agate and is white, with a pink pupil. The eye-stone was originally mounted on a disk of blue glass which measured 3.3×3.2 cm and from which it has now become detached.

H. Winckler erroneously refers to the piece as

being a “Siegelabdruck” (Sar. 1 p. 196). The copies published by Place and Winckler (the latter being based on the former) omit the *ana* of line 1 and all of line 4. Examination of the original in the Louvre shows that *ana* and line 4 are faint and written on the white outer part of the eye, in contrast to the rest of the inscription that is written on the pupil.

## 62

A bronze macehead found at Khorsabad has two one-line inscriptions on it, one ascribing the object to the palace of Sargon — “Palace of Sargon, king of the world, king of Assyria” — and the other stating that it belonged to *Sîn-aḫū-ušur* — “(Property) of *Sîn-aḫū-ušur*, the grand vizier.” Although the former inscription could have been edited here, it has been decided to present the two together at text no. 2003.

## 63

A fragment of a clay prism found at Aššur in 1910 records parts of the campaigns in 716–713, which are assigned in this text to the ruler’s fifth through eighth regnal years (*palûs*), in line with the assignment found in the Nineveh Prism (text no. 82) and, as far as it is preserved, a tablet fragment in the Oriental Institute (text no. 102), and against that found in the Khorsabad Annals (text nos. 1–4) and (apparently) the Najafabad Stele (text no. 117), which assign the events to Sargon’s sixth through ninth regnal years. The fragment describes campaigns against Mannea, Karalla, and Urartu. The text is commonly known as the Aššur Prism of Sargon II and C.J. Gadd refers to it as prism C (Iraq 16 [1954] p. 175). It is possible that the inscription on this fragment was simply a duplicate of what was on the Nineveh Prism (text no. 82), at least with regard to the section preceding the building report (see Tadmor, JCS 12 [1958] p. 24 n. 20). If this is correct, columns i’, ii’, and iii’ would likely duplicate parts of text no. 82 columns ii (towards the bottom of the column), iii (towards the bottom of the column), and iv–v (end of column iv and start of column v) respectively; see also Fuchs, SAAS 8 pp. 8 and 23–35. However, the two texts only overlap for a few lines: text no. 63 ii’

6'-18' ≈ text no. 82 iii' 1'''-17''' and text no. 63 iii' 7'-14' ≈ text no. 82 v 1-8. The Nineveh Prism was composed in Sargon's eleventh regnal year (711), or possibly the following year (710). Thus, if the two texts are duplicates, the Aššur Prism must also have been composed no earlier than 711.

## COMMENTARY

The prism originally had eight columns, of which the fragment preserves the ends of three. The restorations are based for the most part on those proposed by E. Weidner and A. Fuchs.

Assuming that the various prisms of Sargon bore basically the same text, Weidner estimated that each column of the Aššur prism had at least 120–150 lines, perhaps even 150–180 lines, and thus that the eight-sided prisms had originally 960–1,440 lines. He also estimated that the Aššur prism had been originally 32–48 cm high. (See AfO 14 [1941–44] pp. 40–41.)

The building portion of the inscription is not preserved, but the prism was found in the temple of the god Aššur. Since Sargon is known to have carried out work in that temple (see text no. 74 i 25–28 and text no. 84 line 3'), it is possible that the prism was com-

missioned to commemorate work on that temple. (See Fuchs, SAAS 8 p. 5.) On the bottom end of the prism fragment are found damaged representations of a stylized tree and an animal, possibly a kid. (For photographs of these, see Weidner, AfO 14 [1941–44] p. 48; Finkel and Reade, ZA 86 [1996] fig. 7 following p. 268; Fuchs, SAAS 8 p. ii; and Aššur excavation photograph S 4816.) The goat was an attribute of the god Aššur and thus its appearance on the fragment may support the supposition that the prism was created to commemorate work on the temple of that god. (See Finkel and Reade, ZA 86 [1996] pp. 246–247.) Designs are also found on the bottom of a prism from Nineveh, text no. 82; see the commentary to that text with regard to these representations.

(i' 15') [With the support of] the god Aššur, my lord, I inflicted a defeat on him. [In the midst of my camp, I thr]lew [Aššur-lē<sup>2</sup>i of the city Kar]alla (and) Ittî of the city Paddiri in iron fetters. [I removed/deported ...] and [brought th]em to Assyria. The city Karalla, together with its district, (i' 20') I added [to the province of the land L]ullumû and I (thereby) expanded [the territory of Assyria]. I appointed Bēl-aplu-iddina [to] the position of [...] over the city Paddiri and

## Lacuna

ii' 1'-7') together with [...] and sheep and [goats ... I deported] from the la[nd ... and] I sett[led (them) in the land that/of [...] (ii' 5') on the border of the city of the Brook of Eg[yp]t, a district which is on the shore of the] Western [Sea. I assigned them to the authority of a qīpu-official of mine], the sheikh of the city Laban.

ii' 8'-11') (As for) Šilkanni, king of Egypt, whose lo[ca]tion is far away (and whom) fear of the brilliance of the god Aššur, my lord, [had overwhelmed], he brought me as his audience gift twelve large horses from Egypt whose like did not exist in (my) land.

ii' 12'-25') In my sixth regnal year, Ursâ (Rusâ), the Urartian — who did not respect the oath (sworn) by the great gods; who overturned the decision of the god Šamaš; whom, during the course of my previous campaign against Ullusunu, the Mannean, (ii' 15') I had subjugated to the yoke of the god Aššur, (and)

i' 13' Or [ú-šá-an-ki-ir/ú-šam-kir it-ti]-ia, "Aššur-le<sup>2</sup>i [of the city Karalla] incited Ittî of the city Paddir [to rebel against] me"; see Fuchs, SAAS 8 p. 24 and n. 23.

i' 14' The tentative restoration is based on Tadmor and Yamada, RINAP 1 p. 31 Tiglath-pileser III no. 7 line 2.

i' 15' Or [i-na qí-bit] <sup>d</sup>a-šur<sub>4</sub>, "[At the command of] the god Aššur" (Fuchs, SAAS 8 p. 24).

i' 16'-22' For duplicate or similar passages useful for restoration, see in particular text no. 117 ii 31-33. For i' 16'-17', cf. text no. 34.

i' 19' For the restoration, see text no. 74 v 66.

i' 21' For the restoration, cf. text no. 73 line 9.

i' 22' A. Fuchs (SAAS 8 p. 25 n. 30) suggests [a-na LÚ.qé-pu]-ú-ti ("I appointed Bēl-aplu-iddina [to the position of qīpu-official]"); cf. Tadmor and Yamada, RINAP 1 p. 112 Tiglath-pileser no. 44 line 16' and Na'aman, NABU 1997 p. 139 no. 150. Fuchs believes that it is hardly likely that Allabria/Paddir was made into a province and thus that the passage should probably not be restored [a-na LÚ.EN.NAM]-ú-ti.

ii' 4'-7' Possibly restore in ii' 4' i-na ma-a-ti <sup>1</sup>ša<sup>1</sup> [a-šar-ša<sup>2</sup> la<sup>2</sup> i-du-ú<sup>2</sup> i-na<sup>2</sup> URU<sup>2</sup> ...], "in a land whose [location they had never known (before), in the city ...]," and at the end of ii' 6' a personal name instead of LÚ.qí-pi-ia<sup>2</sup>, "a qīpu-official of mine." See Na'aman, Tel Aviv 6 (1979) p. 71 and n. 6 and AfO 46-47 (1999-2000) p. 363. For the restoration in ii' 5', see text no. 1 line 145.

ii' 6'-11' For a duplicate passage, see text no. 82 iii 1''-8''.

ii' 8' For the restoration, see text no. 73 line 8. Šilkanni may be Osorkon IV; see Weidner, AfO 14 (1941-44) pp. 44-46; Kitchen, Third Intermediate Period<sup>2</sup> pp. 376 and 551-552; and Schwemer, PNA 3/2 pp. 1421-1422 sub Usilkanu 1.

ii' 12'-18' The restorations are based upon text no. 82 iii 9''-16''.

ii' 14'-16' In the previous campaign it was actually the Mannean Ullusunu who was defeated, not the Urartian king Rusâ; see Fuchs, SAAS 8 pp. 57-58 n. 26 with regard to a possible rewording of the passage to deal with this problem.

## 64

A fragment of a hollow clay cylinder in the Vorderasiatisches Museum preserves part of an inscription of Sargon II that records the end of the description of his military campaign to Babylon in his twelfth and thirteenth regnal years (710-709), as well as the receipt of gifts from the ruler of Dilmun and from seven rulers on Cyprus (lines 1'-17'), and possibly the beginning of a building report (lines 18'-21'). The inscription may have been composed in 707 (see Frahm, KAL 3 p. 76).

### CATALOGUE

Museum Number	Excavation Number	Photograph Number	Provenance	Dimensions (cm)	cpn
VAT 15466	Ass 8800	Ass ph 1972	Aššur, at the western border of the excavation, on the mud brick (cD6V)	7.8×7.3×3.5	c

### COMMENTARY

The cylinder fragment was found in the area of the former New Palace at Aššur. Although part of the left edge of the piece is preserved, the beginnings of the lines are no longer preserved. As noted by E. Frahm (KAL 3 p. 76), lines 18'-21' might be the beginning of a building report. While the mention of the “king of the gods” in line 21' would make one think of the god Aššur and thus work on the temple of that god, he could also be mentioned in connection with work on other building projects, such as the royal palace. If, as Frahm suggests is possible, the provenance of

the fragment points to the location of the building project for which the cylinder was intended, the report might deal with work on the city of Aššur's inner wall or processional street.

The restorations in lines 1'-17' follow Frahm, KAL 3 p. 75 and are for the most part based on text no. 7 lines 134-149 and similar passages in other texts (e.g., text no. 74 vi 63-80 and vii 7-38; text no. 83 iii' 1-13; and cf. text no. 103 iv 1-42), although for line 6', see text no. 74 vi 80. The text has been collated by J. Novotny.

- 1'-5') [... (As for) the citizens of (the cities) Sippar],  
N[ippur, Babylon, and Borsippa who through no fault  
of their own had been held captive in it (Dūr-Yakīn), I  
put an end to their imprisonment and let them see the  
light (of day). (With regard to) their fields, which long  
ago, whi[le the land was in disorder, the Sutians had  
taken away and appropriated for their own], I stru[ck  
down (those) Sutians, the people] of the steppe, with  
the sword. [I (re)assigned to them (the citizens) their  
territories, (whose boundaries) had been forgotten  
(and) fallen into disuse during the troubled period  
in the land. I (re)-established the freedom (from  
obligations) of (the cities) U]r, Uruk, Eridu, Larsa,  
Kullaba, K[issik, (and) Nēmed-Laguda. Moreover, I  
returned] their [god]s that had been carried off as  
booty to [their] cult centers [and I restored their  
regular offerings that had been discontinued].
- 6'-7') I restored [the land Bīt-Y]akīn and re[organized  
(its administration). I settled there people from the  
land Kummuḥu that I had conquered and I had (them)  
occupy its (Bīt-Yakīn's) abandoned regions]. I divided  
up [th]at [land] into equal parts and [assigned (them)] to  
the auth[ority] of a [eunuch of mine, the governor of  
Babylon, and a(nother) eunuch of mine, the governor  
of the Gambulu (tribe)].
- 8'-12') [Happily], with [a joyful heart (and) a radiant  
face, I entered Babylo]n, the cult center of the Enlil  
of the gods (Marduk); [I grasped hold of the hands  
of the great lord, the god Marduk, and brought  
(him) safely along the road to the akitu-house. (With  
regard to) 154 talen]ts, 26 minas, (and) 10 shekels  
of red gold, 1,804 talen]ts (and) 20 minas of pure  
silver, copper, (and) iron in immeasurable quantities,  
(10') obsidian], lapis-lazuli, banded agate, blue turquoise,  
[green turquoise, ... of banded agate (and) muššaru-stone  
in large quantities, (...) blue-purple wool], red-purple  
[wool], garments with multi-colored trim and [linen  
garments, boxwood, cedar, cypress, (and) every kind  
of aromatic, the products of Mount Amanus, whose

6' [KUR.É-<sup>m</sup>]<sup>1</sup>ia<sup>1</sup>-ki-<sup>1</sup>ni<sup>1</sup> ú-ter-ma a-na eš-šu-<sup>1</sup>ti<sup>1</sup> [aš-bat] "I restored [the land Bīt-Y]akīn and re[organized (its administration)]": Possibly translate instead "I again reorgan[ized] the land Bīt-Y]akīn"; see also text nos. 74 vi 80 and 113 line 23', as well as text nos. 86 line 15' (restored) and 87 line 10' (restored); note also text nos. 7 line 65 and 74 iv 2. Possibly restore AN.ŠĀR EN-ia, "(the god) Aššur, my lord," somewhere at the end of the line, following text no. 74 vi 82 and Frahm, KAL 3 p. 76. E. Frahm tentatively restores ana before KUR, and translates "Ich kehrte [in das Land Bīt]-Jakin zurück," but this translation assumes a G-stem rather than a D-stem of tāru.

10' Several metals may be mentioned at the end of the line, as in text no. 74 vii 10-11.

## 65

A large, four-column tablet with 430 lines of text was found in a private house in the city of Aššur and records a formal letter, written in the first person, from Sargon II to the god Aššur in which the ruler reports on a campaign conducted against the land Urarṭu and the city Mušašir in the ruler's eighth regnal year (714). According to line 6, the campaign began in the month Du'ūzu (June–July) and a lunar eclipse that is mentioned in line 318 as an omen towards the close of the campaign and immediately before

**64 line 12'** MU.3.KÁM, "(my) third year": This should refer to Sargon's third year on the throne of Babylon (707). Or MU.4.KÁM, "(my) fourth year," following text no. 74 vii 19.

**64 line 13'** Text no. 74 vii 20 refers to Aḫundāra as king of Dilmun here rather than Upēri; the former may have been the latter's successor. Text no. 7 line 144 has simply 30 KASKAL.GÍD, "(at a distance of) thirty leagues," rather than *ma-lak 30 KASKAL.GÍD*, "at a distance of thirty leagues." As noted by E. Frahm (KAL 3 p. 76), possibly restore at the end of the line *iš-šá-a man-da-tuš*, "brought me his tribute" (following text no. 74 vii 24), or *iš-pu-ra ar-du-tú*, "sent (a message to do) obeisance (to me)" (following text no. 103 iv 27), instead of *ú-šá-bi-la kàd-ra-šu*, "brought me his gift" (following text no. 7 line 145).

**64 line 15'** Or *a-di-<sup>d</sup>nanna*, a sandhi-writing; see already Frahm, KAL 3 p. 76.

the attack on Muşaşir has been dated to the evening of October 24, 714. This indicates that the campaign lasted at least three or four months. The text was likely composed in 714 or soon thereafter. This text is commonly referred to as Sargon's Eighth Campaign, Sargon's Letter to the God, or Sargon's Letter to Aššur.

The inscription consists of an initial address (lines 1–5), the body of the text (lines 6–425), and a concluding statement/colophon (lines 426–430), which informs us that the tablet had been written by the royal scribe Nabû-šallimšunu, who was the son an earlier royal scribe, Ḫarmakki. The address (lines 1–5, with each line separated by a line ruling) invokes blessings on the god Aššur, the other deities who dwell in his temple Eḫursaggalkurkurra, the deities who dwell in the city Aššur, and the city Aššur itself, as well as all who dwell in it, in particular those living in its palace; and it concludes by stating that all was well with Sargon and his troops. The body of the text is divided by line rulings into fifteen sections. The first five sections (lines 6–166) describe the king assembling his troops, setting out on campaign, and proceeding through the Zagros Mountains, where he received tribute and gifts from vassal rulers and those who wanted to win his friendship and prevent hostile actions being directed against them. In order to help the Mannean ruler Ullusunū, his vassal, he met the forces of Rusâ (written Ursâ in this and numerous other inscriptions of Sargon II) and Mitatti, the rulers of Urarṭu and Zikirtu respectively, in battle on Mount Uauš, which resulted in a major Assyrian victory and the flight of Rusâ. Sargon then decided to break off his campaign to the lands of Andia and Zikirtu and set out for Urarṭu (line 162). Sections six through twelve (lines 167–305) record Sargon's march through Urarṭian territory. For the most part, the natives fled before the Assyrian advance and these sections provide a description of Urarṭu, including its irrigation works. The Assyrians carried out numerous destructive actions as they marched through Urarṭu. The thirteenth section (lines 306–308) simply records the receipt of tribute from Ianzû, the king of the land Na'iri, indicating that Sargon had left Urarṭu and was on his way home. The fourteenth (and longest) section (lines 309–414) describes Sargon's decision to halt his journey back to Assyria as a result of the lunar eclipse mentioned earlier and instead take a small force to attack the city Muşaşir, a small state that bordered both Assyria and Urarṭu. Muşaşir was also a "holy city," sacred to the god Ḫaldi, a deity highly honored in Urarṭu; the text records that in this city Urarṭian kings were crowned. That city was captured, looted, and destroyed; and a long, detailed list of the booty taken from the palace of king Urzana and from the temple of Ḫaldi is given. The final section (lines 415–425) recapitulates the major achievements of the campaign. The exact route taken by Sargon during the course of this campaign is a matter of intense scholarly debate (see below).

A.L. Oppenheim has argued that texts of this type were "not to be deposited in silence in the sanctuary, but to be actually read to a public that was to react directly to their contents" and that "they replace in content and most probably in form the customary oral report of the king or his representative on the annual campaign to the city and the priesthood of the capital" (JNES 19 [1960] p. 143). With regard to letters of gods in general and this one in particular, see Borger, RLA 3/8 (1971) pp. 575–576; Oppenheim, JNES 19 (1960) pp. 133–147; and Pongratz-Leisten in Hill, Jones, and Morales, *Experiencing Power* pp. 295–301. For a letter to the god, likely coming from the reign of Shalmaneser IV, see Grayson, RIMA 3 pp. 243–244 A.0.105.3; for

one from Esarhaddon, see Leichty, RINAP 4 pp. 79–86 no. 33. Although the text is written in Babylonian dialect, at times Assyrian dialectical features appear (e.g., *lā* for *ul* in line 84, *iqabbûšuni* for *iqabbûšu* in lines 11 and 188, and *išbutū* for *išbatū* in line 177). The Akkadian text is composed in a very literary style and is at times complicated, with regard to both syntax and content (Vera Chamaza, SAAB 6 [1992] p. 128) and, as V. Hurowitz has noted, many passages could be described as “poeticized prose” (Studies Eph’al p. 105 n. 8). For these reasons, it is impossible to give a fully acceptable translation that at all times both reflects the Akkadian syntax accurately and does not violate the rules of good English.

## COMMENTARY

The tablet is made up of one large and several smaller pieces: AO 5372 + VAT 8634 (Ass 17861d) + VAT 8749 (Ass 17861a) + VAT 8698a–c (Ass 17861b,c,g). VAT 8634 and 8749 are shown on the Aššur excavation photograph 5280. AO 5372 was purchased by the Louvre Museum from the antiquities dealer Gėjou in 1910. The fragments in the Vorderasiatisches Museum with the excavation number Ass 17861 were found at Aššur in 1910 in the house of the exorcist (hD81, excavation trench). The tablet is one of the largest cuneiform tablets known; the largest piece, AO 5372, measures 37.5×24.5×4 cm. Its four columns (two on the obverse and two on the reverse) have 109 (1–109), 114 (110–223), 110 (224–333), and 97 (334–430) lines respectively. The scribe, Nabû-šallimšunu, has placed a Winkelhaken to the left of the beginning of every tenth line. There are small holes at regular intervals along all four edges of the tablet and in the space between the two columns on each side of the tablet; the right edge, for example, has eleven holes.

There are numerous studies dealing primarily with the geographical and historical aspects of Sargon’s eighth campaign. In particular, there has been a great deal of discussion over the route taken by Sargon. Did he encircle Lake Urmia or did he only go up its western side? Did he go around or even reach Lake Van? The first editor of this text, F. Thureau-

Dangin (TCL 3), believed that Sargon went up the eastern side of Lake Urmia, continued over to Lake Van, and then went along the northern and western shores of that lake before returning to Assyria via Mušašir. In 1977, however, L. Levine proposed a much shorter route, one that took Sargon around neither Lake Urmia nor Lake Van (Levine in Levine and Young, Mountains and Lowlands pp. 135–151). In a recent publication (Muscarella and Elliyoun, Eighth Campaign of Sargon II [2012]), studies by O.W. Muscarella and S. Kroll came to different conclusions, although both agreed that Sargon did not get close to Lake Van. Muscarella (following work by H.A. Rigg, L.D. Levine, and M. Salvini) believes that Sargon “campaigns solely along Lake Urmia’s southern and western shores and adjacent districts before turning back to Assyria” (pp. 5–9, especially p. 8 [article reprinted in Muscarella, Archaeology, Artifacts and Antiquities pp. 523–530]), while Kroll (following work by P. Zimansky, M. Liebig, and J.E. Reade, and making use of an unpublished study by A. Fuchs) believes that Sargon went around Lake Urmia, although not always close to the coast (pp. 11–17). For the latter view, see also Fuchs in Yamada, SAAS 28 pp. 42–47. Recently, however, J. Marriott and K. Radner (JCS 67 [2015] p. 139) have argued that for reasons of food logistics the campaign cannot have gone around Lake Urmia and was more likely

in the area southwest of that lake. See in addition the following studies: Bagg, *Assyrische Wasserbauten* pp. 130–132; Çilingiroğlu, *Anadolu Araştırmaları* 4–5 (1976–77) pp. 252–271; Danti, *Expedition 56/3* (2014) pp. 27–33; Diakonoff and Medvedskaya, *BiOr* 44 (1987) pp. 388–391; Hipp, *Folia Orientalia* 24 (1987) pp. 41–46; Jakubiak, *IrAnt* 39 (2004) pp. 191–202; Kessler in Haas, *Urartu* pp. 66–72; Kleiss, *AMI NF* 10 (1977) pp. 137–141; Kroll in Köroğlu and Konyar, *Urartu* pp. 160–162; Lehmann-Haupt, *MVAG* 21/3 (1916) pp. 119–151; Levine in Levine and Young, *Mountains and Lowlands* pp. 135–151; Liebig, *ZA* 81 (1991) pp. 31–36 and *ZA* 86 (1996) pp. 207–210; Mayer, *MDOG* 112 (1980) pp. 13–33; Medvedskaya in Parpola and Whiting, *Assyria* 1995 pp. 197–206; Muscarella, *JFA* 13 (1986) pp. 465–475; Reade, *Iran* 16 (1978) pp. 137–143; Reade in Liverani, *Neo-Assyrian Geography* pp. 31–42; Rigg, *JAOS* 62 (1942) pp. 130–138; Salvini, *BiOr* 46 (1989) p. 399; Salvini in Pecorella and Salvini, *Tra lo Zagros*, particularly pp. 15–16 and 46–51; van Loon, *JNES* 34 (1975) pp. 206–207; Vera Chamaza, *AMI NF* 27 (1994) pp. 91–118 and *AMI NF* 28 (1995–96) pp. 235–267 (esp. p. 239 fig. 1 and pp. 253–264); Wiessner, *AfO* 44–45 (1997–98) pp. 146–155; Wright, *JNES* 2 (1943) pp. 173–186; Zimansky, *Ecology and Empire* pp. 40–47; and Zimansky, *JNES* 49 (1990) pp. 1–21. An important unpublished study of the topography and history of the Zagros region by Fuchs was completed in 2004 (*Bis hin zum Berg Bikni: Zur Topographie und Geschichte des Zagrosraumes in altorientalischer Zeit* [Tübingen University, 2004]).

There are several abrupt digressions within the section dealing with the city Muşasir. K. Kravitz (*JNES* 62 [2003] pp. 81–95, especially pp. 94–95) has argued that lines 336–342, 347b–348a, and 411–413 were added to the episode of the sack of that city “when it was already essentially completed” and that the additions “shifted the ultimate outcome of the episode from the punitive plundering of the rebellious Muşasirian vassal to the symbolic disempowerment of the Urartian king” (*ibid.* pp. 81 and 94–95).

V. Hurowitz notes that the total number of lines in the text (including the colophon) is the same as the number of Urartian settlements that Sargon claims to have captured (line 422) and argues that “Presenting to the god a 430 line text imitated symbolically the tribute Sargon offered from the 430 cities he conquered” (*Studies Eph'al* pp. 107–108).

The inscription refers to Rusâ (Ursâ) as being ruler of Urartu at the time of this campaign, but there is some discussion over which Rusâ this was, Rusâ son of Erimena or Rusâ son of Sarduri. Thureau-Dangin thought it was Rusâ son of Erimena, but this view was later opposed by C.F. Lehmann-Haupt who argued for Rusâ son of Sarduri. The latter’s view has predominated in recent scholarship (e.g., Fuchs, *PNA* 3/1 pp. 1054–1056 sub Rusâ 1; and Salvini, *Biainili-Urartu* p. 133). M. Roaf has recently argued that Thureau-Dangin was correct and that the Urartian ruler mentioned in this text was Rusâ son of Erimena (*Aramazd* 5/1 [2010] pp. 66–82; *CRRA* 54 pp. 771–780; and *Biainili-Urartu* pp. 187–216).

4 F. Thureau-Dangin (TCL 3 p. 3), followed by some other scholars (e.g., Fales, COS 4 p. 199), takes *āšib libbiša* to refer to *ēkalli* (“Au palais qui y est situé”) while B.R. Foster (Before the Muses<sup>3</sup> p. 791) treats it separately (“to the palace and the dweller therein”). M. Worthington (Textual Criticism pp. 215–216) argues that an “orthographic–morphological analysis of the manuscript tilts the scales in Foster’s favour.” If *āšib libbiša* did refer to *ēkalli*, we might expect *āšibat* instead of *āšib* since *ēkallu* is normally considered to be a feminine noun.

crossed the Upper Zab River while it was in full (flood). On the third day, in order to muzzle the mouth of the boastful (and) shackle the legs of the wicked, I reverently prostrated myself before the god Enlil (and) the goddess Mullissu. (10) I then had the troops of the gods Šamaš (and) Marduk leap across the Lower Zab River, whose fording is difficult, as if it were a ditch. I entered the passes of Mount Kullar, a high mountain of the land Lullumû, which is (also) called the land Zamua. I held a review of my army in the district of the land Sumbi and checked the number of horses and chariotry.

13-17) With the great support of the gods Aššur, Šamaš, Nabû, (and) Marduk, I directed the march into the mountains for a third time. I turned the chariot(s) (lit.: “pointed the yoke”) of the gods Nergal (and) Adad, (whose) standards go before me, towards the lands Zikirtu and Andia. (15) I advanced in between Mount Nikippa (and) Mount Upâ, high mountains that are thickly covered with all kinds of trees, among which (one becomes completely) confused (as to direction), whose very entry is terrifying, (and) over whose (whole) environs, just as in a cedar forest, a shadow is cast with the result that the one who takes the road through them sees no sunlight. I then crossed the Būya River, the river (which flows) between them, twenty-six times, and (my) army did not fear the floodwaters, despite its (the river’s) massive size.

18-30) Mount Simirria is a great mountain peak that points upward like the blade of a spear and who(se) top is higher than the mountains where the goddess Bēlet-ilī dwells. Its summit touches the sky above, and its roots are made to reach down below into the netherworld. (20) Moreover, like the back of a fish, there is no path from (one) side to (the other) side; (thus) ascending it is very difficult both from the front and from the back. Gorges of the outflows of the mountains are deeply cut into its flanks and to the sight of the eye it is shrouded in terror. It is not fit for the ascent of chariotry (or) for allowing horses to show their mettle and its access is very difficult for (even) the passage of foot soldiers. With the intelligence and broad understanding that the god Ea and the goddess Bēlet-ilī decreed for me and (because) they got me moving (lit.: “opened the legs”) to overwhelm the land

10 Or, following CAD N/2 p. 145, “whose ford is narrow.”

14 <sup>d</sup>ÜRIGAL normally stands for Nergal, but can also stand for Šamaš (see Borger, MZ p. 358). In line 160 we have <sup>d</sup>ÜRIGAL <sup>d</sup>IŠKUR ù <sup>d</sup>iš-tar be-li ta-ḫa-zi, where the three deities are called “the lords of battle.” Since Nergal, Adad, and Ištar all had warrior aspects and since Šamaš did not, it seems likely that <sup>d</sup>ÜRIGAL refers to Nergal here.

15 *qer-bi-šún e-ši-tùm-ma* “among which (one becomes completely) confused (as to direction)”: Or *qer-bi-sún e-ši-tùm-ma* “whose midst is confusion” (suggestion courtesy M. Worthington).

18-24 The Akkadian passage is extremely convoluted and a more literal translation would render it as a single sentence.

19 Or emend to *šur-šud-du*, “... are fixed in ...,” instead of “... are made to reach ... into ...”; so CAD A/2 p. 226 sub *arallû a*.

20 For the phrase *idi ana idi*, see Hirsch, *Orientalia* NS 35 (1966) pp. 413-416.

21 *-ṭil*: The text has *-Aš*.

24 Limestone is a somewhat soft stone, and thus the idea is that the axes cut through the mountain as if it were butter. The mention of the use of axes to cut through mountains reminds one of the same motif in the Birth Legend of Sargon of Akkad (see Lewis, *Sargon Legend* p. 26 line 15).

of (my) enemy, I had my *vanguard* carry strong copper axes; (thus), they cut through high mountain crag(s) as if (they were) limestone and (thereby) improved the path. (25) I took the lead (in front) of my army and made the chariotry, cavalry, (and) battle troops who go at my side, fly over it (the mountain) as if (they were) brave eagles. I had the common soldiers (and) *light infantry* follow behind them; the camels (and) donkeys bearing the baggage leapt up its peaks like ibexes native to the mountains. I had the numerous troops of the god Aššur ascend its difficult slopes in a good order and I (then) set up camp on top of that mountain. (With regard to) Mount Sinaḫulzi (and) Mount Biruatti — remote mountains whose vegetation is the sweet-smelling leek (and) *šumlalû*-plant — Mount Turtani, Mount Sinabir, Mount Aḫšūru, and Mount Sūya, I crossed these seven mountains with (great) difficulty. As if (they were) ditches, I crossed the Rappâ (and) the Arattâ Rivers, the rivers flowing off their slopes, when they were in flood.

31-36) I went down to the land Surikaš, a district of the land Mannea, which is on the border of the lands Karalla and Allabria. Because I do not cease avenging him every year, (when) Ullusunū, the Mannean, heard of the advance of my expeditionary force, without (even exchanging) hostages, he (Ullusunū), together with his magnates, elders, counselors, offspring of his father's house, governors, and officials, who govern his land, speedily came out from his land with a joyful heart and a happy countenance, and, (35) (traveling) from his royal city Izirtu to the city Siniḫini, a border fortress of his land, he came into my presence. He brought me horses trained to the yoke, together with their trappings, oxen, and sheep and goats, as his tribute and he kissed my feet.

37-38a) I came to the city Latašê, a fortress that is (situated) on the river of the land Lāruete, a district of the land Allabria. I received horses, oxen, and sheep (and) goats as tribute from Bēl-aplu-iddina of the land Allabria.

38b-41) I went down to the land Parsuaš. The city rulers of the lands Namri, Sangibutu, (and) Bīt-Abdadāni, and of the land of the powerful Medes heard of the advance of my expeditionary force; the laying waste of their lands that (had occurred) in my previous

25 aš-bat-ma, following CAD § p. 28 and see M/2 p. 51. Or meḥ-rit um-ma-ni-ia az-ziz-ma, "I stood facing my army and," following AHw p. 640 sub meḥretu(m) 3c. še\*-: The text has AD-.

26 kal-la-pu, "light infantry": The exact meaning of the term *kallābu/kallāpu* remains uncertain and the translation follows CAD K p. 77 sub *kallābu*. See Postgate, Iraq 62 (2000) pp. 104-105 and Dezsö, Assyrian Army 1/1 p. 60. J. Scurlock (CRR 52 pp. 724-734) argues that it is "the inactive partners of regular cavalrymen" who later "developed into a corps of lancer cavalry" (ibid. p. 731); and F.M. Fales suggests that it refers to regular Assyrian infantry or unarmored cavalry (Studies Oded pp. 88-93).

29 The text refers to seven mountains, but only six are named in lines 28-29. It is possible that one was omitted or that Mount Simirria was the seventh.

32 la-pa-rak-ku-ú: Presumably for *lā apparkkū*; see CAD N/1 p. 280.

year was (still) in their minds (lit.: “their ears”) and deathly quiet overwhelmed them. They brought me their substantial tribute from their lands and handed (it) over to me in the land Parsuaš.

42–50) From Taltâ (Daltâ) of the land Ellipi, U(a)ksatar, Dürēsi, (and) Satarēšu, the city rulers of the river- (land), Anzî of the city Ḫalḫubarra, Payukku of the city Kilambāti, Uzî of the city Māli, Uakirtu of the city Nappi, Makirtu of the city Bīt-Sagbat, Kitakki of the city Uriangi, (45) Mašdayukku of the city Kingaraku, Uzitar of the city Qantāu, Payukku of the city Bīt-Kapsi, Ḫumbê of the city Bīt-Zualzaš, Uzumanda <of> the city Kisilaḫa, Burburazu of the city Bīt-Ištar, Baga-parna of the city Zakruti, Dārî of the land Šaparda, Ušrâ of the city Kanzabakanu, Sarruti of the city Karzinû, Mašdaku of the city Andirpattianu, Akkussu of the city *Usigur*, Birtātu of the city Šibur, Zardukka of the city Ḫarzianu, Mašdaku of the city Aratista, Satarpānu of the city Barikānu, (and) Karakku of the land Uriakku, I received swift horses, fiery mules, Bactrian camels native to their land(s), oxen, and sheep and goats.

51–63) Moving on from the land Parsuaš, I came to the land Missi, a district of the land Mannea. With the whole-hearted intention of doing obeisance (to me), Ullusunu, together with the people of his land, waited for my expeditionary force in the city Sirdakka, his fortress. As if (he were one of) my (own) eunuchs, provincial governors of Assyria, he had piled up in heaps flour (and) wine to feed my army; he (then) presented to me his eldest son, with presents (and) gifts, and in order to firmly establish his position as king, he entrusted his *stele* to me. (55) I received from him large horses trained to the yoke, oxen, and sheep and goats as his tribute, and he prostrated

47 With regard to the Iranian name Baga-parna, see Eilers, ZDMG 90 (1936) p. 178 n. 1; Fuchs and Schmitt, PNA 1/2 p. 251; and Schmitt, *Iranische Personennamen* p. 59.

48 URU.ú-si-gur<sup>?</sup>: See the copy for gur<sup>?</sup> in the minor variants section. F. Thureau-Dangin suggests possibly URU.ú-si-is (TCL 3 p. 10 n. 5); W. Mayer (*Assyrien und Urartu* I p. 100) reads URU.ú-si-ib.

49 For Aratistia (previously read URU.a-rad-pa-ti), see also KUR.a-<sup>r</sup>rat<sup>1</sup>-is-ta in text no. 82 vi 28’ and URU.a-ra-ti-iš<sup>2</sup>-ta in text no. 117 ii 58.

54 na-ra-a-šu, “his *stele*”: Quite possibly an error for *kád-ra-a-šu*, “his gift” (suggestion of S. Parpola); cf. text no. 1 lines 368 and 460, and text no. 2 lines 352 and 437.

himself before me in order to return the favors he had received (from me). He, together with the magnates (and) governors of his land, implored me to bar (the people of) the land Kakmê, an evil enemy, from (setting) foot in his land, to bring about the rout of Ursâ (Rusâ) on the battlefield, to restore the scattered land Mannea, to stand in triumph over his enemy, and to achieve whatever (he) wanted; they (Ullusunu and his officials) kept groveling before me on all fours like dogs. I had pity on them and accepted their supplications. I listened to their beseeching words and said to them “So be it” (lit.: “Enough”). (60) Because of the supreme might that the gods Aššur (and) Marduk had granted me and (so) had made my weapons prevail over (those of) all (other) rulers in the world, I promised them to overthrow the land Urartu, to restore their (true) boundaries, (and) to bring relief to the troubled people of the land Mannea; and, (as a result) they had confidence (again). I set out a table of honor before Ullusunu, the king, their lord, and (thereby) elevated his rule (lit.: “throne”) above that of Iranzi, the father who had begotten him. I had them sit at a festive table with the people of Assyria and they (then) blessed my kingship in the presence of (the god) Aššur and the gods of their own land.

64–73) Zizî of the city Appatar (and) Zalāya of the city of Kitpat – city rulers of the district Gizilbunda, who dwell in remote mountains, far-off place(s), and like a barricade bar (the way) into the region of the lands Mannea and Media – and the people who dwelt in those cities put their trust in their own strength and were not used to being ruled (lit.: “did not know lordship”). None of the kings, my predecessors, had ever seen their abode(s), heard their name(s), (or) received tribute from them. [At] the great command of the god Aššur, my lord – who had granted me as a gift the subjugation of the rulers of the mountain regions and the receipt of presents from them – they heard of the [progr]ess of my expeditionary force and fear of my brilliance overwhelmed them. Fear fell upon them in the midst of their (own) land. (70) From the cities Appatar and Kitpat they brought me as their tribute countless horses trained to the yoke, oxen, and sheep and goats; they brought (these) before me in the city Zirdiakka of the land Mannea. They besought me to spare their lives and they kissed my feet so that (I would) not demolish their (city) walls. Moreover, for the well-being of their land, I appointed a qīpu-official over them and assigned them to the authority of a

56 KUR.ka-ak-mi-i, “land Kakmê”: Kakmê/Kakmî is the name of the land Urartu in the Mannean language; see Fuchs, Khorsabad pp. 440–441.

65 Borger, BiOr 17 (1960) p. 166a sub 107b suggests <bi>-rit instead of šid-<di> (following Bauer, Lesestücke 1 p. 85 sub line 110) and GÍŠ.RI (for talli) instead of giš-ri.

67 “None of the kings .. from them”: This is actually a relative clause in the text, beginning with the relative conjunction ša.

eunuch (lit.: “eunuchs”) of mine, the governor of the land Parsuaš.

74–78) Moving on from the city Zirdiakka, a fortress of the land Mannea, I marched furiously a distance of thirty leagues between (the territory of) the land Mannea, the land Bīt-Kabsi, and the land of the powerful Medes. I then came to the city Panziš, its strong fortress, which is situated as a guard post on (the border with) the lands Zikirtu and Andia (and) which is fortified against (these) two districts in order to prevent any fugitive getting away (and) to block any incursion by (lit.: “the feet of”) the [ene]my. I reinforced the defenses (lit.: “structure”) of that fortress and sent up into it barley, oil, [wine], and [ba]ttle ge[ar].

79–90) Moving on from the city Panziš, I crossed the Ištaraurâ River. I came to the land Aukanê, a district of the land Zikirtu. Mitatti of the land Zikirtu — who had thrown off the yoke of <the god Aššur>, held Ullusunu, the king, his lord, in contempt, and disregarded his position as vassal — put his trust in Ursâ (Rusâ), the Urartian, who like himself had no wisdom, an ally who could not save his life, and, full of fear, he went up onto Mount Uašdirikka, a rugged mountain. Then, (when) he saw from afar the advance of my expeditionary force, his body trembled (in fear). He gathered together all the people of his land and made (them) climb with (great) difficulty up distant mountains; their whereabouts have never been discovered. Moreover, (as for) him, his royal city Parda had no value in his eyes and (so) he abandoned the property of his palace and left town (lit.: “went outside”). (85) He mobilized his horses and his battle troops and brought (them as) auxiliary troops to the aid of Ursâ (Rusâ), his ally. I defeated his fierce combat troops who were stationed as a guard post in a pass at Mount Uašdirikka and I conquered all the cities Išta’ippa, Saktatuš, Nanzu, Aukanê, Kābani, Gurrusupa, Raksi, Gimdakrikka, Barunakka, Ubabara, Sitera, Taštami, (and) Tesammia — their twelve strong, walled cities — together with eighty-four settlements in their environs. I destroyed their (city) walls. I set fire to the houses inside them and, as if the Deluge had destroyed (them), I heaped up (their remains) into (ruin) mounds.

75 -riš\*: The text has -šID.

87–89 As noted by W. Mayer (MDOG 115 [1983] p. 77), although the text refers to a total of twelve cities, thirteen cities are mentioned. F.M. Fales (COS 4 p. 202 n. 35) suggests that if this is not a mistake, Aukanê may not have been included in the count since it could also refer to the entire region.

91–95) Moving on from the land Aukanê, I came <to> the land Uišdiš, a district of the land Mannea that Ursâ (Rusâ) had annexed. Before my time, Ursâ (Rusâ), the Urartian — who did not obey the command(s) of the gods Aššur (and) Marduk, who did not revere (any) oath (sworn) by the lord of lords, a mountain dweller (and) a murderer (lit.: “seed of murder”), one who had no wisdom, whose lips were nimble in speaking slanderous (and) malicious things, (and) who did not obey the venerable command(s) of the god Šamaš, the great judge of the gods, but (instead) kept on transgressing against his (Šamaš’) design(s) every year without fail — after (all) his previous sins, committed a great crime that (led to) the destruction of his (own) land and the striking down of his (own) people.

96–111) On Mount Uauš — a large mountain, whose peaks reach up into the sky with the cloud(s); whose area no living creature since the distant past had (ever) crossed; whose remote region(s) no [trav]eler had (ever) visited; and over which no winged bird of the sky had ever passed or [bui]lt a nest in order to teach [its] young how to spread (their) wings; a high mountain that points upward like the blade of a dagger; whose interior [is deeply cut up by] the gorges of the outflows of the dist[ant] mountains; (100) (a mountain) upon which perpetual (lit.: “day and night”) snow is piled up in (the seasons of both) extreme heat and severest cold, when the rising of the Bow star (and) Arrow star [are continually present] <in> the morning (and) evening (respectively), and whose entire face is co[vered with frost] and ice; (and) where the body of the one who crosses its border is blasted by fierce wind and his flesh frostbitten by the

90 DU<sub>6</sub>\*-: The tablet has DUL-.

92 el-la-mu-ú<sup>2</sup>-a, “Before my time”: Or “before my arrival” (see CAD E p. 101).

95 Or “committed the great crime of destroying his (Ullusunu’s) land and striking down his (Ullusunu’s) people.” The assumption that it was Rusâ’s own land and people that were harmed is based on the translation of F. Thureau-Dangin (TCL 3 p. 17), followed by P. Talon (Annales assyriennes 1 p. 83), F.M. Fales (COS 4 p. 202), and several other scholars; the view that it was Ullusunu’s land and people is that of W. Mayer (MDOG 115 p. 77), followed by B.R. Foster (Before the Muses<sup>3</sup> p. 796). With regard to this matter, see Fuchs, SAAS 8 pp. 113–114.

96–147 See Scurlock, Studies Astour pp. 498–503 for a study of the battle tactics used in the battle at Mount Uauš. Note also Grekyan, Aramazd 5/1 (2010) pp. 83–95. Mount Uauš has been identified with Mount Sahand in northwestern Iran by some scholars (see for example Kroll in Muscarella and Elliyoun, Eighth Campaign of Sargon II p. 13).

98 Or DUMU.MEŠ instead of TUR.MEŠ, following CAD Q p. 80 sub qanānu a.

99 G. Vera Chamaza (AMI NF 27 [1994] p. 117) suggests ... ru-qu-[u-te ḫu-du-du] šur-... (cf. line 21), erroneously omitting the ú sign before šur. While the trace of the sign copied by O. Schroeder and E. Weidner immediately after the break could be <sup>r</sup>du<sup>1</sup>, and thus allow a reading [... ḫu-du]-<sup>r</sup>du<sup>1</sup>-ú, it is not clear that there is sufficient room for all the proposed restoration. R. Rollinger (Studies Lanfranchi p. 614) restores ru-qu-[u-te šut-tuq]-ú (cf. line 326).

100 The Bow star and the Arrow star are in the constellation Canis Major and the latter star has been identified with Sirius. See Reiner and Pingree, BibMes 2/2 pp. 11–12 and CAD Š/3 p. 228. <sup>r</sup>uš<sup>21</sup>-[ta<sup>2</sup>-ba<sup>2</sup>-ru<sup>2</sup>]-ú, [are continually present]: The restoration is based on CAD Š/3 p. 229; G. Vera Chamaza (AMI NF 27 [1994] p. 117) suggests instead [na-pa-ḫu ...] since the verb napāḫu is well attested in connection with stars and heavenly bodies.

101 Following Van Buylaere, Studies Parpola p. 299, possibly restore šal-gu, “snow,” rather than ḫal-pu-ú, “frost”; however, šalgu already appears earlier in the line.

se[vere cold] — (on this mountain) he (Rusâ) mustered his large army, together with his allies. Then, in order to [ave]nge [Mitatti] of the [land Ziki]rtu, he assembled his fighting men, (men) skilled in battle (and) the mainstay of [his] ar[my (...)]. He mobilized [th]eir [...] and (105) [...] their swift riding horses, [and had] them take up (their) weapons. Mitatti of the land Zikirtu who from [...]; aid was provided to him. From all the kings of the mountainous regions in his environs [... he tu]rned and he obtained (military) support. [He trusted] in the main force of his large army and the reinforcements [of ... and] he held [my troops] in contempt. [Thinking of] the fame of his (own) abilities in battle [and believing himself to be] one who was my equal in strength, (110) his heart wanted to meet me in pitched battle, mercilessly planning the rout of the army of the divine Enlil of Assyria (the god Aššur). He drew up (his) battle line in a pass at that mountain and sent a messenger (challenging me) to combat and to join in battle.

112–115) I, Sargon (II), king of the four quarters (of the world), shepherd of Assyria, who keeps oath(s) (sworn) by the gods Enlil (and) Marduk (and) pays attention to the decision of the god Šamaš; the offspring of (the city) Baltil (Aššur), the city of wisdom (and) understanding (lit.: “open with regard to ears”); who reverently pays heed to the words of the great gods and does not question their plan(s); the just king, who (only) speaks benevolently, for whom slander is anathema, (and) from whose mouth (orders) to commit treachery (and) do wrong never come forth; wisest ruler in the world, who was created with intelligence and understanding, (and) who upholds with his hand reverence for the gods and goddesses — 116–122) To the god Aššur, the king of all the gods, lord of (all) the lands, begetter of everything, king of all the great gods, one who controls (all) regions (of the world); almighty lord of (the city) Baltil (Aššur),

105 Possibly iš-<sup>r</sup>ba<sup>1</sup>[at-ma ...], “he sei[zed ...],” following Mayer, *Assyrien und Urartu I* p. 106.

107 [i<sup>1</sup>-tu<sup>1</sup>]-ram-ma “[he tu]rned and”: Or [i<sup>1</sup>-pu<sup>1</sup>]-ram-ma “[he se]nt and.”

109 The tentative understanding of this line is based on that of B.R. Foster (Before the Muses<sup>3</sup> p. 796).

111 na-kaḥ, “pass”: The reading follows CAD N/1 p. 156; however, na-gáb, “spring” would also be possible.

116 a-lid gim\*(text: BI)-ri, “begetter of everything”: B.R. Foster (Before the Muses<sup>3</sup> p. 797) translates “begetter of the Mighty One,” reading a-lid gaš-ri; he takes this to refer to the god Ninurta. Ninurta is called “mighty one” in line 6 of this text. See, however, Fales, *COS 4* p. 203 n. 55.

117 The end of the line is obscure and the very tentative translation “has put the proud to confusion” assumes that the verb is ešû in the Š-stem (a rarely attested form) and that *lalânâte* modifies an unexpressed *nišê*, “people.” The basic meanings of *lalânû* are “luxuriant, happy” (*lalânû A*) and “indigent, powerless” (*lalânû B*) according CAD L p. 46, and “flourishing, luxuriant” and “indigent, powerless” according to CDA p. 176 (sub *lalânû*). V. Scheil (RA 16 [1919] p. 203) has ...-ma uštašila lanâte, “et a étendu des rets”; W. Mayer (Assyrien und Urartu I pp. 108–109) has ...-ma uš-ta-<sup>aḥ</sup>-šî-la la-na-a-te, “... indem er die Gestalten<sup>2</sup> zerschlägt?”; and B.R. Foster (Before the Muses<sup>3</sup> p. 797) has “pulverizes their bodies.” G. Vera Chamaza (AMI NF 27 [1994] p. 117) suggests uš-ta-<sup>aḥ</sup>-šî-la la-na-a-de<sub>4</sub> (i.e., “has crushed the impious”) and P. Talon (Annales assyriennes 1 pp. 84–85) suggests uš-ta-pi<sup>1</sup>-la la-na-a-ṭe<sub>4</sub>, “qui transforme ceux qui ne sont pas convenables (?)”; however, TE is not normally

IGI.II ul ar-ši

(the god) who in his great raging anger *crushes* the rulers of the world and *has put the proud to confusion*; the honored one, the hero from whose net the evildoer cannot escape and (with whose net) the one who does not respect an oath (sworn) by him (the god Aššur) is eradicated (lit.: “his root is torn out”); with respect to the one who does not revere his (the god Aššur’s) name (and) (instead) trusts in his own strength, disregards the greatness of his (the god Aššur’s) divine nature, and talks boastfully, (120) he (the god Aššur) rushes angrily against him in the heat of battle, shatters his weapons, and scatters his well-organized forces to the wind. Moreover, with respect to the one who observes the judgment(s) of the gods, trusts in the fair decision of the god Šamaš, and reveres the divine nature of the god Aššur, the divine Enlil of the gods, he (the god Aššur) has fierce axes go at his side (and) causes him to stand in triumph over (his) enemies and foes

—  
123–126) Because I had never crossed the border of Ursâ (Rusâ), the Urartian. (nor) the boundary of his wide land, (and because) I had never spilled the blood of his warriors on the (battle)field, I raised my hand (in prayer to the god Aššur) to bring about his (Rusâ’s) overthrow in battle, to turn his insolent utterances against him, and to make (him) bear his punishment. (125) The god Aššur, my lord, listened to my just words and they were pleasing to him. He was inclined (lit.: “turned”) to my righteous entreaty and was amenable to my petition. He dispatched at my side his fierce weapons which, whenever they go forth, crush the uncompliant from the east to the west.

127–131) The exhausted troops of the god Aššur, who had (already) come a long journey and were tired and weary, had (had to) cross innumerable remote mountains that were difficult to ascend (and) descend, and they were (thus) in poor condition (lit.: “their appearance had changed”). (However), I neither allowed them (time) to recover from their fatigue nor gave (them) water to drink for (their) thirst. I neither set up camp nor organized a walled (military) encampment. (130) I did not give orders to my warriors. I did not assemble my (military) contingents. I did not summon (lit.: “return”) to my side the right and left wings (of my army); I did not wait for the rear guard. I did not take fright at the main force of his army. I distained his cavalry (lit.: “horses”) and did not (even) glance at his numerous armored warriors.

attested with the value  $de_4/te_4$  during the time of Sargon II (see von Soden and Röllig, Syllabar<sup>3</sup> p. 41). See also F.M. Fales (COS 4 pp. 203–204 and n. 56), who translates “pulverizes the impious,” although stating that the passage is difficult. CAD M/1 p. 357 (with the verb *mašālu*) reads *uš-ta-ši-la la-na-a-te* and translates the passage as “... their bodies”; however, it should be noted that no feminine plural form of the noun *lānu* is attested and that *lalānāti* appears in line 265. Could *la-na-a-te* be an error for *ad-na-a-te* (suggestion courtesy J.N. Postgate)?

132–151 For a study of the metaphorical language in this passage, see M. Van De Mieroop, *Kaskal* 12 (2015) pp. 292–299. *ki-tul-lum*: CAD K p. 476 (followed by CAD P p. 411) tentatively takes *kitullum* here as standing for *iḏāya* and thus translates it as “(my) side(?)”, and this view is tentatively followed here, but AHw p. 495 assumes it refers to a troop formation. M. Worthington (Textual Criticism p. 199) emends the text to

132–140) With (only) my personal chariot and the horse(men) that go at my side (and) never leave (me) in either hostile or friendly territory, the *contingent* of Sîn-aḫ-ušur, I fell upon him (Rusâ) like a fierce arrow, inflicted a defeat on him, and turned back his attack. I inflicted a major defeat upon him; I spread out the corpses of his warriors like malt (spread out for drying) and filled the mountain uplands (with them). (135) I made their blood flow down the gorges (and) gullies like a river and I dyed the steppe, countryside, (and) plains red like the *illūru*-plant. (As for) the fighting men who were the mainstay of his army, (his) bowmen (and) spearmen, I slaughtered (them) at his feet like sheep and cut off their heads. In the midst of the plain I shattered the weapons of his nobles, counselors, (and) courtiers, and I seized them, together with their horses. I captured two hundred and sixty members of his royal family, eunuchs, his provincial governors, (and) his cavalymen, and I broke up (their) battle order. Moreover, (as for) that (man), I shut him up in the *midst* of his (military) camp and I shot his yoke-trained horses out from under him with *uššu*-arrows (and) *mulmullu*-arrows. In order to save his life, he abandoned his chariot, mounted a mare, and fled in front of his army.

141–147) (As for) Mitatti of the land Zikirtu, together with the kings in his environs, I struck all of them down and broke up their (military) contingents. I brought about the rout of the troops of the land Urartu, an evil enemy, together with its auxiliary troops, and on Mount Uauš, he (the enemy) turned tail. Their horses filled the gorges of the outflows of the mountains, while they, like an ant, in desperation opened up narrow paths. I went up after them with my mighty raging weapons, filling both slopes (lit.: “ascent and descent”) with the corpses of (their) warriors. (145) I pursued him at arrow point for a distance of six leagues, from Mount Uauš to Mount Zimur, the mountain of jasper. (As for) the remainder of the

*ki-tul-lum pe-er-ra-<ni>* since *perra* “would be morphologically aberrant on this manuscript” and translates “the *kitullu*, p. of Sîn-ah-ušur.” As noted by Worthington, “the *kitullu* and the *perrā-<ni>* of Sîn-ah-ušur could either stand in apposition to the cavalry, or be listed alongside them as separate items.” A Sîn-aḫ-ušur who was a brother of Sargon II is attested in text nos. 2002–2003. Although the copy in the first edition of TCL 3 indicated that there were traces of one or possibly two signs at the end of line 132, these traces were omitted in the second edition of the volume. Collation of the tablet by both T. Kwasman and the author indicates that there are indeed faint traces of possibly two signs there, but also that the signs are rubbed (or erased by the scribe). Kwasman suggests that the scribe may have originally intended to write a title (i.e., <sup>r</sup>LÚ<sup>1</sup>.x) after the personal name or possibly give the name of Sargon’s son Sennacherib (i.e., <sup>m</sup>30-PAP.PAP.<sup>r</sup>SU<sup>2</sup>-ba<sup>r</sup>) rather than that of Sîn-aḫ-ušur (private communication).

135 The *illūru*-plant may have been the anemone.

140 Two of Tiglath-pileser III’s royal inscriptions (Tadmor and Yamada, RINAP 1 p. 85 Tiglath-pileser III no. 35 i 33’ and p. 103 Tiglath-pileser III no. 41 line 20’) refer to the Urartian ruler Sarduri fleeing from the Assyrians on a mare. This could suggest that the Assyrians considered it ignoble for a ruler to ride a mare.

143 *ú-pat-tu ú-ru-uḫ* is likely a sandi writing for *ú-pat-tu-ú ú-ru-uḫ* or involves a case of haplography (suggestion M. Worthington).

145 “at arrow point”: As noted by F.M. Fales (COS 4 p. 205), the idea is probably that Sargon pursued Rusâ almost within “shooting distance with his bow — for all of six *bērus* (approximately 66km) in the latter’s flight.”

people who had fled in order to save (their) lives (and whom) I had let go in order that they might extol the might of the god Aššur, my lord — the powerful god Adad, the valiant son of the god Anu, let loose his terrifying roar against them and finished off those remaining by means of cloudbursts and hailstones.

148–155) Their ruler Ursâ (Rusâ) — who had transgressed the limits set by the gods Šamaš (and) Marduk and had not honored the oath (sworn) by the god Aššur, the king of the gods — became afraid at the clangor of my mighty weapons and his heart pounded like (that of) a rock partridge fleeing before an eagle. (150) He abandoned his royal city Ṭurušpâ as if (he was) one who had committed bloodshed and sought refuge in mountain clefts like (an animal) fleeing from a hunter. He was laid up in bed like a woman in labor; he deprived himself of food and drink and brought upon himself a sickness from which no one ever recovered. I established the might of the god Aššur, my lord, over the land Urartu for all time and left behind in him (Rusâ) a terror never to be forgotten in the future. (By means of) the might of my supreme power and the onslaught of my exalted weapons — (weapons) that cannot be faced (anywhere) <in> the four quarters (of the world), (that) do not turn back, (and that) I made prevail over the land Urartu in heroic battle — I drenched the people of the lands Zikirtu and Andia with deadly venom. I bared the evil enemy from (setting) foot in the land Mannea, pleased the heart of their (the Mannans') lord Ullusunu, and provided light for his troubled people.

156–161) I, Sargon (II), who protects justice (and) does not transgress against the limits set by the gods Aššur (and) Šamaš, who is always humble, (and) who reveres the gods Nabû (and) Marduk, attained my heart's desire with their (the gods') firm approval and stood in triumph over the proud one who was hostile to me. I poured out deathly silence over all the mountains and (so) inflicted consternation and moaning upon the enemy people. I entered into my camp amidst happiness and rejoicing, accompanied by musicians (playing) lyres and cymbals. I offered splendid pure sacrifices to the deities Nergal, Adad, and Ištar, the lords of battle, the gods who dwell in (both) heaven (and) netherworld, and the gods who dwell in Assyria; I stood before them humbly and prayerfully, and I extolled their divine nature.

149 *iššūr hurri*, “rock partridge”: Salonen, Vögel pp. 143–146 identifies the *iššūr hurri* with *Tadorna casarca*, a type of ruddy shelduck.

150 *mun-nab-ti ša-a-a-di*, “(an animal) fleeing from a hunter”: Or possibly “a restless vagrant” following W. Mayer (MDOG 115 [1983] p. 83) and F.M. Fales (COS 4 p. 205).

159 CAD T pp. 177–178 takes *tāpalu* (*tābalu*), which normally means “pair, set of two,” to also refer to some type of percussion instrument. CDA p. 398 tentatively suggests they may be castanets and P. Talon (Annales assyriennes 1 p. 87) cymbals; B.R. Foster (Before the Muses<sup>3</sup> p. 799) takes them to be flutes.

160 Nergal: See on-page note to line 14.

- 178) *i-na ti-bu-ut GIŠ.TUKUL.MEŠ-ia dan-nu-ti a-na*
- 162-166) I discontinued my campaign to the lands Andia and Zikirtu, my (original) destination, and I set out for the land Urarṭu. (With regard to) the land Uišdiš, a district of the land Mannea that Ursâ (Rusâ) had annexed and appropriated for his own, I conquered all its numerous cities, which are as innumerable as the stars in the sky. I smashed their very strong (city) walls down to their very foundations as if (they were) pots and I leveled (them) to the ground. I opened up their many, countless granaries and (then) fed my army grain in unlimited quantities.
- 167-173) Moving on from the land Uišdiš, I came to the city Ušqaya, a large fortress right on the border of the land Urarṭu, which like a gate acts as a barrier in the pass to the district of Zaranda, holding back messenger(s), and (which) rises up like a rocky pinnacle on Mount Mallâu, a mountain with juniper tree(s), clothed in sun-like splendor over the meadowland(s) of the land Sübi. (170) The people who dwell in that district have no equal in the whole land Urarṭu with respect to (their) skill with riding horses. Every year they catch the young foals of thoroughbred horses native to his (the king's) wide land, which they rear for his royal (military) contingent. Until they (the young horses) are taken to the district Sübi — which the people of the land Urarṭu call the land Mannea — and (until) it is observed how they perform, no one attempts to ride them (lit.: “opened the thigh(s) on back of them”), nor are they (the young horses) taught how to advance, turn about, and turn back again — (skills) necessary in battle — (thus) the harness(es) (for them) remain as yet unfastened.
- 174-177) These people — those of (both) the fortress and the district — saw the defeat of their lord Ursâ (Rusâ) and their legs grew weak, like roots on a riverbank. (When) their leaders — (men) experienced in warfare who had (nevertheless) fled before (my) weapons — came up to them drenched in deadly venom (and) reported to them the glory of the god Aššur, my lord (and) that not (even) a (single) one of all their fighting men had escaped, they became like the dead. They turned the city Ušqaya on which their (lit.: “its/his”) land relied, together with its surrounding settlements, into a wasteland. They abandoned their property and took to the road, never to return (lit.: “road of no return”).
- 178-183) With the onslaught of my mighty weapons, I

167 Ušqaya has been identified with the Urarṭian fortress of Livar (in the region of Marand) by P. Zimansky (JNES 49 [1990] p. 15; see also S. Kroll in KÖroğlu and Konyar, Urartu p. 161).

173 šup-ṭu-<sup>r</sup>ur<sup>1</sup> ši-mit-tu “(thus) the harness(es) (for them) remain as yet unfastened”: We would expect šup-ṭu-rat rather than šup-ṭu-ur. CAD P p. 301 translates the passage as (the horses) “had been freed from the harness.” Cf. von Soden, OLZ 59 (1964) col. 36 sub S. 199a (šub-ṭu-lu).

went up to that fortress, carried off extensive property as booty and brought (it) into my camp. (With regard to) its strong (city) wall, whose foundation had been made firm on bedrock and whose width was eight cubits, (180) beginning with its crenellations and finishing with its massive foundations, I destroyed (it) all together, making (it) level with the ground. I set fire to the houses inside it and turned their lengthy (roof)-beams into ashes. I set fire to one hundred and fifteen settlements in its environs as if (they were) brushwood pyres and (so) made the smoke from them cover the sky like a dust storm. I had its interior made (to look) as if the Deluge had destroyed (it) and I heaped up its inhabited cities as if (they were) mounds of ruins.

184–187) I destroyed the city Aniaštania — the home of his herds, which had been built on the border of the land Sangibutu, between the cities Ušqaya and Tarmakisa — together with seventeen settlements in its environs, leveling (them) down to the ground. I set fire to their lengthy roof-beams. I burned up their crops (and) their fodder (lit.: “straw”). I opened up (their) granaries (and) storehouses and (then) fed my army grain in unlimited quantities. I let the animals of my (military) camp loose in his meadows like swarming locusts; they pulled up the plants on which he relied and laid waste to his field(s).

188–198) Moving on from the city Ušqaya, I came to the steppeland on which his herds rely (for pasture) (and) which is (also) called the land Sangibutu. (With regard to) the cities Tarui (and) Tarmakisa — strong fortresses that had been built in the meadowland(s) of the land Dalāya as (store)houses for his abundant grain, (190) whose (inner) walls had been reinforced, whose outer walls had been (well) joined, whose moats had been made deep and surrounded their (entire) circumference, (and) inside which horses were stationed in teams as reserves for his royal (military) contingent and were provided with fodder for the entire year — the people who dwell in that district saw the lordly deeds that I had been doing in the settlements in their environs and became terrified. They abandoned their cities and fled into the desert, an arid land, a waterless region (lit.: “place of thirst”), seeking (to save their) lives. I overwhelmed that district as with a bird trap and waged war in (the area) between their fortified cities. (195) [Beginning]

183 qer-bi-sa “its interior”: Or simply translate “it,” assuming that this refers to the fortress rather than its environs (suggestion M. Worthington). kam-ri for kar-mi (see CAD K p. 218); cf. Borger, BiOr 19 (1962) p. 252b sub S. 157ff.

184 ep-šu-u (collation T. Kwasman). The scribe initially wrote ep-šu-u, with the signs closer to the preceding line and with the U on the edge of the tablet; he then partially erased the EP and ŠU and redid them somewhat lower on the tablet, thus leaving the U much higher than the new EP and ŠU.

188 The reading mad-ba-ri, “steppeland” (as opposed to KUR.ba-ri, “land Bari”), follows CAD M/1 p. 12 sub madbaru b.

189 Or “which had been built in the land Dalāya, a territory with numerous (store)houses for his grain” (cf. Talon, Annales assyriennes 1 p. 89). ŠE.PAD.MEŠ-šú ma-at-ti, “his abundant grain”: For the use of MEŠ to mark a sumerogram, as opposed to the plural, see Borger, MZ p. 376 and Worthington, Textual Criticism pp. 284–287.

with [their crenellations (and)] finishing [with] their foundations, I destroyed their [stro]ng (city) walls, making (them) level with the ground. [I set] fire to the houses inside them [and] turned their lengthy [(roof)-beam]s into ashes. I burned up their abundant crop(s), [ope]ned [up (their) granaries (and) storehouses, and] (then) fed my army [grain] in unlimited quantities. [I set fire to] thirty settlements in their environs [as if (they were) brushwood pyres and (so) made the smoke from them] cover the sky [like a dust storm].

199–212) Moving on from the city Tarmakisa, I came to [...]. Ul<sup>h</sup>u, a fortified city that [is situated] at the foot of Mount Kišpal [...]. Moreover, its people drink [water] like fish for [their thirst ...], (but) cannot get enough (to quench their thirst). In accordance with [his heart's] desire, Ursâ (Rusâ), the king, their lord, [...] discovered (lit.: “revealed”) [a so]urce of water. He d[ug] a canal which could carry off the overflowing water [and ...] he made abundant [water] flow like the Euphrates. He had innumerable irrigation ditches run off from it (the canal) [and ...] ... he had the pasture lands irrigated. (205) His uncultivated field(s) that for a long time had [...] ... and caused fruit and wine to pour forth like rain. He had plane trees (and) šurathu-trees, the pride of [his] palace, [...], form a canopy over its meadowland(s) like a forest. Moreover, [he brought back] the ara[<sup>h</sup>hu-song] to his abandoned pasture land(s) [(...) and (...)] caused his people to sing (again) the sweet alālu-work song. He caused three hundred homers of seed-field to produce the choicest grain in [its furrows] (so) abundantly that he increased the yield of grain for disposal. He turned the uncultivated field(s) of his agricultural land into meadows [...] so that there is (always) new vegetation in the spring (and so that) grass and pasturage do not cease in (either) winter (or) summer. (210) He turned it (the meadows) into paddocks for horses and herds (of cattle), and he taught (this) entire remote land (the

195–198 The restoration of these lines is based on that proposed by Thureau-Dangin, TCL 3 p. 32, which is based on lines 180, 181, 186, and 268 (also 182) respectively.

200–212 For a study of the water-related facilities described in this section and an edition of these lines, see Bagg, Assyrische Wasserbauten pp. 127–146 and 319–326 no. 26. J. Laessøe (JCS 5 [1951] pp. 21–32) proposed that a qanat is described in this section; however, Laessøe's suggestion is no longer accepted by most scholars. See most recently Bagg, Assyrische Wasserbauten pp. 128–130. Furthermore, the restoration KUR.kiš-pal in line 200 was proposed by F. Thureau-Dangin and is based upon text no. 1 line 140; W. Mayer (Assyrien und Urartu I p. 116) prefers to restore KUR.kiš-te-er (see line 212); cf. line 272.

201 The tentative restoration and understanding of this line is based on Schott, Vergleiche p. 97 (who also suggests restoring da-al-<sup>h</sup>u-ú-ti after A.MEŠ) and CAD Š/2 p. 252; for other possibilities, see Bagg, Assyrische Wasserbauten p. 322.

204 Laessøe, JCS 5 (1951) p. 32 suggests [... i-na A.MEŠ ša ú-še]-lu-ú, “[with the water which he had brought up ([ra]ised).”

206 GIŠ.šu-rat-<sup>h</sup>u, “šurathu-trees”: B.R. Foster (Before the Muses<sup>3</sup> p. 802) suggests they may be walnut trees; see also Mayer, Assyrien und Urartu I p. 117.

207 The reading follows CAD A/1 p. 328. B. Meissner (ZA 34 [1922] p. 114, followed by Fales, COS 4 p. 207 n. 85), reads kīma ili (i.e., GIM DINGIR), “like a god,” but alāla is often preceded by the divine determinative and is found after rigim in the Erra Epic III 18 (see CAD A/1 p. 328).

209 Cf. the old reading ma-di-iš pa-an šat-<sup>r</sup>ti; see Bagg, Assyrische Wasserbauten p. 324 for the various ways that that passage has been understood.

use of) cam[el(s)] so that they could (be employed to) construct weir(s). He [built] a palace, a royal abode for his leisure, on the bank of the canal; he roofed it with beams of juniper and (thus) made it smell sweet. [He had] the fortress city Sarduri<sup>h</sup>urda [built] on Mount Kišter to be his guard post [and] he stationed there [(...)] people [from the land ...]tina, (men) on whom his land relied.

213–214) (When) the people of this district heard a report about the trouble that I had caused to befall [their king] Ursâ (Rusâ), they then cried “Woe!” (and) smote their thigh(s) (in distress). They abandoned their fortified city Ul<sup>h</sup>u, as well as the city Sarduri<sup>h</sup>urda – a fortress on which which [they] reli[ed] – and they fled by night to narrow mountain clefts.

215–232) Furiouly, [I overwhelmed] the region around that district like a fog and compacted the length and breadth (of it) like ice. In a lordly manner, I entered the city Ul<sup>h</sup>u, the city where Ursâ (Rusâ) went for relaxation, [and] walked about triumphantly [in] the palace (that had been) his (own) royal abode. With ir[on] axes [and] iron [spad]es, I smashed its strong (city) wall, which had been built with (blocks of) massive mountain stone, as if (it were) a pot, and leveled (it) down to the ground. I tore [out] the lengthy beams of juniper (that formed) the roof of his palace, cut (them) up [with pickax]es, and took (them back) to Assyria. I opened up his granaries (and) storehouses and (then) fed my army his abundant grain in u[n]limited quantities. (220) I entered his hidden wine cellars, and the extensive troops of the god Aššur drew sweet wine (to drink) from waterskins (and) leather buckets [as if (it were)] river [water]. I blocked up the outlet of the canal, the canal on which he relied (to provide water), and turned the abu[nda]nt water (supply) into a swamp. I stopped up the irrigation ditches (and) drainage pipes that forked off from its (the canal's) center, and exposed [...] their pebbles to the sun. I had my fierce warriors e[nte]r his well-kept gardens, (which provide) the general impression of his city (and) which were (so) studded with fruit trees and grapevines that they dripped (fruit as abundantly) as a rainfall, and they (the warriors) made the noise of (their) iron pickaxes resound like

210–221 For the most part, the restorations follow those proposed by Meissner, ZA 34 (1922) pp. 116–118.

217 Or *i-na qul-mi-i AN.[BAR u pat]-<sup>r</sup>ri<sup>r</sup> AN.BAR*, “With ir[on] axes [and] iron [swor]ds.”

221 -kir<sub>17</sub>\*: The tablet has TÛM.

222–223 The exact understanding of these lines is not certain, in particular the meaning of *ha-li-li*; see Bagg, Assyrische Wasserbauten pp. 325–326. For the translation given above, see in particular Laessøe, JCS 5 (1951) pp. 27–28 and CAD S p. 263. Moreover, C. Zaccagnini (in Fales, ARIN p. 267) translates “I exposed (even) the deep(est) of their pebbles to the sun” but does not suggest any Akkadian reading for this translation.

224 *ú<sup>?</sup>-še<sup>?</sup>-<sup>r</sup>ri<sup>?</sup>-ib<sup>?</sup>-ma*, “I had ... e[nte]r ... and”: The published copy of VA 8749 by O. Schroeder (KAH 2 no. 141) has *iš-mu-x*, but based upon his collation of the piece in Berlin, E. Weidner read *ú<sup>?</sup>-še<sup>?</sup>-<sup>r</sup>ri<sup>?</sup>-ib<sup>?</sup>-ma* (AfO 12 [1937–39] p. 144 n. 1). Collation indicates that Weidner's reading

(the thunder of) the god Adad. (225) They picked a great deal of its fruit, a countless amount, and did not leave (any) for the weary heart to smile about in the future. I (cut down and) spread out his large trees, the ornaments of his palace, like malt (spread out for drying); I made his famous city disgusting and its district a subject of revilement. I gathered up those logs — all the trees that I had chopped down —, piled (them) up in heaps, and set them on fire. I tore out by the roots their abundant crops, which are as countless as reeds in a canebrake, and did not leave even a (single) ear of barley to allow the identification of what had been destroyed. (With regard to) his well-kept field(s) that were spotted with colored flecks like polished lapis lazuli and (whose) meadowland(s) were planted with new vegetation and young shoots, (230) like the god Adad, I trampled (it) down with (my) chariotry, (my) cavalry, (and) the passage of my infantry, and I turned the meadows that his horses had relied on (for pasture) into wasteland. (With regard to) the city Sarduriḥurda, their large fortress, together with fifty-seven settlements in the environs of the district Sangibutu, I destroyed all of them, leveling (them) down to the ground. I set fire to their roof-beams and turned (them) into ashes.

233-246) Moving on from the city Ulḥu, I came to the village(s) of the land, the foremost of the fortified cities of the district Sangibutu. (This is) an inhabited district seized by his (Rusâ's) land, which long ago earlier king(s), his predecessors, had annexed in order to expand their country. (235) The cities Ḥurnuku, Ḥardania, Gizuarzu, Šašzissa, Upper Ḥundurna, ..., Uatzunza, Arazu, Ša-Šinia, Lower Ḥundurna, El[...], ...]nak, Šittuarzu, Zirna, Surzî, Eliyadinia, Dag[...], ..., Šurzialdiu, Armuna, (and) Kinaštanía — twenty-one fortifi[ed] cities [... (which)] grew up on the peaks of Mount Arzabía [like] trees that grow in the mountains — (240) are surrounded by very strong walls [... wh]ose crenellations are each one hundred and twenty layers of brick in height, and ... [...] for stationing

is possible, but not certain. If *iš-mu-*, one might think of *iš-mu-<sup>r</sup>tu<sup>1</sup>-ma*, thus “my fierce warriors denuded (i.e., stripped off all the fruit in) his well-kept gardens,” except that one would not expect *a-na* before *GIŠ.KIRI<sub>6</sub>.MEŠ-šú as-ma-a-ti* in line 223 and the trace at the end of line 224 on VA 8749 fits <sup>r</sup>ri<sup>1</sup> better than <sup>r</sup>ṭu<sup>1</sup>.

225 The reading *an-ḥu<sup>2</sup>-ti* is proposed by Mayer, MDOG 115 (1983) p. 90. The copy has *DIŠ-PA* and the text <sup>r</sup>DIŠ<sup>2</sup>-IZ<sup>2</sup>/GUR<sup>21</sup> for *ḤU*. Possibly read instead *an-<<DIŠ>>-hat-ti*.

228 Possibly “(the place where agricultural) work had been suspended” (see AHw p. 1352) or “(the site of) the destruction (of the fields)” (see CAD M/2 p. 236) instead of “what had been destroyed.”

229 *ki-i za-gin-du-re-e <sup>r</sup>šer<sup>1</sup>-pa šak-nu-ma*: For the tentative translation “were spotted with colored flecks like polished lapis lazuli,” cf. CAD A/2 p. 337 and § p. 209. B.R. Foster translates this as “looked like red faience” (Before the Muses<sup>3</sup> p. 803). A. Bagg translates it as “wie Lapislazuli farbig gesprenkelt (aussah)?” (Assyrische Wasserbauten p. 322); see also *ibid.* p. 326 for various other proposed translations of this passage. Most recently S. Thavapalan, J. Stenger, and C. Snow (ZA 106 [2016] p. 202) suggest that “the image evoked by the color may be of a flax field in springtime, when the powdery blue blossoms appear to glow in spots against the greenery” and translate the passage as “was overlaid with bright flecks (looking) like turquoise-blue glass.”

233 The tentative translation of *a-<sup>r</sup>tur<sup>21</sup> un-na-te re-eš URU.MEŠ-ni dan-nu-ti* as “the settlements of the land, the foremost of the fortified cities” is based on CAD U/W p. 161. M. van Loon (BiOr 44 [1987] p. 259) suggests A.AB.[BA] *un-na-te*, “the sea of the lands,” but there does not appear to be sufficient room for this reading and it would not seem to make good sense here.

[(their)] fighting men. They are clothed in terror for the doing of battle. Deep moats [were dug around them] for the support ... and towers were constructed at the approaches to their gates. The rivers which carry flood-waters in [abundance ...] never have any interruption (in their flow of water) in their (the cities') meadowland(s). Their people in abundance and wealth [...] ..., as many as there are, have extensive possessions. (245) Great palaces, the equals of [...] chairs befitting a king were scattered about. Beams of juniper, the sweet fragrance [...] ... and wafts towards the one who enters them (the palaces) like (the fragrance of) ḥašurru-cedar.

247–253) All the people of the district of Sangibutu, (both) those dwelling in the countryside and those dwelling in those cities, <saw> the cloud of dust (kicked up) by my expeditionary force which [...] for a distance of one league. Confusion was established over the land Urartu, to its full extent. Towers had been constructed on the mountain peaks so that they could observe the district (and look out) for the ene[my]; and [...] had been stationed. (250) They saw the flames of the brushwood pyres which (signaled) the approach of the enemy ... the torches (lit) morning (and) evening, and they transmitted (this information) [...]. They became afraid of the fierce onslaught of my battle (array) that cannot be withstood (lit.: “equaled”); (a state of) stunned numbness spread over them and ... They did not care about their abundant property. They abandoned their strong (city) walls and sought refuge. I covered that district like the dense clouds of evening and overwhelmed all his fortified cities like a turbulent

240 No crenellations or parapets would be 120 layers of brick in height in themselves, but they could well be that many layers of bricks from the ground; see text no. 45 lines 38–39.

241 -tal\*: The text has -RU-.

243 G. Vera Chamaza (AMI NF 27 [1994] p. 118) suggests the possible restoration *i-na* [he-en-gal-li].

246 CAD E p. 280 reads *ša e-ri-ʿiš<sup>1</sup>-ši-na*, i.e., “the fragrance of which ... wafts through it” instead of *ša ēribišina*, “wafts towards the one who enters them (the palaces)”; however, one would expect *erīšina* rather than *erīššina*. The passage is damaged, but considerations of space might suggest BI rather than IŠ.

247 F. Thureau-Dangin (TCL 3 p. 40) restores *na-gi-i*, “district,” after *āš[ibūt]*, not KUR, “land”; however, as noted by G. Vera Chamaza (AMI NF 27 [1994] p. 118), the copy does not indicate that there is sufficient room for that restoration.

248 KASKAL.GÍD.[ĀM (x) x] x-tu: Or KASKAL.GÍD.[TA.ĀM (x)] x-tu; however in line 326 we have only KASKAL.GÍD.ĀM. Possibly <i-mu-ru> before UGU; see Vera Chamaza, AMI NF 27 (1994) p. 118.

250 B. Landsberger (WO 3/1–2 [1964] p. 75 n. 104) suggests *nak-ri ul-lu-[ka-a]-ti-ma*, “die heranmarschierenden Feinde.”

251 For the end of the line, F. Thureau-Dangin (TCL 3 p. 40) suggested *ik-ʿšu<sup>1</sup>-[du mi-tu-ti-iš]*, and this was followed in CAD Š/1 p. 108, which would give the meaning “they became as the dead.” Weidner, AfO 12 (1937–39) p. 146 proposed *ig-ʿlud<sup>1</sup>-[du ta-ḥa]-zi*, “they were frightened of (doing) battle” (see also AHW p. 274; Mayer, Assyrien und Urartu I p. 122; and Foster, Before the Muses<sup>3</sup> p. 804). Collation indicates that there is not sufficient room for either restoration.

253 ILLU “flood”: The reading follows CAD M/2 p. 138; cf. CAD E p. 257, which has *a-rib* and takes it to be from the noun *erbu* “locust.”

flood.

254–261) I advanced a distance of twelve leagues between Mount Arzabia (and) Mount Irtia, lofty mountains, and (then) set up camp. (255) I had my fierce warriors pass through their remote recesses like wild sheep and they did not leave any (enemy) spy behind to hear their orders. I had the extensive troops of the god Aššur envelop all their cities like locusts and I had my aggressive plundering (troops) enter their private quarters. They [bro]ught me property (and) possessions, ro[ya]l treasure, and my hands took possession of their accumulated riches. I sent common soldiers, light infantry, [bow]men, [(and) spearmen] up [onto] their (city) walls and I had demolition-men take up position at the battlements and tower(s). I tore out the palaces' roof-beams of juniper and caused the people of the land Manne[a] (and) the land Na'iri ... (260) As if (they were made of) sand, I [demolished] to their very foundations their high enclosure walls that had been made as firm as the mountains [...]. I set fire to their artfully-built homes and made the smoke from them rise up and cover the sky like a fog.

262–268) I had my whole army carry away on horses, mules, camel(s), (and) donkeys the great stores of barley (and) wheat that they (the enemy) had heaped up in (their) granaries over a long time for the sustenance of (their) land and people, and I heaped up (the grain) inside my camp (so that the piles looked) like (ruin) mounds. I fed my people abundant food until they were completely full (lit.: “food of abundance and satiety”) and they joyfully laid up lavish travel provisions for the return journey to Assyria. (265) I chopped down his luxuriant orchards; I chopped down his grapevines in large numbers and (thus) put an end to his (source of) drink. I cut down his great forests, whose trees were as tangled up as impenetrable reed thickets, and I laid waste to his meadowland(s). I gathered up all his felled logs like the flotsam after a dust storm and I set (them) on fire. I set fire to one hundred and forty six settlements in their environs as if (they were) brushwood pyres and I made the smoke from them cover the sky like a dust storm.

269–276) Moving on from the fortified cities of the

258 ú-šá-aš-ṛbit<sup>21</sup> (e.g. CAD N/1 p. 335) or ú-šá-az-ṛziz<sup>1</sup> (e.g. Weidner, AfO 12 [1937–39] p. 146).

260 šur-šud<sup>1</sup>(text: BU)-du: G. Vera Chamaza (AMI NF 17 [1994] p. 118) prefers to emend BU to šU, but BU is closer in form to šud than šU. Since BU can have a value šúd in the Middle Assyrian period (see von Soden and Röllig, Syllabar<sup>3</sup> p. 40), no emendation may actually be required. For similar forms doubling the final consonant, see for example lines 19 (šuk-šud-du) and 100 (šu-kud-du).

269 KUR.ar-ma-ri-<ia>-li-i: For the emendation, see lines 280 and 290.

land Sangibutu, I came to the district of Armariyalî. (With regard to) the cities Bubuzi — a fortress —, Ḥundur — which is surrounded by two (city) walls (which were) constructed at the entrance to the tower by means of a plumb-line (lit.: “cord of the market”) — Ayalê, Šinišpalâ, Šiniunak, Arna, (and) Šarnî, (a total of) seven fortified cities, together with thirty settlements in their environs, which are situated at the foot of Mount Ubianda, I destroyed all of them, leveling (them) down to the ground. I set fire to their roof-beams and turned (them) into ashes. I opened up their granaries (and) storehouses and (then) fed my army their abundant grain in unlimited quantities. (275) As if (they were) brushwood pyres, I set fire to the crops upon which his people relied (for sustenance) and to the fodder (lit.: “straw”) (that maintains) the lives of his herds, and I turned his meadowland(s) into a desolate land. I cut down their orchards and chopped down their forests; I piled all their logs up in heaps and set (them) on fire.

277-279) In the course of my march, I went to the city Arbu, Ursâ's (Rusâ's) ancestral city, and to the city Riyar, Ištardûri's (Sarduri's) city. (With regard to) seven settlements in their environs in which his brothers, members of his royal family, had been made to dwell and (whose) garrison(s) had been strengthened, I destroyed these settlements, leveling (them) down to the ground. I set fire to the temple of his god Ḥaldi as if (it was) a brushwood pyre and I desecrated its shrines.

280-296) Moving on from the land Armariyalî, I crossed Mount Uizuku, a mountain with juniper tree(s) whose base consists of breccia-stone, (and) I came to the land Ayâdi. (With regard to) the cities Anzalia, Kuayin, Qallania, Bitâya, Aluarza, Qiuna, Allî, Arzugu, Šikkanu, Ardiunak, Dayazuna, Gêta, Bâniu, Birḥiluza, Dêzizu, Dilizia, Abaindi, Duain, Ḥasrana, Parra, Ayaşun, Aniaştania, Balduarza, Šaruardî, (285) Šumattar, Šalzî, Albûri, Şiqarra, (and) Old Uayis — thirty of its fortified cities which were set up in a straight line in a row along the shore of the roiling sea, on the slopes of the great mountains — the cities Argiştiana (and) Qallania, its strong fortresses, were constructed between them. They (the two fortresses) rise like stars above Mount Arşidu and Mount Maḥunna and their foundations are visible for two hundred and forty (...) each way. His warriors — the best troops in his army, (men)

270 The meaning of the passage *pi-i di-im-ti tu-bal-e ma-ḥi-ri ru-uk-ku-su*, translated “(which were) constructed at the entrance to the tower by means of a plumb-line (lit.: “cord of the market”),” is uncertain (see CAD T p. 445). B.R. Foster (Before the Muses<sup>3</sup> p. 805) tentatively suggests “the entry to its two towers connected with a drawbridge(?) of rope” and is basically followed by F.M. Fales (COS 4 p. 209) who translates “the opening of (each) tower connected with a corresponding drawbridge of rope(?)” The reading *tu-bal-e* follows Borger, BiOr 14 (1957) p. 121 sub S. 201a; cf. CAD Ḥ p. 201.

286 Although the text refers to thirty cities, only twenty-nine are named in lines 281–285.

skilled in battle, shield (and) spear bearers, (men) on whom his land relied (to protect it) — had been stationed inside them. (290) They saw the conquest of the land Armariyalī, their neighboring district, and their legs trembled. They abandoned their cities, (along) with their property, and flew like birds into those fortresses. I sent many troops up to their cities and they (Sargon’s soldiers) carried off large amounts of property (and) possessions from them as booty. I destroyed their strong fortresses (lit.: “walls”), together with eighty-seven settlements in their environs, causing (them) to be level with the ground. I set fire to the houses inside them and turned their roof-beams into ashes. (295) I opened up their granaries (and) storehouses and fed my army grain in unlimited quantities. I cut down their orchards and chopped down their forests. I gathered up all their logs and set (them) on fire.

297–305) Moving on from the land Ayādi, I crossed the Alluria, Qallania, (and) Innāya Rivers. I came to the city Uayis, a district upon which he relied (and located) on the lower border of the land Urartu, on the frontier with the land Na’iri. (With regard to) the city Uayis — his fortified city (and) his great fortress — which had been made stronger and whose construction was more ingenious than all his (other) fortresses, (300) his fierce combat troops (and) the scouts who bring in news about the surrounding lands were garrisoned there. He stationed his provincial governors, together with their (military) contingents, there and he had (his) fighting men man its strong (city) wall. I conquered this fortress from the rear (lit.: “the rear part of this fortress”). I slaughtered his

288 The understanding of 4 UŠ.TA.ÀM follows CAD N/2 p. 128; cf. CAD K pp. 44–45 “to a height of 240 (cubits).” F. Thureau-Dangin’s translation, followed by such scholars as D.D. Luckenbill and W. Mayer, suggests that the foundations were visible to a height of 240 cubits. B.R. Foster (Before the Muses<sup>3</sup> p. 805) translates the passage as indicating that the two fortresses “looked down 240 cubits below.” <sup>1</sup>SUḪ-šin<sup>21</sup>: The normal logographic writing for *uššu* is URU., but SUḪ does stand for this word in at least one place in Esarhaddon’s royal inscriptions (see Leichty, RINAP 4 p. 206 no. 105 v 31 and Borger, MZ p. 284).

289 *a-ša-re-tú* (CAD A/2 p. 419 sub *ašarittu*) or *a-ša-re-du-ut* (AHw p. 78 sub *ašarēdu(m)* 3).

291 G. Vera Chamaza (AMI NF 27 [1994] p. 118) suggests *ip-par-šu-du* (“fled” instead of “flew”) and forms of the verb *naparšudu* appear several times in this inscription (lines 118, 146, 149, 175, 214, 315, and 333). Nevertheless, the idiom “fly like birds” is well attested in Neo-Assyrian royal inscriptions (see CAD N/1 pp. 314–315; cf. this inscription line 25, text no. 1 line 153, and text no. 7 line 50) and thus there seems no compelling reason to accept the emendation.

298 Uayis has been identified with Qalatgah, southwest of Lake Urmia in the Ushnu valley of northwestern Iran, by P. Zimansky (JNES 49 [1990] p. 17; see also Kroll in Köroğlu and Konyar, Urartu pp. 161–162).

warriors in front of its (city) gate like sheep. I chopped down his orchards and cut down his forests. I gathered up all his felled logs and set (them) on fire. I burned down the cities of Barzuriani, Ualṭuquya, Qutta, Qippa, (and) Asapâ — five strong fortresses — together with forty settlements in their environs.

306–308) Moving on from the city Uayis, I came to the district of Ianzû, king of the land Naʾiri. Ianzû, king of the land Naʾiri, came from his royal city Ḫubuškia to meet me, a distance of four leagues, and he kissed my feet. Inside his city Ḫubuškia, I received from him as his tribute horses trained to the yoke, oxen, and sheep and goats.

309–313) During my return journey, Urzana of the city Mušašir — one who had committed crime(s) and misdeeds, transgressed against the treaty (sworn) by the gods, (and) not submitted to (my) authority — a dangerous (man), a mountain dweller, who had sinned against a treaty (sworn) by the gods Aššur, Nabû, (and) Marduk and revolted against me, had failed to come before me during the return journey of (my) expeditionary force and had not kissed my feet (while bringing) with him a substantial audience gift. He withheld his tribute, payment(s), (and) audience gift and did not send (even) a single mounted messenger of his to inquire about my well-being. Furiously, I had all my chariots, numerous horses, (and) my entire (military) camp take the road to Assyria.

314–322) With the great support of the god Aššur — father of the gods, lord of (all) the lands, king of the totality of heaven (and) netherworld, begetter <of everything>, (and) lord of lords, to whom, in the distant past, the Enlil of the gods, the god Marduk, granted the gods of (all) the (low)land and mountain regions of the four quarters (of the world) in order that they, without any exception, might constantly render honor to him (Aššur) (and) that he might bring (them), with their accumulated riches, into Eḫursaggalkurkurra (“House, the Great Mountain of the Lands”) — at the exalted command of the gods Nabû (and) Marduk, who had moved on a path in a station of the stars indicating the mobilization of my weapons, and with a propitious sign for seizing

309 Mušašir was likely located in the area of Sidikan; one possible site is Mudjesir (ca. 20 km north of Ruwandiz); see Radner, *Biainili-Urartu* pp. 245–254 and Danti, *Expedition 56/3* (2014) pp. 27–33.

311 Cf. Oppenheim, *JNES* 19 (1960) p. 135.

314–319 With regard to the divine signs which encouraged/caused Sargon to decide to attack the city Mušašir, see Oppenheim, *JNES* 19 (1960) pp. 136–138; the lunar eclipse mentioned in line 318 has been dated to the evening of October 24, 714 BC by A. Sachs (*ibid.* p. 137). See also Koch-Westenholz, *Mesopotamian Astrology* pp. 153–154. For the addition of *gim-ri* in line 314, see line 116. Magur in line 318 refers to Šin, the moon god.

power — Magur, lord of the corona, remained eclipsed for more than one watch, portending the defeat of the land of the Gutians — (and moreover) with the valuable approval of the god Šamaš, the warrior, who had trustworthy omens written on a (sacrificed sheep's) liver (indicating that he would) go at my side, (320) I mobilized only my single personal chariot and one thousand of my ferocious cavalry, bowmen, (and) shield (and) spear (bearers), fierce warriors who were experienced in battle. Then, I took the road to the city Mušašir, a rugged path, and I made my troops climb up Mount Arsiu, a mighty mountain that did not have any ascent, (*not even one*) like *that* of a ladder (lit.: “whose ascent has no ascent like the rungs of a ladder”).

323–332) I crossed the Upper Zab River, which the people of the lands Na'iri and Ḫabḫu call the Elamunia River. In between Mounts Šeyak, Ardikiš, Ulāyū, (and) Alluriu — high mountains, (325) lofty mountain ranges, (and) narrow mountain ledges, which ... and through which there is no pathway for the passage of (even) foot soldiers, (and) in which are carved out gullies made by torrential water — the noise of whose cascades resounds for a distance of one league, just like (the thunder of) the god Adad — (mountains) which are as thickly covered with all kinds of useful trees, fruit trees, and vines as a reed thicket, and the approach to whose passes is fraught with terror, (mountains) whose area no king had ever crossed and whose remote region no prince who preceded me had ever seen — I felled their (the mountains') large tree trunks, and with bronze axes I *hacked* (a way through) the narrow places along their (mountain) ledges. (330) For the passage of my troops between them (the mountains), I improved the narrow path, a route (so) narrow that foot soldiers could only pass through sideways. I placed my personal chariot on the shoulders (lit.: “necks”) (of some of my soldiers) and proceeded at the head of my troops on horseback. I had my warriors, together with the horse(men) who go at my side, form a single narrow file (line) and brought (them) through their (the mountains') defiles.

333–342) In order that he (Urzana) should not escape,

322 KUR-ú *dan-nu ša mu-lu-šu ki-i mé-le-e sim-mil-ti mu-la-a la i-šu-ú* “a mighty mountain that did not have any ascent, (*not even one*) like *that* of a ladder (lit.: “whose ascent has no ascent like the rungs of a ladder”)”: The tentative translation assumes that climbing up the mountain was even more difficult than it would have been for the Assyrian army, with all its military equipment (weapons, armor, horses, chariots, etc.), to climb up an extraordinarily tall, steep ladder one person after another. Cf. CAD M/2 p. 14. Making use of a figurative meaning of *šimmiltu* “referring to a vista of receding ranges of mountains and to mountain ledges” (CAD S p. 274), F.M. Fales (COS 4 p. 211) translates “a mighty mountain, whose climb, like steps in sequential ridges, had no (real) ascent” taking the passage not to indicate that the mountain “was impossible in its ascent, but that to the contrary ... was wearying in its unending sequence of scarcely sloping stepped passages.”

325 *ša ni-ba ed-ku-ma* “which ... and”: F. Thureau-Dangin (TCL 3 p. 51) translates “qui excluent toute description”; W. Mayer (Assyrien und Urartu I p. 129) has *ša ni-ba et-qú-ma*, “mit nicht zählbaren Stufen (hindurch).” B.R. Foster (Before the Muses<sup>3</sup> p. 807) has “which defy description(?),” reading *ed-lu<sup>12</sup>-ma* for *ed-ku-ma* (see CAD N/2 p. 205) but noting that the passage is obscure (Before the Muses<sup>3</sup> p. 813). We might expect *ša niba lā išûma*. “countless and.” M. Worthington tentatively suggests that the writing might stand for *ša niba lā ēdâkuma*, “of which I do not know the number” (private communication).

327 GURUN\*: The text has DUG.

331 *aš-bat-ma* or *az-ziz-ma*; see on-page note to line 25.

I gave orders to my eunuchs, the provincial governors, together with their (military) contingents, and I quickly dispatched (them). [...] he (Urzana) saw [the cloud of dust (kicked up) by my expeditionary force and [... (335) ...] ... him, and the people strengthened [... the land Ur]arṭu and to the city (that was) his royal [ab]ode (and) the abode of the god Ḥald[i, his god, ... throughout the land U]rartu, to its full extent, greater than whom none is known in heaven or (in) netherworld [...] ... [...] without whose permission neither scepter nor crown can be taken up as emblems of the position of sheph[er]d ... the prince, the shepherd of the people of the land Ura[rṭu ...] they bring him and make (lit.: “made”) the one among his sons who was to succeed to his throne (340) enter into the city Mušašir (and) into the presence of the god Ḥaldi, [together] with gold, silver, (and) everything valuable, the treasure of his palace; they present him (with them) as gift(s). They offer before him countless fattened [oxen] (and) fattened sheep (and) give a (ceremonial) banquet for his entire city. [In front of] his god Ḥaldi, they place upon him the crown of lordship and have him take up the royal scepter of the land Urarṭu. Then, his people ... his offspring.

343–349) I let the terrifying roar of my troops resound [ov]er that city like (the thunder of) the god Adad, and those who dwelt in[side it ...] ... [...]. His/Its people, (even) old men (and) old women, climbed up onto the roofs of their houses, crying bitterly [...]. (345) In order to save their live(s), they crawled around on all fours and [...] their hands [...]. Because King Urzana, their ruler, had not respected the command of the god Aššur, but had (instead) thrown off the yoke of my lordship and disregarded his position as a vassal to me, I planned to carry off the people of that city as booty and I ordered the removal of the god Ḥaldi, (the god) on whom the land Urarṭu relied (for protection).

334 E. Weidner (AfO 12 [1937–39] p. 146) tentatively restored at the beginning of the line [... a-la]-ka-ma (“[... the app]roach”). For the restoration [... a]-ka-ma (“[... the cloud of dust”], see line 248 and CAD A/1 p. 259.

335 Instead of -šú-<sup>r</sup>ma<sup>21</sup> possibly -šú-<sup>r</sup>pa<sup>1</sup> or -<sup>r</sup>di<sup>1</sup>.

336 Possibly [...] ar-de-ma ..., “[...] I led and ...” instead of [... KUR.ur]-ar-ṭi-ma, “[... the land Ur]arṭu.” E. Weidner (AfO 12 [1937–39] p. 146) suggested URU.[mu-ša-šir šu]-bat LUGAL-ti-šu, “city [of Mušašir], his royal [ab]ode,” and he has been followed in this reading by several other scholars (e.g., Mayer, Assyrien und Urarṭu I p. 130), but there is not sufficient room for this restoration although the sign before LUGAL might be bat.

337 CAD Q p. 123 translates “[...] (Uartu) apart from which no [...] is known in heaven or on earth”; following Weidner, AfO 12 (1937–39) p. 147, possibly translate instead (somewhat freely) “(in comparison to) which no larger (land) is known.”

339 E. Weidner thinks the line may have indicated that the prince of Urarṭu had died (AfO 12 [1937–39] p. 147), while M. Salvini thinks that the passage may have stated something along the lines of “if the prince of Urarṭu comes to Mušašir” (Salvini in Klengel, Gesellschaft und Kultur pp. 226–227). F.M. Fales (COS 4 p. 212) translates “[after his death?], they would bring to him (=Ḥaldi).”

342 Following Weidner, AfO 12 (1937–39) p. 146, the end of the line is normally read UN.MEŠ-šú i-<sup>r</sup>nam<sup>1</sup>-[bu]-<sup>r</sup>ú<sup>1</sup> MU-šu, “his people would ac[laim (lit.: “call”) his name.”; however, both the published copy (Schroeder, KAH 2 no. 141) and collation indicate that there is not sufficient room for the restoration and that the traces after i- are not good for the beginning of a Neo-Assyrian NAM sign. In addition, independent collations by G. Frame and J. Marzahn indicate that the penultimate sign is NUMUN, rather than MU.

346–410 See Mayer, UF 11 (1979) pp. 571–595 for a detailed study of the booty taken by Sargon II. The precise meaning of some of the Akkadian terms remains elusive. The words for containers are discussed in Gaspa, Contenitori neoassiri.

- Triumphantly, I had (him) sit in front of his (city) gate and I carried off as booty his (Urzana's) wife, his sons, his daughters, his people, (and) (other) offspring of his father's house. I counted (them) (along) with 6,110 people, 12 *kūdanu*-mules, 380 donkeys, 525 oxen, (and) 1,235 sheep, and brought (them) inside the wall(s) of my (military) camp.
- 350-351) I entered triumphantly [into the city M]ušašir, the abode of the god Ḫaldi, and in a lordly manner I occupied the palace, the residence of Urzana. [(With regard to) the] heaped up [storerooms] which were overflowing with accumulated riches, I broke open the seals of their treasure caches.
- 352) [34 talents and 18 m]inas of gold, 167 talents and 2 1/2 minas of silver, shining copper, tin, carnelian, lapis lazuli, *banded agate*, (and other) precious stones in large numbers;
- 353) [x (items): staves] of elephant ivory, ebony, (and) boxwood, together with wooden caskets, whose mountings are made of gold and silver;
- 354) [x (items)]: large [*tab*]les of elephant ivory, ebony, (and) boxwood, (*tables*) fit for a king, whose mountings are made of gold and silver;
- 355) 8 (items): sturdy *maḫrašu*-objects and vegetable baskets of elephant ivory, ebony, (and) boxwood, whose mountings are of gold and silver;
- 356) 6 (items): a stand, a potstand, a *folding screen*, chairs, (and) a *cupbearer's (pot)stand* (made) of elephant ivory, ebony, (and) boxwood, whose mountings are of gold and silver;
- 357) 6 (items): gold knives *with gold (handles in the shape of) cones*, a gold dagger, a [gol]d fly wh[isk], (and) an alabaster offering-bowl inlaid with stones (and) gold;
- 358) 11 (items): a silver *kappu*-bowl belonging to Ursâ

348 It is not completely clear whom/what Sargon caused to sit at the city gate. K. Kravitz (JNES 62 [2003] p. 87; see also Fales, COS 4 p. 212) believes that it was the statue of the god Ḫaldi, while P. Talon (Annales assyriennes 1 p. 97) takes it to be “son épouse, ses fils et ses filles.” B.R. Foster (Before the Muses<sup>3</sup> p. 808 n. 2) thinks that it was Urzana “because Sargon makes special mention of his efforts to prevent Urzana’s flight (line 333),” while noting that “there is no mention of Urzana’s fate” in this text. Sargon’s Annals from Room II (text no. 1 lines 152–155; see also text no. 7 lines 72–76) state that Urzana had fled like a bird and disappeared when he heard of the approach of Sargon’s army and does not mention him among the people (including his wife, sons, and daughters) whom Sargon took away from Mušašir. It would seem more likely that it was the statue of the god Ḫaldi even though that means that the “his,” on KÁ.GAL, “(city) gate,” and DAM, “wife,” do not have the same referent.

352 For the restoration at the beginning of the line, see text no. 1 line 155.

353 For the restoration GIŠ.ŠIBIR.MEŠ (following Thureau-Dangin, TCL 3 p. 52) rather than GIŠ.GU.ZA.MEŠ (e.g., Talon, Annales assyriennes 1 p. 98 and Mayer, Assyrien und Urartu I pp. 79 and 132) at the beginning of the line, see text no. 82 iv 16’.

355 For the restoration at the beginning of the line, see text no. 82 iv 21’. W. Mayer (UF 11 [1979] p. 582) suggests that a *maḫrašu* (see also line 390) may be a wooden serving plate (or similar), while S. Gaspa (Contentitori neoassiri pp. 312–314 and 488) takes it to refer to a support/holder for a vessel.

356 For *kannu* and *kankannu* stands/supports/holders, see Gaspa, Contentitori neoassiri pp. 305–311 and 487–488. For the tentative meaning “folding screen” for GIŠ.táḫ-KAL, see Mayer, UF 11 (1979) pp. 582–583 (sub *taḫlīptu*). Or GIŠ.GAN.BI.LUL (see CAD K p. 155). Or šu-*pu-šu*-, “... whose mountings are made of gold and silver”; see text no. 82 iv 25’.

357 With regard to *terinnu* (pl. *terinnātu*) and its meaning here, see Mayer, UF 11 (1979) p. 583.

358 W. Mayer argues that the items translated as “hauberks” (or “breastplates”) (*qur-pi-si*) and “arrows” (*šil-ta-ḫi*) were actually types of vessels and spits respectively (UF 11 [1979] pp. 583–584), while S. Gaspa (Contentitori neoassiri p. 222) takes them to refer here to vessels with decoration in the form of armor — “(vasi) ... (dalla decorazione in foggia) di corazza” — and skewers (“*spiedi*”) respectively. Their appearance together with spears, bows, and shields in lines 378 and 392 would suggest that they were also some type of weapon or military equipment.

- (Rusâ), together with its lid, ka[ppu-bowls from the] land Tabal with lug-handles of gold, hauberks with silver (scales), (and) silver arrows with gold inlays; 359) 34 (items): silver kappu-bowls with deep, shallow, (and) [nar]row fluting (lit.: “fingers”), luṭṭu-bowls, and susānu-vessels of silver; 360) 54 (items): silver-plated kappu-bowls, <together with> [their] lids, cups (decorated with) cone-shaped ornaments (and) crescent-shaped ornaments, (and) silver torcs; 361) 5 (items): azannu-stands of silver, qabūtu-cups, mukarrisu-dishes, (and) [nab]lu-vessels, (altogether forming) censers from the land Tabal, and silver incense burners; 362) 13 (items): copper basins, copper cauldrons, copper washbasins, copper asallu-bowls, copper diqāru-pots, (and) copper qulliu-bowls; 363) 24 (items): copper stands (for) copper basins, copper ḫuruppu-bowls, copper kurkurru-vessels, copper qullu-clasps, copper nasru-hooks, (and) copper lamps; 364) [1]20 (items): copper objects, (both) heavy (ones and) light (ones), the work of their own land, (objects), the pronunciation of whose name(s) are not easy to write down; 365) [x] (items): an iron brazier, iron shovel(s), iron nasru-hooks, iron aruthu-objects, (and) iron lamps; 366a) [1]30 (items): garments with multi-colored trim, linen (garments), (garments of) blue-purple wool and (plain) wool, (and) garments of red wool from the lands Urartu and Ḫabḫu – 367) I carried off (all these things) as booty, together with the (remaining) property of his palace, and I heaped up his possessions. I sent my eunuchs (and) my officials to the temple of the god Ḫaldi. 368) His god Ḫaldi and his goddess Bagbartu, together with the numerous possessions of his temple, as many there were (of them); 369) [x]+4 talents and 3 minas of gold; 162 talents and 20 minas of silver, less one sixth (of a mina of silver); 3,600 talents of bronze in pieces;

359 The translation follows Foster, *Before the Muses*<sup>3</sup> p. 809. The meaning of “fingers” here is unclear and W. Mayer (UF 11 [1979] p. 574) assumes it means a type of decoration; see also Fuchs, SAAS 8 p. 61 n. 40.

360 Or “massive kappu-bowls of silver”; see AHw p. 1112 versus CAD Š pp. 248–249. According to W. Mayer (UF 11 [1979] pp. 574 and 584), šipru is actually a cone-shaped top for an incense stand and the “crescent-shaped ornaments” are pectorals in the form of a crescent moon. B.R. Foster (*Before the Muses*<sup>3</sup> p. 809) assumes that the last three items are describing ornamentation on the just-mentioned objects: “(decorated with?) bosses, crescents, and rings of silver.”

361 W. Mayer (UF 11 [1979] pp. 575 and 584 and *Assyrien und Urartu* 1 p. 81; see also Fuchs, SAAS 8 p. 61 and n. 44) suggests that the first four items were parts of censers and S. Gaspa (*Contenitori neoassiri* p. 322) translates them as “Five pedestals in the shape of silver quivers, cups, dishes, [nab]lu-vessels (for) incense burners from the country of Tabal” (“Cinque piedistalli in foggia di faretra d’argento, coppe, piatti, [vasi nab]lu (per) bruciaprofumi del paese di Tabal”).

364 and 366 The restoration of 1 follows F. Thureau-Dangin and is based on the available spacing.

365 According to W. Mayer (UF 11 [1979] pp. 575 and 585), an aruthu may be a type of shovel, while S. Gaspa (*Contenitori neoassiri* p. 284) translates the term as pliers (“pinze”). B.R. Foster (*Before the Muses*<sup>3</sup> p. 809) translates the line as “[items]: an iron stove with fire rake, poker, shovel, and lamps of iron.” Since there is a MA reference to a set (iltenniūtu) of this object (see CAD U p. 272 sub uruthu), a translation “tongs,” “pliers,” or something similar might be appropriate (suggestion courtesy J.N. Postgate).

367 A. Fuchs (SAAS 8 p. 62 n. 52) argues that rēdū refers here not to soldiers, but rather to officials (scribes) sent to compile a list of the booty taken.

368 Bagbartu or Bagmastu. See König, RLA 1/5 (1931) p. 391 and Schmitt, AfO 27 (1980) p. 191.

369 6-su: See Borger, MZ p. 252 for the meaning one-sixth.

- 370–371) [6] gold shields which were hung in his sanctuary on the right and left, which shone like the sunlight, [and] from whose centers project the heads of fierce lions, and whose weight was established to be 5 talents and 12 minas of shining red (gold);
- 372) 1 ... with horns ... the locking bar for his doors, which were cast from refined gold 2 talents in weight;
- 373) 1 gold door bolt (in the shape of) a human hand, a fastening for a double door, upon which a winged Deluge (monster) is (represented) in a recumbent position;
- 374) 1 gold peg, which held back the door bolt, securing the fastening of the temple, (and) protecting the stored property and possessions;
- 375) 2 gold keys (in the shape of) divine protectresses (who wear) crowns (and) hold the rod and ring, (and) the soles of whose feet tread upon fierce lions
- 376) — these (last) four (things) comprised the door fastening, one befitting the shrine, whose weight was established to be 2 talents and 12 minas of gold, and which held the door (in place);
- 377) 1 large gold sword, the sword (the god Ḫaldi wore) at his side, which weighs 26 and 1/3 minas of gold;
- 378) 96 (items): silver spears, hauberts with silver (scales), silver bow(s), (and) silver arrows, with inlays and mountings of gold;
- 379) 12 heavy silver shields whose bosses are decorated with the head(s) of Deluge monster(s), lion(s), and wild bull(s);
- 380) 67 (items): silver basins, silver stands, silver braziers, (and) silver vegetable baskets, with mountings and inlays of gold;
- 381) 62 (items): silver mušarrirtu-dishes, silver pomegranates, (and) silver objects of varying sizes, with inlays and mountings of gold;
- 382) 33 (items): silver chariots, silver bow(s), silver quivers, silver maces, silver scepter(s), silver manziaše-objects, silver shields, silver šipru-ornaments, <silver> purṭû-objects, (and) silver standards;

370 The restoration “[6]” is based upon text no. 82 iv 56’.

371 Cf. CAD A/2 p. 269 sub arītu 1.a.2’ kalbē nadržūte, “raging dogs.”

372–376 The exact meaning of the various Akkadian terms used for parts of locking devices for doors are much debated. With regard to devices for locking doors, see most recently P. Ferioli and E. Fiandra in *Studies Palmieri* pp. 269–287; Fuchs, *SAAS* 8 pp. 97–107; Leichty, *JCS* 39 (1987) pp. 190–196; Potts, *Mesopotamia* 25 (1990) pp. 185–192; and Scurlock, *Orientalia NS* 57 (1988) pp. 421–433.

374 -dan<sup>\*</sup>-. The text has -UN-.

375 GIŠ.miṭ-ṭi ù kip-pa-te “rod and ring”: A more literal translation would be “mace and circle.” For these symbols of divine order, authority, and power, see Wiggerman, *RLA* 11/5–6 (2007) pp. 414–421, as well as Slanski in *Crawford, Regime Change* pp. 37–59 and Abram, *Studia Antiqua* 10/1 (2011) pp. 15–36. ši-ḪAR: Or ši-kín. The reading ši-ḪAR and the tentative translation “soles” follows CAD Š/1 p. 109 sub šaḫūru B; see also Kraus, *Orientalia NS* 16 (1947) p. 199 n. 2.

379 F.M. Fales (*COS* 4 p. 213 and n. 150) translates “outer bands” instead of “bosses” and refers to how actual Urartian shields were decorated. See Seidl, *ZA* 88 (1998) pp. 100–113 with regard to the Deluge monster (*abūbu*).

380 ka-nu-ni, “braziers”: B.R. Foster (*Before the Muses*<sup>3</sup> pp. 810 and 813) assumes that this is an error for *kankanne*, “pot racks.”

381 Or, following S. Gaspa (*Contentitori neoassiri* p. 198), “silver libation vessels, (decorative elements in the shape of) silver pomegranates” (“vasi per libagione d'argento, (elementi decorativi in foggia di) melagrane d'argento”).

- 384) 2 large wild bull horns whose mountings and platings are <of silver> and whose mountings are surrounded by gold rivets;
- 385) 1 gold harp that is covered with precious stones for performing the rites of the goddess Bagbartu, the wife of the god Ḥaldi;
- 386) 9 garments belonging to his (Ḥaldi's) divine wardrobe, whose seams are edged with gold disks (and) gold rosettes in *open work*;
- 387) 7 pairs of leather shoes that are covered with gold stars, (along) with a silver whip (handle) with *kiplu*-decoration and a mounting of gold;
- 388) 1 ivory bed (with) a silver *bed-frame*, the resting place of the deity, inlaid with stones (and) gold;
- 389) 139 (items): ivory staves, ivory tables, ivory vegetable baskets, ivory knife(s), (and) daggers of ivory (and) ebony, whose mountings are of gold;
- 390) 10 (items): tables of boxwood, *maḥraṣu*-objects of boxwood, (and) chairs of ebony (and) boxwood, whose mountings are of gold (and) silver;
- 391) 2 portable altars (with) 14 assorted stones, adornments (fit) for gods, jewelry of the god Ḥaldi and the goddess Bagbartu, his wife;
- 392) 25,212 (items): heavy (and) light copper shields, cone-shaped helmets of copper, hauberks with copper (scales), and skull-shaped helmets of copper;
- 393) 1,514 (items): heavy (and) light copper spears, heavy copper spear-heads, copper *purṭû*-objects, copper *kutāḥu*-lances, together with their copper bases;
- 394) 305,412 (items): heavy (and) light copper daggers, copper bows, copper quivers, and copper arrows;
- 395) 607 (items): heavy (and) light copper basins, copper washbasins, copper *asallu*-bowls, copper *diqāru*-pots, (and) copper *qulliu*-bowls;
- 396) 3 heavy copper basins that can hold fifty measures of water in them, together with their heavy copper stands;

383 *ur*\*-*ar*-: The text has *ú-ar*-. Urartu is mentioned frequently in this text and in every other occasion it begins with *ur-ar*-.

384 CAD Q p. 137 suggests *ni-iḥ*(text: *nik-ka*)-*su-ši-na*, “inlays,” instead of “platings”; see also AHW p. 775 sub *neḥsu* II.

386 *-ba\**-: Form has an extraneous vertical wedge.

387 E\*: The text has *iz/pa-šá*; the reading KUŠ.DA.E.SIR follows Mayer, MDOG 115 (1983) p. 108.

388 Or, following CAD M/1 p. 117, 1 GIŠ.NÁ <<ZÚ>> *ma-a-a-al-ti* KÙ.BABBAR, “1 silver bed.”

390 B.R. Foster (Before the Muses<sup>3</sup> pp. 810–811) translates this line as “10 items: boxwood tables with frames of boxwood, legs of ebony and boxwood, and gold and silver mountings.”

391 *sa-ma-ḥu-te*: The translation “assorted” follows CAD S p. 381 sub *summuḥu*; AHW p. 1018 sub *samḥu* (followed by Mayer, UF 11 [1979] p. 578) takes the adjective to mean “miteinander verbunden.”

392 See Mayer, UF 11 (1979) pp. 578 and 589 for the understanding of *šipru* and *gulgullu* as types of helmets. Text no. 82 iv 5'' has 20 LIM 5 <ME> <sup>1</sup>12' here.

393 B. Foster (Before the Muses<sup>3</sup> p. 811) translates *purṭi* as “throw spears(?)” and KI.TA.MEŠ as “storage racks”; however, it seems unlikely that storage racks would be made of copper instead of wood.

396–397 See Gaspa, SAAB 16 (2007) pp. 169–171 and n. 177 and Contenitori neoassiri pp. 85–87 and 179–186 with regard to the *kiūru* and *harū* (*hariu*) vessels. Two large vessels are shown standing in front of the temple of Ḥaldi in the depiction of Sargon's sack of Mušāšir from the palace at Khorsabad (see Figure 17).

- 397–398) 1 large copper *ḥarû*-vessel that can hold eighty measures of water in it, together with its large copper stand, which the kings of the land Urartu used to fill with libation wine for making offerings before the god Ḫaldi;
- 399) 4 divine statue(s) of copper, the chief doorkeepers, guardians of his (Haldi's) gates, (each of) whose height is 4 cubits, together with their bases, cast in copper;
- 400) 1 statue (depicting) Ištar-dūrī (Sarduri), son of Išpueni, king of the land Urartu, praying (and) *in a royal pose, (together with)* its base, cast in bronze;
- 401) 1 bull (and) 1 cow, together with her bull calf, dedicated by (lit.: “of”) Ištar-dūrī (Sarduri), son of Išpueni, (made of) copper (and) belonging to the temple of the god Ḫaldi, (*which Ištar-dūrī had made as a votive offering and upon which he had inscribed (a record of his action);*
- 402) 1 statue of Argišti, king of the land Urartu, wearing a crown (decorated) with stars, (an attribute) of divine rank, and with his right hand in a gesture of blessing, together with its *casings*, which weighs sixty talents of copper;
- 403–404) 1 statue of Ursâ (Rusâ) with two of his cavalry horses (and) his *groom*, together with their base, cast in copper, upon which was engraved his own self-praise, namely “With (the help of) my two horses and my one *groom*, I personally obtained the kingship of the land Urartu” –
- 405–410) I carried off (all these things) as booty, together with numerous, countless (other) possessions of his, not to mention the objects of gold, silver, tin, bronze, iron, ivory, ebony, boxwood, and every (other) kind of wood that the troops of the gods Aššur (and) Marduk carried off in countless numbers as booty from the city, palace, and temple. I loaded the property of the palace of Urzana and of the god Ḫaldi, together with his (Urzana's) numerous possessions that I had carried off as booty from the city Mušašir, on (the backs of the soldiers of) the main body of my extensive army and I had (them) convey (it) to Assyria. I considered the people of the district of the city Mušašir as people of Assyria and I imposed upon them (the same state) service (and) corvée duty as if

399 The wall relief depicting Sargon's sack of Mušašir has a large statue, in a standing position and with one hand raised in a gesture of worship/adoration, on each side of the door of the temple of the god Ḫaldi (see Figure 17).

400 *manzaz šarrūti*, “in a royal pose”: The phrase has usually been understood to mean “upon a socle (indicating his) royal position”; see CAD M/1 p. 235. F.M. Fales (COS 4 p. 214) translates the beginning of the line as “1 worshipper statue, standing for the king, (gift of) Sarduri ...” and see also Fuchs, SAAS 8 p. 64. Possibly <a-di> KI.TUŠ-šú, “<together with> its base”; see lines 399 and 403.

401 A cow apparently nursing a calf is depicted in front of the temple of the god Ḫaldi in the the relief of Sargon's sack of Mušašir (see Figure 17).

403–404 For studies of this passage and text no. 63 iii' 9'b–11'a, see Fuchs, SAAS 8 pp. 108–111 and Rollinger, *Studies Neumann* pp. 585–609. LÚ.GIŠ.GIGIR stands for *susānu* (see Parpola, SAAB 2 [1988] p. 78 n. 2) and may have been a mounted companion.

407 *um\**-. The text has AD-.

426) 1-en LÚ.EN GIŠ.GIGIR 2 LÚ.ša pet-ḫal-lì 3

(they were) Assyrians.

411–414) Ursâ (Rusâ) heard (of this) and threw himself on the ground. He ripped his garments and bared his arms. He tore off his headdress, pulled out his hair, and beat his chest (lit.: “heart”) with both (fists). He lay flat (on the ground), face down. His mood became angry (lit.: “becomes angry”) and his temper burned (hot). Woeful lamentations were on his lips. I caused lamentation to be wailed throughout the land Urarṭu, to its full extent, and established perpetual wailing in the land Na’iri.

415–425) Through the superior strength of the god Aššur, my lord, through the power (and) might of the gods Bēl (and) Nabû, my divine helpers, with the firm approval of the god Šamaš, the great judge of the gods, who opened up my path and established (his) protection over my army, (and) through the great power of the god Nergal, mightiest of the gods, who goes at my side (and) protects my (military) camp, I entered into the land Urarṭu, (going) from the district Sumbi, in between Mount Nikippa (and) Mount Upâ, rugged mountains. I marched about through the lands of Urarṭu, Zikirtu, Mannea, Na’iri, and Mušašir (420) in a lordly manner, like a fierce lion that is endowed with fearsomeness, and I met no one who could overpower (me). On the battlefield, I stuck down the large army of Ursâ (Rusâ), the Urarṭian, (and) of Mitatti of the land Zikirtu. I conquered in all 430 settlements in seven districts belonging to Ursâ (Rusâ), the Urarṭian, and I laid waste to his land. I carried off as booty from Urzana of the city Mušašir, his god Ḫaldi (and) his goddess Bagbartu, together with abundant property from his temple, (along) with 6,110 people, 12 *kūdānu*-mules, 380 donkeys, 525 oxen, 1,285 sheep and goats, his wife, his sons, (and) his daughters. I departed through the pass at Mount Andarutta, a rugged mountain facing the city Ḫiptunu, (and) returned safely to my (own) land.

426) One charioteer, two cavalrymen, (and) three light

411–413 Text no. 43 line 27 states that Rusâ “brought an end to his life with his own weapon” (*ina* GIŠ.TUKUL *ra-ma-ni-šú ú-qa-ta-a na-piš-tuš*). For a discussion of the death of the Urarṭian king — and the argument that in the aftermath of Sargon’s campaign, the Urarṭian ruler Rusâ was assassinated by some of his own nobles — see Roaf, *CRR* 54 pp. 771–780. See also Van De Mieroop, *Studies* Foster pp. 427–430 and Van De Mieroop, *JAH* 4 (2016) pp. 16–39 on the death of Rusâ. *qaq-qa-riš ip-pal-si-iḫ*: Possibly “squatting on the ground” rather than “threw himself on the ground”; see Hurowitz, *Studies* Eph’al p. 119 n. 30.

412 *-pi\**(text: SAL?): The sign may have been written over an erasure. This would be the only attestation of *rapāsu*, “to beat, thrash” in the D-stem; see CAD R pp. 151–152.

413 Or “stood still” instead of “became angry (lit.: “becomes angry”),” taking *izziz* to come from the verb *izuzzu* (preterite tense) rather than *ezēzu* (present tense).

424 Line 349 refers to 1,235 sheep and goats, not 1,285.

425 D.A. Marf (Akkadica 136 [2015] pp. 127–140) has recently argued for the identification of Hiptunu with modern Haudian in the Diana-Ruwanduz valley and Mount Andaruta with Mount Hendrên.

426–430 These five lines are separated from one another by a larger space than is found between the lines in the remainder of the inscription. For a recent study of this ‘colophon,’ see Hurowitz, *Studies* Eph’al pp. 105–110; he prefers to divide the lines into three sentences: line 426,

- infantrymen* were killed.  
 427) Ṭāb-šār-Aššur, the chief treasurer sent *the chief (enemy) informers* to the god Aššur.  
 428–429) Tablet of Nabû-šallimšunu, the chief royal scribe, chief tablet-writer (and) scholar of Sargon (II) king of Assyria, (and) son of Ḫarmakki, the royal scribe, an Assyrian.  
 430) (This report) was brought in the eponymy of Ištar-dūri, the governor of Arrapha.

## 66

A brief inscription of Sargon is found upon some glazed wall plaques for clay cones from Aššur. This is the only royal inscription known that states that Sargon was the son of Tiglath-pileser III. For a letter that might also indicate that Sargon was the son of Tiglath-pileser (Dietrich, SAA 17 no. 46 [=CT 54 no. 109]), see Thomas, *Studies Bergerhof* pp. 467–470.

## CATALOGUE

Ex.	Museum Number	Excavation Number	Photograph Number	Provenance	Dimensions (cm)	Lines Preserved	cpn
1	EŞ 3282	—	Istanbul K 44	Aššur	—	—	(p)
2	VA Ass 2332a-d + VA Ass 2366b	Ass 31	VAN 4027	Aššur, gB5I, East-West trench, close above the floor, at the wall	33×25×6	1	(c)
3	—	Ass 46	—	Aššur, gB5I, East-West trench, room with niches	—	—	n
4	VA Ass 2333a+c-h	—	VAN 4028	Aššur, AP, northeast of the main court	32×23×5.5	1	c
5	VA —	—	—	As ex. 1	Dia. (base): 9.5	1	n

line 427, and lines 428–430, in the latter case taking *tuppi* of line 428 as the subject (or object) of the verb at the end of line 430 (“The tablet ... they/was delivered ...”). Line 426: The exact same number of soldiers killed was used in Esarhaddon’s “Letter to the God” (see Leichty, RINAP 4 p. 85 no. 33 iv 13’ and cf. Grayson, RIMA 3 p. 244 A.0.105.3 rev. 1’–2’). B.R. Foster feels that this line does not refer to the “actual casualties” suffered during the campaign, but rather to “a memorial ceremony in honor of all soliders lost in the campaign” and thus he translates this line as “(Herewith) one charioteer, two horsemen, and three scouts (of those who) were killed” (Before the Muses<sup>3</sup> p. 812). See also Luckenbill, ARAB 2 p. 99 n. 1.

**65 line 426** LÚ.EN GIŠ.GIGIR: The term means literally “lord/owner of a chariot” and thus may indicate an individual of a higher status than someone who just drove a chariot.

**65 line 427** For similar passages, see Grayson, RIMA 3 p. 244 A.0.105.3 rev. 3’–4’ and Leichty, RINAP 4 p. 85 no. 33 iv 11’–12’. The understanding of this line and the interpretation of LÚ.EME.SAG.MEŠ (written *li-šá-a-nu re-še-e-ti* in Leichty, RINAP 4 p. 85 no. 33 iv 11’) are matters of scholarly discussion (e.g., Levine, Eretz-Israel 27 [2003] pp. 114\* and 118\* n. 18). In particular, some instead consider LÚ.EME.SAG.MEŠ to refer to Ṭāb-šār-Aššur as “a first-class speaker” (see Leichty, RINAP 4 p. 85 note to no. 33 iv 11’) or to refer to the individuals who brought the first reports on the events of the campaign back to Assyria, and some take the verb *ul-te-bi-la* to be first person singular (“I,” i.e. Sargon), thus making Ṭāb-šār-Aššur (or the chief informers and Ṭāb-šār-Aššur) the object of the verb. The assumption tentatively followed here that LÚ.EME.SAG.MEŠ refers to individuals who could attest to what happened during the campaign (or perhaps just at Mušāšir) follows B. Levine (Eretz-Israel 27 [2003] p. 114\* and p. 118\* n. 18); see also Fales, COS 4 p. 215 n. 167. With regards to Ṭāb-šār-Aššur, who is known from several Neo-Assyrian letters, see text no. 2005; Parpola, SAA 1 nos. 41–74; and Perroudon, PNA 3/2 pp. 1344–1346 sub Ṭāb-šār-Aššur 1.

**65 line 428** M. Luukko (SAAB 16 [2007] p. 230 n. 17) takes LÚ.GAL.GI.BÜR (LÚ.GAL.GI.U) to be a variant spelling for *rab ṭupšarri*, “chief scribe.”

**65 line 430** Or “in the eponymy of Ištar-dūri, the governor of Arrapha, they (the bodies) were presented” (see Grayson, RIMA 3 p. 244 A.0.105.3 rev. 5’). See also the on-page note to lines 426–430.

## COMMENTARY

According to E. Unger, ex. 1 came from the royal palace at Aššur, but no excavation number or excavation photo number is known for it. Thus, it is edited from the published copy by Unger, with some help from the published photographs. A. Nunn (Knaufplatten p. 107 no. 61) states that EŠ 3282 (ex. 1) is the current museum number for Ass 46 (ex. 3) and that it measures 31×31×3 cm; however, O. Pedersén (Katalog pp. 110 and 215) and F. Pedde and S. Lundström (Palast p. 182 n. 275) treat them separately. The two are kept separate here, but Nunn may be correct in identifying them as one and the same piece. Nunn (Knaufplatten p. 107 no. 62) notes that while the excavation journal says that ex. 2 was found in gB5I, the inventory book indicates it was found in gA5II. Ex. 3 is made up of seven large and several small pieces. Ex. 4 is made up of five joined fragments, as well as several separate pieces with no traces of an inscription. The inscriptions on exs. 1, 2, and 4 are

written counter-clockwise around the middle of the plaque (the area in which the peg for the cone was placed). The signs on ex. 4 are quite faint.

All information on exs. 5–8 comes from Nunn (Knaufplatten p. 117 nos. 269–272), who states that the four pieces (like the preceding exemplars) come from glazed square plaques for cones. She considers ex. 5 to have two inscriptions, one above on the molding (“Profilleiste”) ([...] MAN GAL MAN *dan-nu* [...]) and one below on the plate itself ([...] KUR *aš-šur* A *ṁtukul-ti*-[...]); they are treated here as parts of the same inscription. She also notes that the inscription on ex. 5 is written from the inside out (“von innen nach außen”) rather than the normal direction, from the outside in (“von außen nach innen”). Very little of the inscription on exs. 6–8 is preserved and no part of the royal name; thus, their assignment to this inscription is not completely certain.

## 67

This inscription is found on several clay cones and one unidentifiable clay object from Aššur. It records the king's work on Eḫursaggalkurkurra, the cella of the temple of the god Aššur and was written in the fifth month of the eponymy of Našur-Bēl (705). For brick inscriptions of Sargon recording work on Eḫursaggalkurkurra, see text nos. 69–70; note also text no. 84 line 3' and likely text no. 74 i 25–27.

## COMMENTARY

Assur photo 320 depicts several clay cones with this inscription (supposedly exs. 1–5 and 8), but the inscriptions on them are not legible. According to O. Pedersén (Katalog, pp. 133 and 148) exs. 9 and 11 are fragments of glazed clay cones. Ex. 12

is listed under his category “Other Clay Objects” (“Sonstige Tongegenstände”) (ibid. p. 223). The line arrangement follows ex. 1, but the master line is a composite from various exemplars. Ex. 12 has lines 7–8 on one line.

## COMMENTARY

Pedersén, Katalog p. 162 indicates that exs. 3, 4, or 7 may be the brick depicted on Assur photo 999 (ex. 29). According to Messerschmidt, KAH 1 no. 39, these exemplars (at least those that are preserved at the relevant point) have *ana* not *a-na* in line 4; the brick depicted on the photo has  $\text{r}^{\text{a}}/\text{DIŠ}^{\text{1}}\text{-na}$ . The Vorderasiatisches Museum has a composite excavation copy (“Fundkopie”) of exs. 3, 4, and 7; although this copy has been consulted, it has not been used here since it does not record any variants that are not known elsewhere and since it is clear that at least one of the exemplars was not fully preserved (ex. 4, see Assur photo 158). J. Marzahn and L. Jakob-Rost (Ziegel 1) erroneously give the museum number of ex. 9 as VA Ass 3276h. The provenance of this exemplar is given as hD4I by Marzahn and Jakob-Rost (ibid. p. 131 no. 348); the provenance in the catalogue follows O. Pedersén. The excavation number of ex. 10 is not known; it is erroneously given as Assur 18540 in Marzahn and Jakob-Rost, Ziegel 1 p. 131 no. 349. There is an excavation copy for Ass 2970 and it is assumed here that it represents both exs. 12 (Ass 2970a) and 18 (Ass 2970b). The measurement of ex. 14 follows Marzahn and Jakob-Rost, Ziegel 1 p. 133 no. 353. Jakob-Rost and Marzahn, VAS 23 p. 9 no. 124 gives that exemplar the measurements 10.5×16.0 cm and does not take it to be an exemplar of this inscription, but it seems likely that it is. Ex. 28 is edited from an excavation copy. The museum number of ex. 30 is not clear and the brick could be 6676 (information courtesy H. Galter). It is possible that ex. 30 is to be identified with one of the exemplars only known by its excavation number, particularly exs. 18, 20, or 21

that were assigned to the museum in Istanbul.

All exemplars known are inscribed, not stamped. There are no known deviations from the line arrangement given below and the master line follows ex. 1.

Exs. 6 and 27 are glazed. According to Andrae, MDOG 22 p. 37, ex. 2 is also a glazed brick, but neither KAH 1 p. X nor Pedersén, Katalog p. 162 indicates this. Pedersén (ibid. p. 171) indicates that ex. 22 has a glazed rosette on it. Ass 16596 (found in iC4III) is said to be a fragment of a “gestempelt” glazed brick of Sargon II, but nothing more is known about it (ibid., p. 194; cf. Gries, Assur-Tempel p. 257 no. 2092).

Haller, Gräber p. 36 refers to a brick of Sargon (II) from the Aššur temple being found in grave 456 (bE5V). This should refer to one of text nos. 68–70; the brick is said to measure 41×41 cm, which might suggest either text no. 69 or text no. 70, rather than text no. 68.

According to the Aššur excavation records, Ass 3144 and Ass 3230A are brick fragments which have four inscribed lines each and which can be assigned to Sargon II. Nothing further is known about the inscriptions on them; they may have this inscription or some other inscription of this ruler. Ass 3144 was found in hE4I, court, southeast, and Ass 3230A was found in hD4I, court, middle. Bricks with this inscription were found with the same map coordinates (exs. 12 and 21–23). See Pedersén, Katalog p. 171 and Gries, Assur-Tempel p. 267 no. 2317.

As is the practice in RINAP, no score for this brick inscription is given on Oracc, but the minor variants are listed at the back of the book.

 2) <sup>m</sup>MAN-GIN MAN ŠÚ MAN KUR *aš-šur*.KI  
 3) MAN KUR EME.GI<sub>7</sub> u URI.KI  
 4) *a-na* TI-šú DÛ-uš
- 1-4) To the god Aššur, his lord: Sargon (II), king of the world, king of Assyria, king of the land of Sumer and Akkad, built (this structure) for the sake of his life.

## 69

This inscription from Aššur records the paving of the processional way of the courtyard of Ešursaggalkurkurra, the cella of the temple of the god Aššur. It is inscribed on a large number of bricks, many of which were found in or near the temple of that god. The next inscription (text no. 70) is a Sumerian version of this Akkadian text.

## COMMENTARY

The findspot given above for ex. 1 follows Pedersén, Katalog p. 166; Andrae, AAT p. 91 states that this brick came from iE5I. Ex. 4 has been edited using the excavation photograph and an excavation copy (“Fundkopie”) in the Vorderasiatisches Museum. The excavation photograph of ex. 6 has been consulted, but it was not possible to confirm large parts of the text from it. For ex. 10, Marzahn and Jakob-Rost,

Ziegeln 1 p. 129 no. 343 gives the Assur number 3298e; the catalogue follows Pedersén, Katalog p. 172. The provenance for ex. 12 is given as “Sin-Šamaš-Tempel; fc 6III” in Marzahn and Jakob-Rost, Ziegeln 1 p. 130 no. 345; for greater details on the findspot, see Pedersén, Katalog p. 203 and p. 49 sub Ass 20948. Exs. 16 and 17 are edited from excavation copies. O. Pedersén (Katalog p. 179) says that Ass 3859

(ex. 38) was found in hB4I, while H. Gries (Assur-Tempel) p. 268) states that it was found in hC4I. Ass 5581 (ex. 40) actually refers to fragments of two bricks (see Pedersén, Katalog p. 180). Ass 3898 refers to several fragments of pavement bricks that have text nos. 69 and 70 (see Pedersén, Katalog p. 175); thus, ex. 39 may represent more than one exemplar. It is not certain that the inscription on ex. 41 is a duplicate of this text; see Pedersén, Katalog p. 183. It is quite possible that the two exemplars seen in Istanbul (exs. 44–45) also appear in the catalogue under their excavation numbers. H. Galter kindly supplied information on exs. 44–45 as well as photographs of them.

All exemplars that have been checked are in-

scribed, not stamped, and all have the same line arrangement. The master line follows ex. 1.

Bricks recording the construction of the processional way of the Aššur temple (this inscription and text no. 70) were found at that temple (see also Andrae, MDOG 44 [1910] pp. 47–48 and fig. 16, and Haller, Heiligtümer pp. 62–63) and in such other structures as the palace of Ashurnasirpal II (see Preusser, Paläste p. 23 and text no. 70 exs. 2–3), the Sîn-Šamaš temple (see Haller, Heiligtümer p. 89 and ex. 12), and the Anu-Adad temple (see Andrae, AAT pp. 91–93).

No score for this brick inscription is given on Oracc, but the minor variants are listed at the back of the book.

|--|---|

# 70

This inscription is a Sumerian version of the previous Akkadian inscription recording the paving of the processional way of the courtyard of Eḥursaggalkurkurra. Most of the exemplars with this inscription were found in the temple of the god Aššur at Aššur.

## COMMENTARY

The findspot given above for ex. 1 comes from Pedersén, *Katalog* p. 166 (see also *KAH* 1 p. X); Andrae, *AAT* p. 91 states that this brick came from iE5I. Large portions of the inscription on ex. 2 are not really legible on Ass ph 195. The excavation copies (“Fundkopie”) of exs. 2–3 in the Vorderasiatisches Museum have been used, but these are of limited help. It is not certain that the six-line text reported to be on ex. 8 is actually a duplicate of this inscription; see Pedersén, *Katalog* p. 171. Ex. 9 is only known from a Babylon photo. Since some items depicted on Babylon photographs are known to have come from Aššur, it is likely that this piece did as well. It may even be one

of exs. 2–8 or 10. Ass 3898 (ex. 10) refers to several fragments of pavement bricks on which are found text nos. 69 and 70.

A brick found in hE3V and depicted on Ass ph 5216 may have this inscription as well; see Gries, *Assur-Tempel* p. 264 no. 2262 and pl. 61d.

With regard to the use of bricks with this inscription in structures other than the Aššur temple, see the commentary to text no. 69.

The line arrangement for the text is the same for all exemplars and the master line follows ex. 1. No variants to the inscription are known and no score is presented on Oracc.

## 71

A poorly preserved glazed-brick frieze from the temple of the god Aššur at Aššur has some epigraphs on it that are likely to be attributed to Sargon II and to refer to events connected with that ruler's eighth campaign (714).

Museum Number	Excavation Number	Provenance	Dimensions (cm)	cpn
VA Ass 2283-2286	—	Aššur, Aššur temple, façade of one of the ramps leading up from the forecourt platform to the platform on which the temple was situated	80×180	n

## COMMENTARY

Only a small portion of the frieze has been published and this depicts a mountainous region, with an individual (king?) in a chariot, accompanied by several other soldiers, and a king enthroned. Several pieces are clearly misplaced and W. Andrae thought that the frieze had been patched together in ancient times with pieces from more than one scene (FKA pp. 11-12). According to an inventory book in the Vorderasiatisches Museum, some of the bricks making up the frieze bear the museum numbers VA Ass 2283-2286 (information courtesy J. Marzahn). The edition is based upon Andrae's published drawing.

Following E. Weidner, we can distinguish five groups of signs on the frieze:

1. *ina bi-rit*, “between”
2. *e-tiq*, “I/He traversed”
3. KUR.ni-<sup>r</sup>kip<sup>1</sup>-pi, “Mount Ni[k]ippa”
4. KUR.ú-pa-a KU<sub>6</sub>-ub, “Mount Upâ I/He entered”
- 5.1. KUR.<sup>r</sup>si<sup>2</sup>-mir<sup>1</sup>-[ri-a], “Mount [S]imir[ria]”
- 5.2. <sup>r</sup>KUR<sup>1</sup>.ú-x [...], “Mount U[...]” or <sup>r</sup>KUR<sup>1</sup>.ú x [...], “mountain [...]”

In group 1, the *rit* sign is presented upside down.

Groups 2 and 3 are on bricks in the same row, but separated by the figure of the individual in a chariot. Group 5 is found on one brick in the upper right corner of the frieze, in the same row as group 1; it has parts of two lines of inscription. Also following Weidner, we tentatively divide these five groups into three epigraphs (groups 1, 3, and 4; group 2; and group 5). This assumes that *e-tiq* (group 2) was at the end of an epigraph to the left of the section preserved here.

The ruler to whom the glazed-brick frieze is to be attributed has been a matter of discussion. Andrae and A. Haller assigned it to Tiglath-pileser I, B. Meissner (DLZ 46 [1925] col. 419) and A. Fridman to Tiglath-pileser III, and Weidner, A. Nunn, and P.R.S. Moorey (Materials p. 317) to Sargon II. The relief has been thought to represent Sargon's eighth campaign. See in particular text no. 65 lines 15 (for groups 1, 3, and 4), 16 (for group 2), 18 (for group 5), and 418 (for groups 1, 3, and 4).

Other fragments of inscribed glazed bricks have been found in this temple, but these are poorly

preserved and their assignment to Sargon II is far from certain. A few better preserved fragments were found tumbled down in the court of the Aššur temple or walled up in later buildings (especially in temple A). Weidner gives two examples:

A. Ass 1024+1026: [šú]-lum NUMUN-šú šá-lam<sup>1</sup> [URU-šú], “[the well]-being of his offspring, the well-being [of his city].” Ass 1024 was found in iE5I (eastern prosthesis, eastern slope) and Ass 1026 in iC5I (southern prosthesis, under the Parthian building); the pieces were assigned to the museum in Istanbul. The first part of the inscription (up to and including the šá) is edited from an excavation copy (“Fundkopie”) of Ass 1024 in the Vorderasiatisches Museum; the latter part of the inscription is based on Weidner’s edition (Afo 3 [1926] p. 5). See Andrae, MDOG 22 (1904) pp. 13–14 and Pedersén, Katalog p. 163.

B. Ass 5268e, g: <sup>1</sup>pít-ḫal<sup>2</sup>-lum<sup>1</sup>, “horseman.” The piece was found in iB4III; it is shown on Ass ph 1763 and 1765 and has been collated from Ass ph 1763. See

also Pedersén, Katalog p. 179. It cannot be considered absolutely certain that these two fragmentary texts should be assigned to the time of Sargon II, but it has been thought advisable to include them here.

In addition, Ass 16596 (found in iC4III) is a glazed brick fragment which is reported to have a stamped inscription of Sargon II; see Pedersén, Katalog p. 194. Ass 5269e, s, a fragment of a glazed brick found in iB4III, may also bear an inscription of this ruler; see *ibid.* p. 179.

With regard to the provenance of the frieze, see in particular Haller, Heiligtümer p. 58 fig. 17 no. 12 and pp. 60–61; see also Andrae, MDOG 43 (1910) pp. 34 and 36–38, and 44 (1910) pp. 45–47. With regard to glazed bricks and glazed-brick friezes in general, see Moorey, Materials and Industries pp. 312 and 315–322. For the glazed-brick friezes from Aššur in the Vorderasiatisches Museum in Berlin, see Fügert and Gries in Fügert and Gries, Glazed Brick Decoration pp. 28–47.

## 72

A fragment of part of the right side of a clay tablet in the Vorderasiatisches Museum (VAT 10716) preserves part of an inscription of Sargon II that appears to refer to Kibaba (city ruler of 𒊕𒊕𒊕) and Daltâ (king of Ellipi), thus likely to the Assyrian campaign into Iran during Sargon's sixth regnal year (716). The piece has several so-called "firing holes" in it. It is not certain which side is the obverse and which the reverse. Side A has been collated, but the edition basically follows that published by E. Frahm. The inscription on side B is almost completely worn away and the transliteration of it is based solely on the published copy.

## 73

This text from Kalḫu (modern Nimrud) is generally referred to as the Nimrud Inscription or the Juniper Palace Inscription. It describes Sargon's restoration of the "juniper palace" at Kalḫu, which had originally been built by Ashurnasirpal II (883–859 BC), and his storing in it of gold and silver that had been taken as booty from Pisiri(s), king of Carchemish. It is found on two stone slabs from the North-West Palace. The text includes references to events down to at least the king's fifth regnal year (717) in view of the mention of the conquest of the city of Carchemish in line 10 (see also lines

72 line A 12' As suggested by E. Frahm (KAL 3 p. 74), possibly [...]<sup>r</sup>uš<sup>1</sup>-*tal-pit-su* x [(x)], "[...] I destroyed it ..." or [...] x *re-bit-su* x [(x)], "[...] his/its plaza ...". The end of the line may simply be -*su*-<sup>r</sup>un<sup>1</sup>, "them/their."

72 line A 14' Likely a D-stem of the verb *malû*.

72 line A 15'-16' Following Frahm, KAL 3 pp. 71-72 and 74, possibly restore: [... *i-na me-tiq ger-ri*]-*ia a-tu*-[*ram-ma*] / [*a-na URU.ḫar-ḫar* (...)] URU *šu-a-tu ú*]-*šab-bi-su ak*-[*šud* (x x)], "[...] in the course of] my [campaign] I *ret*[urned to Ḫarḫar (...)], seized [that city], (and) *col*[nquered (it) ...]."

72 line A 17' Following Frahm, KAL 3 pp. 72 and 74, and based on text no. 1 line 100 and text no. 7 line 63, possibly read: [... URU.*kar*-<sup>m</sup>]-<sup>r</sup>LUGAL<sup>1</sup>-GI.NA <sup>r</sup>šú<sup>1</sup>-[*um-šú ab-bi/az-kur*], "[... I (re)named (it) Kār-Šarr]ukīn," although the writing *šu-um-šú* here rather than MU-šú would be unusual in Sargon's royal inscriptions.

72 line A 18' Following Frahm, KAL 3 pp. 72 and 74, and based on text no. 82 iii 2'' (also largely restored), possibly read: [... *É.KUR šu-bat* DINGIR.MEŠ GAL.MEŠ *eš-šiš*]-<sup>r</sup>e<sup>1</sup>-*pu-uš*-<sup>r</sup>ma<sup>1</sup> [x x x], "[...] I built [anew the temple, the abode of the great gods, ...]." Cf. also text no. 117 ii 44.

21–22) that took place in that year and thus N. Na'aman has argued that the text was composed in late 717 or early 716 (SAAB 8 [1994] pp. 17–20). For the archaeological context of the inscription, see J.M. Russell, *Writing on the Wall* p. 99.

## COMMENTARY

A.H. Layard states that these two gypsum slabs, which bear no sculpted relief, were placed on the palace wall above the standard inscription of Ashurnasirpal II (see ICC pl. 33 and Nineveh 1 p. 389). They may have been placed at the entry to the room in which the booty from Sargon's conquest of Carchemish was stored.

The master line is based on ex. 1, although in a few places a sign on that exemplar is partially damaged/unclear and fully preserved/clear on ex. 2; in these cases, the sign is indicated without any indication of damage in the master line. A squeeze of ex. 2 is preserved in the British Museum and that exemplar was collated by means of an examination of the squeeze. The copy of the inscription published by

Layard follows sometimes one exemplar and sometimes the other exemplar, with the divergent reading being cited as a variant; this is contrary to Layard's indication that all his variants were found on one particular exemplar. (According to J.M. Russell, the original Layard hand copy is MS A, pp. 124–126.) Layard made his copies in the early days of the decipherment of cuneiform and a number of signs indicated on his copy as being abnormal or incorrect are in fact correct sign forms (e.g., AK not ENGUR in line 1 and ZI not GI in line 2). H. Winckler's copy was made from Layard's and thus has no independent value; no reference is generally made to divergences between it and Layard's copy below.

- piled up its foundation terrace upon heavy limestone blocks like the base of a high mountain. I completely (re)constructed (it) from its foundations to its crenellations. I opened up an air passage to the left of its door for my pleasure. I depicted inside it (the palace) the conquest of cities, the triumph of my weapons, that I had achieved over the enemy, and I filled it with abundance for the inspection (of the people).  
19–20) I invited the god Urigal (Nergal), the god Adad, and the gods who dwell in the city Kalḥu (to come) inside (it) and I offered before them large prize bulls, fattened sheep, geese, ducks, (and) birds that fly in the sky (lit.: “flying birds of the sky”). I held a festival and (thus) made the hearts of the people of Assyria rejoice.  
21–22) At that time, I brought into this treasure house 11 talents (and) 30 minas of gold (and) 2,100 talents (and) 24 minas of silver, (measured) by the large (weight), booty (taken) from Pisiri(s), king of the city Carchemish, of the land Ḥatti (Syria), (situated) on the bank on the Euphrates River, that I personally had conquered.

## 74

A fragmentary inscription of Sargon II is found on pieces of two clay prisms discovered during British excavations at Nimrud. The inscription commemorates the construction of Dūr-Šarrukīn and records various military actions carried out during Sargon's reign. These military actions are not recorded in chronological order. The inscription was probably composed in the king's sixteenth regnal year (706) since it refers to Sargon's fourth year as ruler of Babylonia (vii 19), which would have been 706; see van der Spek, JEOL 25 (1977–78) pp. 65–66 and Na'aman, NABU 2000 p. 1 no. 1. This text is usually referred to as the Nimrud Prism and C.J. Gadd refers to the two exemplars of the text as prisms D and E (Iraq 16 [1954] p. 175).

## CATALOGUE

Ex.	Museum Number	Excavation Number	Provenance	Lines Preserved	Gadd prism	cpn

2	IM 67662	ND 3400 + ND 3402 + ND 3408 + ND 3409 + ND 3404	Nimrud, ZT, on pavement of the east corridor	ii 1'–20', iii 42–57, iv 32–53, v 13–43, vi 13–86, vii 29–85, viii 1'''–25'''	E	(c)

## COMMENTARY

The fragments were found during British excavations at Nimrud in 1952 and 1953. For a plan showing the provenances of the pieces, see Mallowan, *Iraq* 16 (1954) pl. XIV. It has been possible to collate only two pieces of the inscription: ND 3403 (ex. 1, iii 1–14 and iv 1–8) and ND 3408 (ex. 2, ii 1'–20', iii 42–57, and iv 32–53); the remaining pieces could not be located in the Iraq Museum in 1982 and 1998 when the author was working there. Thus, most of the inscription is edited from the published copies, although some use has been made of the photograph of part of ex. 1 published by C.J. Gadd in *Iraq* 16 (1954) pl. XLIII. Unfortunately, the published copy is mostly a composite of exs. 1 and 2 and it is generally not possible to be certain exactly what is on each exemplar. Lines for which only a composite copy of exs. 1 and 2 exists are iii 42–48, iv 32–53, v 17–42, vi 14–76, and vi 29–69; of these, it has been possible to collate ex. 2 (ND 3408) for iii 42–48 and iv 32–53. Thus, no score for the inscription can be presented on Oracc. Instead, a transliteration of ND 3408 (part of ex. 2) is presented there. It seems that when making his composite copy, Gadd relied mostly on ex. 1. In order to facilitate the use of older scholarship, the line numbering follows that used by Gadd.

Gadd presumably designated the two prisms D and E in order to follow on after fragmentary prisms A and B, which come from Nineveh and are now thought to be parts of the same prism (see text no. 82), and prism C, which also comes from Nineveh (text no. 83).

ND 3404 (Gadd, *Iraq* 16 [1954] pp. 174–175), found on the pavement of the east corridor of building ZT at Nimrud, is reported to have a totally illegible inscription (parts of two columns of 12–13 lines each) and to measure 4.9×4.5×1.2 cm. Gadd stated that it did not join any of the other Nimrud prism fragments, but according to J. Renger (private communication), A. Cavigneaux has joined it to ex. 2. Nothing is known about what is on the fragment.

For ND 3406, which may well preserve part of col. viii of this inscription and either have been originally part of one these two exemplars or have been part of a third exemplar of this inscription, see text no. 75.

Gadd (*Iraq* 16 [1954] p. 188) notes the close similarities between this inscription and 81-7-27,3 (text no. 83), a fragment of a prism in the Kuyunjik collection of the British Museum, and suggests that they may be duplicates. Since it is clear that the two are not exact duplicates ca. vii 7–11 and text no. 83 iii' 1–5, they have been kept separate here.

Col. i: This is found only on ex. 1; the restorations

in i 1–13 are based upon text no. 7 lines 1–7 and text no. 8 lines 1–3.

Col. ii: Lines 1–13 are found on ex. 1 and 1'–20' are found on ex. 2. The edition follows Gadd in assuming that no lines are missing at the beginning of the column and that ex. 2 follows ex. 1. According to Gadd, although “measuring from the preserved top of both prisms, they overlap physically,” in view of the content “it seems clear ... that the E fragment [ex. 2] follows the D [ex. 1]” (*Iraq* 16 [1954] p. 176). The size of the gap between exs. 1 and 2 is not clear.

Col. iii: Lines 1–41 describe Sargon's famous eighth campaign (714) to the land of Urartu; for the places mentioned in lines 1 and 12, see for example text no. 1 lines 137 and 139 and text no. 65 lines 168 and 189.

Col. iv: Most of our information on what was in col. iv comes from ex. 1. Only a little of iv 32–53 is found on ex. 2 (“the ends of a certain number of lines,” Gadd, *Iraq* 16 [1954] p. 180). The beginning of the column, iv 1–12, is the end of an account describing an Assyrian victory over Mutallu of Kummuhu while Sargon was in Babylonia; cf. text no. 2 lines 451–454 and text no. 7 lines 112–117 (particularly 115–117). For iv 13–24, see in particular text no. 1 lines 72–75. The rebellion and defeat of Samaria, which is related in Sargon's accession year in the Khorsabad Annals, is treated in iv 25–49, although the passage here may be a conflation of incidents in the king's accession year and second regnal year (722 and 720); see Gadd, *Iraq* 16 (1954) p. 181.

Col. v: Gadd states that there are about five lines missing at the beginning of the column in ex. 1 and about twelve in ex. 2 (*Iraq* 16 [1954] pl. XLVII). He notes that ex. 2 actually has “little of this column, for only a part of the right side of it remains” (*ibid.* p. 184). With regard to v 13–33, cf. in particular text no. 1 lines 196–204a and text no. 7 lines 30–32. With regard to v 34–40, see text no. 1 lines 125b–126. For v 41–76, cf. text no. 1 lines 204b–216a and text no. 7 lines 78–82.

Col. vi: Gadd states that there are about five lines missing at the beginning of this column in ex. 1 and about twelve in ex. 2 (*Iraq* 16 [1954] pl. XLVII). He notes that col. vi is the best preserved part of ex. 1 while only the extreme right ends of many of the lines in the lower half of ex. 2 are preserved. He also notes that “Distribution of the matter between lines varies slightly in the two copies, but there are no significant differences” (*ibid.* p. 187). Gadd (*ibid.* p. 188) notes that if the prism records matters in the same order as the prism fragment 81-7-27,3

(text no. 83), the first part of the column would have described “the wars against the kings of Ashdod and Meluḥḥa” (i.e., the episode of the rebel Iāmānī of Ashdod who fled to Egypt but was later delivered up to Sargon by the Kushite ruler). For vi 14–80, see in particular text no. 7 lines 121–37, text no. 86 lines 1’–16’, and text no. 113 lines 6’–23’.

Col. vii: According to Gadd (Iraq 16 [1954] pp. 191 and 193), there are about six lines missing at the top of col. vii of ex. 1 and that exemplar has only the first halves of the lines preserved. Gadd notes that ex. 2 begins at line 29, but is neither well-preserved nor clear until ND 3408+3402 joins the exemplar (beginning at line 50). For vii 7–38, see in particular text no. 7 lines 141–49, text no. 83 iii’ 1–13, and text no. 103 iv 8–42.

Col. viii: Gadd (Iraq 16 [1954] p. 197) notes that although the remains of col. viii in exs. 1 and 2 “overlap when the prisms are set side by side it is

not possible to discern any connexion between their texts.” Gadd does not indicate the number (if any) of lines likely to be missing at the beginning of the prism on ex. 1, but states that ex. 2 comes from near the bottom of the column on that exemplar. Thus, ex. 1 is presented first in the edition (viii 1’–33’) and ex. 2 second (viii 1’’–25’’). The edition indicates that there may be a lacuna between the two sections, but no gap may exist and the two may actually overlap. For a further prism fragment that may well have been part of column viii (ND 3406), see text no. 75.

Since the inscription does not record the events of Sargon’s reign in chronological order, the following chart lists the major events recorded in the body of this inscription together with the dates for them (mostly based upon statements in the Khorsabad Annals [text nos. 1–6]).

i 25-28 The tentative restoration is based on text no. 84 line 3' and Fuchs, SAAS 8 p. 5.

i 27 -man\*: The copy has -KUR.

ii 9-10 See text no. 1 lines 89-90 and possibly restore [... <sup>m</sup>it-ti-i KUR.al]-ʿlab<sup>21</sup>-ra-a-a [a-di qin-ni-šu as-su]-ḥa-am-ma.

ii 1'-20' Cf. text no. 1 lines 94-100, text no. 2 lines 86-95, and text no. 4 lines 39'-45'.

ii 6'-7' During the campaign of 716, Sargon changed the names of the cities Kišesim and Ḥarḥar to Kār-Nergal and Kār-šarrukīn respectively. Thus, C.J. Gadd (Iraq 16 [1954] p. 177) suggests that what appears to be a SUḪUŠ in ii 7' might be LUGAL, allowing a reading Kār-šarrukīn, instead of Kār-Išdu-ukin. In line 6 possibly URU.kar-<sup>d1</sup>x-RI.

ii 14'-15' Following Gadd, Iraq 16 (1954) p. 177 and based on text no.1 lines 81-82 and text no. 4 line 24', possibly [...] a-na] ʿAN<sup>1</sup>.ŠĀR be-lí-ia [a-na tur-ri gi-mil-lí] KUR.man-na-a-a.

ii 17' The passage likely refers to the setting up of a statue of the king or a monumental inscription; see text no. 1 lines 95 and 100, and text no. 2 lines 87 and 93.

[...] their fortresses [...] I seized. [...] I stationed [the]re. (ii 10) [...] I led [...] ... [...] the lan]d Zaranda [...]

Lacuna of about 21 lines

iii 36–41) [I took away] subst[antial] booty and I destroyed, [demolished, (and) bu]rned that city down [with fire]. I caused there to be lamentation throughout the land Urart<sup>?</sup>, t[o] its [fu]ll [extent]. His own fear(s) fell upon their ruler [Ursâ (Rusâ)], and he brought an end to [his] life with the iron dagger from his belt.

iii 42–53) (As for) Daltâ of the land Ellipi, a submissive subject who pulled my [yo]ke, five of his districts revol[ted] against him and withheld (iii 45) their annual payment of tribute to (the god) Aššur, my lord. I overwhelmed those districts as with a bird trap. I conquered their fortified city Ḫubaḫna, together with 25 settlements and their countless [villages], (iii 50) and [I in]fllicted a defe[at upon them. I brought] to the land of Assy[ria] 33,600 people, 11,600(+ ...) mules (and) donkeys as substantial boo[ty from them].

iii 54–57) In the course of [my] ca[mpaign ... I received] from 45 city rulers of the [powerful] Med[es] 8,609 horses [...]

Lacuna

iv 1–12) I took to Assyria. [(...)] I restored and I re[organized (the administration of)] that land. I

iii 1 Text no. 1 line 139 has KUR.É-sa-an-gi-bu-ti before the cities Tarui and Tarmakisa and the trace at the beginning of the line could be -<sup>r</sup>ti<sup>1</sup>. C.J. Gadd (Iraq 16 [1954] p. 178) notes that there is not sufficient room at the beginning of the line for such a restoration, though he does in fact restore this.

iii 37–39 and 41 The restorations are based on those proposed by C.J. Gadd, but would require more room than Gadd's copy would indicate is available. For line 38, see text no. 65 line 414.

iii 42–53 Compare text no. 7 lines 70b–72a and text no. 2 lines 207b–218a.

iii 48 We would expect a-di 25 URU.MEŠ-(ni) šá/ša li-me-ti-šú-nu, but the traces do not support such a reading.

iii 50 The restoration is based on that proposed by C.J. Gadd, but would require more room than Gadd's copy indicates is available.

iii 52 MEŠ\*: The text has ME<sup>?</sup>.

iii 55–56 See also text no. 1 lines 192b–193, which however has 4,609 not 8,609.

iv 2 For the restoration, see ii 4'.

[settled] there people of the land Bīt-Yakīn that [I had] c[onquered. (iv 5) I set] a eunuch of mine ov[er them, named him] field marshal of the [left (wing of the army) (lit.: “field marshal of the house [of the left]”), and ...] I conscripted [...] chariot(s) [... 1],500 ca[valry, (iv 10) ...] bow[men], (and) 10,000 shie[ld (and spear)] bearers [(...)] from among them and added (them) [to] my royal [(military) contingent].

iv 13–24) [Pis]iri(s) of the city Carchemish sinned [against] the treaty (sworn) by the great gods and (as a result) I brought him [to A]ssyria, together with his wife, his sons, his daughters, [(his) family], (and) the (other) offspring of his father’s house. I set [a eun]uch of mine as governor [over the people] who lived in the city Carchemish and (iv 20) considered them [a]s people of Assyria. I conscripted [from] among them [... chario]t(s), 500 cavalry [... (and) ...] foot soldiers, and I added (them) [to] my royal (military) contingent.

iv 25–41) (As for) the people of [(the city) Sa]maria who had [altogeth]er come to an agreement with a king [hostile to] me not to do obeisance (to me) [or to

iv 6–7 See text no. 2 line 452.

iv 8–11 See text no. 2 lines 453b–454a and text no. 7 lines 116–117 for possible restorations; however, the amount of space available for restoration sometimes appears to be insufficient (e.g., for restoring [20 LIM ERIM.MEŠ GIŠ].<sup>r</sup>PAN<sup>1</sup> in line 10 and [u GIŠ.az-mar-re]-<sup>r</sup>e<sup>1</sup> in line 11).

iv 16 Or [ni-šú]-<sup>r</sup>ti<sup>1</sup>; see for example text no. 7 line 31.

iv 19 C.J. Gadd restores [UGU-šú-nu LÚ.šu-ut] at the beginning of the line (Iraq 16 [1954] p. 179). Although UGU-šú-nu is expected in the passage, the copy would suggest that there is room to restore no more than one or two signs and in similar passages in this inscription the phrase is placed immediately before the verb (e.g., iv 40).

iv 21–22 Text no. 1 line 75 has 50 chariots, 200 cavalry, and 3,000 foot soldiers at this point.

iv 25–28 Following Frahm, Last Days pp. 71–72, possibly [id-bu]-<sup>r</sup>bu<sup>1</sup> instead of [a-ḫa]-<sup>r</sup>meš<sup>1</sup> at the beginning of line 28, thus “... who [had spok]en (and) come to an agreement with a king [hostile to] me ...” instead of “... who had [altogeth]er come to an agreement with a king [hostile to] me ...”; the trace of the sign before *ig-me-lu* would fit the end of a BU sign as well as the end of a MEŠ. For the restoration in iv 27, see text no. 1 line 68 and text no. 4 line 7. The understanding of iv 25–28 and in particular the restorations at the beginnings of iv 26 and 28 are much disputed. There have been two basic views of the matter. The first view — tentatively reflected in the edition above, but one which would also work with the alternate reading [id-bu]-<sup>r</sup>bu<sup>1</sup> in iv 28 — assumes that the Samaritans came to an agreement with a ruler hostile to Sargon not to be subservient to Assyria; see in particular Gadd, Iraq 16 (1954) pp. 179–82 (restoring instead [na-ki-ri<sup>2</sup>]-ia in iv 26); Tadmor, JCS 12 (1958) p. 34; Hayes and Kuan, Biblica 72 (1991) pp. 171–175; Becking, Fall of Samaria pp. 28–30 (also preferring [na-ki-ri]-ia in iv 26 and restoring “[to Ashur?] at the beginning of iv 28, i.e., “[or to br]ing tribute [to Aššur]”); Briend and Seux, TPOA no. 36; Younger, COS 2 p. 295 (who, like B. Becking, restores “to Aššur” at the beginning of iv 28); and Cogan and Tadmor, II Kings p. 336 no. 6A. Note, however, that the trace at the beginning of line iv 28 as copied by C.J. Gadd would fit the end of a MEŠ sign, but not the end of a ŠUR sign or a KI (i.e., is against a restoration [(a-na) <sup>d</sup>aš]-<sup>r</sup>šur<sup>1</sup> or [(a-na) aš-šur].<sup>r</sup>KI<sup>1</sup>). The second view assumes that the Samaritans had become angry at Sargon’s predecessor. This view is based on restoring [a-lik IGI]-ia or [IGI.DU]-ia in iv 26 and reading *ik-me-lu-ma* rather than *ig-me-lu-ma* in iv 28. Thus, “(With regard to) the people of [Sa]maria who had become angry [...] with the king, my [predecessor] with the result that they would not do obeisance (to me) [or br]ing tribute (to me).” With regard to the second view, see R. Borger apud Spieckermann, Juda unter Assur pp. 349–350 and n. 93; Dalley, Iraq 47 (1985) p. 36 (also restoring [ibbalkitū/ikpudū] in iv 28 and translating the passage: “The Samaritans, who had [conspired?] against the king my [predecessor] not to endure servitude nor to bring tribute, became angry?”); and Borger, TUAT 1/4 (1984) p. 382. N. Na’aman (Biblica 71 [1990] pp. 209–210) has [ālik pāni]-ia at the beginning of iv 26 and in iv 28 suggests [šā-šū]-<sup>r</sup>nu<sup>1</sup> ikmelūma (i.e., “whose [hearts]? became angry? against/to the king my [predecessor]”) or [lemutt]i? igmelūma (“who had repaid? [evil]? to the king my [predecessor]”). G. Galil (CBQ 57/1 [1995] pp. 54–55) reads [LÚ.KÚR]-ia at the beginning of iv 26 and [ḫUL]-<sup>r</sup>tū<sup>1</sup> ig-me-lu-ma at the beginning of iv 28 and translates “... who renewed [evil] with a king [hostile] to me, not to be (my) servants, [and not to de]liver tribute ...” The most extensive discussion of the matter is found in Hayes and Kuan, Biblica 72 (1991) pp. 171–175. E. Frahm (Last Days pp. 71–72) also suggests the translation “... who [had spok]en (and) come to an agreement with a king [who preceded] me ... tribute, had become angry and offered battle” (translation slightly modified from that of Frahm to match the one given above) if we restore at the beginning of iv 26 [ālik pāni]-ia. No proposal is entirely free of textual problems.

bring tribute (to me) and (who) had offered battle – [with] the strength of the great gods, my [lord]s, (iv 30) I foug[ht] them [and] counted [as] booty 47,280 people, together with [their] chariots and the gods who helped them. I conscripted two hundred chariots from among them into [my] royal (military) contingent and settled (iv 35) the remainder of them in Assyria. I restored the city Samaria and made (it) greater than before. I brought there people from the lands that I had conquered. I set a eunuch of mine as provincial governor over them and considered them as people of Assyria.

iv 42–49) I had the awesome radiance of (the god) Ašš[ur], my lord, overwhelm the people of Egypt and the Arabs. At the mention of my name, their hearts (iv 45) pounded (and) their arms grew weak. I opened up a sealed-off [harbor] district of Egypt, mingled [to]gether [the people] of Assyria and Egypt, and [allowed (them) to eng]age in trade.

iv 50–58) [Kiakk]i of the city Šinuḥtu, [who had put his trust in M]itâ, king of the land Musku, [stopped (his delivery off)] t[ribut]e (and) payment(s) and [with]held his audience gift. [I coun]ted him [as booty, together with the people of] his city, his chariots, [...], his [daughter]s, [...].

Lacuna

iv 31 Various exemplars of text no. 7 line 24 have 27,290, 27,280, and apparently 24,280. For the proposal that the number in the Nimrud Prism was 47,280, see Na'aman, NABU 2000 p. 1 no. 1, but note that his reference to the Khorsabad Annals (text no. 1 line 15) in connection with this passage is misleading since the number there is totally restored.

iv 33 Text no. 1 line 15 and text no. 7 line 24 have fifty chariots.

iv 37–38 URU.sa-me-ri-na ú-ter-ma UGU šá pa-ni ú-še-me “I restored the city Samaria and made (it) greater than before”: The understanding and translation of the two verbs in this passage remains somewhat problematic. S. Dalley (Iraq 47 [1985] p. 36) translates “I repopulated Samaria more than before,” assuming that ú-ter-ma comes from atâru rather than târu and reading ú-še-šib (from wašābu) rather than ú-še-me (from ewû). For the (slightly restored) duplicate passage in text no. 1 line 16, A. Fuchs (Khorsabad pp. 88 and 314, with n. 225) noted and apparently rejected Dalley’s understandings of the two verbs, kept the reading ú-še-me, and translated “Samaria wandelte ich um und machte (es) größer als zuvor.” S.Z. Aster (JAOS 139 [2019] pp. 594–595, especially nn. 14–15) accepts Dalley’s understanding of the latter verb, but not the former, and translates the passage as “I again settled Samaria, more than (it had) previously (been settled).” E. Frahm (Last Days pp. 71–72) also rejects taking the former verb from atâru and is uncertain about whether one should read the latter as ú-še-šib or ú-še-me, although his translation assumes ú-še-šib: “I resettled Samaria, making it more (populous) than before.” If the former verb came from atâru, we would really expect the writing ut-tir-ma (see for example text no. 1 line 71) or ú-šá-tir-ma, and so the derivation from the verb târu seems much more likely than one from atâru, although it is not certain whether târu is being used in hendiadys with the following verb (i.e., “I again made the city Samaria greater than before” or “I again settled/populated the city Samaria more than before”) or as translated above. I am not aware of the phrase eli ša pâna being used with either the verb wašābu or ewû in any other Neo-Assyrian royal inscription.

iv 46–49 The Khorsabad Annals place the passage about the reopening of trade with Egypt in the account of Sargon’s accession year (text no. 1 lines 17b–18a). iv 46: Or <sup>r</sup>kar<sup>1</sup>-ri, following Tadmor, JCS 12 (1958) p. 34. Borger, TUAT 1/4 (1984) p. 382 suggests [ki]-<sup>r</sup>sur<sup>1</sup>-re (“[bor]der”), but see text no. 1 line 17 and Fuchs, Khorsabad p. 88 n. 1 to line 17. See also Eph’al, Arabs pp. 101–102 n. 339. It is not known where the entrepôt, or port, was located, but both Tell Abu Salima and Ruqeish have been proposed (see Cogan, Raging Torrent p. 92).

iv 51–55 The restorations in lines 51–52 and 54–55 are based on the readings proposed by Renger, CRRA 32 p. 114; for the restoration in iv 53, see text no. 7 line 113.

iv 56 The copy of the trace before ŠÚ resembles <sup>r</sup>KUR<sup>1</sup> rather than NU.

v 13–33) [... he] seized [... I] gave him [and ...] to his aid. I seated him [on the throne of (Ḫullî)], his [father], and entrusted to him ..., (along) with the land Ḫilakku. I then brought order to his disturbed land. (v 20) However, that (man), a Hittite who did not protect justice, sent a messenger to Ursâ (Rusâ), the Urartian, and Mitâ, king of the land Musku, about taking away territory of mine. I took in bondage to Assyria (v 25) Amris (Ambaris), king of the land Bît-Purutaš, together with the offspring of his father's house (and) the nobles of his land, (along) with one hundred of his chariot(s). (v 30) I had the lands Bît-Purutaš (and) Ḫilakku dwell (as safely) as in a meadow. I set a eun[uch of m]ine as provincial governor over them and considered them as people of A[ssyria].

v 34–40) For a second time, I brought about [the defe]at of Mitâ, king of the land Musku, in his (own) wide district and [I (then) rest]ored to their former st[at]u[s] the cities Ḫarru[a] (and) Ušnanis, fortress[es] of the ci[ty] Que, which he had taken away [by] for[ce] in the past.

v 41–50) [(As for) Tar]ḫun-azi of the city [Mel]id (and) [T]arḫu-lara of the city [Ma]rqaša, to whose disturbed kingdom(s) I had brought order and (v 45) the whole of whose extensive lands I had entrusted to them, those (men), evil Hittites, did not remember my good deeds but (rather) sent (messages) hostile to Assyria to Mitâ, king of the land Musku. They held (Assyria/me) in contempt.

v 53–76) Angrily, I mustered the numerous troops of Assyria and, like a fog, overwhelmed extensive districts (v 55) within the lands Kammanu (and) Gurgum, together with settlements in their environs. I brought to Assyria Tarḫun-azi of the land Kammanu (and) (v 60) Tarḫu-lara of the land Gurgum, together

v 16 For the restoration, cf. text no. 7 line 30; there seems insufficient room on the copy to include the father's name. Or possibly [ina GIŠ.GU.ZA LUGAL-ti]-šú, "[on] his [royal throne]"; see text no. 1 line 196.

v 17 Text no. 1 line 198, text no. 2 line 230, and text no. 7 line 30 have bi-in / [in]-ti<sup>1</sup> (var. -tu), "a daughter of mine" (var. "a daughter (of mine)") before it-ti KUR.ḫi-lak-ki. Possibly <sup>1</sup>DUMU.MUNUS-ia<sup>1</sup>.

v 33 C.J. Gadd's copy would not suggest that there is sufficient room for the required restoration in the middle of the line.

v 38 Ex. 2 has KUR.qu-e, "land Que."

Lines 1–12 not preserved

vi 13) [...]

vi 14–21) [Marduk-ap]la-iddina (II) (Merodach-Baladan), the k[in]g of Chaldea, [who ag]ainst the will of the gods had come down t[o] the territory of the land of Sumer and Akkad and had appropriated for himself the kingship of Babylon, turned to Ḥumbanigaš (Ḥumban-nikaš I), the Elamite, for aid. He put his trust in the sea (and its) surging waves and withheld his audience gift.

vi 22–42) I mustered the numerous troops of (the god) Aššur and crossed the Tigris (and) Euphrates Rivers, as well as innumerable small streams. Like the Deluge, I overwhelmed (vi 25) the Chaldeans to their (lit.: its) full extent. In the face of my advance (lit.: “before me”), Marduk-apla-iddina gathered together the inhabitants of his cities (lit.: “his inhabited cities”) and the gods dwelling in them, and (vi 30) brought (them) into the city Dūr-Yakīn. He strengthened its enclosure walls (and), moving back a distance of ten *nindanu* from in front of its main wall, he made a moat two hundred cubits wide; he made (the moat) one and a half *nindanu* deep and reached ground water. He cut (vi 35) a channel from the Euphrates River, (thereby)

v 67–75 According to text no. 1 lines 248–249a, text no. 2 lines 267–273, and text no. 3 lines 1’–6’a, Gurgum was annexed in Sargon’s eleventh regnal year (711) during the time of Tarḥu-lara’s son Mutallu.

v 74 We expect [UGU-šú]<sup>r</sup>nu<sup>r</sup> at the beginning of the line. The UD could be the end of NA and permit a reading [UGU-šú]<sup>r</sup>na<sup>r</sup>, but this would result in a lack of accord with -<sup>r</sup>su<sup>r</sup>-[nu-ti] in the following line.

v 75 For the restoration (following Gadd, Iraq 16 [1954] p. 185), see for example text no. 7 lines 22–23.

vi 22–62 See Scurlock, Studies Astour pp. 503–505 for a study of the battle tactics used in the battle at Dūr-Yakīn.

vi 25 Ex. 2 has *gim-ri* instead of *gim-re-e-šú*.

vi 32 Text no. 7 line 127 has *áš-la.TA.ÀM* instead of 10 NINDA.TA.ÀM. For the translation “moving back a distance of ten *nindanu* from in front of its main wall,” see Powell, JCS 34 (1982) pp. 59–60 and n. 3, which has “All along in front of its main wall he moved back a distance of 10 *nindan* (var.: an *aslu*).” Ten *nindanu* are approximately 60 m (see Powell, RLA 7/5–6 [1989] p. 459).

making (its water) flow (in)to its meadowland. He flooded its fields, where battles (are fought), and made crossing difficult. Together with his allies (and) (vi 40) his battle troops, he pitched his royal tent in a bend of the river (lit.: “between rivers”) like a crane and assembled his (military) camp.

vi 43–62) At the command of the gods Aššur, Nabû, (and) Marduk, I had a causeway constructed (lit.: “trodden down”) across his canals and I caught him, together with his fighting men, like a flying eagle in a net. I spread out like malt (spread for drying) the corpses of his vanguard and of the Aḥlamû, the people of the steppe who go at his side, and I filled the surroundings of his city (with them). (vi 50) The city Dūr-Yakīn — his treasure house — (and) the cities Iqbi-Bēl, Kapru, Bīt-Zabidāya, Šāt-iddina, Zarāti, Raqqatu, Ekuššu, Ḥursaggalla, (vi 55) Dūr-Bēl-āliya, Dūr-Enlil, Bīt-Qiblāte, Nēmed-Sîn, Limītu, (and) Mād-akālša, (a total of) fifteen fortified cities, together with the settlements in their environs, I turned into (ruin) mounds. I carried off as booty at the same time (vi 60) (both) the people — young (and) old — who lived in the district and the gods who helped them; I did not allow a (single) person to escape.

vi 63–79) (As for) the citizens of (the cities) Sippar, Nippur, Babylon, (and) Borsippa who through no fault of their own had been held captive in them (the fifteen cities), I put an end to their imprisonment and let them see the light (of day). (With regard to) their [fi]elds, which long ago, while the land was [in] disorder, the Sutians (vi 70) [had taken] away and appropriated for their own, I struck down (those) [Sut]ians, the people of the steppe, with the sword. [I (re)assign]ed to them (the citizens) their [territories], (whose boundaries) had been forgotten (and) fallen into disuse [during the troubled] period in the land. [I (re)-established the freedom (from obligations) (vi 75) of (the cities) Ur, Uruk, Eridu, Larsa, [Kullaba, Kissik, (and) Nēme]d-Laguda. [Moreover], I returned [their gods that had been carried off as booty to] their [cult centers] and [restor]ed [their regular offerings

vi 45–46 For the differing accounts of what happened to Marduk-apla-iddina, see the Introduction to this volume, under the section “Military Campaigns.”

vi 49 See text no. 65 lines 134 and 226; CAD Š/2 p. 343 sub *šetû*; and Akdoğan and Fuchs, ZA 99 (2009) p. 83; cf. CAD P p. 541 sub *pušuddu*.

vi 57 For the reading of the second city name, see Weippert, GGA 224 (1972) p. 157 and Borger, HKL 2 p. 75.

vi 65 *i-na qer-bi-šú-un* “in them”: The “them” must refer to the fifteen cities listed in line vi 50–58. In text no. 7 line 135, we find *ina qerbišu*, “in it/there,” which just refers to Dūr-Yakīn.

vi 68–80 Restorations are based on text no. 7 lines 135–137 and text no. 113 lines 19’–23’. Based on C.J. Gadd’s copy, there would, however, not seem to be sufficient room to restore what is given for the beginning of iv 70.

vi 70 C.J. Gadd’s copy has [x x]<sup>r</sup>ma<sup>1</sup> ra-ma-nu-uš-šú-un ú-ter-ru, but a note to the copy states that prism E (ex. 2) “suppl. [i-ki]-mu-ú-ma.”

Lacuna

Lines 1–6 not preserved

vii 7–19) *blue turquoise*, [*green turquoise*], ... [of banded  
*agate* (and)] *muš[šaru-stone ...]*, (vii 10) copper, tin,  
iron, [lead, ...] *skilled [...]*, blue-purple wool, [red-  
purple wool], garments with multi-colo[red trim and  
linen (garments)], boxwood, cedar, cy[press, (and)  
every kind of aromatic], (vii 15) the products of  
Mount Amanus, who[se scent(s) are pleasant – from  
the beginning of my reign] until (my) fourth year,  
I pr[esented (these things) as gifts] to the deities  
Marduk, Zarpan[itu, Nabû, Tašmētu], and the (other)  
gods who dwell [in the cult centers] of the land of  
Sumer and Akkad.

vii 20–24a) Aḥundāra (Ḥundāru), king [of Dilmun,  
who(se) lair] is s[itu]ated at a distance of thirty leagues]  
in the middle of the E[astern] Sea, like (that of) a fish,  
[heard of] the might of the gods Aššur, Na[bû, (and)  
Marduk and] brought me his tribute.

vii 24b–38) *Moreover*, [seven kings] (vii 25) of the  
land Yā', a reg[ion of the land Yadnana (Cyprus)] –  
who[se] abode(s) are si[tu]ated far away, at a distance  
of seven days (journey) [in the middle of the] Western  
[Sea], (and) the n[ame of] who[se land], from the  
dist[ant] past [until now], none (vii 30) of the kings,  
[my] ance[stors], neither in Assyria nor in the land  
Kar[duniaš (Babylonia)], had ever heard – [from afar],  
in the middle of the sea, [heard] of the deeds I had  
been doing in Chal[dea and the land Ḥatti (Syria)]. (vii  
35) Their hearts [then] pounded (and) fe[ar] fell upon  
them. They brought before me in Babylon gold, silver,  
(and) utensils of ebony (and) boxwood, product(s) of  
their land, and they kissed [my] feet.

vi 80–85 See for example text no. 64 lines 6'–7' and text no. 87 lines 10'–11' for the likely sense of the passage.

vii 19 Text no. 7 line 144 has MU.3.KÁM, "(my) third year."

vii 20 Aḥundāra (see also text no. 116 line 27) is likely a variant of the name Ḥundāru; see Gadd, Iraq 16 (1954) p. 194 and Brinkman, PNA 2/1 p. 479. He was likely the successor of Upēri, who appears in other texts of Sargon (see Baker, PNA 3/2 p. 1390). See also Potts, Arabian Gulf 1 pp. 335–336.

vii 35 C.J. Gadd's copy for the line ends with *im-qut-<sup>r</sup>su<sup>1</sup> [x x]*, but a note to the copy states that "Line ends -*su-nu-ti ḥat-[tu]*," which presumably means that ex. 2 had that.

Lacuna

Col. viii

Lacuna

1') [...] (x) x

vii 39-44) I had inscribed upon a stele (the record of) the victorious conquest(s) that I had personally achieved over all [my] enem[ies] by the strength of the great gods and I left (it) for all ti[me] in the land Ya<sup>2</sup>, a region of the land Yadnana.

vii 45-76) At that time, the ancient roads for going to Babylon, the cult center of the Enlil of the god[s] (Marduk), were not open; [their] tra[ck(s)] were not fit (for travel). It was a desert region through which passage had been blocked for a [long] time. (vii 50) Journey through it was very difficult and no pathways were laid out. Thorny-plants, thistles, and (brushwood) thickets encroached upon impassable paths. Lions (vii 55) and jackals took cover in them and gamboled about like lambs. Arameans (and) Sutians – tent-dwellers, fugitives, criminals, (and) thieves (lit.: “son(s) of thieves”) – (vii 60) had set up their abodes in that desert region and had made passage through it desolate. (With regard to) the settlements there that had long ago turned into wastelands, there were neither irrigation ditches nor furrows on their meadowland; (vii 65) (the area) was covered over with cobwebs. Their rich fields had turned into wasteland. Their meadowlands no longer heard (lit.: “were deprived of”) the sweet (harvest) song. Grain had ceased to grow (lit.: “been cut off”). I chopped down the brushwood thickets and (vii 70) set fire to the thorny plants (and) thistles. I struck down the thieving Arameans (lit.: “Arameans, son(s) of thieves”) with the sword. I slaughtered (lit.: “brought about their defeat”) the lions and wolves. I occupied the territory of what had previously been wasteland ... and established people from the host[ile] countries that I [had con]quered ... [ins]ide them.

vii 77-85) Not sufficiently preserved to allow translation.

## 75

A fragment of a clay prism found at Nimrud preserves part of a description of the construction of the palace of Sargon II at Dūr-Šarrukīn and quite likely should be considered part of the previous inscription (text no. 74), preserving part of the last column (col. viii) of that inscription.

Museum Number	Excavation Number	Provenance	Dimensions (cm)	cpn
—	ND 3406	Nimrud, ZT, on pavement of the east corridor	—	n

### COMMENTARY

Since text no. 74 ex. 2 and most of text no. 74 ex. 1 were found in the same place as ND 3406 and since all are prism fragments assignable to Sargon II, it is quite probable that all bear parts of the same inscription, as suggested by C.J. Gadd (e.g., *Iraq* 16 [1954] p. 173). ND 3406 may in fact have originally been part of either text no. 74 ex. 1 or ex. 2; Gadd (*ibid.* pp. 196–197) notes that ND 3406 is “not securely attributable to either, though its general appearance is rather more like E [ex. 2].” Gadd attributed ND 3406 to part of col. viii (of text no. 74) “only on the ground of its contents, as containing

part of a building-inscription.” While acknowledging the probability that the text on this fragment is really part of the previous inscription (text no. 74), the author has preferred to edit it separately since we do not know its exact relationship to the parts of col. viii found on the other two prisms. The inscription is edited from the published copy.

The restorations are based on those proposed by Gadd. Similar passages to lines 6'–9' are found in several inscriptions of Sargon II (e.g., text no. 12 lines 30–33). For lines 11'–12' and 18'–19', see also text no. 2 lines 466–467.

74 viii 23'' As noted by C.J. Gadd (*Iraq* 16 [1954] p. 197), possibly the beginning of a personal name (ša<sup>md</sup>[...]).

## 76

Five fragments of prismatic cylinders appear to have parts of the same inscription of Sargon II, an inscription that is written in Babylonian script and that summarizes a large number of his military actions. The latest actions mentioned — campaigns against Gurgum/Marqasi and Kammanu (lines 24'–27', heavily restored) — occurred in the ruler's eleventh regnal year (711) and thus the inscription must have been composed no earlier than that year. The two fragments whose provenance is certain (exs. 2 and 5) come from Nimrud and Tell Baradān respectively. The text has sometimes been called the Nimrud Cylinder.

## COMMENTARY

Ex. 1 comes from the center of a prismatic cylinder that originally had nine faces; it preserves parts of the beginning and end of the inscription. Assuming that the first eight faces had four lines each as on the first face — the penultimate face had four or more lines — and knowing that the final face had three lines, the inscription on this exemplar would have been ca. thirty-five lines in length. The piece is catalogued as part of the Kuyunjik collection in the British Museum; however, some pieces in that collection were actually not found at that site (see J.E. Reade in *CRRA* 30 p. 213). This raises the possibility that this fragment could have come from Nimrud, just like ex. 2.

Ex. 2 amounts “in bulk to rather more than a quarter of the whole” piece (Gadd, *Iraq* 16 [1954] p. 198). C.J. Gadd indicates that the fragment preserves parts of six faces of the “originally nine faces” of the cylinder. As it is currently preserved, each face had four lines, except for one that had only three lines (lines 8'–10' of that exemplar). Thus, this exemplar would likely have had an inscription of approximately thirty-five lines. Gadd proposed that only five lines were missing at the beginning of the inscription (i.e., one complete face of the cylinder and the first line of the next face) and thus treated the first line preserved on that piece as his line 6. He noted that the beginning of the piece must have had an “abridged version” of the text found on the Khorsabad Cylinder of Sargon (text no. 43) since the beginning of the first preserved line (our 1') is found at the end of line 8 on the Khorsabad text. If exs. 1 and 2 are in fact exemplars of the same inscription, and if the first part of the inscription (1–10'a) essentially duplicates text no. 43 lines 1–17, as seems to be the case from what is preserved on exs. 1 and 2, then the first preserved line on ex. 2 might well have been on the third face of that cylinder rather than the second as assumed by Gadd. He numbers the

lines on ex. 2 as 6–25, which in our edition are 1'–21'. Gadd has suggested that the piece “might prove to have been made for ‘export’ to some temple or structure in the South” (*Iraq* 16 [1954] p. 199); however, if the inscription originally ended with line 27' (see below), there would be nothing in it to suggest that the piece was not intended for use in Assyria. R. Borger (*HKL* 1 p. 140) has suggested that exs. 1 and 2 may have come from the same cylinder, but this cannot be proven. With regards to the findspot of the fragment, ZT 4, see Pedersén, *Libraries* pp. 147–149.

Ex. 3 originally had eight faces and approximately half of the circumference of the piece is preserved. Parts of nineteen lines on five faces are extant; each face whose full length is known had five lines. Since the last line preserved on the fragment may well have been the last line of the inscription and since it was the second line on that face, this exemplar may have originally had thirty-seven lines.

Based on the published photographs of ex. 4, parts of five faces and fourteen lines of text are preserved; when a face is fully preserved, the number of lines on it varies from three to four, although one face may possibly have five lines. It is not known how many faces this cylinder would have had and thus it is not possible to estimate how many lines of text were originally on it. K. Abraham kindly supplied the author with information on ex. 4 before the article by her and J. Klein was published.

Ex. 5 preserves parts of three faces and eight lines of text, one line on the first face, five lines on the second face (the only fully preserved face) and two on the third face. It is not known how many faces the cylinder originally had and thus it is not possible to estimate how many lines of text this cylinder originally had. The author must thank K. Kessler for providing both a copy of the inscription and information on the piece itself.

While it is not certain that the inscriptions on

the five exemplars were exact duplicates, at those points where the pieces overlap there is nothing to suggest that they were not. It is assumed here that the first half of the inscription (lines 1–10'a) basically duplicated text no. 43 lines 1–17. The end of the inscription (lines 26'–27') is somewhat uncertain. The inscription on ex. 1 clearly ended with line 27' since that line is followed by a line ruling and since the next face of the piece preserves the beginning of the inscription. It is uncertain whether or not the inscription on ex. 3 ended at this point since the cylinder is broken immediately following this line (indeed only the top half of most of the signs in line 27' is preserved) and since there would have been room for two or possibly three more lines on that face of the cylinder. Ex. 4 probably also ended with line 27' since there are no traces of a line following it, even though there is room for one, and since some of the signs towards the end of that line are

spaced widely apart. Some of the signs on the last line of ex. 5 (part of 27') are also widely spaced, suggesting that they may come from the last line of the inscription on that exemplar. Thus, it seems likely that line 27' was the last line of the inscription on at least three of the exemplars (exs. 1, 4, and 5).

The line arrangement is based on ex. 1 for lines 1–5, on ex. 2 for lines 1'–14' (lines 6–19 according to Gadd's line numbering of this exemplar [see above]), and on ex. 3 for lines 15'–27' (lines 7'–19' of that exemplar). The reading of lines 1–5 follows ex. 1 and that of lines 1'–7' follows ex. 2; lines 8'–27' are a composite of two or more exemplars. Restorations in lines 1–4, 1'–8', and 12'–14' are based upon text no. 43 lines 1–4, 8–15, and 19–22 respectively. See also Frame, CUSAS 17 pp. 138–140 for the arrangement of the five exemplars and in particular the line equivalences for lines 8'b–27'.

## 77

A brief label mentioning Sargon is found on a green glass vase and on several stone jars; all exemplars whose provenance is known come from Nimrud. Each exemplar has a depiction of a lion before the inscription. This depiction may be an official mark indicating that the article derived from or belonged to the palace or treasury of the king, Sargon. With regard to the use of the figure of a lion, see Millard, *Iraq 27* (1965) p. 15; Curtis and Reade, *Art and Empire* p. 146; Galter, *Journal for Semitics* 16/3 (2007) pp. 646-648; and Niederreiter, *Iraq 70* [2008] pp. 51-86, esp. pp. 51-59.

76 lines 21'-25' Cf. text no. 8 lines 9-10, text no. 43 lines 28 and 32-33, and text no. 13 lines 23-27.

76 line 24' With regard to Gunzinānu, cf. text no. 8 lines 9-10 and text no. 13 lines 23-24. K. Abraham and J. Klein (*ZA 97* [2007] pp. 256 and 261) prefer to restore Tarḥun-azi, rather than Gunzinānu.

76 line 25' The published copy of ex. 1 has *kul-lat* KUR.KUR-šú, "all his lands," but collation shows that the text has *kul-lat* KUR-šú, "all his land."

76 lines 26'-27' Cf. text no. 13 lines 28-31 and text no. 8 lines 10-11.

76 line 27' While ex. 1 ends at this point, with this line being followed by a line ruling, ex. 3 may have had one or more additional lines.

76 Left end C.J. Gadd (*Iraq 16* [1954] pp. 198-199) notes that "to judge by their position" the two lines preserved on the left end of ex. 2 could have been "preceded by no more than the name of a month" and that the signs of the end are larger and different in form to those found in the main text, "especially in the distinctive Assyrian form of the sign SAR".

## COMMENTARY

A.H. Layard found numerous fragments of vessels of white alabaster and baked clay below fallen stone slabs in Room I of the North-West Palace at Nimrud. Some of the fragments had cuneiform signs upon them, among which Layard “perceived the name and title of the Khorsabad king” (Layard, *Nineveh* 1 p. 342). He also found in the room three whole vessels: a glass vessel (ex. 1), an alabaster vessel (ex. 4), and a vessel that was broken by a workman (ex. 5?). Ex. 6 was also likely among the pieces found by Layard in this room at Nimrud. (See Layard, *Nineveh* 1 pp. 342–343 and Searight, *Assyrian Stone Vessels*.) Copies of three exemplars of this inscription are found in Layard’s notebook MS A on pp. 320 and 322 (British Museum); these copies likely represent exs. 2, and 1 and 4 respectively. The statements as to the type of stone for exs. 2–5 and 7 are based upon museum records and/or published accounts (in particular Searight, *Assyrian Stone Vessels*).

Ex. 1 is a “squat *alabastron* of pale green cast and

cut glass” (Collon, *Ancient Near Eastern Art* p. 175). D. Barag (*Catalogue* pp. 53–54 and 61) suggests that the vessel may have been made in Phoenicia or in Assyria by Phoenician artisans; J.E. Curtis (Curtis and Reade, *Art and Empire* p. 146) notes that the inscription may have been added later. The inscription has been collated from the published photos, but these are not always clear.

Ex. 5 was “found in a box from palace of Nimrud” (British Museum records; Searight, *Assyrian Stone Vessels* p. 18 no. 52). Ex. 6 preserves only the beginning of the inscription (É.GAL) and it is possible that the remainder of its inscription did not duplicate this one. It is assigned to Sargon in view of the presence of a depiction of a lion immediately to the left of the signs; for a possible origin in Nimrud, see *ibid.* no. 53. Ex. 7 was purchased by the Vorderasiatisches Museum. Comparing ex. 7 to two vases from Cyprus, F.W. von Bissing suggested that it also came from Cyprus (ZA 46 [1940] p. 153).

## TEXT

- 1) É.GAL <sup>m</sup>MAN-GI.NA MAN KUR AŠ (1) Palace of Sargon (II), king of Assyria.

## 78

In 1846, A.H. Layard found sixteen bronze weights of varying sizes in the shape of crouching lions under one of the winged bull colossi in Entrance b of the throne room of the North-West Palace at Nimrud. Thirteen of these bear cuneiform inscriptions and these allow the assignment of one to Tiglath-pileser III (Tadmor and Yamada, *RINAP* 1 pp. 152–153 Tiglath-pileser III no. 63), nine to Shalmaneser V (Tadmor and Yamada, *RINAP* 1 pp. 171–181 Shalmaneser V nos. 1–9), one to Sennacherib (Grayson and Novotny, *RINAP* 3/2 no. 211), and two to Sargon II (text nos. 78–79). A third lion weight (BM 91235), which has only the weight written on it in Aramaic (*šqln* 2), might also be assigned to Sargon according to F.M. Fales (*Studies Milano* pp. 488, 491, and 501–505 no. 14). The largest of the two lion weights of Sargon II has two brief texts, one in Akkadian and one in Aramaic, and both state that the object weighed “one mina of the king.”

Major studies dealing with the bronze lion weights from Nimrud by T.C. Mitchell, F.M. Fales, C. Zaccagnini, and L. Peyronel are found in *Gyselen, Prix* pp. 129–138; *Studies Lipiński* pp. 33–55 and *Studies Milano* pp. 483–510; *Studies Heltzer* pp. 259–265; and *Mesopotamia* 50 (2015) pp. 93–112 respectively. Note also J. Reade’s important study on Assyrian weights and money in *SAAB* 24 (2018) pp. 125–193. For further bibliography on the lion weights, see de Vogüé, *CIS* 2/1 p. 2 and Fitzmyer and Kaufman, *Aramaic Bibliography* 1 p. 37 no. B.2.4. For a photograph of one of the lion weights of Shalmaneser V, see Pritchard, *ANEP*<sup>2</sup> p. 36 no. 119.

## CATALOGUE

Museum Number	Registration Number	Provenance	Dimensions (cm)	cpn
BM 91229	48-11-4,74	Nimrud, North-West Palace, under one of the winged bull colossi in Entrance b of the Throne Room (Chamber B)	9.4×4.5	c

## COMMENTARY

The larger and heavier of the two bronze lion weights ascribed to Sargon II weighs 468.388g/468.5g. There is no handle on the back. Published references to this weight have often mixed information about it and BM 91227, a bronze lion weight weighing 480.149g and bearing an inscription of Shalmaneser V (Tadmor and Yamada, RINAP 1 pp. 178–179 Shalmaneser V text no. 7; attributed to Tiglath-pileser III by T.C. Mitchell). The two pieces were kindly weighed for the author several years ago by the staff of the British Museum and he was informed that BM 91229 was the one that weighed 468.388g. In the meantime several publications have continued to state that BM 91229 weighed 480.149g, and so its weight was again checked for the author by

J.E. Reade in June 2018, when it was found to weigh 468.5g, a difference of about one tenth of a gram from the earlier weight of 468.388 and a difference that is likely due to different scales being used. In any case, it is clear that BM 91229 is over eleven grams lighter than BM 91227. In the bibliography provided below, it has been thought advisable to cite information on both weights in a few cases since it is not always easy to disentangle the information.

The Akkadian text is found on the back of the lion; line 1 of the Aramaic text is found on the left flank of the lion and line 2 on the base. The edition is for the most part based upon the published copies and the edition by Fales (Studies Lipiński p. 42), although the original has also been examined.

## 79

The second bronze lion weight from Nimrud that can be assigned to Sargon II also bears both Akkadian and Aramaic texts. The Akkadian one states that the object belonged to the palace of Sargon, while the Aramaic one states that it weighed three shekels.

## CATALOGUE

Museum Number	Registration Number	Provenance	Dimensions (cm)	cpn
BM 91234	48-11-4,79	Nimrud, North-West Palace, under one of the winged bull colossi in Entrance b of the Throne Room (Chamber B)	4.1×2.1	n

## COMMENTARY

The bronze lion weight has no handle on its back and currently weighs 49 g (52.36 g in Peyronel, *Mesopotamia* 50 [2015] p. 99 N15). It was found with two rings (now missing) around its neck and with the rings would have weighed ca. 54.6 g (note also Mitchell in Gyselen, *Prix* p. 135 no. 15; Curtis, apud Fales, *Studies Lipiński* p. 45 and n. 24; and Curtis, *Examination of Late Assyrian Metalwork* p. 173 no. 547). In a personal communication (July 15, 2018), J.E. Reade has pointed out to the author that the two rings around the neck of the lion may not originally have been part of this weight and that this had already been noted back in 1864 by the respected

numismatist Reginald Stuart Poole: “The weight of the shekel, obtained by including the rings is excessive ... I am therefore of opinion that these rings are smaller weights, originally of flexible metal” (in Madden, *Jewish Coinage* p. 264 n. 9).

The Akkadian text is found on the back of the lion; line 1 of the Aramaic text is found on the left flank of the lion and line 2 on the base. The presence of a “badly preserved fourth line” in the Akkadian inscription was noted by F.M. Fales (*Studies Lipiński* p. 46), who suggested a tentative reading of that line (*Studies Milano* p. 501 no. 13 and n. 54); cf. text no. 78 line 2 of the Akkadian inscription.

## 80

Fragments of sixteen ivory writing boards (ND 3557–3572) and seven wooden writing boards (ND 3575–3581) were found in “Layard’s well” of the North-West Palace at Nimrud in 1953. One of the ivory writing boards has an inscription engraved upon its polished outer face recording that Sargon II had had the series of celestial omens Enūma Anu Enlil copied on it and deposited in his palace at Dūr-Šarrukīn.

## CATALOGUE

Museum Number	Excavation Number	Provenance	Dimensions (cm)	cpn
IM 56967	ND 3557	Nimrud, North-West Palace, “Layard’s well” in Room AB	33.8×15.6×1.4	p

## COMMENTARY

The inscription on the piece could be viewed as a colophon to the copy of Enūma Anu Enlil, but it has been included here among Sargon’s royal inscriptions since it is incised on the outer surface of the writing board and since it does not refer to one specific tablet of the series. It has been edited both from the published photographs and photographs kindly supplied by J. Renger. A few sections of wax with inscriptions on them were still preserved upon some of the boards and those that are legible have been identified as parts of the series Enūma Anu Enlil.

With regard to Mesopotamian writing boards, see San Nicolò, *Orientalia* NS 17 (1948) pp. 59–70; Mallowan, *Iraq* 16 (1954) pp. 98–107 and pls. ## 81

S. Beverly, who was a member of the University of California, Berkeley, archaeological expedition excavating Nineveh in 1989 and 1990, took some photographs of work being carried out at the eastern end of Nebi Yunus by Iraqi archaeologists and made them available on Flickr, an online image hosting service. Two of the photos taken at Nebi Yunus on June 4, 1990 show a fragment of a stone slab with the image of an Assyrian eunuch and a cuneiform inscription. (The figure on the slab originally had a beard, but the slab had later been re-carved, removing the beard.) The inscription, which is part of a longer annalistic text that would have continued on a series of additional slabs, describes some events from Sargon's first and second regnal years (721 and 720), in particular the defeat and deportation of the Tēša and Tu'umuna (two Aramean tribes in northern Babylonia) and the suppression of a rebellion against Assyria led by Iaū-bi'dī of Hamath. E. Frahm has referred to this text as the Mosul Annals (Last Days p. 77).

## COMMENTARY

As noted by E. Frahm, it is not clear if the piece was actually discovered at Nebi Yunus — either erected there by Sargon or brought there from some other site (e.g., Dūr-Šarrukīn) by a later Assyrian monarch (e.g., Sennacherib) — or if it had been found elsewhere and brought to Nebi Yunus at the instruction of M. Jabr (then director of the Mosul Antiquities Office) to be exhibited to a television crew (AoF 40 [2013] pp. 52–53). (See also J.E. Reade in *Studies Postgate* p. 433.) It should be noted that some bricks with inscriptions dealing with Khorsabad have been found at Nineveh and some other sites (i.e., they were taken there in antiquity); for example, text no. 53 ex. 24 and text no. 54 ex. 4 were also found at Nebi Yunus. J.E. Reade (private communication, March 30, 2019) has suggested to the author that the slab may have originally been erected in Sargon's Juniper Palace at Kalḫu and been brought by Esarhaddon to Nebi Yunus for reuse along with the paving slab of Ashurnasirpal II published by A. Al-Juboori in *Iraq* 79 (2017) pp. 15–16.

The inscription runs on either side (but not across) the figure carved on the slab. This might sug-

gest that the slab does not come from Khorsabad since the annals inscriptions from Khorsabad are found on a central band between two registers of reliefs (Frahm, AoF 40 [2013] pp. 45–46). Since Frahm estimates that the slab is about 85 cm high, the figure would thus be much smaller in size than comparable figures from Court VIII at Khorsabad; however, he points out that the slab might well come from some other location in or near Khorsabad. He also raises the possibility that the individual depicted was Sīn-aḫu-ušur (ibid. pp. 51–53).

The current location of the slab is not known, although it is possible that it was once in the Mosul Museum and is now in the Iraq Museum (ibid. p. 44).

Photographs of the slab and inscription were published by Frahm (ibid. pp. 43–44), and the text has been edited from these photographs, but the edition basically follows that of Frahm. Restorations essentially follow those proposed by Frahm and are in particular based upon material in Sargon's Annals (text no. 1 lines 23b–26), the Aššur Charter (text no. 89 lines 18–23), and the Najafabad Stele (text no. 117 ii 4–7).

## 82

This inscription, which is often referred to as the Nineveh Prism or the Broken Prism, is poorly preserved and made up from numerous fragments. Initially, the inscription was thought to be found on two prisms (called prism A and prism B), although exactly which fragments were to be assigned to each was debated. (See for example Winckler, *Sar.* 2 pls. 44–46 and Gadd, *Iraq* 16 [1954] pp. 174–175.) The assignment of fragments to the two prisms was based primarily upon their physical preservation and color. In the early 1940s, E.F. Weidner suggested that all the fragments came from one prism (AfO 14 [1941–44] pp. 51–52). Later, H. Tadmor showed that the two main fragments (K 1668a and K 1668b) form an indirect join at one point in what is the fifth column of the inscription and demonstrated that all the pieces

**81 line 9** Cf. for example text no. 1 line 24 and text no. 117 ii 6.

**81 line 10** Possibly restore *e-tiq*, “he transgressed,” or *ul a-du-ur-ma*, “he did not fear and” at the beginning of the line; cf. text no. 1 lines 149–150. Possibly restore *KUR.a-ma-at-ti*, “land Hamath,” instead of *KUR.MAR.TU.KI (DAGAL-tu)*, “(wide) land Amurru.”

**81 line 11** For the restoration, see text no. 7 line 34.

**81 lines 12–13** For the restoration at the beginning of line 12, see text no. 89 line 19, although there one finds *ú-ba-<sup>2</sup>u-ú-ma* rather than the proposed *ú-ba-<sup>2</sup>i-i-ma*. Lines 12–13: As noted by E. Frahm (AoF 40 [2013] p. 48), no exactly similar list of places is attested in the other texts of Sargon, but one can compare it to text no. 7 line 33, text no. 89 lines 19–20, and possibly text no. 1 line 25. Frahm states: “It might seem tempting to restore <sup>URU</sup>*A-ma-at*]-tu in line 13, but no other Sargon text mentions the city of Hamath among the rebel cities of 720, suggesting that a representative of the Assyrian crown may have managed to stay in power there.”

**81 line 14** For the restoration, see text no. 89 line 20.

**81 line 15** For the restoration, see text no. 108 Frgm. D line 5’.

**81 lines 16–19** For the restoration of line 16a, see text no. 89 line 21. Lines 16b–19: Cf. text no. 89 lines 21b–23 and text no. 108 Frgm. D line 7’.

likely come from only one actual prism. (See Tadmor, JCS 12 [1958] pp. 87–92 and more recently Fuchs, SAAS 8 pp. 3–15.)

It is possible that the inscription originally found on the prism was also inscribed, in all or in part, on a fragment of a prism discovered at Aššur (VA 8424, text no. 63) and on a fragment of a tablet acquired from an antiquities dealer in Mosul (A 16947, text no. 102). All three appear to use the same chronological assignment of events, an assignment at variance with the one used by the Annals of Sargon from Khorsabad (text nos. 1–6) and by the Najafabad stele (text no. 117). Thus, these two pieces were combined with this inscription in the most recent edition of the text (Fuchs, SAAS 8). Since only a small section of the text on the Aššur prism fragment overlaps what is known of the Nineveh Prism (text no. 63 ii' 6'–18' ≈ text no. 82 iii 1'''–17''' and text no. 63 iii' 7'–14' ≈ text no. 82 v 1–8) and since there is some reason to suspect its text would have had a different building report at the end, it has been kept separate here (text no. 63). The same holds true for A 16947, which has no passage also preserved on the Nineveh Prism; moreover, the tablet from which it comes would not have been large enough to have the whole text found on the Nineveh Prism.

The inscription records events in Sargon's reign in chronological order down until the king's eleventh regnal year (711) — referred to in this inscription as his ninth regnal year (vii 13') — before returning to events in his tenth regnal year, and thus A. Fuchs has recently referred to this inscription as the Annals of the Year 711 (“Die Annalen des Jahres 711”). It is not impossible, however, that the final, poorly preserved column of the text might have also recorded events of the king's twelfth regnal year (SAAS 8 p. 4), but if so, the account would have been unexpectedly brief. The prism was made to commemorate work on a ziggurat (see viii 5'''), likely that of the god Adad at Nineveh, in view of the reference to that god in the concluding formulae (viii 8''' and 10'''). (See also Fuchs, SAAS 8 pp. 4–6.)

The edition of this text is the result of collaborative work between G. Frame and Fuchs, but is in effect based on the one published by Fuchs in SAAS 8. Differences between the edition here and the earlier one in SAAS 8 are mostly modifications to fit the style of the RINAP series and to conform to the manner of translation used for the other inscriptions included in this volume.

## COMMENTARY

This eight-sided prism is poorly preserved; in particular, only small sections of columns i, ii, and viii are preserved and the exact placement of some fragments is not certain. Charts indicating the relative positions of the fragments on the various sides of the prism are presented in Fuchs, SAAS 8 pp. 8–9. The exact provenances at Nineveh of the various fragments are not known, but at least some came from excavations in the palace of Sennacherib (G. Smith, *Assyrian Discoveries* p. 98). The only published photograph of any part of the inscription on the prism is found in Ball, *Light* p. 185 (K 1668a+); see also now Figure 27.

Based upon what is preserved and what duplicates or is similar to passages in other inscriptions, Fuchs has estimated that each column probably had approximately 200 lines, for a total of 1500–1600 lines. He argues that the prism would have been about 60 cm high and 14.5 cm in diameter. (See Fuchs, SAAS 8 pp. 12–15.)

In the chart “Arrangement of Fragments,” the column and line numbers given after the museum numbers are those for that particular fragment, not

for the Nineveh Prism inscription as a whole. Thus, for example, the end of col. i of the inscription is found on column ii' (counting from the left) of K 4818.

Cut into the bottom of K 4818 are representations of two animals striding left. (See Caubet, *Khorsabad* p. 251 fig. 15; Finkel and Reade, *ZA* 86 [1996] fig. 8 following p. 268; and Fuchs, SAAS 8 p. ii for photographs; see also Niederreiter, *Iraq* 70 [2008] pp. 54–55 and fig. 2.) One of the animals is a bull and the other probably is as well. Designs are also found on the bottom of the prism fragment of Sargon II from Aššur (text no. 63). Similar symbols are found on glazed bricks and paintings of Sargon; these symbols have been interpreted by I.L. Finkel and J.E. Reade (*ZA* 86 [1996] pp. 244–268) as hieroglyphs, standing for particular words. They do not see, however, any cogent link between these and the designs on the ends of the prisms. They suggest that the latter may have been “related to the identities of the gods for whose temples the prisms were made” and note that the bull was an attribute of the god Adad (*ibid.* p. 247). As noted above, the Nineveh

Prism may have been created to commemorate work on the zigurrat of the god Adad.

In view of the fact that the inscription is made up from numerous fragments, it has been thought helpful to the user to indicate in the edition the museum number of each fragment as it comes into

use, and also the column number on that particular fragment. Thus, immediately before the edition of i 1'-2' is "(K 4818 ii')," indicating that these line are found on the second column (from the left) of the fragment K 4818.

Rm 2,92 ii'

ii 1–8) Too poorly preserved to allow translation.

## Lacuna

K 1673 i'

ii 1'–13') Too poorly preserved to allow translation.

i 1–12 The beginning of the text appears to be different from the opening sections of all other inscriptions of Sargon II. Furthermore, the first line follows a line ruling and the copy by H. Tadmor (JCS 11 [1957] p. 97) indicates traces of signs from one or two lines above that line ruling; he assumes three lines in this area (ibid. p. 98). The copy by A. Fuchs (SAAS 8 pl. 1) also indicates some marks/damage above the line ruling, but he states “Das Fragment enthält über der ersten Zeile des eigentlichen Textes noch weitere unleserliche Kratzer, die zunächst an Zeichenspuren denken lassen. Nach mehrfacher Prüfung des Originals bin ich zu der Überzeugung gelangt, dass es sich hierbei wohl doch nur um Risse und Löcher handelt, die Zeichenresten nur ähnlich sehen” (ibid. p. 21). It is most unusual not to have begun the inscription at the very top of the column and one would wonder if there had not originally been something written in this area. However, Sm 2021, which also preserves the top of its columns (iv and v of the master text), seems to indicate that the text does begin a bit lower down from the top of the prism than is usual.

i 2–3 The tentative translation assumes ... an-na-šu [ke-e-na a-šá-al-ma ...]; see Schroeder, KAH 2 no. 54 line 5. Or possibly ... an-na-šu [ke-e-nu (la muš-pe-lu) at-ta-kil-ma ...], “[I trusted in] his [firm (and unalterable)] approval”; see Leichty, RINAP 4 p. 107 no. 48 line 79.

i 4 Possibly [...] ʾša<sup>21</sup>-ge-pi-ir DINGIR.[MEŠ], “most majestic of the god[s]”?

i 8 Possibly ša ne-me-[qí], “of wisd[om]” or ša ne-me-[eq-šú], “who[se] wisd[om].”

ii 1'–13' If the inscription of text no. 102 was also found on the Nineveh Prism, it would likely have been slightly before or after this section of K 1673.

Lacuna

K 1669

- iii 1'-21') [...] his/its kings ... [...] his property (and) his  
 possessions to/for [...] with [...]s, horses, mul[es, ... (and)  
 everything valuable], royal [treasure], [I brought out]  
 from [the city Kišesim] (iii 5') and [I] re[organized (the  
 administration of)] that city. [I] (re)nam[ed] it Kār-  
 Nergal. [I had the weapons of the deities Aššur], Sîn,  
 Šamaš, Adad, (and) I[štar, my lords, who go before me,  
 m]ade and I in[stalled (them)] there. I [settled/caused  
 to enter] there [people whom] I [had cap]tured (and)  
 (iii 10') I considered th[em as people of] Assyria. [...] ...  
 [...] the cities Kilambāti (and) Armang[u ... (iii  
 15') ... I added] to the province of the city Kišesim.  
 [I set a] eunuch of mine as provincial governor [over  
 them]. I ma[de] a ro[yal] image of myself, [inscrib]ed  
 [upon it the victorious deeds of the god Ašš]ur, my  
 lord, that I had [acc]omplished in [the lands Mannea  
 and] Media, (iii 20') and ere[cted (it)] (to stand) forever  
 in the temple of the god ..., [my lord].
- iii 22'-25') [(As for) the cit]y [ruler]s of the city  
 Kimi[rra, ...], the land Bīt-...angi[...], Bīt-Zualzaš, (and)  
 [..., I received horse]s (and) mul[es (as their tribute)].

ii 13' The contents of text no. 63 i' may have been found on the Nineveh Prism, and if so, probably at some point after this section of K 1673.  
 iii 1'-35', 1'-12', and 1'-8' These lines apparently describe events for what the inscription would have referred to as the king's fifth regnal year.

iii 2'-9' Cf. text no. 117 ii 38-39. Possibly a-<sup>r</sup>na<sup>1</sup> [šal-la-ti am-nu], "[I counted] as [booty]," or a-<sup>r</sup>na<sup>1</sup> [la ma-ni], "[countless]."

iii 3' Na'aman, AfO 46-47 (1999-2000) p. 363 suggests restoring [it-ti GU<sub>4</sub>].<sup>r</sup>MEŠ<sup>1</sup>, "[together with oxen]."

iii 4' The restoration at the beginning of the line is based on such passages as text no. 2 line 493. At the end of the line possibly restore URU-šú, "his city," instead of URU.ki-še-si-im, "the city Kišesim."

iii 6'-8' For the restorations, cf. text no. 4 line 40' and text no. 117 ii 38-39.

iii 11'-15' Cf. text no. 1 lines 95-96, text no. 2 lines 87-88, and text no. 4 lines 41'-42'? The traces would not support the reading expected in 11' from text no. 117 ii 40: "The land Bīt-Sagabi, which is in the Fortress of the Babylonian(s)."

iii 17'-21' These lines describe the creation and installation of a stele, likely the one found at Najafabad (text no. 117 and cf. ibid. ii 70-71 and possibly text no. 72 Side A 4'-6'a).

iii 20'-21' A. Fuchs (SAAS 8 p. 26 and n. 43) suggests i-na É <sup>d</sup>a<sup>2</sup>-šur<sub>4</sub><sup>1</sup> (LÁL?.S[AR?]), "in the temple of the god Aššur," but, as noted by E. Frahm (KAL p. 73), such temples are rare outside of the city Aššur. In a possibly similar passage in text no. 72, we have [... i<sup>2</sup>]-<sup>r</sup>na<sup>21</sup> É <sup>d</sup>AMAR.UTU é-kur-ri-šú-nu a-na da-ra-ti / [ul-ziz' ...], "[... i]n the temple of the god Marduk, their temple, for all time [I erected ...]" (Side A 5'-6'a).

iii 23'-24' We might expect KUR.É-sa-an-gi-[bu-ti] in iii 23', but the traces do not seem to support this. Possibly (iii 23') [ša] KUR.É-ma<sup>2</sup>/ba<sup>2</sup>-al-x-an-gi (iii 24') [ù ša URU].É-<sup>r</sup>zu<sup>1</sup>-al-za-<sup>r</sup>áš GU<sub>4</sub><sup>1</sup>.<sup>r</sup>[MEŠ]; see Na'aman, AfO 46-47 (1999-2000) pp. 362-363. In Sargon's eighth campaign (714), the ruler of the city Bīt-Zualzaš was Ħumbê (text no. 65 line 46).

iii 30' Possibly [URU.MEŠ-ni ša li-me-ti]-šú ap-pul [aq-qur ina IZI aš-ru-up], "I destroyed, [demolished, (and) burned down with fire the settlements in] its [environs]."

iii 31' Possibly la sa-[an-qu ...]?

iii 32' Cf. text no. 117 ii 42?

iii 33' Possibly [... a]-<sup>r</sup>na<sup>1</sup> a-šab šu-[bat ne-eh-ti], "[... in order] to dwell [in peace]"?

iii 34' Possibly eš-[šiš] plus a form of the verb epēšu, or the number 30 [...]. The passage likely has to do with the strengthening of the defences of the city *Harḥar*; cf. for example vii 24'-25 and text no. 117 ii 42.

iii 1'' For the restoration, see text no. 1 line 100 and text no. 2 line 93; possibly az-kur rather than ab-bi (see text no. 7 line 63).

iii 2''-4'' The restoration of these lines is based on text no. 117 ii 44. Possibly restore DINGIR.MEŠ GAL.MEŠ EN.MEŠ-ia, "the great deities, my lords" at the end of iii 4' rather than DINGIR.MEŠ a-li-kut pa-ni-ia, "the deities who go before me."

iii 5''-9'' For the restorations, cf. iii 10' and 6'-17', text no. 1 lines 97-98 and 262, text no. 2 lines 90-91 and 286-287, text no. 3 lines 12'-13', text no. 4 lines 44'-45', and text no. 7 lines 62 and 108-9.

iii 10''-11'' For the restoration of this passage and following lines, cf. text no. 1 lines 98-99 and text no. 2 lines 92-93; note also text no. 117 ii 45.

Lacuna after iii 12'' The text at the end of this gap was likely similar to or a duplicate of text no. 63 ii' 1-5'.

iii 1'''-2''' N. Na'aman (AfO 46-47 [1999-2000] p. 363) suggests there was a personal name at the end of iii 1''', possibly Ilu-bi'di ([... šu].<sup>r</sup>ni<sup>m</sup>-i-x- [...]). See Na'aman, Tel Aviv 6 (1979) p. 71 n. 6 for a different restoration of these two lines.

K 1668a + K 1671 ii' (+) K 1668b + DT 6 i'

v 1'-7') Too poorly preserved to allow translation.

v 8'-11'a) He (Amitašši) became afraid and crossed Mount [Š]urda in order to sav[e his life]. Deceit(fully), they sent to [Adâ of the land Šurd]a a mendacious message intended [to make (him) ho]stile t[o me].

v 11'b-30') Fear of my brilliance ov[erwhelmed] Adâ [of the land Šurd]a and (as a result) [he put] him (Amitašši) to [the sword], together with his men. He did [not] spare (even) one of them to praise the god ... [... He brought to me] alive (v 15') Atkayadug (and) Atkaya-..., the children of his (Amitašši's) own body, with the (severed) head of Amita[šši, their father], (as well as) horses, pr[operty ...] as (his) audience gift. (v 20') Because ... [...] ... to allow [to live] in peace ... [...] like a [...] I listened to his supplication(s) [...] I pu[t] gold [bracelets] upon his wrists [(and)] (v 25') ... and I imposed upon him labor duty of [...]. I assigned [them] to the authority of a [eunuch of mine, the provincial [gove]rnor of the land Lullumû. I a[dded] the [land] K[arall]a to its full extent t[o the province of the land] Lullumû. [I established] regular offerings for the god Aššur fore[ver].

v 31'-39') At that time the people of the land Ḥabḥu — whi[ch is (located) between] the lands Karalla and Namri in [...] inac[cessible] mountain wilderness — heard of the harsh deeds that I had carried out in the land Kar[alla] and sent [me] a messenger to do obeisance (to me). I assigned t[hem] to the authority of a eunuch of mine, the [provincial governor] of the land Lullumû. [I imposed] the yoke of the god Aššur upon them.

v 8'-9' Or "the [Š]urda mountains."

v 13' We expect *ušamqitma* or *urassibma* at the end of the line, but there does not appear to be sufficient room for either unless a logographic writing was used instead of a syllabic one (e.g., <sup>r</sup>šUB<sup>21</sup>-ma).

v 18' NÍG.[GA<sup>2</sup> ...] "prop[erty ...]": Or šá [...], "of/which [...]."

v 21' Cf. text no. 2 line 466.

v 22' Possibly [nu]-<sup>r</sup>du<sup>1</sup>-un-né-e, "dowry"? Possibly *qé-reb<sup>2</sup>*, "inside," for KI KID?

v 33' Or possibly *áš-bu<sup>1</sup>-ú*, i.e., "wh[o] dwe[ll between] the lands Karalla and Namri in [...] mountain wilderness" rather than "whi[ch is (located) between] the lands Karalla and Namri in [...] inac[cessible] mountain wilderness."

vi 39''-40'' Possibly ... bi-bil [lib-bi-ia ...], thus “[my heart’s] desire.”

vi 2'''-5''') For the restoration and understanding of the passage cf. text no. 1 lines 444b-451a and text no. 7 lines 149-150.

vi 6''') The restoration is based on text no. 1 lines 194. Or possibly restore a<sup>1</sup>-šur<sup>4</sup>, “the god Aššur,” as subject of the verb?

vi 7''') Or possibly restore [LUGAL KUR.ta-bal], “[king of the land Tabal]”; cf. text no. 1 line 194 and text no. 2 line 226.

vi 8''') For the restoration, cf. v 63-65 and text no. 4 line 27'.

vi 9'''-11''') The restorations and understanding of the passage are based on text no. 1 line 195, text no. 2 line 227, and text no. 89 line 33.

vi 3''''') The restoration is made on the lines of text no. 1 line 200, text no. 2 line 232, text no. 7 line 31, and text no. 74 v 20-24.

vi 3''''-8''''') N. Na'aman suggests restoring the passage to read: “my eunuchs, [the governors] of the cities of Sam'al, [of Šubat<sup>21</sup>], of Hamath, of Damascus, [of Ḫatarikka<sup>21</sup>], with my cavalry [which m]y [commanders] stationed in the lands Hamath [and Ḫatarikka<sup>21</sup>]” (UF 31 [1999] pp. 426-427 and AfO 46-47 [1999-2000] p. 363). The passage cited by him (Fales and Postgate, SAA 11 no. 1 rev. i 12') is not sufficient reason to restore Šubat (Šupāt) in vi 5''''') instead of Arpad. The restorations would mean that most of the governors who are about to go and fight in the north (Tabal) would have come from central or southern Syria. Cf. Landsberger, Sam'al p. 73 with regard to the restorations in vi 4''''-5'''').

vii 1'-4') [...] they put [iron] fe[tters] on their [hands and] feet and [...] as booty [...].

vii 5'-12') (When) Kurtî of the land Atunna, who had put his tru[st] in [Mitâ] of the land Musku, saw the capture of Amris (Ambaris) and the carrying off [of his people], his heart pounded. His (lit.: "their") messenger, bearing the [happy] news, brought to me in the land Sikris — which is (situated) in the land Med[ia] — (a message indicating his willingness) to [bring (me)] an audience gift (and) [pull] the yoke of the god A[ššur]; he (thus) [made my heart rejoice].

vii 13'-16') In my ninth regnal year I marched to [the city Ashdod which is (situated) on the shore of the] great [s]ea. [... the city] Ashdod [...]

Lacuna

K 1668b + DT 6 iii'

vii 1''-8''a) Because of [the evil he (Azuri) had done ... I brought him out] from the city A[shdod], elevated Ahî-Mîti [...], his favorite brother, o[ver the people of the city Ashdod], (vii 5'') and [set him on the throne of his father]. I established for him (the same) tribute, payment(s), [labor duty, (and) military service] as the kings, [my ancestors, had imposed].

vii 8''b-33''a) However, [those] evil [Hittites] with/in ... [...] plotted evil [in their heart(s)] (so as) to no longer (have to) bring tribute (to me). [They made] an insurrection (and) up[rising against] their ruler, [and] drove him out [of the city Ashdod] as if he was one who had committed bloodshed. ... [...] They made] king over

vii 1' The section before what is found in vi 2'-3' might have referred to something along the lines of "Am(ba)ris, king of the land Bît-Purutaš, together with the (other) offspring of his father's house (and) the nobles of his land"; see text no. 1 line 201, text no. 2 line 233, and text no. 74 v 25-26, and cf. text no. 7 line 31.

vii 2' The restoration is based on text no. 8 line 14.

vii 4' The traces do not support reading ᵀim<sup>1</sup>-[*nu-šu-nu-ti*] and we would not expect ᵀam<sup>1</sup>-[*nu-šu-nu-ti*] since the passage is in the third person plural.

vii 7'-12' For restoration and understanding of these lines, compare text no. 1 lines 451-456, text no. 2 lines 431-435, and text no. 7 lines 152-153.

vii 9'-10' H. Winckler's copy appears to show the šur<sub>4</sub> of line 9' and the MUNUS of line 10' to be completely or partially preserved; collation indicates that there appears to be a new break at this spot on the fragment.

vii 14' G. Vera Chamaza (Rolle Moabs p. 146) reads the line as [ti-a]-mat GAL-ti šá ᵀe<sup>1</sup>-[rib ᵀUTU-ši x x x x x x x x], but collation indicates that the copy by A. Fuchs is correct — i.e., ᵀamti<sup>1</sup>(ᵀGÉME<sup>1</sup>) not -mat —, no šá after -ti, and a- not ᵀe<sup>1</sup>.

vii 1'' The restoration is based on text no. 1 line 251, text no. 3 line 7', and text no. 7 line 92.

vii 2'' For the restoration, cf. text no. 7 line 81. G. Vera Chamaza (Rolle Moabs p. 145) reads iš-tu ᵀLUGAL<sup>1</sup>-[ti-šú UGU KUR-šú ú-nak-kir], "[I did away] with [his] ru[lership over his land]," based on text no. 7 line 93, but the traces fit iš-tu ᵀURU.as<sup>1</sup>-[*du-di*] better.

vii 4'' G. Vera Chamaza (Rolle Moabs p. 145) restores just ᵀUGU<sup>1</sup>-[šú-nu], "ov[er them]," at the end of the line based on text no. 3 line 8' and text no. 7 line 94, but we would expect several more signs in the line.

vii 5'' Or restore šEŠ-šu, "his brother," instead of AD-šu, "his father." G. Vera Chamaza (Rolle Moabs pp. 145 and 148) reads ú-ᵀrab-bi<sup>1</sup> šú-ú [*a-na ni-ri-ia iš-du-ud*], "I raised. He [pulled my yoke]"; however the fourth sign is MA, not ŠU.

vii 6''-7'' For the restorations, see text no. 105 ii' 9-12 and note v 25'-26' of this text. For line 7'' G. Vera Chamaza (Rolle Moabs p. 145) reads *ki-ma ša* LUGAL.MEŠ-ni [*maḥ-ru-ti* AD.MEŠ-ni], "like the [previous] kings, [(my) ancestors]"; however, the second sign is clearly I, not MA.

vii 8'' For the restorations of the line, cf. text no. 1 lines 198-199 and 253, text no. 3 line 8', and text no. 7 lines 94-95, and see Fuchs, SAAS 8 p. 45 n. 140.

vii 12'' Or restore ú-šab-šu-ma instead of *i-pu-šu-ma*; see Grayson, RIMA 3 p. 188 A.0.103.1 iv 40.

vii 13'' Or restore ul-ᵀtú<sup>1</sup> [*qé-reb/lib-bi* URU-šu], "out [of his city]."

them (vii 15'') Iāmānī, a member of the low(er class who had no right to the throne), (and) they sat [him on the throne] of his lord. [...] their city ... [...] of batt[le ...] (vii 20'') ... [...] ... [...] ... [...] in] its environs [its/their] moats [... they dug] twenty cubits deep [until] (vii 25'') they reached groundwater. <They sent> mendacious messages (and) malicious words to the ki[ngs] of the lands Philistia, Judah, Ed[om], (and) Moab, (as well as to) those who live on the sea(coast), (all) those who brought tribute [and] audience gift(s) to the god Aššur, my lord, (vii 30'') in order to make (them) hostile to me. They took gift(s) to Pir'û (Pharaoh), king of Egypt, a ruler who could not save them, and they repeatedly asked him for (military) aid.

vii 33''b-48'') I, Sargon, the just prince, who reveres oath(s) (sworn) by the gods Šamaš (and) Marduk (and) who obeys (vii 35'') the commands of the god Aššur, had (my) troops cross the Tigris (and) Euphrates Rivers at the height of (their) flooding, (namely) at the spring inundation, (as easily) as if (they were) dry land. Moreover, that (man) Iāmānī, their king, who had put his trust in his own strength and had not su[bmitted] to any(one else's) rule, (vii 40'') heard from [af]ar of [the app]roach of my expeditionary force. Then, the [aw]esome splendor of the god [Aššur], my [lord], overwhelmed him and ... [his legs grew weak, like roots] on a river bank. [...] ... [Like fish, th]ey chose the depths of [far-off] waters (for their) hiding place.

vii 15'' One does not expect MEŠ after LÚ.ERIM if it refers to Iāmānī. For the restoration of the end of the line, cf. text no. 7 lines 33 and 95, text no. 1 line 254, and text no. 3 line 9'.

vii 16''-17'' For the restorations, cf. text no. 1 lines 252-253, text no. 3 line 8', and text no. 7 line 39.

vii 19'' The word *mithuši* appears in text no. 2 line 380.

vii 22'' Or *mit-hur-[ti/tu]*?

vii 23'' Cf. text no. 65 line 190 for the tentative reading of the end of the line. At the end of the line, G. Vera Chamaza (Rolle Moabs p. 145) reads *hi-ri-ša [ih-ru-u]*, "[they dug] a moat."

vii 24'' At the end of the line, G. Vera Chamaza (Rolle Moabs p. 145) restores [*ih-ru-u adi*], "[they dug until]."

vii 26'' At the end of the line, G. Vera Chamaza (Rolle Moabs p. 145) reads *KUR.ú-[du-me KUR.E-am-ma-na-a u]*, "Ed[om, Ammon, and]," but there is not sufficient room to restore more than one sign after - $\text{r}^{\text{du}^1}$ .

vii 30'' The verb *iš-pu-ru* appears to have been omitted after *šum-ki-ri*; cf. v 10'-11'.

vii 36'' The height of flooding of the Tigris is in April and that of the Euphrates in May (Redman, Rise of Civilization p. 35).

vii 38'' For the end of the line, G. Vera Chamaza (Rolle Moabs p. 146) reads *i-na e-[mu-qi-šú]*, "in [his] str[ength]," but collation does not support this reading.

vii 40'' We would expect [a]-*lak* rather than [a]-*lik*; see text no. 7 line 101 and note the variant *a-lik* in ex. 5.

vii 42''-43'' The restorations are based on text no. 65 line 174.

vii 44'' Cf. Novotny and Jeffers, RINAP 5/1 p. 246 no. 11 v 20 (*ki-ma KU<sub>6</sub>.MEŠ iš-bat šu-pul A.MEŠ ru-qu-u-ti*) and text no. 6 line 6'a (*ú<sup>1</sup>-šá-aš-bi-ta pa-ši-ru*).

## 83

A fragment of a prism preserves parts of three columns of an inscription of Sargon II. While only a few signs are preserved for the first column, the other two columns have passages dealing with Sargon's involvement with Iāmānī of Ashdod in his eleventh regnal year (711; ii' 1-11) and the Chaldean ruler Marduk-apla-iddina in the following years (ii' 12-15), as well as Sargon's dedication of various valuable commodities to the gods of Babylonia (iii' 1-13'). According to C.J. Gadd (Iraq 16 [1954] p. 188), this fragment "has a remarkable similarity to the Nimrud prisms in width of columns, style of writing, disposition of text, and general appearance, so great that it might be a duplicate, and in all these respects it is equally unlike the Kuyunjik fragments, to which there can be no question of its belonging." Some pieces in the Kuyunjik collection were not actually found at Nineveh (see Reade, CRRRA 30 p. 213) and thus it is not impossible that the fragment came from Nimrud. Gadd (Iraq 16 [1954] p. 188) notes: "What its actual provenance may have been there is no means of ascertaining." Thus, it is not impossible that this piece should be treated with text no. 74; however, it is also clear that they are not exact duplicates (see commentary to text no. 74). This inscription is sometimes referred to as prism C.

## CATALOGUE

Museum Number	Registration Number	Photograph Number	Provenance	Dimensions (cm)	cpn
—	81-7-27,3	BM 56568-9	Probably Nineveh, Kuyunjik	8.5×7.5×6.0	c

## COMMENTARY

This prism fragment in the Kuyunjik collection of the British Museum is part of the top of what was probably an eight-sided prism. C. Bezold assigned the fragment to Sennacherib (Cat. 4 p. 1795), but E. Weidner recognized that it actually belongs to Sargon II (AfO 14 [1941-44] p. 49).

As noted by Weidner, col. ii' 1-11 likely deal with Sargon's involvement with Ashdod and the extradition of Iāmānī from Egypt by the Nubian ruler of that land, Šapataka' (Shebitko). Iāmānī had fled

from Assyrian forces in 711 and was extradited at some point in or before 706. See text no. 7 lines 90-112 (especially 107-109 and 111-112), text no. 8 lines 11-14 (especially 14), and text no. 116 lines 19-21 (especially 21).

For ii' 12-15, see text no. 74 vi 14-17 and text no. 113 line 6'.

For iii' 1'-12', see text no. 2 lines 364-368, text no. 7 lines 141-144, text no. 103 iv 6-22, text no. 74 vii 7-19, and text no. 113 line 26'.

## 84–88

The five fragmentary cylinder texts presented here all certainly or probably come from Nineveh. They may actually represent only one or two different inscriptions, but it has been thought best to present them separately. Text nos. 84 and 85 overlap, as do text nos. 86 and 87, and W.G. Lambert and A.R. Millard (Cat. p. 13) have suggested that text no. 84 may come from the same cylinder as text no. 86. If text nos. 84–87 represent one inscription, text nos. 84 and 85 would be placed before text nos. 86 and 87. Following the account of the campaign against Mutallu of Kummuhu (707) at the end of text no. 84 would likely have been the description of one or more other campaigns, concluding with the beginning of the campaign against Marduk-apla-iddina II, the campaign recorded at the start of text nos. 86 and 87. It must be noted, however, that although text nos. 84 and 85 overlap, the former is a barrel cylinder fragment (as are text nos. 86 and 87) while the latter a fragment of a prismatic cylinder. Text no. 88 preserves part of what is likely the introductory section of an inscription, with epithets and participial forms, rather than finite verbal forms as in the other texts. Like text no. 85, text no. 88 is found on a fragment of a prismatic cylinder.

## 84

This fragmentary inscription is found upon a barrel cylinder from Nineveh. After mentioning work on temples at Aššur and Ḥarrān, it records the building of the city Dūr-Šarrukīn and its palace. The text then goes on to describe various military actions, including victories over Elam, Mannea, Urarṭu, Hamath, and Kummuhu, the latter of which took place during Sargon's fourteenth regnal year (708). Since the text refers to the king's fifteenth regnal year (707) in line 7' and also to the installation of various gods inside Dūr-Šarrukīn (line 9'), which the Assyrian Eponym Chronicle records for that year, this text must have been composed no earlier than 707.

83 iii' 13 The translation assumes *a-di* MU.3.KÁM at the beginning of the line, following text no. 7 line 144 and cf. text no. 103 iv 21 (*a-di* 3 MU.MEŠ); text no. 74 vii 19 has *a-di* MU.4.KÁM.

## CATALOGUE

Museum Number	Registration Number	Provenance	Dimensions (cm)	cpn
BM 122614 + BM 122615	Th 1930-5-8,3 + Th 1930-5-8,4	Nineveh, palace of Ashurnasirpal II, Square C at depths of 15 and 11 feet below datum (C, 15' and C, 11')	8.5×17	c

## COMMENTARY

BM 122614 + 122615 is part of a solid barrel cylinder. The inscription is written in Neo-Assyrian script. Collation of the inscription revealed a number of inaccuracies in R. Campbell Thompson's copy, in particular: 'ša' instead of his 'am-ḥur' in line 7'; the presence of several signs at the end of line 12' omitted by Campbell Thompson; his addition of *ma* after *ú-še-šib* in line 20'; and 'tu' instead of his *-tum a-* in line 21'.

With regard to restorations, for lines 1'-2', see

text no. 7 lines 5-7 and 10-12. For lines 7'b-10', see text no. 7 lines 23, 154-56, and 158-59. For the end of line 7', see text no. 111 line 10 and for the end of line 9', see text no. 45 line 18 and text no. 111 line 12. For line 11'a, see text no. 14 lines 28-29. For lines 12'-20', see text no. 103 ii 22-65; see also text no. 8 lines 6-7 for lines 12'-13' and text no. 105 ii' 5 for line 20'. For lines 21'-26', see text no. 7 lines 74, 85-86, and 112-117.

## 85

A fragment of a clay prismatic cylinder in the Kuyunjik collection of the British Museum preserves part of the description of the construction of the city of Dūr-Šarrukīn. The first part of the text is poorly preserved but lines 3'-11' duplicate parts of text no. 84 lines 7'-15' and it is possible that this fragment should be treated as a duplicate of that inscription.

## CATALOGUE

Museum Number	Registration Number	Provenance	Dimensions (cm)	cpn
BM 98518	Th 1905-4-9,24	Probably Nineveh, Kuyunjik possibly the Nabû temple	3.2×4.1×0.6	c

**84 line 22'** Cf. ša a-šar nak-ri ù sa-al-mi la ip-pa-rak-ku-ú (text no. 65 line 132) and ša a-šar sal-me <sup>1</sup>Á<sup>1</sup>.II-a-a la ip-par-ku-ú (text no. 7 line 85).

**84 line 26'** The restoration at the end of the line follows text no. 7 line 117. Another possible restoration is UGU ki-šir LUGAL-ti-ia ú-rad-di, "I added (them) to my royal contingent"; see text no. 74 iv 12.

## COMMENTARY

The piece is merely a thin flake from a clay prismatic cylinder with an inscription in Neo-Assyrian script. Lines 1'–3' are on one face of the cylinder and 4'–10'

on the adjoining face. Since it is unclear how much is missing on either side of the flake, only minimal restoration has been done in the transliteration.

## Lacuna

## 86

A large fragment of a barrel cylinder in the Kuyunjik collection of the British Museum preserves part of an account written in Neo-Assyrian script that describes Sargon's defeat of Marduk-apla-iddina II (Merodach-Baladan) at Dūr-Yakīn (709) and his entry into Babylon, an account which is for the most part a duplicate of that found on the Nimrud Prism (text no. 74 vi 23–83) and a Malatya cylinder (text no. 113 lines 8'–26'). The mention of deporting people from Kummuhu to Bīt-Yakīn (line 15') would suggest that the text was composed no earlier than 708, when the Assyrian Eponym Chronicle states that that city was captured. The inscription partially overlaps text no. 87, another fragment of a barrel cylinder from Nineveh. Although it is quite possible that the two pieces are duplicates of the same inscription, it has been thought useful to present them separately in view of their fragmentary state.

## CATALOGUE

Museum Number	Registration Number	Provenance	Dimensions (cm)	cpn
BM 98528	Th 1905-4-9,34	Probably Nineveh, Kuyunjik, possibly the Nabû temple	8.3×5.7×3.2	c

## COMMENTARY

The text is written in the Neo-Assyrian script. It is suggested in Lambert and Millard, *Cat.* p. 13 that BM 122614 + 122615 (text no. 84) may come from the same cylinder as BM 98528. With regard to the restorations used in the translation, in addition to text no. 87, note:

Lines 1'–6': See text no. 74 vi 22–42 and text no. 113 lines 8'–12'; cf. text no. 7 lines 126–129.

Lines 7'–9': See text no. 74 vi 43–62 and text no. 113 lines 13'–17'. Based upon the spacing, this text abbreviated text no. 74 vi 50–58 and text no. 113 lines 15'–16', which list the fifteen cities destroyed by Sargon.

Lines 10'–14': See text no. 74 vi 63–79 and text no. 113 lines 18'–22'; note also text no. 7 lines 134–137.

Lines 15'–16': See text no. 2 lines 424 and 426, text no. 7 lines 139–140, text no. 64 lines 6'–7', text no. 87 lines 10'–11', and text no. 113 lines 23'–24'; cf. text no. 74 vi 80–85.

Lines 17'–18': See text no. 7 lines 140–142, text no. 103 iv 1–9, and text no. 113 lines 25'–26'.

Since it is not clear how much space is missing at the beginning and end of each line, restorations have been kept to a minimum in the transliteration.

## 87

W.G. Lambert and A.R. Millard identified this fragment of a barrel cylinder in the Kuyunjik collection of the British Museum as having an inscription of Sargon II (Lambert and Millard, Cat. p. 24). It preserves part of Sargon's account describing his defeat of Merodach-Baladan II at Dūr-Yakīn (709) and his triumphal entry into Babylon. The inscription partially overlaps text no. 86, which is also a fragment of a barrel cylinder from Nineveh. Although the two pieces may be duplicates of the same inscription, it has been thought best to present them separately.

## CATALOGUE

Museum Number	Registration Number	Provenance	Dimensions (cm)	cpn
BM 123416	1932-12-10,359	Nineveh, Kuyunjik, palace of Ashurnasirpal II, Square C, 25 feet below the datum level	5.5×7.1	c

## COMMENTARY

The piece comes from the right end of the barrel cylinder. With regard to the restorations used in the translation:

Lines 3'-4': See text no. 74 vi 47-49 and 62, text no. 86 lines 8'-9', and text no. 113 lines 14' and 16'-17'.

Lines 5'-9': See text no. 2 lines 416-421, text no. 7

lines 135-137, text no. 74 vi 63-79, text no. 86 lines 10'-14', and text no. 113 lines 18'-22'.

Lines 10'-11': See text no. 7 lines 139-140, text no. 64 lines 6'-7', text no. 86 lines 15'-16', and text no. 113 lines 23'-24'; note also text no. 74 vi 80-85.

Lines 12'-16': See text no. 7 lines 140-144, text no. 74 vii 7-19, text no. 86 lines 17'-18', text no. 103

iv 1–22, and text no. 113 lines 25'–26'.

Lines 17'–21': See text no. 7 lines 145–149, text no. 74 vii 20–38 (Aḥundara instead of Upēri), and text no. 103 iv 23–42.

Where the parallel texts diverge, preference has generally been given in the restoration to text nos. 7 and 86.

## 88

A fragment from the left end of a prismatic clay cylinder in the Kuyunjik collection of the British Museum preserves some of the epithets of Sargon, including reference to his laying waste to the land Urarṭu (cf. in particular text no. 13 lines 13–31).

87 line 16' Text no. 74 vii 19 has MU.4.KÁM.

87 lines 22'-23' At this point text no. 74 vii 39–44 and text no. 103 iv 43–57 each records the creation of a stele; text no. 7 lines 149–153 describe actions of the governor of Que against Mitâ (Midas) of the land of Musku.

## CATALOGUE

## 89

The so-called Aššur Charter is one of the earliest of Sargon's royal inscriptions, mentioning events only up to 720 BCE. It describes the historical circumstances connected with Sargon's succession to the Assyrian throne and his actions with regard to the city of Hamath in his "second regnal year" (720). The text commemorates the restoration of privileges for the city of Aššur, which is called *āl kidinni*, "city of privileged-status," and the dedication of a silver object to the god Aššur. The inscription is found on a clay tablet in the British Museum's Kuyunjik collection and was presumably either copied from the inscription on the silver object (see lines 40b–43) or a model for the inscription to be engraved on that object. H. Tadmor believes that this text "is superior to all other Annalistic sources of Sargon as to historical reliability and exactness of dating" (JCS 12 [1958] p. 32).

## CATALOGUE

Museum Number	Provenance	Dimensions (cm)	cpn
K 1349	Probably Nineveh, Kuyunjik	11.8×6.8×2.3	c

## COMMENTARY

The scribe appears to have utilized every way that he knew to write the word Aššur. The name appears as <sup>d</sup>*a-šur* (line 1, god), *a-šur* (line 28, city), <sup>a</sup>*a-šur*<sub>4</sub> (e.g., lines 12 and 30, country and god), *aš-šur* (line

14, country), and AN.ŠĀR (e.g., line 19, god); see also *bal-til.KI* for the city (e.g., line 29). Most restorations follow those proposed by H.W.F. Saggs.

1–12a) [To] the god Ašš[ur], the great mou[untain], king of all the Igīgū gods and Anunnakū gods, [...] ... whose command ... *rea[ches ...]*; the Assyrian Enlil without whom judgment cannot be rendered, ... [...] sanctuaries be altered, (or) decisions be canceled by any other god; the important one who [...] (5) heaven (and) netherworld are constantly put in difficulty, lands and sea(s) tremble; the king of king[s], (...) *the one by whom*] no [oath (sworn)] is broken and the flood-tide, (who)se limits cannot be transgressed, the fierce deluge, *the sickle [sword, ...]* who overwhelms all the uncompliant (and) crushes the *wild*; the furious storm, who for the *imp[ious ...]* seals quickly the one who changes his design(s); the awesome god who *from* his royal dais, *from [his]* throne [...] plunders every land; lordly one, lord of lords; one clothed in awesome splendor who defeats the wicked, tramples on [all enemies], (10) (and) *overwhelms* foes; the judicious one who loves humankind, (but) whose anger is great; the fe[roc]ious one, [...] who dwe[lls] in Eḫursaggalkurkurra (“House, the Great Mountain of the Lands”) — the mighty shrine, primordial reflection (lit.: “design”) of the

2 Possibly for *appa ikaššadu*, “triumphs” (see CAD A/2 p. 187)?

5 The tentative restoration at the end of the line follows AHw p. 832.

7 The understanding of the end of the line basically follows H.W.F. Saggs (Iraq 37 [1975] pp. 12 and 17), who reads *šá a-na la na-[a<sup>2</sup>-di<sup>2</sup> x x x]*, but collation shows that there may be a trace of a slanted wedge head after NA, suggesting A<sup>1</sup> rather than NA. G. Vera Chamaza (SAAB 6 [1992] pp. 22 and 24) reads *šá a-na la na-[sa-ki ...]* and translates “who for those who [do not cast themselves in front of him<sup>2</sup> ...].”

whole world — the lord of (the city) Baltil (Aššur) — the city of privileged status, the dynastic seat (and) oldest inhabited settlement — the prince, his lord:

12b–15) Sargon (II), vice-regent of the land of the god Ašš[ur], just shepherd, *offspring* of the gods Enlil (and) Marduk, your servant; me, upon whom, among all the black-headed people, he (the god Aššur) duly looked to renovate the structure of the temple, to make the ritual performances perfect, (and) to make the cult centers brilliant. He then exalted me (and) handed over to me the ru[lership] and governance of Assyria. He made [my] weapons prevail over the four quarters (of the world).

16–17a) In my second regnal year, having ascended the royal throne and been [crowned] with the crown of lordship, I dispersed the forces of Ḥumba(n)igaš (Ḥumban-nikaš I), king of the land Elam (and) brought about his defeat.

17b–21a) [Iaū-bi'di (Ilu-bi'di)] of Hamath — who had no right to the throne, who was not worthy to (live in) a palace, (and) who [had not been] fate[d] to shepherd the people — [came down], sought evil, (things that were) not good, for (the god) Aššur, his land, (and) his people, and held (them) in cont[empt]. He assembled the cities [Šimirra, Damascus], Arpad, (and) Samaria and made (them) side with him. [...] ... he killed (them) *altogether* and le[ft] no one alive.

21b–25a) [...] ... and I prayed (to the god Aššur) in order to (be able to) conquer the land Hamath, [overthrow Iaū-bi'di (and) ... the] wide [land Amu]rru. Aššur, the [great] god, then [... li]stened [to my prayer] and accepted my supplication. [I mustered my vast]

9 For the restoration *kullat nakiri*, see for example Grayson, RIMA 2 p. 275 A.0.101.23 line 4.

10 *mu-ṭib* (following CAD M/2 p. 284) or *mu-dip* (see Saggs, Iraq 37 [1975] p. 17).

13 The reading *na-du-Ṡu<sup>7</sup>* (“*offspring of*”) follows H.W.F. Saggs (Iraq 37 [1975] pp. 14 and 18; see also Vera Chamaza, SAAB 6 [1992] pp. 22 and 24); cf. CAD N/1 p. 104. W. Mayer (Studies Loretz p. 546) reads *na-tù <a>-Ṡna<sup>1</sup>*, “geeignet für?”

14 For the reading Ṡpe<sup>1</sup>-(e)-li], cf. Grayson, RIMA 2 p. 226 A.0.101.2 line 25.

17 Or ṠmfDINGIR<sup>1</sup>-[bi-i'-di], “Ilu-[bi'di], although the spacing might suggest the longer reading.

18 The restoration is based on text no. 81 lines 5–6; although H.W.F. Saggs’s copy might not suggest that there was sufficient room for this restoration, collation of the original would suggest there was (see also the photo at CDLI P393884).

19 For the possible restoration, cf. text no. 81 lines 12–13 and text no. 7 line 33.

20–21 Based on text no. 81 lines 14–15, E. Frahm (Last Days p. 59) suggests restoring *mārē aššur ša ina māṭ ḥamati* at the end of the line 20 and reading [ba<sup>7</sup>]-Ṡu<sup>7</sup>-ú<sup>7</sup> at the beginning of line 21, thus “He killed [the citizens of Assyria who we]re [in the land Hamath (...)]” (Frahm’s translation slightly modified). It is not clear if there would be sufficient room for the former restoration, but the restoration would be a logical one. For the tentative reading ṠGIM<sup>2</sup> 1<sup>2</sup>-en<sup>2</sup>, “*altogether*,” see text no. 81 line 15 and Frahm, AOF 40 (2013) p. 48.

22 For the beginning of the line, H. Winckler’s edition would suggest [... a-na aššur] *qa-ti áš-ši-ma*, “I raised (my) hands (in prayer) [to the god Aššur] and” (AOF 1/5 p. 403). H.W.F. Saggs (Iraq 37 [1975] pp. 14 and 18) has [x x] Ṡx x x x x áš-š[i]-Ṡma<sup>1</sup> (slightly modified) and states that the traces “may conceal some form of *qātī* (or *qātē<sup>ll</sup>-ia*) *ana* Ṡaššur” but that “*qa-ti* (following Winckler) is not the preferred reading.” While Winckler’s reading would make good sense, collation also indicates that, with regard to *áš-ši-ma*, the traces of the first sign are not necessarily compatible with Áš and that the second sign is more likely DI than ŠI. For the tentative restoration *sa-kap<sup>2</sup> Ṡia-ú-bi-i'-di*, “to overthrow Iaū-bi'di,” see text no. 108 Frgm. D line 7' and text no. 81 line 18.

tr[oops (...) and] (25) had (them) take [the road to the land Am]urru.

25b–29) The land Ha[math ...] corpses were spread wide (lit.: “the/a corpse was spread out”). Fame [...] I made [the people of the land Am]urru bow [down] at my feet. I brought [...] to my city Aššur, and, because [they (the people of the city Aššur) li]st[ened to my] comma[nd and ...] came to my aid, [I showed favor to] (the city) Baltil (Aššur), the city of privileged-status since ancient dynasties.

30–40a) (With regards to this) august cult center (the city Aššur) that the god Aššur, his lord, had selected to be the (central) link [of kingship ...] for the (four) quarters (of the world), (the city) which has no rival (and) whose people have not known (state) service (or) corvée duty since the distant past, [Shalmaneser (V)], who did not revere the king of all (the world), raised his hand against that city with evil intent and esta[blished ...]. He imposed oppressively (state) service (and) corvée-duty upon its people (and) treated (them) as if (they were of the) lower class. At [that time, ...] the Enlil of the gods angrily overthrew his reign. (As for) me, Sargon, the ... king [...], (35) he exalted me (and) had me take hold of scepter, throne, (and) crown. [...] In order to make (my) throne secure, to firmly establish my reign, [to restore] their exemption (from obligations), [...] so that (I) might walk about in his presence in Ešarra, (and) in order that [I be] well of he[art ...] I planned the exemption (from obligations) of those citizens of the city. [...] I exempted them [from (state) service, corvée duty], the levy of the land,

24 Or <sup>r</sup>um<sup>1</sup>-[ma-na-at<sup>2</sup> aššur gaṣšati<sup>2</sup> adkēma<sup>2</sup>], “[I mustered the vast] t[roops of Aššur and],” following E. Frahm (Last Days p. 59).

26 E. Frahm (Last Days p. 60) says “mu-ša-at is apparently a feminine singular stative derived from wuššú/muššú ‘to spread out,’ even though one would rather have expected plural forms here” and translates the beginning of the line as “[...] ... spread out was the corpse.”

27 Possibly restore gi-mir, “all,” instead of UN.MEŠ, “people” at the beginning of the line. At the end of the line would be a statement of who or what was taken back to Assyria, for which cf. text no. 106 ii 11’. Likely based on text no. 117 ii 11, E. Frahm (Last Days p. 59) suggests restoring Iaū-bi<sup>2</sup>di/šāšu adi kimitišu (mundaḫšēšu)?, thus “Iaū-bi<sup>2</sup>di (or: him), together with his family (and his fighting men)” (Frahm’s edition slightly modified).

33 G. Vera Chamaza (SAAB 6 [1992] pp. 23 and 25) reads [uš]-<sup>r</sup>ma<sup>1</sup>, “[he] impo[sed] ... and” rather than <sup>r</sup>iš<sup>2</sup>-kun<sup>2</sup>, “He imposed,” but there is a trace of the first sign and it would fit the end of iš better than uš. Collation also shows that there is sufficient room to read iš-kun (against Vera Chamaza).

34 <sup>r</sup>iš-kip<sup>2</sup>: The tentative translation “overthrew” follows H.W.F. Saggs (Iraq 37 [1975] pp. 14–15) and G. Vera Chamaza (SAAB 6 [1992] pp. 23 and 25) and assumes that the verb is from sakāpu (see CAD S p. 71 sub sakāpu 1.d.2’). For the end of the line, Saggs (Iraq 37 [1975] pp. 14–15 and 20) reads MAN<sup>1</sup>ka<sup>1</sup>-ia<sup>1</sup>-nu<sup>1</sup> [...] and translates “the legitimate king,” but the traces do not fit KA and kay(y)ānu means “normal, plain, permanent, constant, regular” (CAD K p. 40). Relying in part on H. Winckler’s copy, Vera Chamaza (SAAB 6 [1992] pp. 23 and 25) reads MAN [KUR aš-šur] šá-[i-im ...] and translates the passage “[appointed] me, Sargon, as king [of Assyria].” However, the traces do not fit well with KUR aš-šur; the sign is IA, not ŠA; and we would not expect šá-<sup>2</sup>im to stand for “appointed” in this context.

36–38 The exact sense of the passage is not clear. H.W.F. Saggs (Iraq 37 [1975] pp. 16–17 and 20) prefers to take the ends of line 36 and line 37 as being what Sargon planned to do and translates the passage “In order to give a sure foundation to the throne-base, to make my dynasty firm, I conceived a desire to bring about the freedom of those citizens, to restore their freedom (from taxes), to permit them to walk about within Ešarra before Him, for the sake of their heart’s life.” In the break at the end of line 36, Saggs (Iraq 37 [1975] p. 16) reads [tu<sup>2</sup>-ur<sup>2</sup>-ri<sup>2</sup> ...] and G. Vera Chamaza (SAAB 6 [1992] p. 23) [šá-ka-ni ...], i.e., “[to restore/(re)-establish ...].”

37 Following H.W.F. Saggs (Iraq 37 [1975] pp. 17 and 20), possibly <sup>r</sup>šá<sup>1</sup>-[(bi)-šú-nu ...], “[they be] ... of he[art ...].”

- 39) *uš-ta-bil* <sup>1</sup>*ka*<sup>1</sup>-*bat*-[*ti* (...)] *i-na il-ki<sup>2</sup> tup-šik-ki<sup>2</sup>* (and) the proclamation of the herald, from quay [(and) *di-ku-ut* KUR *ši-si-ti* <sup>1</sup>*LÚ*<sup>1</sup>.*NÍMGIR* *ina mi-ik-si* ferry] dues [...] all the temples of Assyria.

## 90

A clay tablet from Nineveh preserves a short dedicatory inscription of Sargon II to the goddess Anunītu. This text was likely either a copy of an inscription on an object or a draft to be engraved on an object. The inscription is written in pseudo-archaic script and seems to be complete, although only one face of the tablet is preserved. There appear to be fingernail impressions on the left side of the tablet.

## BIBLIOGRAPHY

- 1968 Lambert and Millard, Cat. p. 77 (study)

## TEXT

- 1) *a-na* <sup>d</sup>*a-nu-ni-tum* 1–3) To the goddess Anunītu, his lady: Sargon (II)  
2) *GAŠAN-šú* <sup>m</sup>MAN-GIN presented (this) for the sake of his life.  
3) *ana* TI-šú BA-iš

**89 line 43** H.W.F. Saggs (Iraq 37 [1975] pp. 16–17 and 20) reads <sup>1</sup>*mu*<sup>1</sup>?-<sup>1</sup>*šim*<sup>1</sup>? *ši-ma-a-te*, “the One who fixes the fates,” and assumes this describes Aššur, who is mentioned immediately following. However, a divine name is not generally preceded by an epithet and, as noted by Saggs, the tablet has *ḥu-u*, not *šim*. G. Vera Chamaza (SAAB 6 [1992] pp. 23 and 25) reads [*mu-saḥ*]-*ḥu-u ši-ma-a-te ... li-iš-i-im-šú*, takes the first word with the preceding and the second word with the following, and translates “[w]hoever [takes away] this work [from its place and] viol[ates it], for him, may the god Aššur determine a fate of death.” However, one would prefer a finite verb in the subjunctive to follow the *ša* of line 42. The traces before *ḥu* would fit well with a *SAḤ* sign and there may actually be the trace of the top of a vertical wedge for the first sign of the line (thus <sup>1</sup>*ú*<sup>2</sup>-*saḥ*<sup>2</sup>-*ḥu-u*). The tentative translation “representation(s)” assumes that *ši-ma-a-te* stands for *simāte*. The phrase DN + *ezziš* + a precative of the verb *nekelmū* is common in royal inscriptions (see CAD N/2 pp. 152–153).

## 91

A clay tablet fragment in the Kuyunjik collection of the British Museum bears a “very fragmentary, poetic description of the campaign of 710 (and 709?)” against Merodach-Baladan and “the complete document must have given a detailed description comparable to that of the annals” (Brinkman, *Studies Oppenheim* pp. 44–45).

## COMMENTARY

The inscription on the fragment does not appear to be a duplicate of any other inscription of Sargon II. In editing this text, H. Tadmor compares lines 2', 3', 8', and 9' to text no. 1 lines 269, 263, 273–274, and 267 respectively, line 5' to text no. 65 line 266, line 10' to text no. 74 vi 38 and vii 50, and line 12' to text

no. 73 line 16. (Tadmor's citation of line numbering does not take into account our line 1'.) In addition, for lines 3'–4' and 11', cf. for example text no. 7 lines 122 and 128, and text no. 74 vi 20–21 and 34; for line 4', cf. text no. 1 line 110.

## 92

An inscription found on numerous fragments of clay cones from Nineveh records the king's restoration of the temple of the god Nabû (referred to as the temple of the gods Nabû and Marduk), which had been restored seventy-five years earlier, in the time of Adad-nārārī III (810–783). (For a brick inscription of Adad-nārārī III recording work on the temple of Nabû at Nineveh, see Grayson, RIMA 3 pp. 219–220 A.0.104.14.) Brick inscriptions of Sargon II also record work on this temple (see text nos. 95–96 and possibly no. 97). For the history of the temple, see Menzel, Tempel pp. 119–120 and P 12.

## COMMENTARY

The text presented here is made up from numerous tiny fragments and it is possible some actually come from a different original inscription, rather than preserve simple variants to this one. Nevertheless, it has been thought advisable to treat them all here, rather than deal with them separately or argue about the validity of the inclusion of individual pieces. The line arrangement follows ex. 1, but the master line is composed from numerous exemplars. Although the text of lines 4–9 is reasonably certain, that of lines 1–3 is not. There may well have been major divergences among the pieces preserving parts of these three lines (i.e., the name, titles, and epithets of Sargon). R. Campbell Thompson's edition of these lines is as follows:

1. <sup>m</sup>Šar-gi-na šar kiššati šar <sup>mātu</sup>Aš-šur<sup>ki</sup> šakin <sup>ilu</sup>Bêl nišak <sup>ilu</sup>A-šur
2. ri'u [kînu ša <sup>ilu</sup>A-šur] <sup>ilu</sup>Marduk [ut-tu-šu ?] ... uš

šarru ...-a-ti u(?) ..

3. ša a-na šarru-ti ib-bu-u-šu ilâni<sup>pl</sup> rabûti<sup>pl</sup> a-na-ku-ma

However, it is not possible to find some of his readings on the exemplars known. In particular, in line 1, no exemplar has KIŠ/ŠÚ for Campbell Thompson's *kiššati* or a GAR for his *šakin*, and in line 3, no exemplar has LUGAL-ti or MAN-ti (for his *šarru-ti*) following *a-na*, although ex. 26 (not known to Campbell Thompson) has *i-na x* [...], where *x* could conceivably be the beginning of LUGAL.

It is worth noting that the copy of ex. 1 by G. Smith in 3 R (used by H. Winckler as the basis for his copy) omits several signs and traces of signs (e.g., *a-šur* in line 1 and <sup>l</sup>ul<sup>l</sup> in line 6) and incorrectly copies several others (e.g., TI not KI, and LA not MA, in line 7).

Ex. 29 has [...] (x) TI <sup>r</sup>SI SA<sup>?</sup> KU<sup>1</sup> UN x [...]. Moreover, it is not clear if [...] <sup>r</sup>e<sup>1</sup>-ti <sup>r</sup>ù<sup>71</sup> [...] should go here or in line 2. This reading is based upon ex. 7, where the traces of the ù are <sup>r</sup>š<sup>1</sup> [...] [...]; ex. 14 has [...] <sup>r</sup>ti <sup>r</sup>š<sup>1</sup> [...]. As for [...] x-<sup>r</sup>a/e<sup>71</sup>-ti, it comes from ex. 1, where the x is simply the head of a vertical wedge. Ex. 23 has [...] <sup>r</sup>a<sup>?</sup>/e<sup>71</sup>-ti.

4 Ex. 4 inserts u, “and,” after <sup>d</sup>AG, “Nabû.” Ex. 17 has ĠIŠ for ma-<sup>hi</sup>-rat. Exs. 17 and 28 insert šá and ša respectively before i-na; ex. 26 replaces i-na with <sup>r</sup>ša<sup>1</sup>.

6 For the translation of this line, cf. text no. 73 line 14. Ex. 4 has lu-u for the first ul, thus “The foundation of this temple was indeed made strong ...”

7 Or less likely ... an-nu-um ki-nu-um ša NU KÚR KI.TUŠ-<sup>r</sup>šú<sup>1</sup> [...] x-šú, “firm approval not to change its site [or ...] its [...].”

8 Thompson, AAA 19 (1932) p. 103 has e-pu-uš, “I built,” after ar-šip ušaklil u, “I completely (re)constructed ... and,” but no known exemplar appears to have this.

9 For a similar passage, see for example Grayson and Novotny, RINAP 3/2 p. 300 no. 214 line 2. Or less likely ... sà-kap LÚ.KÚR.MEŠ-[ia ...]-ia SI.SÁ BURU<sub>14</sub> ..., “... the overthrow of [my] enemies, [the ...] of my [...], the success of the harvest ...” šùl-<sup>r</sup>mu<sup>1</sup>: Or SILIM.<sup>r</sup>MU<sup>1</sup> following CAD Š/1 p. 207.

# 93

This fragmentary inscription of Sargon II is found on a “marble” fragment from Nineveh. The present location of the piece is not known and the inscription is edited from the published copy by R. Campbell Thompson. Compare in particular text nos. 96–97, which were found on bricks from the temple of Nabû at Nineveh; this inscription might have been a duplicate of text no. 96. Limestone paving slabs with an inscription recording Sargon’s work on the temple of Nabû and Marduk have been found at Nineveh (see the commentary to text no. 95).

# 94

This fragmentary inscription is found on a “marble” fragment from Nineveh. R. Campbell Thompson refers to it as a “Large Inscription.” The present location of the piece is not known and the inscription is edited from the published copy. Compare in particular the beginning of text nos. 95–98 (bricks from the temple of Nabû at Nineveh) and text no. 93 (a “marble” fragment from Nineveh). It is likely that nothing is missing before line 1’.

## COMMENTARY

H.C. Rawlinson (1 R pl. 6) states that the bricks with this inscription seen by him were from the “Eastern edge of the mound at Koyunjik.” Additional information on the bricks in the British Museum (exs. 1–3) comes from C.B.F. Walker; all these are inscribed on the face.

The line arrangement follows ex. 1; exs. 4, 5 (as far as it is preserved), and 6, as well as R. Campbell Thompson’s copy in Arch. 79, have the inscription on nine lines (splitting lines 2 and 6 into two lines each).

Campbell Thompson (Arch. 79 [1929] p. 124) states that he found this inscription in the Nabû temple at Nineveh on “limestone slabs in his [Sargon’s] pavement (XXVI–XXVII) and NE. doorway : with duplicates from about twenty-eight bricks”; see also Thompson and Hutchinson, CEN pp. 74–75. Three stone slabs are known from photographs from Campbell Thompson’s excavations at Nineveh in 1927–28: photo nos. 76 (ex. 4), 77 (ex. 5), and 80 (ex. 6). The photos are stored in the Department of the Middle East in the British Museum. Ex. 5 was found “S.E. side of Temple” and is marked M.41 (information courtesy P. Watson). The present location of none of the bricks found by Campbell Thompson is known and these are not included in the catalogue. Campbell Thompson states that their findspots are: IV, 5; V, 7; V, 7; VIII, 7; XI, B, 8; XIII, 3; XVI, 10; XVII, 9; XVIII, C, 12; XVIII, C, 13, below pavement; XIX, 1; ?XXI,

10; XXII, 9; XXII, 10; XXIII, B, 10; XXVI, 9; XXVII, 12; XXVIII, 12; XXVIII, 12; XLII, 10; LXV, 9; LXVI, 11; LXVII, depth uncertain; LXVIII, 8; LXXIV, 5; LXXVII, 6; XC, 2; and XCII, B, 14. Variant readings to this inscription known only from Campbell Thompson’s comments (see Arch. 79 [1929] pl. XLV no. 69) are noted with the indication “Thompson.”

A copy of this inscription is found in Layard MS C second p. 58 (Department of the Middle East, British Museum) and supposedly comes from a brick discovered at Kuyunjik. The inscription is said to be “very indistinct in parts” and the copy diverges from our inscription at several points (e.g., <sup>d</sup>MAŠ not <sup>d</sup>BAD in line 1 and BE DU not NU.ÈŠ in line 2). Since it is not clear if these divergences are errors of the modern copyist or actual variants, they have not been noted here. A copy of lines 1, 3, and 4 of this inscription, with a gap where line 2 would have been and with the notation “3 more lines” after our line 4, is found in L.W. King’s notebook “Kuyunjik: Notes on Sculpture & Inscriptions” (Department of the Middle East, British Museum). It is stated to come from a brick from the Nabû temple. In as far as it is preserved, the inscription duplicates our master line. It is possible that one or both of the bricks copied by A.H. Layard and King is to be found among exs. 1–3.

No score for this brick inscription is given on Oracc, but the minor variants are listed at the back of the book.

1–7) Sargon (II), appointee of the god Enlil, *nešakku*-priest of (the god) Aššur, governor (appointed) by the gods Nabû and Marduk, built the temple of the gods Nabû and Marduk, his lords, from its foundations to its crenellations for the sake of his life, the well-being of his offspring, the overthrow of this enemies, the success of the harvest of Assyria, (and) the well-being of Assyria.

3 Exs. 4 and 6 have the rare writing <sup>d</sup>KU for <sup>d</sup>AMAR.UTU; see Borger, MZ p. 425.

## 96

A second inscription recording the construction of the temple of the god Nabû is found on bricks from the well and latrine of the Nabû temple at Nineveh.

## CATALOGUE

Ex.	Museum Number	Registration Number	Provenance	Dimensions (cm)	Lines Preserved	cpn
1	BM 137468	1929-10-12,179	Nineveh, Kuyunjik, well	33×5×13	1-5	n
2	BCM 336'79	—	Nineveh, Kuyunjik, well, D 9	32×11×13	1-5	n

## COMMENTARY

Exs. 1-2 are inscribed along the edge. Additional information on them comes from C.B.F. Walker.

R. Campbell Thompson (Arch. 79 [1929] p. 124) states that bricks with this inscription come from the well and latrine of the Nabû temple; elsewhere (ibid. pl. XLV) he says that exemplars come from the well and from the following findspots: XX, C, 20; LXXVII, 5; LXIX, 7; and XXVI, 8. None of these four findspots appears to be near the latrine, which is located near areas LVIII and LIX (see Thompson and Hutchinson, Archaeologia 79 [1929] pl. LXIII). The present location of none of these bricks is known and they are not included in the catalogue, although variants from them are noted with the comment "Thompson." The bricks found by Campbell Thompson in the well presumably include exs. 1-2.

A copy of this inscription reportedly discovered on bricks in the well of the Nabû temple is found in L.W. King's notebook "Kuyunjik: Notes on Sculpture & Inscriptions" (Department of the Middle East, British Museum). The copy has a misbegotten GÍD and a BALA rather than a TI in line 3. Since the BALA and TI signs are quite similar and since the BALA sign is copied in pencil while almost all of the rest of the inscription is copied in pen, it is likely that King misread the sign.

It is possible that text no. 93 should be treated as a duplicate of this inscription. As is the practice in RINAP, no score for this brick inscription is given on Oracc, but the minor variants are listed at the back of the book.

- |    |  |      |   |
|----|--|------|---|
| 1) | <sup>m</sup> MAN-GIN MAN KAL MAN ŠÚ MAN KUR AŠ   | 1-5) | Sargon (II), strong king, king of the world, king of Assyria, completely built the temple of the lord, the god Nabû, (located) inside the city of Nineveh from its foundations to its crenellations for the sake of ensuring his good health (and) and prolonging his life. |
| 2) | É EN <sup>d</sup> MUATI ŠÀ URU.NINA.KI           |      |   |
| 3) | ana TI ZI.MEŠ-šú GÍD TI-šú                       |      |   |
| 4) | TA UŠ <sub>8</sub> -šú EN <i>gaba-dib-bi</i> -šú |      |   |
| 5) | DÛ-uš ú-šak-lil                                  |      |   |

2 É EN <sup>d</sup>MUATI "temple of the lord, the god Nabû": Or possibly É <sup>d</sup>EN <sup>d</sup>MUATI "temple of <the god> Bēl (and) the god Nabû"? Cf. text no. 95 line 3 É <sup>d</sup>AG u <sup>d</sup>AMAR.UTU, "temple of the gods Nabû and Marduk."

3 The copy by R. Campbell Thompson (Arch. 79 [1929] pl. XLV) has ZI.MEŠ-šú, while Walker, CBI p. 119 has NAM.MEŠ-šú. The signs ZI and NAM are very similar and the former reading is used here since in similar places TI (or TILA or TIN) is followed by ZI (or ZI.MEŠ), not by NAM (or NAM.MEŠ).

4 Omission of -šú, "its," after *gaba-dib-bi*, "crenellations" on the brick from LXIX, 7 (Thompson).

## 97

This fragmentary inscription from Nineveh should possibly be treated as a variant of the preceding inscription with the only variation being in the arrangement of words and lines, but since this is not certain, it has been kept separate here. The current location of the brick fragment is not known and the inscription is edited from the published copy. Text no. 93, found on a stone fragment, may also be a duplicate of this inscription.

## 99

Two copper coverings for door jambs from the Nabû temple at Nineveh bear a short dedicatory inscription to the god Nabû.

## CATALOGUE

Ex.	Museum Number	Provenance	Dimensions (cm)	Lines Preserved	cpn
1	EŞ 7848	Nineveh, Kuyunjik, Nabû temple	—	1-3?	n
2	EŞ 7849	As ex. 1	—	1-3?	n

## COMMENTARY

The two copper coverings come from the upper part of two door jambs from the temple of Nabû at Nineveh (“deux couvertures en cuivre de la partie supérieure des deux jambages de la porte”). According to E. Nassouhi, who published the pieces, one is in fragmentary condition, while the other is better preserved and has a lower diameter of 30 cm. Nassouhi states that both pieces have the same size,

and inscription and that the less well preserved exemplar has below the logogram for Nabû (<sup>d</sup>AG of line 1) the emblem of the Sebetti gods, seven stars marked by embossed dots.

It was not possible to examine the two objects and thus, since it is not known exactly what is on which exemplar, no score of the inscription is provided on Oracc.

## 100

An eye-stone in the J. Rosen collection bears a short dedicatory inscription of Sargon to the goddess the Lady of Nineveh. The piece was purchased on the antiquities market and thus its original provenance is not known. It is placed with the inscriptions from Nineveh solely because it is dedicated to the Lady of Nineveh.

## CATALOGUE

Source	Provenance	Dimensions (cm)	cpn
Galter, ARRIM 5 pp. 12, 14, and 21 no. 42	—	3.5×1.3	n

## COMMENTARY

H. Galter (ARRIM 5 [1987] p. 12) states that the stone is possibly sardonyx, while U. Kasten states that it is agate (information courtesy of W.W. Hallo). The edition presented below is taken from the publication

by Galter and has been confirmed by Hallo.

The writing SUM-<sup>r</sup>iš<sup>r</sup> in line 3 is unusual and is presumably intended to stand for a form of the verb *qâšu*, although one would expect BA-iš.

## 102

A fragment of one side of a clay tablet in the collection of the Oriental Institute, Chicago, preserves part of the end of an account of Sargon's conquest of Carchemish and the beginning of an account of the campaign against the Mannean Ullusun. The inscription assigns these campaigns to Sargon's fourth and fifth regnal years respectively. It thus follows the numbering of the Aššur Prism (text no. 63) and the Nineveh Prism (text no. 82), rather than that of the Khorsabad Annals (text nos. 1 and 2) and the Najafabad Stele (text no. 117), which assign these to Sargon's fifth and sixth regnal years (717 and 716) respectively. For the dating of these campaigns, see the introduction to the present volume and Tadmor, JCS 12 (1958) pp. 23 and 94–95. H. Tadmor (ibid. p. 22) has suggested that the fragment "seems to be the only known specimen of Sargon's Annals on a clay-tablet." It is not

impossible that the text originally on the tablet duplicated all or part what was on the Aššur and Nineveh prisms for these campaigns and all three were treated in A. Fuchs' recent edition (SAAS 8). Since no part of the text of this fragment overlaps any part of those prisms that is actually preserved and since this tablet is unlikely to have contained the whole text originally on either prism, it is treated separately from those texts here.

## CATALOGUE

Museum Number	Provenance	Dimensions (cm)	cpn
A 16947	—	4.8×5.1×1.3	c

## COMMENTARY

The provenance of the fragment is not known. H. Tadmor reports that the piece “was acquired in 1928 by the late Prof. Chiera from a local dealer in Mosul” (JCS 12 [1958] p. 22 n. 2). The piece may have come from the neighboring site of Nineveh, although this remains mere speculation. The inscription has been collated from the original and the restorations, for the most part, follow those proposed by H. Tad-

mor and A. Fuchs.

As noted in the introduction, the text on this fragment may be a duplicate of at least part of what was originally on the Nineveh and Aššur prisms. It would presumably have been found around the middle of the second column of the Nineveh prism (text no. 82 ii) and at some point above the first preserved column of the Assur prism (text no. 63 i').

## 103

A stone stele found in the vicinity of the modern city of Larnaca (ancient Kition) on the southern coast of Cyprus has a relief depicting Sargon II and an inscription of that ruler mentioning a number of military achievements, including victories over Urartu and Hamath, as well as his joyful entry into Babylon in 710. The inscription also describes the submission of rulers of the land Yā' and the erection of a stele in the land Adnana (Cyprus). The erection of (presumably) this stele is also mentioned in text no. 74 vii 39–44. Since the text refers to the king's third year (as ruler of Babylonia) (iv 21), the text must date to 707 or later. This inscription is often referred to as the Cyprus Stele, the Larnaca Stele, or the Kition Stele.

The discovery of this stele on Cyprus, the statement in it and several other inscriptions that seven kings of “the land of Yā', a region of the land of Adnana (or Yadnana), situated in the middle of the Western Sea,” had brought gifts to Sargon in Babylon when they had heard of his actions in the lands of Chaldea and Ḫatti (iv 28–42), statements in some other inscriptions that Sargon had subdued those kings (e.g., text no. 9 lines 27–29), and a possible understanding of passages in Sargon's Annals from Rooms II and V (text no. 1 lines 456b–467a and text no. 2 lines 436b–441a), have allowed some scholars to argue that Sargon sent soldiers to Cyprus to help Silṭa, the king of Tyre, put down a rebellion there by some of the latter's vassals and that the seven kings had sent their gifts to Sargon at some point following that event (see in particular Na'aman, *Orientalia* 67 [1998] pp. 239–247 and *CRRA* 45/1 pp. 357–363). Since the passages in Sargon's Annals are poorly preserved, Sargon's exact actions vis-à-vis Silṭa and Cyprus remain uncertain. Whether or not a body of Assyrian troops ever went to Cyprus, it is quite reasonable to assume that some Cypriot rulers had sent gifts to Sargon in order to win his friendship since Assyria controlled Phoenicia, a major trading partner for Cyprus and the ancestral home of some of the people living there, and that Sargon had at some point sent an envoy, likely accompanied by a military escort or bodyguards, to Cyprus. There is no need to assume that Assyrian troops carried out actual military actions on Cyprus — whether in support of Silṭa or not — or that Assyria annexed any city located on Cyprus. Na'aman's claim that “Sargon conquered Cyprus about 707 B.C.E.” (*CRRA* 45/1 p. 357) cannot be accepted without serious reservations.

An important study by Radner on the erection and purpose of this stele — the only Assyrian artifact discovered up to now on Cyprus — is found in Rollinger, *Interkulturalität* pp. 429–449; B.N. Porter presents a study of the audiences for the stele in *Studies Fales*, pp. 669–675.

## COMMENTARY

The exact date of discovery and provenance of the stele are matters of scholarly discussion. Local workmen apparently discovered it in 1845 (sometimes said to be 1844) near Larnaca on Cyprus. Most publications state that it was found in ruins to the west of the harbor of ancient Kition, thus at the site of Bamboula (see for example Yon in Caubet, *Khorsabad* pp. 161–168; and Radner in Rollinger, *Interkulturalität* pp. 429–430), but, following a thorough study of the early reports about its discovery, R. Merrillees has recently argued that it “was found in the southern part of ancient Kition, possibly on or near a mound in the south-western corner of the wall encircling the city” (*Studies Hermary* p. 378). It is also uncertain where the stele was originally erected; see iv 52–53 and the on-page notes to those lines. (With regard to where Assyrian steles were set up in general, see Frame, *Subartu* 18 pp. 61–63.)

The stele is in the Vorderasiatisches Museum, having been purchased in 1846. It is now 32–33 cm thick, but an additional ca. 13 cm had been cut away from the back of the stele, likely in order to lighten it for shipment to Berlin; thus, the cuneiform signs of the inscription that were at the end of right side (col. ii) and beginning of left side (col. iv) are now missing, as well as anything written on the back face (col. iii). The line arrangement assumes that the inscription began on the front of the stele (col. i) and carried on to the right (col. ii), back (col. iii, missing), and left (col. iv) sides respectively. Since col. ii ends at a textually logical point and col. iv begins at a textually logical point, it is not impossible that the back of the stele had not been inscribed and that this encouraged someone to remove it to lighten the weight of the object. Thus, what is given here as col. iv may really have been col. iii. However, based on other Neo-Assyrian steles, we would certainly expect the back to have been inscribed and we would also expect an account of the Assyrian campaign against Marduk-apla-iddina II (Merodach-Baladan) of Babylonia to precede the account of Sargon’s joyful entry into

Babylon, which is found at the start of the left side (col. iv) of the stele. The inscription was collated from the original, with some additional collations provided by J. Marzahn. Squeezes of col. iv preserved in the British Museum were also examined. Col. i is badly worn and the traces of the inscription are in places obscured by the relief. Thus, at times the copy published by Ungnad is the basis for the transliteration.

The stele is said to be made of black basalt (or gabbro), a stone that can be found on Cyprus in the Troodos massif. However, citing two scholars who have worked on the petrographic analysis of materials from Cyprus (C. Elliott and C. Xenophontoa), Merrillees states that “no block of vesicular basalt the size of the Sargon stele could have been mined in Cyprus, whereas, for example, volcanic deposits in north Syria were evidently suited for the purpose” (*Studies Hermary* p. 378). He thus hypothesizes that the stele was quarried and carved on the mainland and then sent by boat to Cyprus, although noting that a scientific analysis of the stone of the stele needs to be made.

The relief on the front of the stele depicts the king facing right, holding a mace in his left hand, and raising his right hand. Eight symbols representing various deities are carved in front of the face of the king: a horned crown (Aššur), a crescent moon (Sîn), a star (Ištar), lightning bolts (Adad), a spade (Marduk), a stylus (Nabû), seven circles (the Sebeti), and a winged sun disk (Šamaš). These same deities are invoked at the beginning of the inscription.

The text is written in Babylonian dialect using a mixture of Assyrian sign forms and archaizing Babylonian sign forms. Several passages similar to parts of i 1–25 may be found in Grayson, *RIMA 2* pp. 12–13 A.0.87.1 i 1–16, text no. 116 lines 1–10, and text no. 117 i 1–19. For ii 22–65, see text no. 84 lines 12’–20’. For iv 1–42, see text no. 7 lines 140–149 and for iv 11–42, see text no. 74 vii 7–38 (with some significant divergences); see also text no. 86 lines 17’–18’ and text no. 87 lines 15’–21’.

for the ea[rth] (and) destroys [the enemy]; the god Šamaš, [the] gr[eat judge ...], who [...] the treachery of the evil and ... of the foe, (and) exp[oses the vil]lain; the god Adad, the great prince, her[o, canal inspect]or, (i 10) who devastates regions ... (and) makes the seas h[ea]ve; the god Mar[duk], the lord [...], who provides all people with food, [...] ... [...], (and) grants pl[ants ...]; (i 15) the god Nabû, the [perfect] heir, [...] ... [...] high [mountain]s, who rem[oves] the uncompliant (and) ... the roots of the enemy; (i 20) the goddess Ištar, queen of battle, ... evil-doers; (and) the Sebetti, who go before the gods, stand at the side of the king, their favorite, in the place of battle, and [bri]ng about (his) victory;

i 24–28) Great gods, managers of heaven and netherworld, whose attack means battle and strife, who appoint (rulers) (lit.: “raise the eyes”) (and) name king(s), (and) by whose holy command they place (one) land over (another) land and make (its ruler) greater [than] (other) rulers.

ii 1–4) Sargon (II), great king, [strong king], king of the world, king of Assyria, governor of B[abylon], king of the land of Sumer and Akkad, king of the [four] quarters (of the world), favorite of the great gods, ... [...].

i 6 Following Genge, Stelen p. 15, Malbran-Labat in Yon, Kition dans les textes p. 345 reads, <sup>d</sup>UTU [DI.KU<sub>5</sub>? GAL-ú? ša<sup>2</sup> AN-e<sup>2</sup> DINGIR-u<sup>2</sup>?] <sup>r</sup>ga<sup>1</sup>-aš-ru, “Šamaš, [le grande juge céleste, le dieu] puissant.”

i 7 Following Genge, Stelen p. 15, Malbran-Labat in Yon, Kition dans les textes p. 345 reads, mu-<sup>r</sup>ḫi<sup>1</sup>-[i-tu<sup>2</sup> šá<sup>2</sup> ša-al-pat<sup>2</sup>] lem-ni, “celui qui per[ce à jour les perfidies] du méchant.”

i 10–11 Cf. Grayson, RIMA 2 p. 12 A.0.87.1 i 9–10 ra-ḫi-iš kib-rat KÚR.MEŠ KUR.MEŠ AB.MEŠ-ti, “who storms over hostile regions, mountains, (and) seas.”

i 13 Genge, Stelen p. 15 (partially followed by Malbran-Labat in Yon, Kition dans les textes p. 346) tentatively suggests mu-šar-bu-u LUGAL-ti-ia, “the one who makes great my kingship,” based on Leichty, RINAP 4 p. 182 no. 98 line 8.

i 14 The tentative restoration follows CAD Š/2 p. 45. Perhaps instead <sup>r</sup>Ú<sup>1</sup>.[ḪI.A.(MEŠ) ...]; see text no. 65 line 187 and text no. 2 line 406.

i 15 For aplu gitmālu, see text no. 116 line 4. Or IBILA [ke-e-nu]; see Tallqvist, Götterepitheta p. 30. Genge, Stelen pp. 16 and 161 tentatively suggests IBILA [SAG šá é-sag-íl], “[eldest] offspring [of Esagila].”

i 16–19 The lines are quite short and the suggestion that another god may have been mentioned between Nabû (i 15) and Ištar (i 20) (Frame, *Orientalia* 68 [1999] p. 42) seems unlikely.

i 17 Possibly [mu-lat-ti KUR].<sup>r</sup>MEŠ<sup>1</sup> zaq-ru-te, “[who splits/crushes the] high [mountain]s”; see 4 R pl. 26 no. 3:40 and cf. Genge, Stelen p.16 and Malbran-Labat in Yon, Kition dans les textes p. 346.

i 19 Possibly <sup>r</sup>ša/šá-li<sup>1</sup>-ip<sup>1</sup> šur<sup>1</sup>-uš za-ma-ni, “who tears out the roots of the enemy” (Genge, Stelen p. 16).

i 20 Cf. mu-šak-si-<sup>r</sup>rat<sup>2</sup> a-<sup>r</sup>nun<sup>2</sup>-ti<sup>21</sup>, “who makes (men) ready for battle” in text no. 116 line 7.

i 21 H. Genge (Stelen p. 16) tentatively suggests sa-pi-nat tar-gi<sub>4</sub>-gi<sub>4</sub>, “who overthrows evil-doers.”

i 22–23 See text no. 116 line 8.

ii 4 The traces do not seem to fit a-<sup>r</sup>na<sup>1</sup>-[ku], “I.” Following H. Winckler (Sar. 1 p. 174), possibly a-<sup>r</sup>li<sup>1</sup>-[kut maḫ-ri-ia], “who [go before me],” but while the traces after A could fit the beginning of a LI sign, it is not clear that there would be sufficient room for the full restoration proposed. H. Genge (Stelen p. 17) suggests za-[nin é-sag-íl], thus “one who pro[vides for Esagila],” but the first sign is clearly A not ZA and the following traces would not fit the beginning of NIN.

 49) ina ŠU.II rama-ni-šú ina GÍR.AN.BAR [šib-bi-šú]

ii 18 For the restoration, see text no. 7 line 10 and text no. 8 line 5.

ii 36 F. Malbran-Labat (in Yon, Kition dans les textes p. 347) suggests ab-[šá-an <sup>d</sup>aš-šur<sup>2</sup>], “le j[ou]g d’Aššur.”

ii 39 For the restoration, see text no. 84 line 15’. Or, following F. Malbran-Labat (in Yon, Kition dans les textes p. 347), possibly a-di [kim-ti-šú], i.e., “together with [his family].” There may not be sufficient room at the end of the line to restore either of the proposed readings.

ii 43 With regard to the use of the razor, see the note to text no. 1 line 369. Text no. 84 line 16’ has here [...]at-te ù šur-ri, “[...] ... and flint blades.” Possibly restore [ú-ša-aš-riḫ], “[...] (and) utter cries (of mourning)”; see Malbran-Labat in Yon, Kition dans les textes p. 347.

ii 44 F. Malbran-Labat (in Yon, Kition dans les textes p. 347) suggests a-na ár-[ni-šú-nu<sup>2</sup>], i.e., “for [their] cri[mes],” instead of a-na ár-[kát u<sub>4</sub>-me], “for the fu[ture].”

ii 46 There appear to be fewer traces of the sign before TI than copied by A. Ungnad (VAS 1 no. 71); collation would suggest that they could be the end of IG.

ii 5–8) The gods Aššur, Nabû, (and) [Marduk] gra[n]ted me] a reign without equal [and] exalted my [good] reputation to the h[eights].

ii 9–21) I [continually acted] as provider for (the cities) Sippar, Nippur, (and) B[abylon] (and) I [made restitution] for the wrongful damage suffered by the people of privileged status, as many as [there were (of them)]; I abolished corvée duty for (the cities) D[ēr], Ur, Uruk, Eri[du], (ii 15) Larsa, Kul[labā], Kissik, (and) Nēmed-L[aguda] (and) gave relief to [their] people. I restor[ed] the exemption (from obligations) of (the city) Baltil (Aššur) and the city [Ḫarrān], which had fallen into oblivion in the dis[tant] past, and their privileged status [that had lapsed].

ii 22–50) With the support of the great gods, I ad[vanced and] ru[led] the people (from) the Up[per] Sea to the Lo[w]er Sea as if (they were) one (people). From Egypt to the land [Musku], I made (them) bow down at my feet. I [dispersed] the forces of Ḫumbanigaš (Ḫumban-nikaš I), the [Elamite]. I destroyed the land Karalla, the land [Šurda], (ii 30) the city Kišesim, the city [Ḫarḫar], the land Media, (and) the land El[lipi]; I did not spare any of [their] offspring. I settled in their midst people from the land Ḫatti (Syria) that [I] had conquered. (ii 35) I [set] e[unuchs of mine] as provincial governors over them [and] had (them) pull [my] y[oke]. I subjugated the lands Mannea, Andia, (and) Zik[irtu]. I [counted] as booty Urzana, king of the city Mušašir, together with [the people of his land (ii 40) (and) his deities] Ḫaldi (and) Bagbartu. [I] had (the people of) [the land] Urarṭu, to [its full] extent, wield razor(s) [...]. (ii 45) [I imposed for the fu[ture] lamentation and [dirge (singing) upon the people] who lived there. [I brought about the defe]at of Ursâ (Rusâ), the [Urarṭian, at Mou]nt Uauš, a rugged mountain. He to[ok fright at] (engaging in) fierce battle with me [and] by his own hands, [he brought an end to] his life with the iron dagger [from his belt].

ii 51–65) Like the Deluge, I overwhe[imed] the land Hamath to [its] fu[ll] extent. I [brought their] ki[ng] Iaū-bi'dī (Ilu-bi'dī) to Assyria in bondage, together with his family, [his] fighting men, (ii 55) (and) the booty of his land. I cons[cripted] from among them 300 chariots, 600 cav[alry], (and) shield (and) spe[ar] bearers, and I [added] (them) to my royal contingent. I [settled] 6,300 Assyrian cri[minals] in the land Hamath; I set a eunuch of mine as [provincial] gov[ernor] over them and imposed upon th[em] (the delivery of) tribute (and) pa[yment(s)].

Missing or not preserved.

iv 1–22) [Happily, with a jo[y]ful heart and a radiant face, I entered [Babyl]on, the cult center of the Enlil of the gods (Marduk); I grasped hold of [the hands of the gre]at [lord], the god Marduk, and (iv 5) [brought] (him) safely along the road to the akītu-house. [(With regard to) 154] talents, 26 and 1/6 minas of [red] gold, 1,804 talents (and) 20 minas [of pure silver], (donkey) loads of copper (and) iron [in im]measurable quantities, (iv 10) [obsidian], lapis-lazuli, banded agate, muššaru-stone, [blue turquoise], green turquoise, ... of banded agate [(and) mušša]ru-[stone] in immeasurable quantities, [blue-pur]ple [wool], red-purple wool, [garments] with multi-colored trim and linen (garments), (iv 15) [boxw]ood, cedar, cypress, [(and) every kind of] aromatic, the products of Mount Amanus, [who]se [sce]nt(s) are pleasant – [from the beginning] of my reign until (my) third year, [I pres]ented (these items) as gifts [to the] deities Bēl and Zarpanītu, Nabû, [Tašmēt]u, and the (other) gods who dwell in [the cult centers] of the land of Sumer and Akkad.

iv 23–27) [Upēr]i, king of Dilmun, who(se) lair is [sit]uated at a distance of thirty leagues [in the middle of the] Eastern [Se]a, [like that of a fish, heard of the might] of the gods Aššur, Nabû, (and) Marduk and sent

ii 51 The name Hamath is written in a variety of ways in the texts of Sargon; see Parpola, Toponyms pp. 14 and 146–147. In this text, we find Amattu (KUR.a-ma-at-tu) here and Ḥammati (KUR.ḥa-am-ma-ti) in ii 62.

ii 56 Or ᵀa¹-[qa-a]; see text no. 74 v 28.

iii The back of the stele (col. iii) may have contained (among other things) a description of Sargon's campaign against Mutallu of Kummuhu (which follows after the account about Ilu-bi'dī/Iaū-bi'dī in text no. 84, a cylinder that was composed close to the time of the Cyprus Stele) and of Sargon's defeat of Merodach-Baladan, which would logically precede what is found in col. iv (see Frame, Subartu 18 pp. 54–55 n. 11).

iv 6 See Fuchs, SAAS 8 p. 33 n. 80 with regard to the reading 6-su, which has often been thought to be an error for 6 GÍN. Text no. 7 line 141 has 10 GÍN.

(a message to do) obeisance (to me).

iv 28–42) [(Moreover), seven king]s of the land Yā', a region [of the land Adn]ana (Cyprus) — whose abode(s) [are situated] far away, at a distance of seven days (journey) (iv 30) [in the middle] of the Western Sea, (and) the name of whose land, [from] the distant past, when Assyria was taken over, [until now], none of the kings, my ancestors, [who preceded] (me), (iv 35) [had ever heard] — [he]ard [from afar], in the middle of the sea, [of the deeds I had been doing] in Chaldea and the land Ḥatti. Their hearts then pounded (and) [fear se]ized them. [They brought] before me [in] Babylon gold, silver, (and) [utensils of] ebony (and) boxwood, the treasure of their land, [and] they kissed my feet.

iv 43–57) [At that time], I had a stele made and [I engraved] upon it [image(s) of the] great [god]s, my lords. I had an image of myself as king stand before them (the gods) [constantly implor]ing [them for the sake] of my life. [I inscrib]ed upon it [the name(s) of the people] whom, from the east [to the we]st, (iv 50) I had subjugated [to the yok]e of my lordship with the support of the gods Aššur, [Nabû], (and) Marduk, my divine helpers. I had (it) erected [beside/facing Mount] Ba'il-ḤARri, a mountain [(that towers) abo]ve the

iv 32–34 Text no. 7 lines 146–147 have ša ul-tu u<sub>4</sub>-me ru-qu-ti a-di i-<sup>d</sup>nanna a-na\*(var. i-na) LUGAL.MEŠ-ni AD.MEŠ-ia ša KUR aš-šur.KI u KUR kar-<sup>d</sup>du-ni-ās ma-nam-ma, “from the distant past until now, none of the kings, my ancestors, neither in Assyria nor in Karduniaš ...” There would appear to be insufficient room at the beginning of iv 33 to restore [a-di i-na-an]-na or [EN i-na-an]-na. J. Lewy (HUCA 19 [1945–46] pp. 466–467) restores [i-na pa]-na at the beginning of iv 33 and translates this and the preceding line as “since the distant days of the seizing of Assyria [aforet]ime,” understanding “the seizing of Assyria” to refer to “the occupation of Assyria by Sargon’s ancestors and their people.” S. Dalley (in Reyes, Archaic Cyprus p. 51) translates “[since] far-off days [they had not paid?] the tax (šibtu) of Assyria, for none of the kings, my fathers [who preceded] me ....”

iv 39 The parallel passage in text no. 7 line 148 has at this point im-qut-su-nu-ti ḥat-tu (see also text no. 74 vii 35). The proposed restoration goes back to Smith, ZĀS 9 (1871) p. 71. To my knowledge, no other text uses kašādu with ḥattu and it is possibly for this reason that S. Dalley (in Reyes, Archaic Cyprus p. 51) restores instead “their [trib]ute”.

iv 43–57 Compare the description of the setting up of this stele “in the land Yā', a region of the land Yadnana,” in text no. 74 vii 39–44. iv 43–46: A.T. Reyes (Archaic Cyprus p. 54) argues that the passage indicates “that the stele was set up facing a rock relief” (i.e., the royal image was on the stele and the images of the gods were on the rock relief). It seems more likely, however, that the passage describes only the stele, which has on it a depiction of the king standing in an attitude of prayer before symbols of several gods.

iv 44–45 For the tentative restorations, see Streck, *Asb.* p. 270 iv 2 and the on-page note to text no. 117 ii 70. In iv 45, possibly restore [e-si-ir] or (following Malbran-Labat in Yon, Kition dans les textes p. 348) [ab-ta-ni] instead of [e-si-qa]. Or restore [ta-nit-ti DINGIR].MEŠ and [ú-šá-ās-tir-(ma)], “[I had inscribed] ... [the praise of the] great [god]s”; cf. Leichty, RINAP 4 p. 186 no. 98 rev. 50 and 52.

iv 45–46 Malbran-Labat in Yon, Kition dans les textes p. 348 suggests ša-lam MAN-ti-ia / [šur-ba-a a]-<sup>r</sup>na<sup>2</sup>? TI.LA-ia, i.e., “for the sake of my life a [great] image of myself as king.”

iv 47 Possibly restore [KUR].<sup>r</sup>MEŠ<sup>1</sup>, “[of the land]s,” instead of [UN].<sup>r</sup>MEŠ<sup>1</sup>, “[of the people].” In Yon, Kition dans les textes p. 348, F. Malbran-Labat tentatively reads for the beginning of the line [KUR.MEŠ<sup>2</sup> DÜ-ši]-<sup>r</sup>na<sup>2</sup>?, i.e., “[all thei]r [lands],” but it is not clear that there would be room for all this and the traces at the beginning of the line would fit the end of MEŠ, but not NA.

iv 52–53 The proper restoration and understanding of these lines stating where the stele was to be set up is uncertain and a matter of extensive scholarly discussion. For the tentative restorations used here, see in particular Tadmor, *Eretz-Israel* 25 (1996) pp. 287–288 and Radner in *Rollinger, Interkulturalität in der Alten Welt* pp. 432–433. For the beginning of line 52, possibly simply [i-na KUR], [a-na KUR], [ina UGU KUR], or [e-li KUR], “[at/on] Mount,” in which case the stele had either never reached its intended destination, or had been removed from it and taken to Kition, or never actually been intended to be placed there. H. Tadmor (*Eretz-Israel* 25 [1996] pp. 286–288) discusses parallels to, and the possible meaning of, the name Ba'il/Ba'al-ḥarri/ḥurri — West Semitic *bl hr* — and suggests that the stele was originally erected on a mountain peak, possibly in the mountain range around Mount Stavrovouni, about 20 km east of Larnaca. S. Dalley has suggested that in iv 52 one should translate ḥur-ri KUR-i as “mines,” and from this A.T. Reyes has suggested that the stele was set up in a place associated with the mines of Cyprus, presumably copper mines; see Reyes, Archaic Cyprus p. 54. For iv 53, possibly translate instead “[the] [that is situated] at the he]ad of the land of Adnana,” i.e., on a promontory. See also Na'aman, *Orientalia* NS 67 [1998] p. 240 “[at the t]op (i-na [re]-eš) of the land of Adnana.” C. Saporetti (*Studi Ciprioti e Rapporti di Scavo*, 2nd fascicle p. 85 and n. 16) reads iv 52–53 as [ašar] ba'il ḥurri māti / [nišē] Adnana ulziz, “[Dove?] è larga? l'apertura del paese [delle genti?] del paese Adnana (l')ho eretta.” Lipiński (*Itineraria Phoenicia* pp. 51–52) would restore these lines to read: “[in the House of the] Baal of Mount Hor [and the god]s of (I)adnana”, [ina ē d]ba-il ḥur-ri KUR-i [u DINGIR].<sup>r</sup>MEŠ<sup>1</sup> KUR ad-na-na; he assumes

land Adnana (Cyprus). I left [for] future [king]s, my descendants, [*the praises of*] the great gods, my lords, [*with wh*]ose firm [*approval*] I act and have no [*equal*].

iv 58–62) [In fu]ture days, may a later prince look at my [stel]e and read (it). May he praise [*the names*] of the great gods, anoint (the stele) [with oil], (and) offer a sacrifice. [May] he [not] change its location.

iv 63–74) [(As for) the one who alt]ers my stele (or) [erase]s my inscribed name, may the [great god]s — as many as are mentioned by name on [this] stele — and the gods [who live] in the middle of the wide sea curse him [*angrily*] and make his name (and) his descendant(s) disappear [from] the land. (iv 70) [May they not have] pity (on him). [May they red]uce his people through famine, want, [hunger], (and) plague. May they make him live in bondage [under] his enemy and may (his enemy) govern his land [in the sight] of his (own) eyes.

## 104

Three fragments found at Ashdod in 1963 come from one or more stone steles that are likely to be assigned to Sargon II in view of textual parallels on at least one of those fragments with passages in other inscriptions of that ruler. H. Tadmor has suggested that the fragments may have been parts of a stele erected soon after the capture of Ashdod by Sargon in 711 that had been deliberately broken when Hezekiah rebelled against Assyria in 705 ('Atiqot, English Series 9–10 [1971] pp. 192–194).

the stele was erected in a shrine on the acropolis of Kition (i.e., Bamboula) and near the ancient harbor. It has also been suggested this might refer to a mountain in Phoenicia; see also Bagg, *Rép. Géogr.* 7/1 pp. 111–112 sub *Ḫurri*. As K. Radner has noted, “there are no parallels for a temple that would be described as the shrine of an unspecified number of gods; in the Mesopotamian view, a temple has one owner and is identified by his or her name (although it can of course house additional deities)” (Radner in Rollinger, *Interkulturalität in der Alten Welt* p. 433 n. 22). R. Merrillies (*Studies Hermary* pp. 378–379) has argued that “it seems highly unlikely that the stele was ever physically erected on or near a mountain in Cyprus” and suggested that the stele was set up near one of Kition’s city gates where it could be seen by passers-by and that it was found “presumably in or not far from its original position.” Certainly, steles were most often set up in cities (normally either in or near temples or at city gates), and not in the countryside, where rock reliefs were the more common Assyrian monuments. .

**103 iv 54–55** The tentative restorations are based upon H. Tadmor’s understanding of the passage (*Eretz-Israel* 25 [1996] p. 287); see also Grayson and Novotny, *RINAP* 3/2 p. 308 no. 222 lines 8–9 and p. 313 no. 223 lines 3–4. Possibly restore instead in line 55 something along the lines of [ša ina tukul-ti]-šú-un or [ša ina zik-ri pi]-šú-un, i.e., “[with the support of] the great gods” or “[at the command of] the great gods” (cf. Winckler, *Sar.* 1 p. 182 and Luckenbill, *ARAB* 2 p. 103 §188).

**103 iv 60** [zik-ri<sup>2</sup>] “[the names]”: For the restoration, see Leichty, *RINAP* 4 p. 186 no. 98 rev. 57. Possibly restore instead [ep-šet], “[the deeds],” based on text no. 117 ii 73. *lit-ta-id-ma*: Rather than translating this as “May he praise” and taking *litta* “id” from the verb *nādu* (following CAD N/1 p. 104), we could translate it as “May he pay attention to,” taking it from the verb *na’ādu* (see AHW p. 693). (See also text nos. 105 ii’ 14 and 106 iii 12’.)

**103 iv 64** With regard to the restoration, see also text no. 106 iii 15’.

**103 iv 73** The restoration KI.TA instead of *pa-an*/IGI, “before,” follows text no. 9 line 106, text no. 43 line 77, and text no. 44 line 60.

## COMMENTARY

Three inscribed fragments of black basalt were found during the second season of Israeli excavations at Ashdod (1963) and these are stored in the Israel Museum, Jerusalem. The inscription is edited from the published photographs, with further collations made by J.G. Westenholz, who also provided the information on the museum and field numbers.

H. Tadmor, Z. Kapera, and several other scholars refer to these pieces as fragments 1–3, which correspond to our A–C. W. Horowitz and T. Oshima (Canaan pp. 40–41 and 208) cite our Frgms. A, B, and C as Ashdod 2, 4, and 3 respectively. They state that Frgms. A and C (their Ashdod 2 and 3) “are written in the same script with lines of identical height, but with different indentations at the left edge. Thus they could be from different steles or from two different parts of the same stele.” They also say that Frgm. B (their Ashdod 4) “is written in a different hand altogether” and point out that it was found in a different area of the site. Thus, they believe that the three fragments “come from at least two separate originals.”

Frgms. A and C preserve parts of two adjoining faces of a stele, referred to below as the left and right faces. Frgm. B preserves part of only one face of the stele; since there is a blank space immediately above the first line of the inscription on this piece, it is assumed that this is the first line that was on that face of the stele.

Due to a lack of clarity in the published records, the exact findspots of the individual pieces are not clear. Westenholz informs me that Frgm. A may be the piece found reused in a Hellenistic wall (Area A

locus 45) since it is covered with a patina and its back is worked. This would then suggest that Frgm. C is the piece found in Area A in debris of Stratum 3 in square H/3 near locus 32. (See Dothan, ‘Atiqot, English Series 9–10 [1971] p. 40 and pl. XCVI.) Frgm. B would then be the piece found in the Byzantine dump in Area G (see Swauger, ‘Atiqot, English Series 9–10 [1971] p. 150, which, however, refers to two fragments being found there).

Tadmor (‘Atiqot, English Series 9–10 [1971] p. 195) points out that the palaeography of the Ashdod, Acharneh (Asharné), and Cyprus inscriptions (text nos. 104, 106, and 103 respectively) are identical and very similar to the inscriptions from Samaria and Carchemish (text nos. 1009 and 1010). Tadmor suggests that the left sides of Frgms. A and C refer to Azuri’s rebellion at Ashdod and the tentative restorations generally follow those proposed by Tadmor. Certainly, the phrase *dābīb ṣalıpti*, which may appear in Frgm. C left face line 2’ (largely restored), is used to refer to the people of Ashdod in text no. 7 line 95. Since, however, the same phrase is used to refer to Mutallu of Kummuhu in text no. 7 lines 112–113, the mere presence of this phrase would not prove that the passage has to describe the rebellion at Ashdod. Questioning Tadmor’s assignment of the left sides of Frgms. A and C to the episode about the rebellion at Ashdod, Kapera (Folia Orientalia 17 [1976] pp. 94–99) assigns the left side of Frgm. C to the episode of Mutallu of Kummuhu. The restorations in Frgm. B (including the alternative restorations given in the on-page notes) also follow those suggested by Tadmor in his study of this text.

## 105

A fragment of stone stele in the Bible Lands Museum (Jerusalem) preserves part of an inscription of Sargon II that describes the events of his second year (720), including the settlement of Assyrians in Hamath (ii' 1-12). Mention is also made of events that occurred much later in the king's reign, including the submission of the seven kings of Yā' (i' 24'-25'a, mostly restored), which took place in or around 708. J.D. Hawkins, the initial publisher of the text, suggests that it was erected in 708 within the territory of Hamath (Studies Grayson pp. 162-164). The stele has been at times referred to as the Beirut Stele, the Borowski Stele, and the Hamath (or Hama) Stele.

### COMMENTARY

This fragmentary stone stele appeared on the antiquities market in Beirut and thus its original provenance is not known. W.G. Lambert (in Muscarella, *Ladders* p. 125) suggests that the stele “belongs to a type which was set up locally to commemorate events in the district. So presumably this one commemorates the settlement of Syria and Palestine in 720 B.C. and was set up somewhere in the region on the successful completion of the campaign.” J.D. Hawkins suggests that it may have come from the territory of Hamath (Studies Grayson p. 162), possibly from Sheizar, which is located on the Orontes between Acharneh and Hama (CAH<sup>2</sup> 3/1 p. 417 n. 368).

Parts of two faces of the stele are preserved. There is an area without inscription above col. ii'; thus, col. i' starts higher up on the stele than col. ii'. The inscription is edited from a copy of the inscription made by Hawkins and from photographs of the object provided by J.G. Westenholz (with supplementary collations by Westenholz).

The restorations in col. i' follow Hawkins and are based upon text no. 43 lines 10-17 and 23-24 for i' 2'-18', text no. 13 lines 23-26, 28-31, and 41-45 for i' 19'-20'a, 21'-22'a, and 24'-25'a, and text no. 43 line 26 for i' 25'b-26'.

## 106

A fragment of a basalt stele that was discovered near the bridge crossing the Orontes River at Acharneh (Asharné) bears part of an inscription of Sargon II which appears to describe a victory over the ruler of Hamath. Sargon is known to have conquered Hamath in his second regnal year (720). Thus, this is likely one of the earliest of Sargon's royal inscriptions. For the possibility that Acharneh is to be identified with the third and second millennium city Tunip, see Klengel, *Studies Lipiński* p. 128, and Goren,

105 i' 26' With regard to whom the "their" in "their subject" refers, see the note to text no. 43 line 26.

105 ii' 1 Text no. 103 ii 57 has 300 chariots.

105 ii' 11 Irḫulena, king of Hamath, was part of the coalition opposing Shalmaneser III at Qarqar in 853. See for example Grayson, *RIMA 3* pp. 23–24 A.O.102.2 ii 89–102; Hawkins in *RLA 5/3–4* (1977) p. 162; and Van Buylaere, *PNA 2/1* p. 564.

Finkelstein, and Na'aman, *Inscribed in Clay* pp. 116–121. N. Na'aman (NABU 1999 pp. 89–90 no. 89) also suggests that Acharneh might be identified with the first millennium city Qarqar; however, Qarqar is normally thought to be modern Tell Qarqūr (see Bagg, *Rép. Géogr.* 7/1 pp. 194–195).

## COMMENTARY

The inscription was found in 1924 by Commandant Maignan near the Acharneh bridge on the Orontes. It was M 10890 in the Aleppo Museum, but was later moved to the museum in Hama. The piece is inscribed on three sides (ii–iv), with the fourth side (i) being entirely damaged. Following F. Thureau-

Dangin, it is assumed here that the totally damaged side had the beginning of the inscription; however, it is conceivable that the inscription did not begin on that side, but rather on our col. iv (i.e., iv > i, i > ii; ii > iii, and iii > iv). The inscription was kindly collated for the author by K. Radner.

Remainder not inscribed

ii 13'-14' [...] i-da-a-a i-<sup>r</sup>tap-pa-lu<sup>1</sup> "[... who goes] at my side cont[inuually an]swered": Or "[...] cont[inuually st]ood in for me"; see Novotny and Jeffers, RINAP 5/1 p. 305 no. 23 line 79 (partially restored); Bauer, *Asb.* p. 49 obv. 13' (81-7-27,70); and von Weier, *SpTU* 2 p. 141 no. 31 rev. 4 (W 22669/3). Citing a passage in an inscription of Ashurbanipal as a parallel (Novotny and Jeffers, RINAP 5/1 p. 232 no. 11 i 38), F. Thureau-Dangin proposed restoring *ke-mu-u-a* at the beginning of ii 14' ("in my stead").

iii 4' For the tentative restoration, cf. text no. 117 ii 71. Possibly restore Amurru instead of Hamath at the end of the line; see also Frahm, *Last Days* p. 62.

iii 10'-15' For the tentative restoration, cf. text no. 103 iv 58-64, text no. 117 ii 72-73, and Leichty, RINAP 4 p. 186 no. 98 rev. 57. With regard to the translation of iii 11'-12', see the on-page note to text no. 103 iv 60.

iv 5' The remainder of this side of the fragment is not inscribed and thus this appears to be the last line of the text.

## 107

A stone fragment from Til-Barsip (modern Tell Ahmar), located on the Euphrates River about 20 km south of Carchemish, bears part of an inscription of Sargon II. Although the ruler's name is not mentioned in the section preserved, it may be assigned to Sargon II because of textual parallels in other inscriptions of this ruler.

## CATALOGUE

Museum Number	Provenance	Dimensions (cm)	cpn
M 9944	Tell Ahmar, at a depth of more than a meter, in a late wall, not far from (and to the east of) the western cemetery	40×97×15	p

## COMMENTARY

According to F. Thureau-Dangin, the fragment is part of a bull that would have originally been placed at an entranceway. The piece has been set up in the courtyard of the Aleppo Museum. The inscription is poorly preserved and it is edited from the published photograph, with collations by H. Galter. It is not

clear how much is missing at the beginning and end of each line and thus restorations in the transliteration have been kept to a minimum.

Lines 1'-6' are restored from such similar passages as text no. 7 lines 4-7 and 10-12, text no. 8 lines 2-3 and 5, and text no. 84 lines 1'-2'.

## 108

Five fragments of a basalt stele found at Tell Tayinat in the Amuq Valley of Turkey's Hatay province likely come from one and the same stele. Tell Tayinat (ancient Kullania) was the capital of the Neo-Assyrian province of Unqi following that area's conquest by Tiglath-pileser III in 738. Frgm. D mentions Qarqar, Samaria, and Hamath, and thus likely refers to Sargon II's defeat of a coalition of Syrian kingdoms in his second regnal year (720). The fragment may well preserve the beginning of the name of the leader of the rebellious coalition, Iaū-bi'dī (Ilu-bi'dī), the ruler of Hamath. Frgm. E also appears to duplicate a section of Sargon's Beirut Stele (text no. 105) dealing with the settling of deportees in Hamath.

## COMMENTARY

Frqm. A is known as the “Taşar Stone,” from the name of the owner of the farmstead where it was discovered in 2006 by one of the people working on the excavations at Tell Tayinat. It was being used as a door step in a building, which likely explains the abraded state of the inscription. It had apparently been brought for use there at some point after 1980 and before 2002, when the owner took possession of the farm. In 2009, the piece was taken to the Hatay Arkeoloji Müzesi. The University of Chicago's Syrian-Hittite Expedition (1935–38) discovered Frqms. B–E during excavations at Tell Tayinat and the pieces are now conserved in the Oriental Institute of the University of Chicago. For detailed information on their provenance, see Lauinger and Batiuk, ZA 105 (2015) pp. 57–59 (information partially provided by H. Snow). The existence of Frqms. B–E has previously been mentioned by G.F. Swift (Pottery of the 'Amuq p. 183) and J.A. Brinkman (JCS 29 [1977] p. 62). Only Frqm. B preserves parts of two inscribed faces, the front, Face i, and left side, Face iv, of the stele; what would be Faces ii and iii, the right side and back of the stele, are not preserved on this fragment.

J. Lauinger kindly provided the author with photos of Frqms. A–D and information on the discovery of the Frqm. A was provided by S. Batiuk.

Elements of the relief on the front of the stele are preserved on Frqm. A and Face i of Frqm. B. As noted by Lauinger and S. Batiuk (ZA 105 [2015] pp. 60–61), Frqm. A was likely situated higher on the stele than Frqm. B, and thus closer to the beginning of the inscription. The order in which the fragments are numbered is based on the assumed order of the text, with Frqm. A and Face i of Frqm. B preserving parts of the invocation of deities at the beginning of the text, Frqms. C–E preserving parts of the historical report, and Frqm. B Face iv preserving part of the curse at the end of the text. In view of the fact that none of the fragments join any other fragment, each fragment has been treated separately in the edition presented here. In general, the restorations follow those proposed by Lauinger and Batiuk.

Lauinger and Batiuk (ZA 105 [2015] pp. 66–67) suggest that the “most likely possibility seems to us to be that the report of Hamath's destruction is the main historical event described in the text.”

Frgm. D 1'–10') [...] He (Iaū-bi'di) [assembled ... at the

**Frgm. A** The fragment comes from the left side of the front of the stele and traces of eleven lines are preserved; however, “the inscription is so worn as to be illegible even if individual signs can be discerned here and there (e.g., EN [line 4], URU.aš-šur [line 7] and perhaps SIG<sub>5</sub> [line 9])” (Lauinger and Batiuk, ZA 105 [2015] p. 60). It is possible that the end of the preserved portion of line 4' has URU.MEŠ šá KUR DÙ-šú-nu, that the seventh line begins with x pa-da-a URU.aš-šur x.MEŠ (where the first indeterminate sign does not appear to be LA), and that the ninth line has ina na-ge-e after the tentative SIG<sub>5</sub>; however, we do not expect to find some of these words/phrases in the introductory section of the inscription where various deities are normally invoked and, as noted in the commentary, Fragment A comes from the beginning of the inscription. Compare for example text no. 103 i 1–28, text no. 116 lines 1–10, and text no. 117 i 1–19a.

**Frgm. B, Face i 1'–11'** For the restorations, cf. text no. 103 i 19–28 and text no. 116 lines 1–10.

**Frgm. B, Face i 10'** ša i-na e-<sup>r</sup>peš<sup>1</sup> [KA-šú-nu el-li] “by who[se holy command]”: Possibly translate instead “who in order to carry o[ut their holy command]” (cf. Novotny and Jeffers, RINAP 5/1 p. 231 no. 11 i 13).

**Frgm. C lines 2'–3'** The restorations are based on text no. 103 ii 18–21. The line breaks are conjectural and some of what is restored at the end of line 3' may have been on line 4'. For line 3' J. Lauinger and S. Batiuk (ZA 105 [2015] p. 65) read [... GN]<sup>ki</sup> māṭ(KUR) [GN ...], but the second sign appears to be DIN rather than KUR; compare the KUR in Frgm. D line 5' (see the photos on ibid. p. 59).

**Frgm. D** The exact amount of space missing at the beginnings and ends of the lines is uncertain, as are the line breaks in the restorations.

Frgm. B iv 1'-6') [(As for) the one who alters my good] deeds [(or) erases my] inscribed [name, may the] great [gods] — as ma[ny ... as] are ment[ioned by name] on [this] stel[e — curse him and make his] name [(and) his descendant(s) disappear from the land]

Lacuna

**Frgm. D lines 2'-9'** For the restorations, cf. in particular text no. 81 lines 8-20 and text no. 89 lines 19-26; see also Frahm, Last Days pp. 63-64. Possibly restore *a-na i-di-šú ú-ter-ra*, "he brought to his side" at the end of line 4' (also Frahm, *ibid.* p. 64). E. Frahm (*ibid.* pp. 63-64) tentatively reads [*mārē aššur ša ina qé*].<sup>r</sup>reb<sup>1</sup> at the beginning of line 5', [... *bašū ki ištēn*] at the end of line 5', and [*iddūk qātī aš-ši*].<sup>r</sup>ma<sup>1</sup> at the beginning of line 6', thus "[He killed the citizens of Assyria who were i]n the land Hamath ... [... altogether. I raised my hands a]nd" (Frahm's translation slightly modified), and this would make good sense, but must remain uncertain. He also tentatively suggests restoring EN *ḥi-it-ti* in line 9' before *aḏūk* based on text no. 7 line 35, thus "I killed [the criminal(s)]" (*ibid.* p. 64).

**Frgm. D line 7'** <sup>r</sup>sa<sup>1</sup>-kap, "overthrow": The reading of the signs as *sa-kap* is certain even although the first sign is slightly damaged with only two (instead of three) vertical wedges being clear and the second sign has one more angled wedge head than is expected.

**Frgm. E lines 2'-4'** The passage deals with the settling of 6,300 Assyrian criminals in Hamath. The restoration is based on text no. 105 ii' 8-12 and assumes that the beginning of the following line began with *e-mid-su-nu-ti*. As noted by J. Lauinger and S. Batiuk (ZA 105 [2015] p. 65), in view of Fragment D line 5', we should perhaps restore KUR.a-ma-te in line 2', rather than KUR.ḥa-mat-ti.

**Frgm. B Face iv 1'-6'** For the restorations, cf. text no. 103 iv 63-68 and text no. 106 iii 14'-15'. We would expect SIG<sub>5</sub>.MEŠ rather than just SIG<sub>5</sub>, but there does not appear to be room to allow this. The translation assumes that the following line had *i-na KUR li-ḥal-li-qu*, following text no. 103 iv 69.

## 109

Three fragmentary prismatic clay cylinders with an inscription of Sargon were found in 2015 during excavations at Carchemish by a Turkish-Italian expedition led by N. Marchetti. The text describes the conquest of Carchemish, the settlement of Assyrians there, the building activities carried out there by Sargon, and the expansion of irrigation in the area of that city. According to text no. 73, after Sargon's conquest of Carchemish in his fifth regnal year (717), booty taken from Pisiri(s), the king of Carchemish, was sent to Kalḫu and stored in the juniper palace there. A short colophon on the right end of ex. 1 states that the piece came from (or belonged to) the "Palace of Sargo[n]." Information on the text was kindly provided to the author by G. Marchesi before its recent publication in JNES.

## CATALOGUE

Ex.	Excavation Number	Provenance	Dimensions (cm)	Lines Preserved	cpn
1	KH.15.O.221	Carchemish; palace complex, in layer of fill (F.5859), in a well (P.5345) cut into bedrock	8.8×13.2×3.9	5'-38'; colophon 1-2	p
2	KH.15.O.300	Carchemish; palace complex, near the well (P.5345), embedded in a floor of beaten earth (L.5896) that dated to the Neo-Babylonian phase of the complex	4×5×2.6	1'-13'	p
3	KH.15.O.355	Carchemish; palace complex, in a layer of fill (F.6309), in a well (P.5345) cut into bedrock	3.8×5.3×2.7	14'-20', 29'-44'	p

## COMMENTARY

The three fragments are preserved in the Gaziantep Archaeological Museum. Ex. 1 originally had a diameter of ca. 8.5 cm and 12 faces. Each of the preserved faces has six lines and thus the text would have likely had 67-72 lines (with the final face having at least one line). Marchesi suggests that the lines on ex. 1 were at least as long as those on the Khorsabad cylinder Nap. III 3156 (text no. 43 ex. 1) and that "the longest lines of text preserved [on KH 15.O.221] are only preserved for about two-thirds of their original length" (JNES 78 [2019] p. 7).

Marchesi (JNES 78 [2019] pp. 11 and 18) argues that the apparent reference in line 13' to people of Carchemish being deported to some place on the border of the land Kammanu almost certainly refers to a location in the state of Bit-Purutaš, which was conquered by Sargon in 713. He thus states that this inscription must have been composed after that date. He further notes that the description of the war with Carchemish in this text is more similar to that in the Khorsabad Annals (text no. 1 lines 72-76a and text

no. 4 lines 13'-18'a), which he dates to 707, than to that in A 16947 (text no. 102), which he dates to 711, and so he suggests that the Carchemish cylinder inscription is likely to date closer to the time of the former than that of the latter (*ibid.* pp. 11 and 21-23).

The description of the construction work at Carchemish, the planting of trees in its environs, and the celebrations following the completion of the work are often similar to passages in other texts of Sargon dealing with the city Dūr-Šarrukīn (see also Marchesi, JNES 78 [2019] pp. 11-17).

The restorations follow those proposed by Marchesi, with only a few minor modifications. The master lines are based on ex. 1 for lines 10'-32', ex. 2 for lines 1'-5', and ex. 3 for lines 38'-44'. Lines 6'-9' are a combination of exs. 1 and 2 and lines 33'-37' are a combination of exs. 1 and 3. The published photos are occasionally not completely clear and as a result the edition must rely at times on that of Marchesi.

1'-2' For the restorations, see text no. 43 lines 30–31.

3'-4'a For the restorations, see text no. 7 line 13.

4'b-8' The restorations are based on text no. 1 lines 72–76 and text no. 4 lines 13'–18'.

10' The exact meaning of the passage is not clear. G. Marchesi translates it as “[... (people of Karkemish)] I brought down [from the cen]ter of the city and made (them) occupy its rear part” and takes it to refer to “a forced relocation of the inhabitants of Karkemish to the Outer Town. The Citadel and the Inner Town were presumably reserved for the newly settled-Assyrians,” although noting that “[n]o other example of this kind of displacement of people from one area of a city to another is known” (JNES 78 [2019] pp. 5 and 17–18).

11' [su<sup>2</sup>]-<sup>r</sup>un<sup>1</sup>-na-bu “[a (military) co]ntingent”: The tentative restoration and understanding of this word, which would be a hapax legomenon, follows Marchesi, JNES 78 (2019) p. 18.

cedar, cypress, (and) juniper, and I made the smell of  
the city sweeter than the smell of a cedar forest. [...] the  
grapevine(s) and aromatic plants grew high and the people  
inside it (Carchemish) continually receive *an invitation to*  
*well-being*. Their faces are (thus) radi-  
ant (with joy). [...] I opened up the meadows [in order  
to ...] and to increase the (number of) offspring of the  
herds of cattle and sheep (and) goats, and I provided  
fresh water for irrigation. [...] they had [the p]eople in-  
side it dwell (as safely) as in a meadow; their orchards  
are covered all over with fruit and its meadowland(s)  
flourished.
- 31'-34') [...] I invited [...], my lords, (and) the deities

15' G. Marchesi (JNES 78 [2019] pp. 11 and 19) suggests that the passage may refer to various peoples and places sending tribute to Sargon.

19' Cf. text no. 8 line 36.

20' The exact meaning of the line and the word *ḫi-bi-ib* in particular are uncertain. The tentative translation is based on that proposed by G. Marchesi (JNES 78 [2019] pp. 5 and 19). He takes *ḫibību* as the Assyrian form of *ḫabību* (following a suggestion of W.R. Mayer) and suggests that the person speaking may be Sargon or some deity. With regard to the understanding of *ḫi-bi-ib*, note the appearance of the verb *ḫabābu* in line 23' (*ušaḫbiba*).

21' The tentative restoration follows Marchesi, JNES 79 (2019) pp. 4 and 19 and is based on text no. 74 vii 66.

22' The tentative restoration follows Marchesi, JNES 79 (2019) pp. 4 and 19 and is based on text no. 43 line 34 and text no. 65 line 68.

23' As noted by G. Marchesi (JNES 79 [2019] p. 20), both *giṭpušu* (presumably at Gt form of *qapāšu*) and *nadi'ūti* (presumably for *nadūti*, from the adjective *nadū*) would be hapax legomena.

24' See Mayer, *Orientalia* NS 86 (2017) p. 13 and cf. text no. 43 line 40.

27' For the restoration, see Grayson and Novotny, RINAP 3/1 Sennacherib text no. 17 viii 20.

28' *qur-ru* “an invitation to”: See Mayer, *Orientalia* NS 86 (2017) p. 32.

31'-32' Cf. text no. 73 lines 19-20. *Karḫuḫa* and *Kubāba* are the city god and goddess of Carchemish respectively.

## 110

A brief proprietary inscription of Sargon II is found inscribed on several bricks from Carchemish and one from the nearby site of Tell Amarna (about 8 km south of Jerablus). The conquest and plunder of Carchemish in Sargon’s fifth regnal year (717) and the deportation of its royal family is mentioned in several of Sargon’s royal inscriptions (see especially text no. 1 lines 72–76, text no. 73 lines 21–22, text no. 74 iv 13–24, text no. 102, and text no. 117 ii 20–22a). See text no. 1010 for a stone fragment from Carchemish with an inscription possibly to be assigned to this ruler.

## COMMENTARY

Exs. 1–2 come from the excavations of P. Henderson at Carchemish in 1879. According to C.B.F. Walker, BM 90702 is part of a half brick and is stamped on the face and along the side (stamp 6.2×7.0 cm). The edition for these exemplars follows that of Walker and has not been collated. Ex. 3 is a fragment of a baked brick and was found in a pit (i.e., out of its original context) on May 7, 1996. Ö. Tunca suggests that it may have been taken from Carchemish after the Neo-Assyrian period for reuse during the Hellenistic or Roman-Byzantine period (Bagh. Mitt. 37 [2006] pp. 180–181). G. Marchesi kindly provided information (including transliterations) on exs. 4–11 and photos of exs. 6, 7, and 10; these unpublished exemplars from Carchemish are cited here through the courtesy of N. Marchetti, director of the Turco-Italian Archaeological Expedition to Karkemish.

According to L. Woolley and R.D. Barnett (Carchemish 3 pp. 211 and 265), a brick was found at Carchemish with an inscription saying “Palace of Sargon King of Nations, King of Assyria” (see *ibid.* p. 171 for possibly a different brick). Barnett also refers to a brick being found on the surface by Boscauwen with a similar inscription (*ibid.* p. 265). According to Walker (CBI p. 119), “A typescript report entitled

‘Report on the excavations at Carchemish 1911’ by R.C. Thompson and T.E. Lawrence (now preserved in the Department of Western Asiatic Antiquities, British Museum) refers (p. 51) to the discovery of ‘an Assyrian brick inscribed in cuneiform ‘Palace of Sargon, king of multitudes, king of Assyria’; and one of the field note-books of the Carchemish excavations has a note in Thompson’s hand, ‘Assyrian inscribed brick of Sargon 350 × 165 × 120 high. Another found near it 350 × 165 × 110’. The field note-books do not contain any copy, transliteration, or translation of these bricks.” The current locations of these bricks are not known and it is not clear whether or not they had a different inscription to the one presented here, although the translation in Woolley and Barnett, Carchemish 3 pp. 211 and 265 would suggest KUR.MEŠ or KUR.KUR (*mātāti*, “lands”) instead of ŠÚ (*kiššati*, “world”) in line 2. The translation “multitudes” for ŠÚ is, however, attested in various other publications of the time (e.g., Thompson, Arch. 79 [1929] p. 124 and pl. XLV no. 70 line 1).

No minor variants are attested for this inscription and, as is the practice in RINAP, no score for this brick inscription is given on Oracc.

## 111-114

Four fragments of clay barrel cylinders bearing inscriptions of Sargon II were either certainly or likely found at Arslantepe (ancient Melid), near modern Malatya: text nos. 111-114. Text nos. 111 and 113-114 must come from different cylinders and it is clear that the inscription on text no. 111 is different to those on text nos. 113 and 114. It is possible that text nos. 113 and 114 are both duplicates of the same inscription, but since the line arrangement would differ in at least two places — text no. 113 lines 13'-17' and 18'-22' are each on five lines, rather than on four lines as on text no. 114 (lines 2'-5' and 6'-9' respectively) — and since only a little of text no. 114 is preserved, it has been thought best to keep them all separate here. Text nos. 111 and 112 were once physically joined together, but that was a false join since their inscriptions clearly deal with different topics where they were attached. It is not impossible, however, that the two fragments came from the same cylinder, but since this cannot be considered certain, they have also been kept separate here.

During the 1938 season of excavations at Arslantepe, L. Delaporte found two cylinder fragments with inscriptions of this ruler under the pavement of the Assyrian palace. The pieces were sent to the Ankara museum, but their inscriptions were not published at the time, although they were said to agree exactly with the text of Sargon's Annals (Landsberger, *Sam'al* p. 81 n. 213). It seems probable that one of these pieces was text no. 112 since at least part of the inscription on that piece does appear to duplicate part of Sargon's Annals. The other was likely text no. 111 or text no. 114, even though these are not duplicates of the Annals. Records in the Ankara Museum state that text no. 111 (AnAr 21717/323) was found at Arslantepe. While the provenance of text no. 114 (AnAr 21718/324) is not noted in the museum inventory, the piece is numbered and listed immediately following text no. 111; thus, it is quite possible that it also came from Arslantepe. (See Frame, *Studies Parpola* pp. 65-66; and Akdoğan and Fuchs, *ZA* 99 [2009] p. 85.) Since text nos. 111 and 112 were once physically joined together — albeit erroneously — it is not impossible that they were considered by B. Landsberger to be one piece and that his two cylinder fragments were text nos. 111+112 and text no. 114; however, in view of Landsberger's great expertise with cuneiform texts, it would seem unlikely that he would have accepted the join of text nos. 111 and 112. Text no. 113 was found at Arslantepe during excavations in 1968.

Sargon's conquest of and relations with Melid are mentioned in several other inscriptions of his (e.g., text no. 1 lines 204-210, text no. 2 lines 236-238 and 443, text no. 7 lines 78-80, text no. 8 lines 9-10 and 22, text no. 13 lines 24-26, and text no. 74 v 41-76). For an overview of this ruler's involvement with Melid, see Frame, *Studies Parpola* pp. 66-68.

---

**110 line 1** <sup>m</sup>MAN: Ö. Tunca's edition of ex. 3 has simply MAN, while his copy shows the heads of two vertical wedges. As noted by G. Marchesi (private communication), the published photo of ex. 3 would suggest <sup>m</sup>fMAN<sup>1</sup>.

# 111

The first cylinder fragment from Arslantepe is part of the right end of a clay barrel cylinder. Its inscription mentions the creation/building of sacred objects/temples at Nineveh and Kalḫu (lines 5–10), the building of the city Dūr-Šarrukīn (lines 11–14), military campaigns to the east and northeast and the deportation of people from there to the west and northwest (lines 15–33), and, after a long gap, the end of an account describing the defeat of Marduk-apla-iddina II (lines 1'–9') and possibly the annexation of an area to Assyria (lines 10'–12'). Line 10 of the inscription refers to the ruler's fourteenth year (708), but the text should have been composed no earlier than his fifteenth year (707) because it refers to the installation of the gods of Dūr-Šarrukīn in their shrines (line 12), which took place in the eponymy of Ša-Aššur-dubbu (707).

## CATALOGUE

Museum Number	Provenance	Dimensions (cm)	cpn
Malatya Archaeological Museum 1997	Arslantepe	10.8×9.5	(c)

## COMMENTARY

The cylinder fragment was transferred to the Malatya Archaeological Museum in 1970 from the Museum of Anatolian Civilizations in Ankara, where it had the inventory number 21717/323. The inventory in Ankara states that the piece was found at Arslantepe. (See Akdoğan and Fuchs, *ZA* 99 [2009] p. 84, and Frame, *Studies Parpola* p. 68.)

Parts of forty-seven lines are preserved, thirty-three from the beginning of the inscription and fourteen from the end of the inscription. The original inscription would have been over twice as long and each line would have been about five times as long as is currently preserved. The original has

not been examined and the edition is based on the examination of a cast of the fragment that was kindly supplied by M. Frangipane and photographs of the original that were kindly made available by J. Renger.

Lines 1–4 are restored based upon text no. 103 ii 1–12 and 18–21; cf. text no. 74 i 1–11 and text no. 7 lines 1–7. Lines 10b–14 are restored based upon text no. 84 lines 7'a–11'; cf. also text no. 7 lines 154–156 and 158–159 and text no. 13 lines 94–101. Lines 1'–9' are restored based upon such passages as text no. 74 vi 27–62 and text no. 86 lines 2'–9'. For lines 1'–9', see also text no. 113 lines 9'–17' and for lines 4'–9' see also text no. 114 lines 1'–5'.

## 112

In 2017, J. Renger kindly sent the author some photos of various royal inscriptions of Sargon II that were in his possession and that had been used by him during his work on Sargon's royal inscriptions. Among them were photos of two fragments of a clay barrel cylinder that had been joined together. He had received the photos, which had been taken by A. Palmieri in the Malatya Archaeological Museum, from A. Archi around 1974. The larger of the two fragments has been edited here as text no. 111 and likely comes from L. Delaporte's excavations at Arslantepe in 1938. That fragment was once in the Archaeological Museum in Ankara, but was moved to the Malatya Museum in 1970. While the other fragment also preserves a text of Sargon II, a study of the inscriptions on the two pieces clearly shows that the two pieces do not join where they were fixed on the photo. This false join must have been recognized at some point since the two pieces are no longer attached. The current museum number of the smaller piece is not known to the author and recent searches for it in the museum have not located it. Since both pieces are only fragments, it is not impossible that the two come from the same cylinder, although based on what is known of the two pieces, it does not appear that they preserve parts of the same line at any point. The smaller piece is edited here, but it must be noted that due to the fragmentary state of the piece, the photos are not always clear, that the beginning and end of the text are for the most part illegible, and that the edition presented must be considered only preliminary. Unlike the inscriptions on the other cylinder fragments from Malatya, the text on this piece, for the most part, duplicates sections from Sargon's Annals dealing with Ambaris of Tabal/Bit-Purutaš during Sargon's ninth campaign (713).

111 line 11' Possibly [... a/i]-ṛ<sup>na</sup> at the beginning of the line.

111 lines 13'–14' [*i-še-mu-u*<sup>2</sup>]: Or [*i-šem-mé*], in which case only Marduk would be subject of the verb. There does not appear to be sufficient room to restore *i-še-mu-ú* at the end of line 13', but we would expect a form in the plural in view of the plural *ir-šu-šu* in line 14'.

## COMMENTARY

As noted earlier (introduction to text nos. 111–114), B. Landsberger (Sam'al p. 81 n. 213) stated that two cylinder fragments found by L. Delaporte at Arslantepe in 1938 and located at that time in the Ankara museum agreed exactly with the text of Sargon's Annals. However, none of the cylinder fragments previously thought to come from Malatya duplicate passages from the Annals, although they might at times deal with similar topics. The present piece, however, as far as one can tell, does agree for the most part with the text of the Annals from Room II (text no. 1). This would suggest that the current piece and possibly the fragment to which it was once (erroneously) joined (text no. 111) were one or both of the pieces that Landsberger saw.

On the photos of this fragment and text no. 111,

line 11' of text no. 111 (which deals with the founding of the city Dūr-Šarrukīn) was joined as a continuation of line 8' of the present fragment (which deals with the appointment of governors over the land Bīt-Purutaš, following the defeat of its ruler Ambaris). Lines 5'–11' of the present fragment may be compared to, and restored from, text no. 1 lines 198, 200, 202, 204, 125–126, 207, and 208 respectively (cf. text no. 2 lines 230, 232, and 235). Note that line 9' matches parts of lines 125–126 of text no. 1, which come from the report of the Annals seventh campaign, unlike the remainder of the text which comes from the report of the ninth campaign. Since it is not clear how much is missing at the beginning and end of each line, restorations have been kept to a minimum in the transliteration.

## 113

Lines 1'-5' of this fragment from the left side of a clay barrel cylinder found at Arslantepe in 1968 and currently stored in the Malatya Archaeological Museum describe the episode of Iāmānī of Ashdod and lines 6'-27' summarize Sargon's campaigns against Marduk-apla-iddina II (Merodach-Baladan) (710-709), and in particular the capture of the latter's stronghold Dūr-Yakīn, which took place in Sargon's thirteenth regnal year (709). The inscription duplicates parts of the Nimrud prism (text no. 74) and two cylinder fragments from Niniveh (text nos. 86-87), as well as parts of two other cylinders from Arslantepe (text nos. 111 and 114).

### CATALOGUE

Museum Number	Provenance	Dimensions (cm)	cpn
Malatya Archaeological Museum 855 (registration date 14.IX.1968)	Arslantepe, north of the mound	8.7×7.0×3.3	(c)

### COMMENTARY

The inscription was collated from a cast of the piece kindly loaned to the author by M. Frangipane in January 2004.

The mention of the king of Meluḥḥa and the fear of the brilliance of the gods Aššur, Nabû, and Marduk (line 4') suggests that lines 1'-5' describe the incident of Iāmānī, who usurped the throne of Ashdod, fled at the approach of Sargon's forces, took refuge in Meluḥḥa, and was later handed over to Assyria by the king of Meluḥḥa out of fear of the

power of those three gods and of the Assyrian king (see text no. 7 lines 95-112 and text no. 8 lines 11-14).

For restorations in lines 6'-23', see for example text no. 1 lines 404-408, text no. 2 lines 375-383, text no. 7 lines 126-129, 134-137, and 140-142; text no. 74 vi 14-80; text no. 86 lines 1'-18'; and text no. 87 lines 3'-14'. For lines 9'-17', see also text no. 111 lines 1'-9', and for lines 12'-27', see also text no. 114 lines 1'-13'.

## 114

This clay barrel cylinder fragment in the Museum of Anatolian Civilizations (Ankara) was likely found by L. Delaporte at Arslantepe in 1938 (see the introduction to text nos. 111-114). The inscription preserves the end of an account describing the capture of Marduk-apla-iddina II's tribal stronghold of Dūr-Yakīn in Sargon's thirteenth regnal year (709) and the reorganization of the administration of Bīt-Yakīn (lines 1'-11'), as well the beginning of an account recording Sargon's triumphal entry into Babylon in the preceding year (lines 12'-13'). The inscription is similar to passages in several other texts, including the Khorsabad Display Inscription and the Nimrud Prism (text nos. 7 and 74), as well as in two other Malatya texts (text nos. 111 and 113).

### CATALOGUE

AnAr 21718/324	Probably Arslantepe	7.4×3.0×3.0	(p)

### COMMENTARY

The provenance of the piece is not recorded in the museum inventory, but the immediately preceding piece (see text no. 111) is stated to come from Arslantepe (Malatya). The inscription is written in Neo-Assyrian script and, according to R. Akdoğan and A. Fuchs, in no place is more than at most one third of a line preserved (ZA 99 [2009] p. 83). Although the published photograph has been examined, the transliteration basically follows that of Akdoğan and Fuchs (ZA 99 [2009] p. 82).

Since it is not known where the line breaks would

have occurred in the text, only minimal restorations are given in the transliteration even though the translation is restored in full. For the restorations in lines 1'-5', see in particular text no. 111 lines 4'-9', and for the restorations in lines 1'-13', see text no. 113 lines 12'-26'. For line 1', see also text no. 74 vi 39-42; cf. text no. 7 line 129. For lines 2'-5', cf. text no. 74 vi 43-62. For lines 6'-9', cf. text no. 7 lines 134-137 and text no. 74 vi 63-79. For 10'-11', cf. text no. 7 lines 137-140 and text no. 74 vi 80-85. For lines 12'-13', see text no. 7 lines 140-142.

## 115

In 2015, a workman gave a fragment of the front side of a stone stele to a group of Iranian archaeologists excavating at Qal'eh-i Imam, near Lake Zeribor, under the direction of Dr. Hassan Karimian. The poorly preserved inscription can probably be assigned to Sargon II and likely deals with his military actions in the Zagros Mountains. Information on the piece was kindly supplied to the author by K. Radner and M. Masoumian before their publication of the text.

### CATALOGUE

Museum Number	Provenance	Dimensions (cm)	cpn
Archaeological Museum of Sanadaj	Qal'eh-i Imam, drystone wall	30×22×12.5	p

### COMMENTARY

The greenschist fragment was found in secondary context, within a drystone wall of the village Barqaleh located at Qal'eh-i Imam. It is conserved in the Archaeological Museum of Sanadaj. As noted by Radner and Masoumian, the inscription is likely to be assigned to Sargon II because of the use of a (partially preserved) phrase in line 4' that is otherwise only attested in the inscriptions of this ruler: *ardu kanše/kanšu šādīd nīriya/nīr aššur (bēliya)*; see text no. 7 lines 36, 70, and 117, text no. 74 iii 43, and text no. 82 v 61'. In the latter texts, the phrase is regularly used to describe Daltâ of the land Ellipi, who

appears already in the time of Tiglath-pileser III and who likely died in 708 or 707, although it is used once (text no. 7 line 36) for the Mannean ruler Iranzi, who is mentioned in the Khorsabad Annals in connection with Sargon's third campaign (719). In addition, the city Ḥarḥar, which is mentioned in line 5', appears frequently in inscriptions of Sargon II, although most often with the determinative URU rather than KUR. Sargon renamed the city Kār-Šarrukīn and made it the capital of a new province during his campaign of 716 (see, for example, text no. 1 lines 96b-100).

## 116

The Tang-i Var rock relief (or Urāmānāt relief) is carved on the flanks of the Kūh-i Zīnānah in the Tang-i Var pass in Iranian Kurdistan, about 50 km southwest of Sanandaj and 85 km northwest of Kermanshah. The relief is found in a niche cut into the cliff face about 40 m above ground level and depicts an Assyrian ruler in a standard pose. A badly worn cuneiform inscription runs across the relief. The inscription records a campaign to the land of Karalla (lines 37–44) and also refers to Sargon's defeat of the Babylonian ruler Marduk-apla-iddina II (Merodach-Baladan) which occurred in 710–709. Since the Assyrian Eponym Chronicle mentions Karalla (albeit in damaged context) in its entry for 706 (see Millard, SAAS 2 p. 48 B4 rev. 21' and p. 60), it is likely that there was a campaign to Karalla in that year, and that the relief and inscription of Sargon at Tang-i Var were made during or shortly after that campaign. This is the only known account of the campaign in Sargon's sixteenth regnal year, a campaign that was not led by the Assyrian king. It was the third time that the Assyrians had had to campaign in Karalla, the two previous campaigns taking place in the king's sixth and ninth regnal years (716 and 713 respectively). The inscription provides a useful chronological link with Egypt's twenty-fifth dynasty since it states that the ruler who sent the fugitive lāmānī of Ashdod back to Sargon was Šapataku' (Shebitko). Šapataku' is called the king of the land Meluḥḥa (i.e., Nubia) in line 20 of this text.

**115 line 4'** The restoration is based on text no. 7 lines 36 and 117, and text no. 74 iii 43. Possibly instead <sup>r</sup>ša-di<sup>1</sup>-[id ni-ir <sup>d</sup>aš-šur ...], "who pul[led the yoke of the god Aššur]" (following text no. 7 line 70) or <sup>r</sup>ša-di<sup>1</sup>-[id ni-ir <sup>d</sup>a-šur<sub>4</sub> be-lf-ia ...], "who pul[led the yoke of the god Aššur, my lord, ...]" (following text no. 82 v 61').

**115 line 5'** The tentative restoration is that proposed by Radner and Masoumian, who also suggest as an alternate reading [... i-na lib]-<sup>r</sup>bi<sup>1</sup> KUR.ḥar-<sup>r</sup>ḥar<sup>1</sup> [...], "[... insid]e the land Ḥarḥ[ar ...]."

## CATALOGUE

Source	Provenance	Dimensions (cm)	cpn
Frame, <i>Orientalia</i> NS 68 pp. 31–57 and pls. I–XVIII	Kūh-i Zīnānah, in the Tang-i Var pass	—	p

## COMMENTARY

The inscription was originally edited by the author from photographic materials of the original made by F. Vallat in 1971 (Frame, *Orientalia* NS 68 [1999] pp. 31–57 and pls. I–XVIII). Subsequently, through the intermediary actions of H. Arfaei and W. Nahm, A.A. Sarfarāz kindly provided the author with photographs of the squeezes made by him at the site in the late 1960s. In 2009, Z. Deylamipout of the Ingenieurbüro Gilan (Berlin) made laser scans of the relief for the Iranian Cultural Heritage and Tourism Organization and graciously gave the author copies of these important materials for use in revising the edition of the inscription for this volume.

The inscription is badly damaged and some sections are inevitably better represented on the photographic materials, squeezes, and laser scans than other sections. Parts of the text cannot be read and the reading of other parts is problematic. In particular the first section of the inscription (invocations of various deities [lines 1–10]) and the last three sections of the inscription (description of the campaign to Karalla [lines 37–44], description of the creation of the monument [lines 45–1'], and concluding formulae [lines 2'–6']) are the least legible; the second section (name and titles of Sargon II [lines 11–12]) and third section (description of the major accomplishments of Sargon II [lines 13–36]) are the most legible.

The relief depicts the Assyrian king facing right, with his right hand raised and his left hand holding an object (likely a mace or scepter). Symbols of various deities are depicted at the top of the relief, in front of the king's face. The only symbol that is clearly visible is a series of circles that represent the Pleiades, the divine Seven (Sebetti), although there

also appears to be traces of a winged disk, the symbol of the god Šamaš, and possibly of the symbols of Marduk (spade) and Nabû (tablet and stylus).

For photographs of the relief and a fuller study of the inscription, including a discussion of its date and of the image depicted on the relief, see Frame, *Orientalia* NS 68 (1999) pp. 31–57 and pls. I–XVIII.

Lines 1–10 are likely to have had some passages similar to ones found in text no. 103 i 1–28, text no. 108 Fragment B i 1'–11', text no. 117 i 1–18, and Grayson, *RIMA* 2 pp. 12–13 A.0.87.1 i 1–18 and pp. 32–33 A.0.87.2 lines 1–8.

For passages similar to lines 13–15, see in particular text no. 8 lines 2–3 and 5 and text no. 103 ii 5–12 and 18–21.

For a passage similar to lines 16–18, see in particular text no. 8 lines 7–10 and note such texts as text no. 13 lines 14–27.

For Sargon's dealings with Ashdod (lines 19–21), see in particular text no. 1 lines 249–262, text no. 3 lines 10'–13', text no. 7 lines 90–112, text no. 8 lines 11–14, text no. 82 vii 13'–16' and 1''–48'', and text no. 83 ii' 1–11.

For lines 22–24, see in particular text no. 8 lines 16–18 and note such texts as text no. 13 lines 35–45.

For lines 25–27, see in particular text no. 7 lines 121–122 and 144–45, text no. 8 lines 18–21, and text no. 13 lines 45–58; note also such texts as text no. 9 lines 30–36.

Lines 28–36 are basically duplicated by text no. 7 lines 16–23 (with the only major divergence being for line 33) and text no. 13 lines 59–89 (except that Sargon is treated in the first person, rather than the third person). Note also such texts as text no. 10 lines 5–23.

- 1–8) The god Aššur, the great lord, king of a[ll the] Igīgū gods [and Anunnakū gods ...] ... [...; the god *Mardu*k, lord of all, who provides [all] people with food (and) revives the dying [...; the god Nabû], perfect heir, ... lands [...; (5) the god S]în, lord of heaven and netherworld [...; the god Šamaš], great judge of heaven and netherworld [...; the goddess [Iš]tar, who makes (men) ready for battle [...; the Sebetti, who go before the gods, [stand] at the side of the king, [their favorite], in the place of battle, and bring about (his) victory;
- 9–10) Great gods, managers of heaven and [netherworld], whose attack means [con]flict and [st]rife, who appoint (rulers) (lit.: “raise the eyes”) (and) name king(s), (and) [by who]se holy command they pla[ce] (one) land [(...)] over (another) land [and] make (its ruler) greater [(than other rulers):
- 11–12) Sargon (II), great king, strong king, king of the world, king of Assyria, governor of Babylon, king of the land [of Sumer and Ak]kad, favorite of the great gods, perfect hero, ... man, pious [prince], admirable man, ... shepherd ...
- 13) The gods Aššur, Nabû, (and) Marduk, the gods, [(my)] helpers, granted [me] a reign [without] equal and exalted my good reputation to the heights.
- 14–15) I co[n]tinually ac]ted [as pro]vi[der] for (the cities) Sippar, Ni[ppur], (and) Babylon, (and) I made restitution for the wrongful damage suffered by the

3 The translation “who revives the dying” assumes a reading *mu-bal-liṭ mi-(i)-ti* or *mu-bal-liṭ (LÚ).ÚŠ*.

10 See the note to text no. 108 Fragment B, Face i 10'. We expect *ú-šar-bu-ú UGU mal-ki* at the end of the line; see text no. 103 line 28.

12 One might expect *dan-nu* after *zikaru* based on such passages as text nos. 9 line 11, 43 line 7, and 44 lines 15–16; however, all the cases of *zikaru dannu* in the inscriptions of Sargon are followed by *ḥālip/lābiš namurrati/namurrate*, “who is clad/clothed in awesome splendor.”

people [of privileged status], as many as there were (of them); I re[sto]red the exemption (from obligations) of (the city) Bal[til (Aššur) that had been l]apsed. (With regard to) the city Ḥarrān, for future days ... I set up a kidinnu-symbol (indicating their privileged status) in the gat[e of the pe]ople.

16–18) I dispersed the forces of Ḥumbanigaš (Ḥumbanikaš I), the Elamite. I destroyed the land K[aral]la, the land Šurda, the city Ki[šes]im, the city Ḥarḥar, [the land Me]dia, (and) the land Ellipi. I laid waste to the land Urartu, plundered the city [Mušaš]ir (and) the land Mannea, slaughtered the lands Andia [(and) Zikirtu, (and)] allowed [(...) a]ll [th]eir settlements to dwell .... I struck down the rulers of the land Hamath, the city Carche[mish, the city Kumm]uḥu, (and) the land Kammanu; over their lands [...] I se[t] officials.

19–21) I plundered the city Ashdod. Iāmānī, its king, took fright at my [weapon]s and abandoned his city. He fled to the border of the land Meluḥḥa and lived (there) stealthfully (lit.: “like a thief”). Šapataku’ (Shebitko), king of the land Meluḥḥa, heard of the mig[ht] of the gods Aššur, Nabû, (and) Marduk that I had esta[bl]ished over all lands, ... He put (Iāmānī) in handcuffs and manacles ... [...] he had him [brou]ght in bondage [in]to my presence.

22–24) [I deported (the people of)] all the lands Tabal, Kasku, (and) Ḥilakku; I took away settlements belonging to Mitâ (Midas), king of the land Musku, and reduced (the size of) his land. At the city Raphia I defeated the vanguard of the army of Egypt and counted as booty the king of the city Gaza who had not submitted to my [yo]ke. I subjugated seven kings of the land Yā’, a region of the [and] Yadnana (Cyprus) – whose abode is situated at a distance of ... [in the mid]dle of the Western Sea.

25–26) Moreover, My great hand defeated Marduk-apla-iddina (II) (Merodach-Baladan), king of Chaldea,

15 Possibly  $\text{KÁ.GAL}^{\text{r}1}\text{[te}^{\text{r}}\text{-ne-še-ti}^{\text{r}}\text{]}^{\text{r}}\text{?}$  For the second half of the line, compare *a-na u<sub>4</sub>-me ša-a-te ina KÁ-šú-nu az-qu-up ki-din-nu* (Leichty, RINAP 4 p. 124 no. 57 iii 13–15). Possibly *a-na*  $\text{d}^{\text{d}30}$ , “to/for the god Šin,” after URU.KASKAL?

16 Possibly  $\text{KUR}^{\text{r}1}.\text{ELAM}^2.\text{MA}^{\text{r}1}.\text{KI-i}^{\text{r}}$ . For the end of this line, text no. 8 lines 7–8 have ... *KUR.ma-da-a-a a-di pa-aṭ* [*KUR.bi-ik-ni*]<sup>r</sup>*KUR<sup>1</sup>.el-li-pi e-mi-du ni-ir*  $\text{d}^{\text{d}30}$ -šur.

19 Cf. text no. 8 lines 11–12.

20 Some scholars have questioned the presence of the masculine determinative at the beginning of the line. It can be seen clearly on the laser scans and on enlarged prints of some of photos published in *Orientalia NS 68* [1999] (in particular pl. IV), although it is just to the left and off the photo on pl. XI. For an attempt to find a different reading of the name and to dismiss the identification of the person here with the Nubian ruler Shebitko, in connection with a view to locating Meluḥḥa in Arabia and not in the Sudan, see Michaux-Colombot in Tavernier, *Topography and Toponymy* pp. 159–163.

22 Possibly a form of the verb *ekēmu* before *ušaḥḥir* (cf. text no. 7 lines 44 and 52).

24 We expect ... *ma-lak* 7 *u<sub>4</sub>-me i-na qa-bal* ... based on text no. 8 lines 17–18 (and other texts), but the traces after *ma-lak* do not seem to fit 7 *u<sub>4</sub>-me*. Possibly *ma-lak*  $\text{d}^{\text{d}30}$  [*KASKAL.GÍD i-na qa*]-bal ... (cf. text no. 7 line 144 and text no. 8 line 20).

who dwelt on the shore of the sea (and) who ex[er]cised  
kingship over Babylon against the wil[l] of the gods].  
Moreover, all the land Bīt-Yakīn ... [...] ...

27) Aḥundāra (Ḥundāru), king of Dilmun, who(se) lair  
[is situated] at a distance of ... leagues [in the middle] of  
the sea like that of a fish, heard of my [lord]ly mig[ht]  
and brought me [his] aud[ience gift].

28–36) With the power and might (granted me) by the  
great gods, my lords, [who mobilized up my weapons,  
I cut] down al[l] my fo[es]. I ruled all together from  
the land Yادنانا (Cyprus), which is in the middle of  
the [Western] Sea, [as far as the border(s) of Egypt  
[(and) the land M]usk[u, the wide land Amurru], the  
land Ḥ[atti (Syria) (in its entirety)], (30) all of the land  
Gutium, the distant Medes [(who live) on the border  
of Mount Bikni, the land El]lipi, (and) the land Rāši  
on the border [of the land Elam], those who (live)  
beside the Tigris River — the Ituʿu, Ru[buʿu, Ḥaṭal]lu,  
Labdudu, Ḥamrānu, Ubulu, [Ru]ʿuʿa, (and) Li[ʿtaʿu]  
(tribes) — those who (live) beside the Surappu (and)  
the Uqnū Rivers — the Gam[bulu], Ḥindaru, (and)  
Puqudu (tribes) — the Sutians, people of the steppe  
of the land Yadburu, as many as [there are], from  
the city Samʿuna as far as the cities Bubê (and) Tīl-  
Ḥumba, ... which are on the border of Elam, Karduniaš  
(Babylonia) from one end to the other (lit.: “above and  
below”), the lands Bīt-Amukāni, Bīt-Dakkūri, (...) Bīt-  
Šilāni, (and) Bīt-Saʿalli, (35) all of Chaldea, as much as  
there is (of it), (and) the land Bīt-Ya[k]īn, which is on  
the shore of the sea as far as the border of Dilmun.  
I s[e]t eunuchs of mine as provincial governors over  
them and I imposed the yoke of my lordship upon them.

37–44) At that time the people of the land Karalla  
... who had [not] submitted to pull (any ruler’s)  
chariot [pole] and did not know how to respect  
(any) authority, put their trust in the high mountains  
and (...) rose up against (...) a eunuch of mine, the  
governor [...] all the land NARbitu ... they established  
and prepared for battle. ... they became enraged like  
lions and cut down the people of their land. (40)

## 117

A badly damaged stele of dark grey limestone with a relief and inscription of Sargon II was found at the village Najafabad (less correctly Najafehabad) in the Assadabad valley about 15 kilometers to the northeast of the Kangavar valley in western Iran. The inscription describes events in Sargon's second through sixth regnal years (720–716), but the account of the campaign into the central Zagros region, in particular against the Medes, in his sixth regnal year (716) is the most detailed. The inscription on the stele appears to state that it was erected in the city of Kišesim (written URU.ki-<sup>r</sup>sa<sup>2</sup>-si<sup>1</sup>, ii 71). It is likely that the inscription on the stele was composed during, or shortly after, the campaign. This text has often been referred to as the Najafehabad Stele and the edition of this text is the result of collaborative work between G. Frame and A. Fuchs.

## COMMENTARY

The village of Najafabad is built on the slope of a mound and a local inhabitant claims to have found the stele while excavating a foundation for an addition to his house. Its existence was reported to L.D. Levine and T.C. Young, who were conducting a preliminary season of excavations at Godin Tepe in 1965. They examined the piece and informed the Iranian authorities of its existence. Levine argues that Najafabad was not the original site of the stele, and that it may have been moved there from one of the other mounds in the area, possibly Godin Tepe (Stelae p. 25).

The inscription begins on the lower portion of the front surface, initially just flanking the figure of the king, and then running across it. The right side of the stele appears never to have been inscribed. On the back of the stele, the lines run across the back and continue on across the left side. The inscription is poorly preserved; in particular column i (face) and the end of column ii (the parts of the lines found on the left side) are badly worn and/or damaged. The inscription appears to have been made by an inexperienced scribe since numerous signs are slightly abnormal in form or have fewer or more wedges than expected. For example, AR in ii 48 has

five vertical wedges instead of four and MU in ii 70 is AŠ+KUR not AŠ+ŠE. These abnormal sign forms have not normally been noted below.

Latex squeezes of the front, back, and a small part of the bottom of left side of the stele (ROM 965.274.1.1–4), as well as unpublished photographs of the back of the stele, are preserved in the Royal Ontario Museum; these have been collated by G. Frame. The squeezes had been made in the National Museum of Iran when the stele was moved there soon after it was seen by L.D. Levine and T.C. Young. While the stele is currently on display inside the National Museum of Iran in Tehran, it had unfortunately been on display in the open air for many years and thus the inscription has been badly weathered and is no longer as clear as when first found. Thus, although both Frame and A. Fuchs have examined the original stele in Tehran, the edition is for the most part based on Frame's examination of the squeezes in the Royal Ontario Museum. The signs on the left side (i.e., the ends of the lines beginning on the back of the stele) are frequently unclear on the relevant squeeze. Additional photos of the stele, including three of the left side, have been kindly provided by S. Razmjou and A.M. Arfaee of the National Museum of Iran.

Unfortunately, since it is very badly worn, most of the left side remains illegible. The edition of most of the left side has had to be based in large part upon the published copy. The approximate point at which the squeeze of the back (col. ii) ends is indicated in the copy by a bullet (•), but this must be taken as only a rough indication. The photographs of the left side suggest that there are traces of many more signs in lines 1–61 than are indicated in the edition, but they are so faint or unclear as to make it best to omit them. In sum, numerous uncertainties in the reading of the text remain.

On the front of the stele (col. i), the first eighteen lines are split in half by the figure of the ruler, while beginning with line 19, the lines run all the way across the stele. Before i 19 there are eighteen lines to the left of the figure, but only seventeen to the right of it. It is assumed in the edition below that line 16 appears only to the left of the column and was not carried over to the right side when the scribe realized that he was going to have trouble with the line alignment once he began to run the lines across the figure. None of line 16 is preserved, but its existence is clearly indicated by line rulings. Thus, what is given as the right side of i 2–16 on the published copy is the right side i 1–15 in the present edition.

The relief on the front of the stele depicts the king facing left, holding a mace in his left hand, and raising his right hand. Symbols of several deities are carved in front of the head of the king. Three of the symbols have been identified by Levine as being a crescent, a horned disk, and a winged sun disk (Levine, *Stelae* p. 27), with the first and third representing the moon god Šîn and the sun god Šamaš, who are also mentioned in i 7 and 9 of the text. The horned crown probably stands for the god Aššur, who is likely mentioned in one or both of i 1 and 4.

With regard to the restoration of i 1–14, see in particular text no. 103 i 1–23 and text no. 116 lines 1–8; for i 15–19a, see in particular, Grayson, *RIMA 2* p. 13 A.0.87.1 i 15–19 and p. 33 A.0.87.2 lines 7–8, text no. 103 i 24–28, and cf. text no. 116 lines 9–10; for i 19–23, see in particular text no. 43 lines 1–3 and

text no. 76 lines 1–2; for i 24–27, see in particular text no. 43 lines 4–5; and for i 29–32, see text no. 73 lines 3–5.

For a brief study of the extent of the campaign in 716 as described in this text, see Zadok, *NABU 2000* p. 9 no. 5. S. Alibaigi, I. Rezaei, and S.I. Beheshti (*ZA 107* [2017 pp. 261–273] discuss the finding of the stele (suggesting that it was likely erected originally at Najafabad) and the stele's stone (concluding that it is local limestone), and argue that the stele was erected in the land of Urattus, the last place mentioned in the course of the campaign (*KUR.ú-ra-ta-as*, ii 68). In a recent article, S. Alibaigi and J. MacGinnis (*ZOrA 11* [2018] pp. 198–211, especially p. 202) argue that the place the stele was erected, *URU.ki-ša-si* (ii 71), cannot refer to the city Kišesim since the episode dealing with that city is much earlier in the text and since there the place is written *URU.ki-še-si-im* (ii 39). They proceed to suggest that the place mentioned in ii 71 was instead the capital city of Urattus, the last place to which Sargon campaigned in the text, and that the land Urattus included Mount Alvand and the city located at Najafabad. However, it must be pointed out that the spelling of personal and place names is not always consistent in Neo-Assyrian royal inscriptions, that there is the well-attested š/s interchange in Assyrian texts (written /š/ standing for /s/ and written /s/ for /š/ — this text being written in Babylonian dialect but using Assyrian sign-forms), and that this particular text, as noted earlier, seems to have been written by an inexperienced scribe. Moreover, it is known from other texts that Sargon erected a stele/image/weapon in Kišesim during the campaign of 716 (text no. 1 lines 93–95, text no. 2 lines 86–87a [mostly restored], and text no. 82 iii 1'–21'; see also text no. 7 lines 59–60) and it would seem unwise to postulate another stele being erected during the same campaign in a different place with such a similar name. Finally, there is no particular reason that the stele had to be erected at the final place mentioned in the campaign report (or the one furthest from the Assyrian heartland) as opposed to being erected in perhaps the most important place captured and annexed during the campaign.

by them; who (re)-established [...] ... the god Enlil ... [... who abolished] corvée duty for (the city) Dēr ... who [gave relief to their people ...] the city Ḥarrān ... his people ... [...] ... to strike down [...] (i 30) who from the (first) day of his [reign] has had no rul[er] who could equal him [...] from ea]st to we[st ...] the subjects [of the god Enlil ...] ... [...] ... [...]

ii 1-3) Too poorly preserved to allow translation.

ii 4-13a) ... Iaū-bi'dī (Ilu-bi'dī) of the land Hamath ... [...] (ii 5) ... spears he abandoned [...] ... he assembled (his) troops and [transgressed against] the oath (sworn) by the great gods [...] he brought (them) to his side and put his trust in his (own) forces. [I mustered] the numer[ous] troops of (the god) Aššur [and ...] ... he/they rose up. Chariotry, cavalry, (and) horses in the city AB[...] ... their ... I dyed (both) the river (Orontes) (and) the dry land as red as red wool ... [...] (ii 10) ... with a mighty battering ram I smas[hed] his (city) wall like a pot [and ... the city Qarqar] I burned down [with] fire. I took him, together with his family (and) his fighting men, to my city Aššur. [I flayed the skin from him] in front of the (city) gate [...] ... I set eunuchs of mine as provincial governors over them. The [people of the] land Hamath [...] ...

ii 5 The passage is likely to be similar to text no. 81 line 7: [... na-áš GIŠ.ka]<sup>1</sup>ba<sup>1</sup>-bu GIŠ.az-<sup>1</sup>ma<sup>1</sup>-[ru]-ú ú-maš-šir-ma, “[..., shi]eld (and) spe[ar] [bearers], he abandoned [...] and.”

ii 6 Cf. text no. 81 line 9.

ii 7 The translation “he brought (them) to his side and” assumes a reading a-na i-di-šú ú-ter-ma; see text no. 89 line 20.

ii 8 Possibly gi-<sup>1</sup>ip-<sup>1</sup>šú<sup>2</sup>, “massed” (i.e., a massed body of troops). For URU AB x [...], E. Frahm (Last Days p. 65) suggests reading URU.ab-tam-[ma-ku ...] and identifying it with a city of Hamath that is mentioned in an inscription of Shalmaneser III (Grayson, RIMA 3 p. 76 A.0.102.16 line 75’).

ii 9 While one expects “with their blood,” “with the blood of their warriors,” or something similar, the traces do not seem to favor any obvious reading. “I dyed (both) the river (Orontes) (and) the dry land as red as red wool” or “I dyed the Nabalu River (ID.na-ba-lu) as red as red wool.”

ii 10 For the reading of middle of the line, see text no. 1 lines 63-64; for the tentative restoration “city Qarqar” at the end of the line, see text no. 7 line 35.

ii 11 ma-šak-šú<sup>2</sup> a-ku-uš<sup>2</sup>, “I flayed the skin from him.” The restoration is based on text no. 7 line 35; as noted by E. Frahm (Last Days p. 65), the a-ku-uš may be at the beginning of line 12. Otherwise, the passage may refer to the slaughtering of the enemy in front of the city gate (see text no. 65 line 302 and cf. ii 28).

- ii 13b–16) In my third regnal year, the cities Šundaḥul (and) Durdukkā, strong, w[alled] cities [...] disregarded (their) position as vassal to Iranzi, the Mannean, their lord, (and) held him in contempt [...] I took the lead (in front) of the troops of Aššur and I marched to the land Mannea in order to conquer those cities. [I inflicted] a ma[*lor*] defeat upon it [...] ... I caused to pour forth like hailstones. [I carried off as booty] the people, together with [their] property [...].
- ii 17–19) In my fourth regnal year, I marched to the land Tabal. I conquered the city Šinuḥtu, Kiakki's fortified city. That (individual), together with [his] fam[*ily*, ...] elephant hides, elephant ivory, ebony, boxwood, garments with multi-colored trim (and) linen garments, equipment, battle gear ... [...], their sheep and goats, herds of horses, (and) donkeys, I carried off as booty in countless numbers. [I received] tribute from the kings of the land of Tabal [...].
- ii 20–22a) In my fifth regnal year, I conquered the city Carchemish which is (located) on the bank of the Euphrates River. Piširi(s), its king, together with Šemtarru [...] (along) with the possessions of his palace, every valuable object, his royal treasure, I carried off as booty and brought to my city Aššur. I imposed upon the people of the city Car[chemish ... (the same) tribute (and) payment(s)] as if (it were part of) Assyria. [I presented] to the gods Aššur (and) Marduk, ... gods [...] the gold (and) silver that I had personally seized at the city Carchemish [...].
- ii 22b–25) [In my sixth regnal year], the wrath of Aššur was directed against [Ullusunū, the Mannean, (...)] (ordaining) the dissolution of the land Mannea, the destruction of (his) people, (and) the demolition of his (city) wall. [He (Ullusunū)] then [put his trust] in Rusâ

ii 12 The traces at the beginning of the line do not fit either *ú-še-rib* or *ú-še-šib*, which are often found before the statement about the appointment of new governors (e.g., text no. 1 line 98 and text no. 7 line 32). For a possible translation “a eunuch of mine as provincial governor” instead of “eunuchs of mine as provincial governors,” taking the sign sequence SAG.MEŠ as “a late echo of the dual-based Middle Assyrian term for eunuch, *ša-rēšēn*,” see Frahm, *Last Days* p. 66, who also compares the passage to text no. 84 line 20' and text no. 103 ii 63.

ii 13–16 Cf. text no. 1 lines 58–64.

ii 14 For the tentative reading *imišū*, “disregarded,” see text no. 65 lines 80 and 346 and text no. 7 line 73.

ii 15 ṣaš<sup>1</sup>-bat-ma: Or ṣaz<sup>1</sup>-ziz-ma; see the note to text no. 65 line 25.

ii 17 The published copy has *a-lik*, but the squeeze suggests that *al* is more likely than *A*.

ii 19 Or possibly *ma-da-at-tu ša* MAN.MEŠ-ni ša KUR.ṣta-ba-li<sup>1</sup> [UGU ša pa-na ut-tir-ma UGU-šú áš-kun (...)], “[I imposed upon him] (the payment of) tribute that [was higher than] kings of the land Tabal [(had paid) previously (...)],” following, Renger, *CRRA* 32 p. 114 and based on text no. 1 line 71 and text no. 4 line 12'.

ii 20 mšem-tar-ru: The name was originally read *m<sup>2</sup>bi-iš-tar-ru*, but see Groß, *PNA* 3/2 p. 1256. The PNA only mentions the occurrence of this name in this text, but see also ND 2084 line 2 mšem-tar-i (Parker, *Iraq* 23 [1961] p. 18 and pl. IX).

ii 21 One expects *mim-ma aq-ru* (see for example text no. 65 line 340), but the traces would not seem to support this reading. With regard to the tentative restoration at the end of line 21, compare for example text no. 41 lines 12–13.

ii 22–23 For the tentative restorations at the end of lines 22 and 23, see text no. 1 lines 84–85 and text no. 4 lines 27'–28'. Line 22: *kar\*-*: The squeeze has ŠE-A-.

of the city [...]. He caused [Aššur-lē'i of the land Karalla (and) Ittī of the land Allabria] to rebel against me and made (them) act in unison. He threw off the yoke of (the god) Aššur and took [...] ... He withheld his tribute and [...] (who) [...] transgressed, did not respect his mighty oath, and forgot his sworn agreement ... [...]

ii 26–33a) I became confident and my mood became joyful. I mustered the [exte]nsive troops of (the god) Aš[šur] and ma[rched] to the land Mannea. [...] ... be[fore] the day had proceeded two double-hours, I [had smashed] his (city) wall as if (it were) a potter's vessel [(and) ...] I personally captured. In front of his (city) gate I considered his people, together with their property, as if (they were) a number of sheep and goats. [His] for[tified] city Izirtu [...] ... they saw the smoke of the conflagration of the city Izirtu and vomited gall. They came down to kis[s my feet ... (ii 30) In] order to save his life he grasped hold of my feet. I received horses, oxen, (and) sheep and goats as his tribute. [...] I captured Aššur-lē'i of the city Karalla, an evil-doer. In the midst of my camp, I threw him, together with his soldiers, in [iron] fetters. [...] I re]moved and brought to my city Aššur (lit.: "Assyria"). I added the city Karalla, together with its district, to the province of the city Lullumû. [...] I elevated [Bēl-aplu-iddina (...)] over the city Paddiri. I imposed upon him more (state) service (and) corvée duty than before.

ii 33b–35a) Moving on from the city Paddir(i), [I came] to the city Niqqar [...] the city Kinahri, of the city Šurgadia, fortified [citi]es of the land of the Gutians, those who do no work, who daily [...] the expeditionary force of the people [...] I carried off as booty [...] their people, together with their property, their horses, their oxen, (and) their sheep and goats. Šēp-šarri ... the city ruler [...].

ii 35b–38a) [Moving on from ...], I came to the city Ḥundir. Bēl-šarru-ušur of the city Kišesim spoke mendaciously to the city rulers of [his] en[virons ...] He brought before me in the city Ḥundir as his tribute

ii 23 One expects KUR.ur-ar-ḥa-a-a or KUR.TILLA-a-a, "the Urartian," after Rusâ. Parpola, Toponyms pp. 370–373 lists only one case (a Babylonian chronicle) when Urartu is preceded by URU rather than KUR, but note also Grayson, RIMA 3 p. 20 A.O.102.2 ii 48.

ii 28 The end of the line likely mentioned the burning of city (cf. text no. 1 lines 86–87 and text no. 7 lines 41–42).

ii 32 For the restoration at the end of ii 32, see text no. 63 col. i' 21'.

ii 33 at\*-: The squeeze has MA-.

ii 34 For Šēp-šarri, the ruler of Šurgadia, see also text no. 1 lines 92–93, text no. 4 line 38', and text no. 7 line 58.

- horses, oxen (and), sheep and goats. I received them inside my camp. [...] I counted (them) [as] booty.
- ii 38b–41a) [I brought to Assyria] horses trained to the yoke, property, possessions, gold, silver, garments with multi-colored trim, linen garments, equipment, (and) battle gear [...] I had [the weapons of the deities Aššur, Sîn, Šamaš], Adad, (and) Ištar, my lords, who go before me, made [and] I installed (them) there. [I had] the people of the city Kišesim (and) its district [dwell (as safely) as in] a meado[w and ...] (ii 40) I set a eunuch of mine as provincial governor over [them]. [I ...] the land Bīt-Sagabi (Bīt-Sagbat), which is in the Fortress of the Bab[ylonian(s) ...] I imposed upon them (state) ser[vice], corvée duty, (and) labor duty for (the god) Aššur, my lord.
- ii 41b–46a) At that time, the people of the city Ḥarḥar who are submissive to Aššur (and) perform labor service [...] They drove off [Kibab]a, their city ruler, and withheld the horses (which were) to be given yearly as their tribute. They strengthened their (city) wall and repeatedly as[sked for (military) aid ...] before the day had proceeded [x double-hours] I brought about their defeat; I inflicted a major defeat on them. I impaled their fighting men on stakes [...] I completely [(re)con]str[ucted]. I built its temple anew (and) restored its gods to their places. [I ...-ed the ...] of the deities Aššur, Sîn, Šamaš, Adad, (and) Ištar, the deities [who go before me. (...)] I poured out innumerable offerings at its festival. The upper river(land) of the land Arazišu (Aranzêšu), the lower river(land) of Bīt-Ramatua [...] I had them perform [(...) labor duty] as if (they were) Assyrians.
- ii 46b) Moving on from the city Ḥarḥar, I crossed a river with cold water (and) came to the city Zakruti. ... [...]

ii 36 For the reading Bēl-šarru-ušur, see for example text no. 1 line 93 and text no. 7 line 59.

ii 38 LAL<sup>\*</sup>-at<sup>\*</sup>: The squeeze has ME-ŠI. For the tentative restoration at the end of line 38, cf. text no. 1 line 94, text no. 4 lines 39'–40', text no. 82 iii 6'–7', and the present text ii 44.

ii 40 For the Fortress of the Babylonian(s), see Tadmor, Tiglath-pileser III pp. 72–73, commentary to Ann. 15 line 11. H. Tadmor states that similar references in the inscriptions of Tiglath-Pileser III “point to the existence of Babylonian colonies in western Media” and that their origin “should be sought in the late Kassite period.”

ii 42 For the restoration Kibaba, see text no. 7 line 61. ni-dan MU.AN.NA “(which were) to be given yearly”: Although the original publisher of the stele, L.D. Levine, read er-bet MU.AN.NA and translated the passage as “for four years” (Stelae pp. 40–41 and 71), the squeeze clearly indicates that the stele had ni-dan rather than er-bet; the form ni-dan is, however, unexpected. For the tentative reading e-ter-<sup>1</sup>ri<sup>21</sup>-[šú<sup>2</sup> ki-it-ra<sup>2</sup> ...], “repeatedly as[sked for (military) aid ...],” cf. text no. 82 vii 32' b–33' a e-ter-ri-šu-uš<sup>1</sup> ki-it-ra. The end of the line might have referred to Daltā of the land of Ellipi (see text no. 1 lines 96–97).

ii 43 At the beginning of the line one expects a-di x KASKAL.GÍD u<sub>4</sub>-me la šá-qe-e, “Before the day had proceeded x double-hours” (see ii 27), but the trace before u<sub>4</sub>-me does not fit the end of KASKAL.GÍD. The trace looks like: [...] LIŠ or the end of the DA sign.

ii 45 One expects SISKUR.MEŠ (or UDU.SISKUR.MEŠ) at the beginning of the line, but the traces do not seem to favor this reading. É<sup>m</sup> has five vertical wedges, with the last two apparently connected to the first three by a horizontal line. With regards to “the upper river(land)” and “the lower river(land),” see the on-page note to text no. 1 line 98. For further possible restorations at the end of the line, cf. text no. 1 lines 98–99.

ii 47–51a) Moving on from the city Zakruti, I came to the city Kurabli. [I received] as tribute from Daiku of the city Šaparda (and) from UŠ... [... Moving on from the city Kurabli, ...] the land of ..., the land Igali, the land Sikris, (and) the land Bīt-Uargi, distant regions whose name(s) the kings who preceded me had never heard, [... Fe]ar of (my) brilliance overwhelmed them and they abandoned their cities. They gathered their people (and) their property and [...] the land Abrau ... for their support [...] I struck down with the sword and carried off the remainder of them as booty, (namely) people, horses, mules, oxen, sheep, (and) donkeys. ... to/for ... [...] I destroyed, demolished, (and) burned down with fire.

ii 51b) Moving on from the land Sikris, I came to the land Arussa. That region, together with ... [...]

ii 52–54a) ... I crossed the Pattaus River (and) came to the land Ukuta. The people of th[at] region ... [... who/which] I set on fire like a torch, I fed my troops their grain crop in large quantities. My warriors in order to plunder ... [...] they carried off as booty.

ii 54b–55) Moving on from the land Ukuta, I crossed over Mount Arusaka, a mighty mountain, with great difficulty (and) came to the land Anzaknê ... [...] ... I made flare up like a star. Karakku of the land Uriakku saw the smoke of the conflagration of the cities of the land Anzaknê ... [...].

ii 56–59a) Moving on from the land Anzaknê, I entered the pass of the land Uppuria in between Mount Pattaššun (and) Mount Darüe, high mountains. [I set up camp] at the foot of Mount Uab...šu.... [...] I sent [...] cavalry (and) bowmen ...ly against the settlements of the city Bustus in order to take booty from the steppe. The soldiers of the steppe ... [...] I received [as tribute from ...] of the land Uppuria (and) from Mašdakku of the land Aratišta. Razištu of the land Bustus (and) Ušrâ of the land Kan[za]bkanu [came before me] in the land Uppuria [and kissed my feet. (...)] Razidatu (Razištu), the city ruler of the city Bustus, spoke mendaciously,

ii 50 -lu\*-. The squeeze has -IB-.

ii 52 ÍD.pa-at-ta-us: Not ÍD.pa-at-tu-us as in the copy in Levine, Stelae p. 72.

ii 54 -kat\*. The squeeze has -Aš. Based on the writings in lines ii 55 and 56, we would expect KUR.an-za-ak-<sup>1</sup>né<sup>1</sup>-e before aqterib; however, there does not appear to be room for the -e and it is not clear that there is actually a trace of a sign between the -<sup>1</sup>né<sup>1</sup> and the aq-.

ii 56 The reading RU in <sup>1</sup>e-ru<sup>2</sup>-ba<sup>1</sup> is particularly uncertain. For the restoration at the end of the line, cf. text no. 65 line 27.

ii 57 ši-li-pu "...ly": See the note to text no. 1 line 447.

ii 58 Text no. 65 line 49 has URU.a-rat-is-ti and text no. 82 vi 28'' has KUR.a-<sup>1</sup>rat<sup>1</sup>-is-ta. The translation assumes a restoration a-di maḥ-ri-ia il-li-ku-nim-ma ú-na-aš-ši-qu ĠIR.II-ia at the end of the line.

ii 68b–70a) Moving on from the city Irnisa, I came to the land Uratas. I received [(...) horses] trained to the yoke as tribute from Azamada of the city U..., from TAK... [..., from ...] of the city ḡagabtâ (Ecbatana), from Burbuasu of the land Uratista, (from) Šummušrâ of the city Qarkasia, [(from)] Burbuazu of the city Ginkir, (and) from Bu...bartanu of the land Rur[... (...)].

ii 70b–72a) At that time, I had a stele made and [I engraved upon it] image(s) of the great gods, my lords, who make me triumph ... [...]. I inscribed upon it [(...)] the victorious deeds of (the god) Aššur, my conquests that I made over the four quarters (of the world), (and) everything that I had done in the city Kišesim. [I erected (it)] for all time in the city Kišesim that I had personally con[quered], for ... [...].

ii 72b–73a) May a future prince — (one) whom (the god) Aššur, king of all the Igīgū gods, will summon and nominate for the lordship of Assyria — read this stele and ano[int (it)] with o[il. (...)] May he offer a sacrifice. May he praise the good deeds of (the god) Aššur and have future generations learn to revere him (Aššur).

ii 73b–75) (As for) the one who ... this stele, ... changes its resting place ... [...], secretly stores (it) away, or throws (it) into a river (lit.: “rivers”), or [buries] (it) in the ground, (or) destroys (it) by fire, or places (it) ..., or mutilates (it), or ... [...], may the great gods who dwell in heaven (and) netherworld curse him angrily. May they make his name (and) his descendant(s) disappear from the land.

ii 69 ḡagabtâ can be identified with Ecbatana, modern Hamadan (A. Fuchs). For the city of Qarkasia, see also text no. 82 vi 36''. It is not clear if Burburazu, the Median ruler of Bīt-Ištar appearing in Sargon's eighth campaign in 714 (text no. 65 line 46), should be identified with either Burbuasu of Uratista or Burbuazu of Ginkir; see Schmitt, *Iranische Personennamen* pp. 71–72.

ii 70 mu\*-: The squeeze has AŠ-KUR-. Or restore e-si-ir instead of e-si-qa; see text no. 103 iv 45 and the on-page note to that line.

ii 71 Sargon is known to have erected a monument depicting himself at Kišesim during this campaign (see text no. 1 lines 93–95, text no. 2 lines 86–87a, text no. 7 lines 59–60, and text no. 82 iii 1'–21'). The writing URU.ki-sa-si for Kišesim is also found in Luukko, SAA 19 no. 91 line 12. Too little is preserved of the two signs following the first URU.ki- in the line to propose any reading for that city, but we might assume that the same place was indicated.

ii 72–73 With regard to the reading of these lines, see text no. 103 iv 58–62, text no. 105 ii' 13–16, and text no. 106 iii 10'–13'. lip\*-: The copy has ŠU-PA-. Possibly ḡle<sup>1</sup>-mut-tu, “evil,” in line 73.

ii 74 Cf. Grayson, RIMA 2 p. 30 A.0.87.1 viii 68. ú\*-: See the copy in the minor variants section. -ḡu-ú\*-: The stele appears to have -U<sub>5</sub>- (see the copy in the minor variants section), but this is surely an error for -ḡu-ú-.

## 118

A small, barrel-shaped bead found at Persepolis has a short dedicatory inscription of Sargon to the goddess Aya. The objects with this inscription and with text nos. 119–122 were probably taken to Persepolis as booty, either directly or indirectly from Assyria following its destruction by the Babylonians and Medes towards the end of the seventh century.

## CATALOGUE

Museum Number	Excavation Number	Photograph Number	Provenance	Dimensions (cm)	cpn
—	PT4 548a	Persepolis field negative Ps-320	Persepolis, Room 33 of the Treasury (SE corner, in refuse 1–1.5 [m] above floor)	2.6×1.3	p

## COMMENTARY

This small bead was found in 1936 by the Oriental Institute excavations at Persepolis and was allotted to the Iranian Antiquity Service. It is made of onyx that is bluish white and brown in color; the piece is pierced lengthwise. (For information on the other items found in Room 33, see Schmidt, *Persepolis* 1 pp. 174–175.) The edition is based upon the published photograph and an unpublished copy of the inscription made by D.E. McCown (kindly supplied by J. Larson of the Oriental Institute).

The inscription should not be attributed to Sar-

gon I of Assyria, who reigned in the Old Assyrian period, since that earlier ruler is only attested in contemporary texts with the title “vice-regent of the god Aššur” (ÉNSI <sup>d</sup>a-šūr), not “king of Assyria”; see Grayson, *RIMA* 1 pp. 45–46 A.0.35.1 and A.0.35.2001. Moreover, the other votive objects found in the Treasury at Persepolis with this bead all come from the middle of the first millennium BC, in particular, from the reigns of Esarhaddon, Ashurbanipal, and Nebuchadnezzar II; see Schmidt, *Persepolis* p. 56.

## TEXT

- 1) *ana* <sup>d</sup>a-a
- 2) GAŠAN-šú <sup>m</sup>MAN-GIN
- 3) MAN KUR AŠ
- 4) *ana* TI-šú BA\*

1–4) To the goddess Aya, his lady: Sargon (II), king of Assyria, presented (this object) for the sake of his life.

4 BA\*: The published edition has BA[!]-eš[?]. The sign/signs are not legible on the published photograph, but the unpublished copy by D.E. McCown has simply BA, with what appear to be two vertical wedges at the end of the sign, rather than one. The copy also indicates that the šú of line 2 has two vertical wedges. Could the engraver's tool have slipped in both places?

## 119

A fragment of an eye-stone found at Persepolis has a short dedicatory inscription to the god Šamaš that is probably to be assigned to Sargon.

## CATALOGUE

Museum Number	Excavation Number	Photograph Number	Provenance	Dimensions (cm)	cpn
—	PT6 233	Persepolis field negative Ps-324	Persepolis, Room 53 of the Treasury (East end, refuse)	2×2.1×0.8	n

## COMMENTARY

This fragment of an oval-shaped eye-stone was found in 1938 by the Oriental Institute excavations at Persepolis and was allotted to the Iranian Antiquity Service. (For information on other items found in Room 53, see Schmidt, *Persepolis 1* p. 181.) The piece is made of bluish-green turquoise and has a highly polished convex top, a beveled side, and a groove in

the base. The inscription is written on the beveled side and the bottom, and is edited from the published copy. The text is said to be “rather carelessly written.” Text no. 120 may be a duplicate of this inscription. (Information on the dimensions of this piece was kindly supplied by J. Larson.)

## 120

A fragment of an eye-stone found at Persepolis has a short dedicatory inscription to the god Šamaš that is probably to be assigned to Sargon.

**119 line 2** The transliteration by G. Cameron (*Schmidt, Persepolis 2* p. 58) indicates that the GIN is clear, but the published copy indicates that the sign has more wedges than are found with a normal GIN sign.

## CATALOGUE

Museum Number	Excavation Number	Photograph Number	Provenance	Dimensions (cm)	cpn
—	PT4 495	—	Persepolis, Room 33 of the Treasury (NE corner, floor)	3.2×1.8×1	n

## COMMENTARY

This eye-stone fragment was found by the Oriental Institute excavations at Persepolis and was allotted to the Iranian Antiquity Service. It is made of onyx, has a polished top with a gray center and a white margin, and is pierced laterally. The inscription is edited from an unpublished copy made by D.E. Mc-

Cown that was kindly made available to the author by J. Larson of the Oriental Institute. The restorations in lines 3–4 assume that the inscription is identical with text no. 119, but the two texts have been arbitrarily kept separate here.

## 121

A fragment of an eye-stone found at Persepolis has a short dedicatory inscription of Sargon.

## CATALOGUE

Museum Number	Excavation Number	Photograph Number	Provenance	Dimensions (cm)	cpn
—	PT4 1170	—	Persepolis, the area of Room 33 of the Treasure (refuse)	Dia.: 3	n

## COMMENTARY

This eye-stone fragment was found in 1936 by the Oriental Institute excavations at Persepolis and was allotted to the Iranian Antiquity Service. It is made of chalcedony; the top has a gray center (chipped off) and a white margin. The piece is inscribed on the bottom. The edition presented below is based upon an unpublished copy of the inscription made by D.E. McCown (kindly supplied by J. Larson) and G. Cameron's understanding of the text. The unpub-

lished copy would suggest that there is room to restore little if anything at the beginning of the line and one wonders if instead of restoring *ša* at the beginning of the line (and assuming that the inscription is basically a duplicate of text no. 122), we should assume that a whole line is missing and restore a dedication to a deity, i.e., "[To DN, (his lord/lady)], Sargon dedicated (this object)."

## BIBLIOGRAPHY

- 1957 Schmidt, Persepolis 2 pp. 56-58 and 149 (edition [by Cameron])
- 1989 Galter, NABU 1989 p. 41 no. 63 sub no. 87 (study)

## TEXT

1) [(<sup>m</sup>)]MAN-GIN BA-iš

1) Sargon (II) presented (this object).

## 122

Two eye-stone fragments found at Persepolis have what may be short dedicatory inscriptions of Sargon duplicating text no. 121.

## CATALOGUE

Ex.	Museum Number	Excavation Number	Provenance	Object	Dimensions (cm)	Lines Preserved	cpn
1	—	PT4 1169	Persepolis, the area of Room 33 of the Treasury	fragment of a pink and white calcite eyestone	Height: 0.7; dia: 2.8	1	n
2	—	PT4 1172	As ex. 1	fragment of a grey and white onyx eyestone	Height: 0.6; dia.: 2.5	1	n

**121 line 1** G.G. Cameron (in Schmidt, Persepolis 2 p. 58) restored *ša* at the beginning of the line and translated the text as "[which] Sargon presented"; however, we would then expect the verb to be in the subjunctive (i.e., *iqišu* rather than *iqiš*).

## COMMENTARY

The two eye-stone fragments were found by the Oriental Institute excavations at Persepolis in 1936 and were allotted to the Iranian Antiquity Service. The objects are each inscribed on the bottom. Both exemplars were transliterated from unpublished copies made by D.E. McCown that were kindly supplied to

the author by J. Larson (Oriental Institute). The edition is based on ex. 2; ex. 1 has only šá LUGAL-[...]. Following G. Cameron, the edition assumes that the inscription is basically a duplicate of text no. 121, but they have been arbitrarily kept separate here.

1) šá LUGAL-<sup>r</sup>GIN<sup>21</sup> [BA-šú<sup>2</sup>]

1) That which Sarg[on (II) presented].

## 123

Text nos. 123 and 124 are brick inscriptions that deal with the restoration of Babylon's city walls for the god Marduk during the time of Sargon II. The first, written in Akkadian, is found on at least twenty exemplars from Babylon and Kish. In addition to recording work on Imgur-Enlil ("The God Enlil Showed Favor") and Nēmet-Enlil ("Bulwark of the God Enlil") – the inner and outer city walls respectively – the inscription mentions work on the quay-wall of Babylon. Sargon is given the traditional titles "governor (GĪR.NÍTA) of Babylon" and/or "king of the land of Sumer and Akkad" in this and several other Babylonian inscriptions (text nos. 124-127).

## COMMENTARY

According to M. Gibson (Iraq 34 [1972] p. 120), the bricks found at Kish with this inscription may have been brought there from Babylon for reuse in the Neo-Babylonian temple. In every case where information is available, the inscription appears in contemporary Babylonian script. The text is inscribed (not stamped) on the edge of each brick, with the number and arrangement of lines varying greatly among the exemplars. While some bricks have the inscription written down the edge (exs. 1–2, 7, 13, 15–17, and 19) in 24–28 lines, others have it written across the edge, in either one (exs. 8–12, 14, 18, and 20) or more columns (exs. 3–6) of 5–7 lines each. The line arrangement and the master line are based on ex. 1, with help from ex. 10 in lines 9–12.

H. de Genouillac's excavations at Kish in 1912 discovered exs. 1 and 6. Since ex. 6 was both catalogued among pieces in Paris (Kich 2 p. 29 P.208) and given a reference number indicating that it was in Istanbul (Kich 2 pl. 1 O.5), it is not known whether this exemplar was sent to Paris or to Istanbul. The Oxford-Field Museum, Chicago, expedition to Kish 1923–1933 discovered exs. 2–4, and ex. 5 was found during H. Rassam's excavations in Babylonia (probably at Babylon,

according to Walker, CBI p. 65).

Excavations conducted by the Deutsche Orient-Gesellschaft discovered exs. 7–20 at Babylon. The inscriptions on several are known only from excavation photographs and no details are available on several exemplars. Two Babylon photos (nos. 868 and 869) show five and four exemplars respectively. Excavation records give the excavation numbers of four pieces for each photo, but do not indicate which bricks shown have which excavation numbers. The variants from all but two of these nine bricks are cited by the photo number followed by A, B, C, etc. (e.g., 689D), with A indicating the brick on the photo which is separated from the others by the ruler. It is possible to be reasonably certain about the identification of two bricks on photo 689 — nos. B and C, exs. 17 and 7 respectively — and they are cited by exemplar number. Not all the bricks are in good condition and many of the inscriptions are difficult to read, particularly from photographs. Thus, readings must often be considered tentative. The minor variants are listed at the back of the book, but no score for this brick inscription is given on Oracc.

## 124

A Sumerian inscription written on four bricks found at Babylon also describes the restoration of Babylon's inner and outer city walls — Imgur-Enlil and Nēmet-Enlil, respectively — for Marduk, the patron deity of the city, by Sargon II.

123 line 14 Exs. 10, 16, and 868D insert *i-te-e* KÁ.GAL <sup>d</sup>15 after *ina*, “beside the gate of the goddess Ištar, on the bank of the Euphrates River” for “along the bank of the Euphrates River.” Exs. 7, 17, 868E, 869A, and 869D are all damaged but likely have the same insertion; they have <sup>r</sup>*i-te-e* KÁ.GAL<sup>1</sup> [...], [*x x*]-*e* KÁ.GAL <sup>d</sup>15, <sup>r</sup>*i*<sup>71</sup>-*te*-<sup>r</sup>*e*<sup>1</sup> [...], *i*-<sup>r</sup>*te*<sup>1</sup>-[*e*] KÁ.GAL <sup>d</sup>15<sup>1</sup>, and <sup>r</sup>*i*<sup>71</sup>-*te-e* <sup>r</sup>KÁ<sup>1</sup>.GAL *x x* respectively.

## CATALOGUE

2	—	BE 41861	Bab ph 2194, 2305, 2330	Babylon, in debris in the bridge gate; Sachn y 40 +2.80 m	—	2–7	p
3	—	BE 42335 + BE 42417	Bab ph 2305, 2320, 3458	Babylon, Sachn aa 40, ca. -1.50 m	—	1–14	p
4	EŞ —	BE 58377	Bab ph 3458	Babylon, southeast corner of inner city wall in debris at edge of mud-brick outer wall	—	1–14, 16–18	p

## COMMENTARY

The excavations of the Deutsche Orient-Gesellschaft at Babylon discovered all of the exemplars. The inscription, written in Babylonian script, is inscribed (not stamped) down the edge of each brick. The edition of lines 1–2 and 8 is a conflation of exs. 3 and 4; lines 3–7 and 9–10 follow ex. 3; and lines

11–18 follow ex. 1. Ex. 4 may omit line 15 or have had it on the same line as 14 (the end of which is not preserved). No other variants are attested and no score for this brick inscription is presented on Oracc.

1–18) For *the god Marduk*, the gr[eat] lord, his lord: Sargon (II), king of the land of Assyria, king of the world, governor of Babylon, (10) king of Sumer (and) Akkad, constructed anew the (city) wall Imgur-Enlil (and) the (city) wall Nēmet-Enlil for the sake of his life (and) made (them) shine like daylight.

## 125

Two Akkadian inscriptions and two Sumerian inscriptions commemorate Sargon's work on the Eanna temple of the goddess Ištār at Uruk (text nos. 125–128). This clay cylinder has an Akkadian inscription that is modeled upon one of Marduk-apla-iddina II (Frame, RIMB 2 pp. 136–138 no. B.6.21.1) and may have been intended to replace it. The cylinder has a colophon stating that it had been copied and collated from another exemplar.

## CATALOGUE

Museum Number	Provenance	Dimensions (cm)	cpn
YBC 2181	Possibly Uruk	13.2×6.5	c

## COMMENTARY

This barrel cylinder was given to the Yale Babylonian Collection in New Haven by Dr. and Mrs. J.B. Nies, likely in 1912 or 1913 when the collection was being first formed. The inscription is reported to have been discovered at Uruk by local diggers, is composed using contemporary Babylonian script, and is presented in two columns of 40 and 41 lines respec-

tively. Line rulings are found after every two or three lines and there is one before the colophon.

One may note the use of *-mu* and *-mi* for the enclitic particle *-ma* in lines i 19, 20, 22 and 38, and ii 3, 23 and 34; the vowel used is the same as the one immediately preceding the enclitic particle. See also Röllig, ZA 56 (1964) p. 231.

may she bestow a (long) life on Sargon, king of Assyria, (ii 10) king of the world, governor of Babylon, the king who provides for her. May she say good thing(s) about him before the god Marduk, king of the gods. May she go (with him) as his helper in strife and battle.

ii 16–27) May he shatter the weapons of his enemies and may he achieve whatever he wants. May he make all the rulers who are not submissive to him bow down at his feet. (ii 20) By the command of the goddess Ištar, beloved of the lord of the gods, may he increase (his) good fortune. May long life, happiness, and gladness be bestowed on him and may his reign be long. May he make the foundation of his throne secure for future days and may he govern (all) regions (of the world).

ii 28–38) May he constantly exercise the rule over the people who are of privileged status (and have) *šubarrû*-privileges (granted) by the great gods. (ii 30) During his reign may those ones with *šubarrû*-privileges not become disordered. May he take away their negligence and erase their sin. Let turmoil be anathema to them (ii 35) (and) may he make their heart(s) rejoice. Like the foundations of Uruk and Eanna, may their foundations be firm.

**Colophon**

ii 39–41) Copy of the inscription, dispatch *to/of* the palace of Assyria; written and collated.

## 126

A large number of bricks found at Uruk are stamped with an Akkadian inscription recording that fact that Sargon had reconstructed parts of the Eanna temple. It is worthy of note that the king's name is preceded by the divine determinative in line 1; see also text nos. 127 line 6 and 128 line 4. However, M. Karlsson argues that “the overwhelming absence of divine determinatives” before the names of Assyrian rulers (unless a ruler's name commenced with the name of a deity) indicates that they “did not claim divine status in their royal inscriptions” (NABU 2020/1 pp. 33–36 no. 16).

125 ii 16 and 19 The goddess Ištar may be the subject of the verbs “shatter” and “make bow down” rather than the king.

125 ii 32 *li-šat-bil-ma* “May he take away”: The reading follows AHW p. 190 and cf. Lambert, BWL p. 50 line 60. R. Borger (BiOr 55 [1998] p. 845 sub S. 146ff., following Gadd, Iraq 15 [1953] p. 130 n. 1) read *li-maṭ-ṭi<sub>5</sub>-ma*, “May he decrease”; however, in view of *iddīmi* and *ullīmi*, instead of *iddīma* and *ullīma*, in i 38 and ii 3 respectively, we would have expected *imaṭṭīmi*, not *imaṭṭīma* (suggestion courtesy M. Worthington).

## COMMENTARY

German excavations at Uruk discovered all the exemplars of this inscription. The provenances given for exs. 1 and 8 come from the excavation's registry of finds rather than from the statements in UVB 1 (see Marzahn, FuB 27 [1989] pp. 60–61 and 64 nn. 17 and 21). Findspots for exs. 1, 5, and 8 are marked on pl. 3 of UVB 1 and these would suggest that ex. 1 was found in Od XVI 3 (as stated in UVB 1) and that ex. 5 was found in Ob XVI 1 rather than Oc XVI 2. The registry refers to three exemplars with the excavation number W 6420 (W6420a–c). Ex. 10 is W 6420a and ex. 11 is either W 6420b or c (the letter is no

longer recognizable); one of exs. 13–15 may be the third brick originally given this excavation number. (See Marzahn, FuB 27 [1989] p. 64 n. 19.)

The inscription is stamped on an edge of exs. 1 and 7 and on the face of exs. 2–6 and 8–15. Ex. 1 also has text no. 127 stamped on its face. The text appears in three columns, with each column having four lines. The edition is based upon the published composite copy and J. Marzahn's work in FuB 27. No variants are attested and no score for this brick inscription is presented on Oracc.

## 127

A number of bricks discovered during excavations at Uruk are stamped with a Sumerian inscription that records Sargon's paving of the processional way of the Eanna temple for the goddess Inanna (Ištar).

## COMMENTARY

The Deutsche Orient-Gesellschaft excavations at Uruk discovered all the exemplars of this inscription. Numerous bricks with this inscription and measuring 34×34×7 cm were found within Eanna at one spot north of the ziggurrat (see Jordan, Uruk-Warka p. 48). The provenances given for exs. 2–5 come from the excavation's registry of finds rather than from the statements in UVB 1 (see Marzahn, FuB 27 [1989]

pp. 61–62 and 64 n. 21). With regard to the findspot of ex. 2, see the commentary to text no. 126. The inscription is found stamped on the face of the brick. Ex. 2 also has text no. 126 stamped on one edge. No variants are attested for this inscription and no score for this brick inscription is provided on Oracc.

The last sign in line 8, a\*, is composed of three vertical wedges, one next to the other. The read-

ing of line 14 is problematic. Although the published copies and the transliteration by J. Marzahn suggest *ki-bi bí-in-túm* (“he brought to its place,” i.e., “he restored”), in comparison with other inscriptions, including brick inscriptions of Sargon from Babylon (text no. 124) and Aššur (text no. 70) and one of Esarhaddon’s brick inscriptions from Babylon (Leichty, RINAP 4 pp. 267–269 no. 131 and Frame, RIMB 2 p. 180 B.6.31.13, Akkadian), we might expect *u<sub>4</sub>-gin<sub>7</sub> bí-in-zálag* (“made shine like daylight”).

Based upon all the originals and photos examined, *u<sub>4</sub>, gin<sub>7</sub>*, and *zálag* appear to be as good or better than *ki, bi, and túm* respectively; in particular, the second sign appears to have a vertical wedge at the end (see also the copy in UVB 1). The final sign is more elongated than the first one and this might suggest *túm* rather than *zálag*, but the two vertical wedges appear to be angled, narrowing toward the left.

# 128

Two bricks found at Uruk by the expedition sponsored by the Deutsche Orient-Gesellschaft are stamped with a Sumerian inscription that describes Sargon’s reconstruction of the Eanna temple for the goddess Inanna (Ištar). The edition presented below is based upon the copy and information published by J. Marzahn in FuB 27. No score is provided on Oracc for this brick inscription.

## 129

A fragment of a clay cylinder from Tell Haddad (ancient Mê-Turnat) in the Hamrin area bears an inscription of Sargon II that is almost a total duplicate of the cylinder inscription found at Khorsabad (text no. 43). The line arrangement of this text, however, differs from that of the latter text. Unfortunately, the portion of the text that mentions the structure being rebuilt is not preserved. Since the fragment was found near the temple of Nergal (Ešahula), the inscription may have referred to work on that structure. For an axe head dedicated by one of Sargon's eunuchs to the god of that temple, see text no. 2008 and note also text no. 2009.

**128 line 5** J. Marzahn notes that the traces of the sign after lugal could be those of either unu or kala. Since no other inscription from this period accords a ruler the title "king of Uruk" while several use the epithet "strong king" (e.g., Frame, RIMB 2 p. 222 B.6.32.16 line 6), the latter restoration is preferred here.

## CATALOGUE

Museum Number	Provenance	Dimensions (cm)	cpn
IM —	Tell Haddad, in the area of housing outside the temple of Nergal (near the north corner of Area 3, next to the north-east section, in Level 1), in fill about 150 cm below the surface	10.9×4.6–6.5	n

## COMMENTARY

Neither the excavation number nor the museum number of this fragment of the right end of an eight-sided cylinder is known. Parts of the first two faces are preserved, as is a small portion of the last (eighth) face. The text is in Neo-Babylonian script

and is edited from the published copy.

The restoration of lines 1–21 is based upon text no. 43 lines 1–17 and 19; for lines 8–21 see also text no. 76 lines 3'–13'.

# 1001

An “historical(?) tablet” was found in Room 166 (the chapel of Adad) of Sargon’s palace at Khorsabad (Loud and Altman, *Khorsabad* 2 p. 104 no. 18). Nothing further is known about the inscription, but it is placed here since most historical inscriptions from Khorsabad come from the reign of Sargon II.

# 1002

A sealing published by P.E. Botta together with his finds from Khorsabad depicts a man killing a lion; see Botta, *Monument de Ninive* 2 pl. 164 no. 2; Albenda, *Palace of Sargon* p. 114 no. 14 (entry by C.B.F. Walker) and pl. 152; and Figure 30. The image appears have a cuneiform inscription around it and to be from a royal stamp seal similar to other royal Assyrian seals; see Sachs, *Iraq* 15 (1953) pp. 167–170 and pls. XVIII–XIX; and Millard, *Iraq* 27 (1965) pp. 12–16 and pl. I. According to Walker, “One could think of restoring the visible signs at the top as *šar*<sub>4</sub> KUR *aš-šur*, ‘king of Assyria’, but this could be completely wrong.” Since the piece presumably comes from Khorsabad, the inscription might have mentioned Sargon and is thus presented here. The current location of the sealing is not known. Cf. the sealing Sm 2297 (see Figure 1 in the Introduction to this volume), as well as the seal depicted on Botta, *Monument de Ninive* 2 pl. 154 no. 2 and listed in Albenda, *Palace of Sargon* p. 114 no. 14.

## 1003

A fragment of a clay cone from Aššur bears an inscription that may come from the time of Sargon II. The initial publisher of the inscription assigned it to Ashurnasirpal II, but the text mentions Akkadī in line 2' and that does not appear in the inscriptions of Ashurnasirpal II. Ḥašmar (line 3') appears only in inscriptions of that king and Sargon II (see Bagg, *Rép. Géogr.* 7/2-1 p. 219), and thus the text is tentatively assigned here to Sargon. It should be noted that Ḥanigalbat (line 4') does not appear in any other inscription of Sargon II, while it does appear in early Neo-Assyrian royal inscriptions and in one inscription of Esarhaddon (*ibid.*, p. 206).

## 1004

A fragment of a clay cone found at Aššur may bear an inscription from the time of Sargon II. L. Jakob-Rost, the initial publisher of the inscription, tentatively assigned it to Sargon II, but R. Borger has stated that it should more probably be assigned to Shalmaneser III (ZA 76 [1986] p. 301). Very little of the inscription is preserved and it does not appear to duplicate exactly the known inscriptions of either ruler. Note that like text no. 67 (an inscription also on clay cones from Aššur), this cone originally bore the date on which it was composed. O. Pedersén's and A. Nunn's recent works follow Jakob-Rost's tentative assignment of the text and thus, arbitrarily, this inscription is presented with those of Sargon. The fragment was found with several other clay cone fragments; for further details on the provenance compare Nunn, Knaufplatten p. 73 and p. 164. Line 3' of the inscription is indented.

A fragment of a baked brick, or perhaps more likely a clay plaque, from Aššur in the Vorderasiatisches Museum in Berlin bears a fragmentary inscription — [...] 'KUR' aš-šur. 'KI' [...] — that A. Nunn has tentatively assigned to Sargon II (Knaufplatten p. 117 no. 273). The inscription was collated by F. Weiershäuser. If the piece comes from a plaque it might be a duplicate of text no. 66.

## 1006

Two fragments of a prismatic cylinder from Nimrud preserved in the British Museum have an inscription that is arbitrarily presented here. It might be assigned to Sargon II because another prismatic cylinder inscription of his is known from that city (text no. 76).

## CATALOGUE

Museum Number	Excavation Number	Provenance	Dimensions (cm)	cpn
BM —	ND 2075a+b	Nimrud	—	c

## COMMENTARY

ND 2075a, which is comprised of three joined fragments, is part of the left end of the cylinder and ND 2075b, which is composed to two joined fragments, is part of the central section. The cylinder would likely have had ten faces originally, but parts of only five inscribed faces, and traces of two others, are preserved. Unfortunately, neither the beginning nor the end of the inscription is preserved. The faces are not of the same width. The first and second in-

scribed faces have four lines each, while the third, fourth, and fifth have three lines each. There is an un-inscribed margin ca. 1.7–1.8 cm wide to the left of the inscription.

The text is written in Neo-Babylonian script and has been collated both from the original fragments and from photographs. Photographs of ND 2075a were kindly supplied to the author by G. Van Buylaere and photos of ND 2075b by M. Touillon-Ricci.

## 1007

A fragmentary inscription on a limestone block found by R. Campbell Thompson at Nineveh and currently in the British Museum was tentatively assigned to Sennacherib by Campbell Thompson and to Sargon or Sennacherib by R. Borger (HKL 1 p. 536; and 3 pp. 26–27) and E. Frahm (Sanherib p. 143 no. 5 and NABU 2000 p. 77 no. 66). The inscription refers to an *akītu*-house and, as noted by Frahm, Ashurbanipal explicitly states that Sargon had built the *akītu*-house of Ištar at Nineveh (Novotny and Jeffers, RINAP 5/1 p. 220 no. 10 v 33–42). The inscription is thus tentatively assigned to Sargon II even though his name is not mentioned in what is preserved of the text. (For two stone fragments found at Nineveh that mention Sargon, see text nos. 93 and 94.)

## 1008

A.H. Layard mentions a pair of lions made of coarse limestone that were found in Sennacherib's palace at Nineveh and that had a "nearly illegible" inscription. H. Galter et al. (ARRIM 4 [1986] p. 31 no. 12) suggests that the copy of a "fragment on part of [a] yellow bull at entrance" among Layard's papers in the British Museum might represent this text. E. Frahm (Sanherib pp. 122–123) raises the possibility that the yellow bull may not come from Nineveh and that the text copied by Layard may actually duplicate part of a description of the building of Sargon's palace at Khorsabad that is found on several bulls discovered at Khorsabad (text no. 9 lines 71–78). Unfortunately,

(1) the reading of a large number of the signs in lines 1'–6' is not at all clear, (2) there are problems with regard to the space for the restorations in those lines, and (3) the traces of lines 7'–8' do not seem to fit that inscription of Sargon. Since the present location of the piece is not known and the inscription could not be collated, the edition is based on Layard's copy and Frahm's suggested transliteration. Without examination of the original, it is not possible to determine with any degree of certainty if this inscription actually duplicates all or part of Sargon's bull inscription from Khorsabad or if it should even be attributed to this ruler.

8' As noted by E. Frahm (Sanherib p. 123), a reading a-na da-ši, "in order to treat unjustly," might be possible here.

## 1009

A tiny limestone fragment with part of a cuneiform inscription was found at Samaria and is currently preserved in the Rockefeller Museum in Jerusalem. Since the inscription is written on stone, it is likely to have been a royal inscription. As noted by C.J. Gadd, the script shows a mixture of Assyrian and Babylonian forms, suggesting that it comes from the time of one of the Neo-Assyrian kings of the ninth through seventh centuries. It is edited with the inscriptions of Sargon II because many inhabitants of Samaria were deported during his reign. Thus, Sargon may well have left an inscribed stele at Samaria, just as he did at Ashdod (text no. 104). There is, however, nothing in the inscription that suggests its assignment to Sargon II in particular. The inscription is edited from the published photograph.

- 1'-2') Too poorly preserved to allow translation.  
 3') [...] days ... [...]  
 4') [...] creator [...]  
 5') [...] locusts [...]  
 6'-8') Too poorly preserved to allow translation

2' Possibly Ṛu<sub>4</sub>-me, "days," following Horowitz and Oshima, Canaan p. 115.

4' C.J. Gadd (in Crowfoot, Samaria-Sebaste 3 p. 35) suggests that what is preserved might be the end of a place name -ba<sup>2</sup>-nu-u.ṚKI<sup>1</sup>, while W. Horowitz and T. Oshima (Canaan p. 115) read [...] Ṛib<sup>1</sup>-ba-nu u x [...], "[... w]ere built and . [...]"

5' Locusts are mentioned at least three times in Sargon's inscriptions (text no. 1 line 86 and text no. 65 lines 187 and 256), but in no case does the context fit the passage here.

6' W. Horowitz and T. Oshima (Canaan p. 115) read [...] áš-me-tu x [...], "[...] dust-storm . [...]," and suggest that if the traces of the last sign are those of A the end of the line might be restored a[šamšūtu]. However, the former word only appears once in all of cuneiform literature, in the lexical series MALKU, where áš-me-tú is given as a synonym of ašamšūtu (see CAD A/2 p. 450 and AHw p. 82). The use of the ṚU sign here rather than -tu or -tú makes the identification of the word in this line with the áš-me-tú of MALKU uncertain. Possibly šip-ṫu, "judgement" or "threat," instead of ME ṚU.

## 1010

A basalt stone fragment with a cuneiform inscription was found at Carchemish in the early part of the last century during excavations by a British Museum expedition. The fragment is a corner fragment of a stone object, “perhaps an obelisk” (i.e., stele) in the view of the original publisher of the piece. The inscription on it is presented with those of Sargon II since cylinder and brick inscriptions of Sargon II have also been found at Carchemish (text nos. 109–110), while inscriptions of no other Neo-Assyrian ruler have been found at this site. Sargon is also known to have left inscribed steles in various locations in the western part of his realm. According to H. Tadmor, the palaeography of the inscriptions on this fragment and text no. 1009 (from Samaria) is “very similar” to that of the Cyprus, Ashdod, and Tell Acharneh steles of Sargon (text nos. 103, 104, and 106 respectively) (‘Atiqot, English Series 9-10 [1971] p. 195).

### CATALOGUE

Source	Provenance	Dimensions (cm)	cpn
Barnett in Woolley and Barnett, Carchemish 3 pl. A.33 m-m*	Carchemish	—	n

### COMMENTARY

Neither the exact provenance of the fragment nor its current location is known. R.D. Barnett states that the originals of the cuneiform inscriptions from Carchemish published by him “are lost” and that he made use of squeezes in his work (Woolley and Barnett, Carchemish 3 p. 279 n. 3). The fact that the one fully preserved side is relatively narrow and that the lines of text run from that side onto the adjoining side raises questions about the idea that the fragment comes from a stele since this would be an almost unique arrangement. (The inscription on the back of the Najafabad stele [text no. 117] also runs over onto the adjoining side.) The inscription is edited from the published copy, with some help from the published photo and a scan of the original photo kindly supplied by N. Marchetti. A squeeze of the inscription is preserved in the British Museum,

but it was not available for collation.

In a recent publication, G. Marchesi refers to a “very fragmentary” stele with “a non-standard inscription of Sargon that has no phraseological parallels in other texts of the Sargonid corpus” that will be published by him and Marchetti (JNES 78 [2019] p. 11 n. 9). He has kindly informed me that this object is made up of four fragments that do not join and that two of the fragments were found by the British Museum excavations and two by the recent Turkish-Italian excavations led by N. Marchetti; one of the four pieces is the one edited here.

Although the asseverative particle *lū* does occasionally appear in Sargon’s royal inscriptions (e.g., text nos. 8 line 6, 14 line 12, and in particular 82 iv 7’, 8’, and 9’), the fact that it occurs in three successive lines (lines 2’, 3’, and 4’), is noteworthy.

1009 line 7’ W. Horowitz and T. Oshima (Canaan p. 115) read [...] *ma-si-na*<sup>21</sup> [...], “[...] *thei[r<sup>2</sup>]* land [...].”

## Lacuna

2' ᵀKÙ<sup>21</sup>.[GÍ?], “g[old]”: Since gold is normally mentioned before silver in Neo-Assyrian royal inscriptions, the restoration is uncertain.

3' LAL\*–: According to the photo, the text has ME–.

4' NU mu-sa-pu-u DINGIR<sup>2</sup>-ti, “an image (of myself) praying to (his) divine majesty”: Cf. Leichty, *RINAP* 4 p. 136 no. 60 line 28' ša-lam LUGAL-ti-ia mu-sa-pu-u DINGIR-ti-šú-un (see also *CAD* S p. 394). R.D. Barnett suggested reading NU.MU.SA-pu-u-rat-ti.KI, “the city of Almat-puratti” (lit.: “widow of the Euphrates”), although noting that no city with this name is otherwise attested (Woolley and Barnett, *Carchemish* 3 p. 280). We would also expect URU before the city name and NU.MU.SU instead of NU.MU.SA. Assuming that the passage does mean “widow of the Euphrates,” I. Winter suggested that it “could conceivably refer to Carchemish after its conquest” (*AnSt* 33 [1984] p. 194 n. 89). J. Penuela and D.J. Wiseman suggested KUR.mu-ša-šir ..., “the land of Musasir ...,” a suggestion which Barnett describes as “most plausible ... The ambiguity is due to faults of copying” (Woolley and Barnett, *Carchemish* 3 p. 280 n. 1). The photograph is not clear enough to confirm a reading KUR for the copy’s NU and, according to S. Parpola (*Toponyms* p. 250), Mušasir is always written with ŠA, not SA. (The one instance given by Parpola of a writing with SA — KUR M(U)-SA-ŠI-RA (WO 2 230.178) — is a typographical error; the text in question [Grayson, *RIMA* 3 p. 70 A.0.102.14 line 178] has ŠA.)

5' R.D. Barnett suggested ana mit<sup>2</sup>-gu<sup>2</sup>-ur<sup>2</sup> for the end of the line (Woolley and Barnett, *Carchemish* 3 p. 280). While the copy allows reading ana mit-gu–, the traces of the final sign copied do not fit UR, but might allow RI. Cf. Grayson and Novotny, *RINAP* 3/2 p. 354 no. 1016 rev. 2'.

# 2001

In 1989, Iraqi excavations of a tomb chamber below Room 49 of the North-West Palace at Nimrud (Tomb II) uncovered the bodies of two women and numerous precious items, including four inscribed gold bowls, one inscribed jar apparently of rock crystal, and an electrum mirror. Inscriptions on them refer to three Assyrian royal wives: Yabâ, the wife of Tiglath-pileser III; Bānītu (or possibly Banītu), the wife of Shalmaneser V; and Atalia, the wife of Sargon II. Since only two bodies were found in the grave, their identities has been a matter of some discussion, with one suggestion being that they are Yabâ and Atalia (with the latter being buried with property inherited from Bānītu; Kamil in Damerji, *Gräber* p. 13), another suggestion being that they are Bānītu and Atalia (George, *Minerva* 1/1 [1990] p. 31), and the most recent suggestion being that Yabâ and Bānītu were one and the same person, so that the grave then holds Yabâ (=Bānītu) and Atalia (Dalley, *New Light on Nimrud* pp. 171–175). As pointed out by A.R. George, although the name Bānītu is a good Assyrian name, that of Atalia and possibly that of Yabâ are Northwest Semitic, suggesting that these two “were thus probably of Syrian or Levantine birth, entering the Assyrian harem as a result of diplomatic marriages or as spoils of the many western campaigns undertaken by the Assyrian armies of this period” (*Minerva* 1/1 [1990] p. 31). S. Dalley has proposed that Yabâ and Atalia were both princesses from Jerusalem (e.g., *SAAB* 12 [1998] pp. 83–98) and (as already mentioned) that Yabâ and Banītu were actually one and the same person since Yabâ means “beautiful” in Hebrew and Banītu is the Akkadian equivalent (*New Light on Nimrud* pp. 171–175). The evidence adduced by Dalley to support a Judean ancestry, while intriguing, is open to other interpretations. E. Frahm, for example, has tentatively suggested that Atalia might have been of Israelite background, although noting that “the uncertainties in identifying Atalyā’s true background are so substantial that it seems preferable to abstain from further speculation” (*Last Days* p. 81; see also Frahm in *Sennacherib at the Gates of Jerusalem* pp. 186–189). For a linguistic discussion of the name Atalia suggesting that it might be of Arabian derivation, see Zadok, *Studies Eph’al* pp. 327–329. See also Kertai, *AoF* 40 (2013) pp. 114–116 with regard to the three queens and note Tadmor and Yamada, *RINAP* 1 p. 164.

A short proprietary inscription of Atalia’s is written on a gold bowl, a jar of (apparently) rock crystal, and an electrum mirror found in the tomb chamber.

## COMMENTARY

The gold bowl (ex. 1) was found resting on the breast of one of the two bodies found in the tomb and it has been suggested that Atalia was buried in this tomb (Damerji, *Gräber* p. 8). The inscriptions on exs. 1–2 are found on the outer surface of the vessels, running in one line around each vessel’s neck; the one on ex. 3 is in two lines (with the second line beginning after MUNUS.É.GAL) and is found on the handle of the mirror. It has not been possible to collate the exemplars and the inscription is edited from the published copies.

A drawing of a scorpion is found on the neck of ex. 1 (just before the the beginning of the inscrip-

tion) and on the handle of ex. 3 (at the end of the inscription). With regard to the scorpion on Neo-Assyrian artifacts as a marker of the property of the queen, see most recently Galter, *Journal for Semitics* 16/3 (2007) pp. 646–671; Niederreiter, *Iraq* 70 (2008) pp. 51–86, esp. 59–62; and Radner, *Studies Fales* pp. 690–693. A bronze duck weight (ND 1898/158) with brief inscriptions in Akkadian and Aramaic stating that it weighed one-sixth of a mina and with the depiction of a scorpion on it was also found in Tomb II and F.N.H. Al-Rawi has argued that it also belonged to Atalia (see *New Light on Nimrud* pp. 126–130 no. 7 and Hussein, *Nimrud: The Queens’ Tombs* pp. 22–23).

## TEXT

- |    |  |    |  |
|----|--|----|--|
| 1) | šá <sup>f</sup> a-ta-li-a MUNUS.É.GAL šá <sup>m</sup> MAN-GIN MAN KUR AŠ | 1) | (Property) of Atalia, queen of Sargon (II), king of Assyria. |
|----|--|----|--|

**1** Ex. 3 has <sup>f</sup>a-tal-ia-a for <sup>f</sup>a-ta-li-ia-a. S. Parpola (*SAAB* 2/2 [1988] pp. 73–76) argues that the reading of MUNUS.É.GAL is *issi ekalli > sēgallu*; cf. the discussion in Borger, *MZ* pp. 346–348. The translation of this term, which literally means “palace woman,” as “queen” is a matter of some scholarly discussion; it is translated as “queen” in Tadmor and Yamada, *RINAP* 1 pp. 164–167 Tiglath-pileser III nos. 2003–2005 and pp. 187–188 Shalmaneser V nos. 2001–2002 and as “wife” in Leichty, *RINAP* 4 pp. 313–323 nos. 2001–2009.

# 2002

An inscription of *Sîn-aḫū-ušur*, a brother of Sargon II, is found upon three stone pavement slabs from doorways in Residence L (or Palace L) in the citadel at Khorsabad; he is also the owner of an bronze macehead (text no. 2003). Residence L was the second largest building in the citadel, exceeded in size only by Sargon's palace. The inscription on the paving slabs identifies the residence as belonging to the grand vizier (*sukkalmaḫḫu*) *Sîn-aḫū-ušur*. A *Sîn-aḫū-ušur* is mentioned in the eighth campaign of Sargon II (text no. 65 line 132) and it is quite likely that that individual is to be identified with the king's brother.

## COMMENTARY

The findspots of the exemplars are indicated on Loud and Altman, Khorsabad 2 pl. 72. Ex. 3 was left in situ and, according to the excavator, its inscription is “barely legible” (Khorsabad 2 p. 70). Thus, the transliteration for this exemplar presented in the score and made from a published photo is at times tentative. Each inscription is on seven lines and written across the middle of the slab. “The areas above and below the inscription are entirely filled with the usual daisy-like rosettes, each in its individual square” (Khorsabad 2 p. 48). The line arrangement and master line are based upon ex. 1.

In their translations of this inscription, T. Jacobsen (in Loud and Altman, Khorsabad 2 p. 104) and

B. Meissner (ZDMG 98 [1944] p. 38) assume that the subject of the verbs in lines 4–6 (“completely constructed,” “invited,” and “offered”) is *Sîn-aḫū-ušur*, while A. Fuchs assumes it is Sargon. The latter view is supported by passages similar to lines 4b–6a on other paving stones from Khorsabad that clearly refer to Sargon (text no. 12 lines 34–37 and text no. 13 lines 123–126).

For information on *Sîn-aḫū-ušur*, see Mattila, PNA 3/1 p. 1128 sub *Sîn-aḫū-ušur* 1; Niederreiter, RA 99 (2005) pp. 57–76; and May, BiOr 74 (2017) pp. 491–528. For 707 or 706 as the suggested date of this inscription, see May, Iconoclasm p. 199 n. 41.

## 2003

During his excavations at Khorsabad, V. Place found a bronze macehead that had the heads of four lions on its top (see Figure 31 below). The object has two one-line inscriptions engraved on it; the top one connects the object to the palace of Sargon and the lower one states that it belonged to Sîn-aḫū-ušur, the grand vizier (*sukkallu rabû*). Sîn-aḫū-ušur was the brother of Sargon II and the occupant of Residence L at Khorsabad; see text no. 2002, where he is given the title *sukkalmahḫu* and said to be Sargon's *favorite brother* (*ta-lim* <sup>m</sup>MAN-GIN). The first inscription (inscription A below) could have been presented earlier with those of Sargon from Khorsabad and is in fact cited there as text no. 62; however, it has been thought best to edit both inscriptions on the macehead here.

**2002 line 1** This text provides the only attestation of the title *sukkalmahḫu* in the Neo-Assyrian period. Since Sîn-aḫū-ušur is also called *sukkallu rabû* in text no. 2003, H. Baker has suggested that the two titles were interchangeable (PNA 4/1 p. 135). Lines 1 and 7: A. Bartelmus argues that *talimu*, which is tentatively translated here as *favorite (brother)* and *favorite*, was “the official designation of the highest possible rank among the king’s relatives, but obviously of lower position than the king himself” (SAAB 16 [2007] pp. 287–302, esp. p. 299), while N. May suggests that Neo-Assyrian scribes gave it the meaning “‘somewhat special’ brother” when referring to Assyrian royal siblings (SAAB 19 [2011–12] pp. 153–174, esp. p. 168).

**2002 line 7** The line arrangement is different to the master line in ex. 3, with the last line of the exemplar beginning with <sup>r</sup>GAL<sup>2</sup> LU<sup>2</sup> ša <sup>md</sup>EN.ZU-ŠEŠ-ú-šur<sup>1</sup> and the end of the previous line of the exemplar appearing to end with <sup>r</sup>ik-tar<sup>21</sup>-x-<sup>r</sup>bu-ma<sup>1</sup>. The identification of the first two signs as GAL and LU seems fairly clear, but their meaning in the context (*qal-lu*, “slave”?) is not.

## COMMENTARY

This macehead was found together with fifty-three other bronze maceheads in one of the corners of Room 18 of Sargon's palace (Place, Ninive et l'Assyrie 1 p. 65; Niederreiter, RA 99 [2005] pp. 57–58). The inscriptions run around the macehead, with the two lines on different bands of the object; inscription A is on the upper band and inscription B on the lower band. Just before the beginning of inscription B a dromedary and an omega-like symbol are incised on the macehead. These are also found on two stamp seal impressions from Kalḫu, which has led

Niederreiter to identify Sîn-aḫu-uṣur as the owner of the seal that made those impressions (Iraq 70 [2008] pp. 62–65 and RA 99 [2005] pp. 66–69). N. May (SAAB 19 [2011–12] pp. 168–170) has argued that the dromedary and omega are “Assyrian hieroglyphs,” with omega standing for *aḫu*, “brother,” and dromedary for *talimu* (with regard to the meaning of this word, see the on-page note to text no. 2002 line 1). For another opinion about their interpretation, see Niederreiter, Iraq 70 [2008] pp. 62–65.

## 2004

A stamp seal impression found at Khorsabad in 1929 bears a brief Aramaic inscription of one of Sargon's eunuchs, Pān-Aššur-lāmur. It is not known if he is to be identified with the homonymous author of two poorly preserved letters to Sargon II (Parpola, SAA 1 nos. 156 and 157 [=Harper, ABL no. 1064 and CT 53 no. 525]). Although the inscription is in the Aramaic script and language, it has been thought useful to include the text in this volume.

## COMMENTARY

The seal impression was found in 1929. Information on the museum, excavation, and photograph numbers and on the measurements was kindly supplied by J. Larson. The edition presented below follows that of S. Kaufman (JAOS 104 [1984] p. 94), who examined the original seal impression in the Oriental Institute (Chicago). The transliteration of the inscription by P. Bordreuil (in Caubet, Khorsabad p. 261)

restores “y” at the end of the second line, rather than at the beginning of the third line, but in his commentary (ibid. p. 264), Bordreuil appears to refer to restoring it at the beginning of the last line (referred to as “ligne 4”). K. Watanabe, K. Åkerman, and most others do not restore “y” in their editions (see bibliography below).

## 2005

A corner fragment of an alabaster coffer found at Aššur records a dedication to the god Adad by Ṭāb-šār-Aššur, the treasurer (*masennu*). Ṭāb-šār-Aššur served as eponym in 717 and is mentioned in text no. 65 line 427, as well as in several letters (see in particular, Parpola, SAA 1 nos. 41-74 and Perroudon, PNA 3/2 pp. 1344-1346 sub Ṭāb-šār-Aššūr 1).

 4) *ana* TI ZI.MEŠ-šú ḠBA<sup>1</sup>-[iš] 1–4) To the god Adad, the canal inspec[tor of heaven (and)] netherworld, prince [...]: Ṭāb-šār-Aššur, the trea[surer], pre[sented (this)] for the sake of ensuring his good health.

## 2006

A clay sealing that was discovered at Nimrud (ancient Kalḫu) in 1956 and is preserved in the Metropolitan Museum of Art in New York bears impressions of a stamp seal and a cylinder seal. The cylinder seal impression has a short inscription of Aššur-bāni, a governor of Kalḫu who served as eponym in 713 and who wrote several letters to the king and one to the vizier (see Whiting, *PNA* 1/1 pp. 158–159 sub Aššūr-bāni 5 and Parpola, *SAA* 1 nos. 111–123). The inscription has been collated from the published photos.

## CATALOGUE

Museum Number	Excavation Number	Provenance	Dimensions (cm)	cpn
MMA 57.27.22	ND 5486	Nimrud, in an ash deposit on the floor of Room 11 (an oil storeroom) of the Ninurta temple	4.29×7.01×10.8	p

**2005 line 1** *a\**: The text has DIŠ. Or read *ana* <<*na*>> .

**2005 line 2** Perhaps Ḡbe<sup>1</sup>-[i-šú] or ḠEN<sup>7</sup>-[šú], “[his] l[ord],” at the end of the line; D. Schwemer (*Wettergottgestalten* p. 607 n. 4906) suggests possibly Ḡdan<sup>1</sup>-[ni], Ḡez<sup>1</sup>-[zi], Ḡgaš<sup>1</sup>-[ri], or Ḡši<sup>1</sup>-[ri], “mi[ghty],” “fi[erce],” or “po[werful].”

**2005 line 3** If D. Schwemer is correct that there is not sufficient room to restore LÚ.ḠAGRIG<sup>1</sup> [GAL-*u*/*ú*] (*Wettergottgestalten* p. 608 n. 4907), the inscription was presumably composed before Ṭāb-šār-Aššur was promoted to chief treasurer.

**2005 line 4** The restoration follows text no. 2010 line 5.

## 2007

A cylinder seal of agate bears a short inscription of Nabû-ušalla, the governor of the city Tamnūnu and eunuch of Sargon. As noted by W.G. Lambert and C.E. Watanabe, it is likely that the owner of the seal is to be identified with one or more individuals by this name who either sent, or are mentioned in, a few letters of the period (Parpola, SAA 1 nos. 177 and 237; Lanfranchi and Parpola, SAA 5 no. 104; Luukko, SAA 19 no. 183; see Luppert-Barnard, PNA 2/2 p. 900 sub Nabû-ušalla 2 and 3).

## CATALOGUE

Source	Provenance	Dimensions (cm)	cpn
Watanabe, Bagh. Mitt. 23 (1992) pp. 357–369 and pls. 70–71	—	4.83×2.32	p

## COMMENTARY

The cylinder seal is in a private collection in Japan but was on display in the Ancient Orient Museum (Tokyo) from July 20 until September 1, 1991 with the exhibition number II-1-19. The inscription is incised

so that when impressed it appears in mirror writing. The inscription was collated from the published photograph.

2006 line 1 B. Parker, K. Deller, S. Herbordt, and K. Watanabe read the final sign of the personal name as *-an*, but, as noted by R. Whiting, and confirmed by a collation by I. Spar, it is in fact *-ni*.

## 2008

A broken stone axe head from Tell Haddad (ancient Mê-Turnat) bears an inscription of an individual who was one of Sargon's eunuchs and who was also likely governor of Na'iri. The inscription records the dedication of the axe head to the god Nergal of the temple Ešahūla. A brick inscription from the time of Ashurbanipal deals with work on this temple (Frame, *RIMB* 2 p. 229 B.6.32.22). A fragment of a clay cylinder with an inscription of Sargon II was also found at Tell Haddad (text no. 129) and note also text no. 2009.

## CATALOGUE

Museum Number	Excavation Number	Provenance	Dimensions (cm)	cpn
IM 95520	Haddad 581	Tell Haddad, Neo-Assyrian temple (area 3, level 1)	9×6.4×1.7	p

## COMMENTARY

According to E. Valtz, this fragmentary stone axe head is made of “bluish marble” and is trapezoidal in shape and triangular in section. Lines 1–8 are found on the upper surface of the object and line 9 on the trailing edge. The edition is based upon the published photograph and copy, with help from F.N.H. Al-Rawi's edition that also made use of a paper squeeze of the inscription. Restorations are based on those proposed by Al-Rawi; as noted by him, for lines

5 and 6, see Leichty, *RINAP* 4 p. 20 no. 1 iv 38 and cf. King, *BBSt* no. 36 iv 15–19 respectively.

The first published reference to this inscription assigned it to the Assyrian king Shalmaneser III (Mancini, *Land Between Two Rivers* p. 418) and thus this inscription was originally to appear in Grayson, *RIMA* 3. The edition was removed from that volume before publication (see *ibid.* p. 155 A.0.102.98).

2007 line 2 KUR\*: The text has MAN. For the writing of the place name Tamnūnu (as URU.tam-nu-na or URU.tama-nu-na) and a possible location east of the Tigris opposite Eski Mosul, see Bagg, *Rép. Géogr.* 7/2-2 pp. 585–587.

## 2009

A small clay barrel cylinder found on the surface of Tell Baradān in 1977 and now in the Iraq Museum describes the construction of the wall of the city Sirara (a literary rendering for Mē-turnat), apparently by Nabû-bēlu-ka’in, the governor of the city Arrapĥa, and following the wishes of Sargon.

## CATALOGUE

Museum Number	Provenance	Dimensions (cm)	cpn
IM —	Tell Baradān, surface	—	n

## COMMENTARY

Tell Baradān is located in the Diyala region about 500 meters from Tell Haddad. Ancient Mē-Turnat is either Tell Haddad or Tell Baradān, or possibly both since they are located close to each other. No information on the exact provenance of the piece, its excavation number, or its current museum number is known. The edition of the piece is based upon the copy and edition published by Kessler in AfO 50 (2003–04) pp. 105–110.

For Neo-Assyrian references to Mē-Turnat and its location, see Bagg, *Rép. Géogr.* 7/2-2 pp. 426–427, and note also p. 534 sub Sirara 2.

K. Kessler has argued that this inscription is more likely one of the governor of Arrapha Nabû-bēlu-ka''in (mentioned in line 15') than that of Sargon

because of the Babylonian and, in places, Elamite, character of the text, as well as because of the various scribal errors and graphic peculiarities (AfO 50 [2003–04] p. 107); however, as noted by Kessler, the construction of the city wall appears to have been in accordance with the will of Sargon (lines 14'–15'a). Nabû-bēlu-ka''in is known to have been an important Assyrian official active in the Diyala region and to have been governor of Kār-Šarrukīn (formerly known as Ḥarḥar, which Sargon had re-named) in western Iran before becoming governor of Arrapha around 710 or 709. (For information on Nabû-bēlu-ka''in, see Mattila, PNA 2/2 pp. 815–817 sub Nabû-bēlu-ka''in 1 and Postgate and Mattila, *Studies Grayson* pp. 251–253, esp. n. 50.)

## 2010

A stele found at Til-Barsip (modern Tell Ahmar) bears a votive inscription of Aššur-dūr-pāniya, governor of Kār-Shalmaneser, dedicated to the goddess Ištar of Arbela. Til-Barsip had been renamed Kār-Shalmaneser by Shalmaneser III (Grayson, RIMA 3 p. 19 A.0.102.2 ii 34-35). An official by the name of Aššur-dūr-pāniya is attested in several letters (see Parker, PNA 1/1 p. 180 sub Aššūr-dūr-pāniya 1). For the assignment of this inscription to that individual in the reign of Sargon II, see Radner, Bagh. Mitt. 37 (2006) pp. 188-192.

### CATALOGUE

Museum Number	Provenance	Dimensions (cm)	cpn
AO 11503	Tell Ahmar, in secondary usage (in a later wall, northeast of the western cemetery, ca. 1 m in depth)	121×82×30	c

### COMMENTARY

The stele is made of reddish limestone and was found during the French excavations at Tell Ahmar led by F. Thureau-Dangin. The stele, which is now in the Louvre and said to join AO 16083, has a relief on it depicting the goddess standing on the back of a

lion. The inscription is written in Neo-Assyrian script across the upper part of the front of the stele. The edition presented here is based on that published by K. Radner, who examined the original in 2005.

## 2011

An inscribed basalt stele was found in 2003 at Turlu Höyük (Turkey), ca. 30 km northwest of Carchemish. Over a quarter of the stele (the lower part) is no longer preserved. The stele has the image of a bearded individual carved on it. Since the figure has a horned headdress, is holding a bundle of three lightning bolts in his right hand, and is standing on a (partially preserved) bull, the figure has been identified as the storm god. The back of the stele bears a six-line votive inscription of one Bēl-iddin, who is given no title. The initial publishers of the text suggested that Bēl-iddin is a previously unknown Assyrian prince or high official. While he might be one of the “independent” Assyrian officials and governors from the period ca. 850–740, they thought that he more likely comes from the time of Sargon since (1) we do not know if the area where the stele was found was under Assyrian control in the earlier period, (2) Bēl-iddin does not bear a title, and thus we do not know what authority/function he had there, and (3) the expanded dedicatory formula including *GÁ-ma* is first attested in the time of Sargon II. Thus, although the exact date of the inscription remains uncertain and the position that Bēl-iddin held is unknown, the inscription is tentatively presented here. The inscription is edited from the published photo and copy.

## Text No. 7

1.4 omits <sup>m</sup> in <sup>m</sup>LUGAL-GI.NA. 1.3 GAL-ú for GAL. 1.4-5 <sup>r</sup>LUGAL<sup>1</sup> for the first MAN. 1.5 <sup>r</sup>LUGAL<sup>1</sup> for the second MAN. 2.5 LUGAL for MAN. 2.5 Botta's copy omits KUR without any indication of damage; but the squeeze suggests [KUR]. 2.3 EME.GI, for *šu-me-ri*. 3.5 Botta's copy erroneously omits MEŠ after GAL; this was likely miscopied one line lower, after *la*. 4.4 LUGAL-ú-tu for *šar-ru<sup>1</sup>-ut*. 4.5 Botta's copy has a MEŠ after *la*, but this was likely an error since the MEŠ after GAL in the previous line has been erroneously omitted by Botta. 4.3-4 *ú-šat-li-mu-in-ni-[ma]* for *ú-šat-li-mu-ni-ma*. 6.3-4 *bár-sipa.KI* and *bár-<sup>r</sup>sipa<sup>1</sup>.KI* respectively for *bár-sipa.KI*. 7.1 omits *šú* in *hi-bil-ta-šú-nu*. 8.4-5 <sup>r</sup>ÚRI\*<sup>1</sup>(copy: <sup>r</sup>ŠEŠ<sup>1</sup>.MURUB<sub>4</sub>).KI and <sup>r</sup>ÚRI\*(copy: ŠEŠ<sup>1</sup>.MURUB<sub>4</sub>).KI<sup>1</sup> respectively for ÚRI.KI. 8.4 UNUG\*(copy: MURUB<sub>4</sub>).<sup>r</sup>KI<sup>1</sup> for UNUG.KI. 9.5 ARARMA\*(copy and squeeze: UD.MURUB<sub>4</sub>).KI for ARAMA.KI. 9 *kul-aba<sub>4</sub>.KI*; ex. 1 omits KI; and exs. 4-5 have *kul-<sup>r</sup>aba<sub>4</sub>\*<sup>1</sup>*(copy: <sup>r</sup>MURUB<sub>4</sub>).KI and *kul-aba<sub>4</sub>\*<sup>1</sup>*(copy and squeeze: MURUB<sub>4</sub>).KI respectively.

10.4-5 *ša* for *šá*. 12.4-5 *i-na* for *ina*. 12.4-5 ŠĀ-šú-nu for *lib-bi-šú-nu*. 13.4-5 *i-[na]* and *i-na* respectively for the first *ina*. 13.1 Winckler's copy omits *ma* in *ib-ší-ma*. 13.4-5 *i-na* for the second *ina*. 13.4 MURUB<sub>4</sub>\*<sup>1</sup>(copy: UNUG) for MURUB<sub>4</sub>. 13.3-5 *ú* for *u*. 13.4-5 *mu-né-eh<sub>4</sub>-hu* for *mu-né-hu*. 14.5 *[ha]-am-ma-a-mi* for *ha-am-ma-mi*. 14.4 *ša* for *šá*. 15.4-5 *ú-pat-ti-i-ma* and *ú<sup>1</sup>-pat-ti-<sup>r</sup>i<sup>1</sup>-[ma]* respectively for *ú-pa-ti-ma*. 16.3-5 *ú* for *u*. 16 *da-na-ni*; ex. 3 has *da<sup>1</sup>-na-a-ni*; and exs. 4-5 have *da-na-a-ni*. 16.3-4 *ša* for *šá*. 16 MURUB<sub>4</sub>; exs. 3-4 have *qa-bal*; and ex. 5 has *[qa]-<sup>r</sup>bal<sup>1</sup>*. 17.3-4 omit *ú* in *ru-qu-ú-ti*. 18.4 *šá* for the first *ša*. 18 KUR.*el-li-pí*; ex. 3 has KUR.*el-li-pi*; ex. 4 has KUR.*[el]-<sup>r</sup>li<sup>1</sup>-pi*; and ex. 5 has *[KUR].<sup>el</sup>-li-pi*. 18.5 *ša* for *šá*. 18.5 ÍD.IDIGNA\*(copy: BAR-GÚ) for ÍD.IDIGNA. 19.3-4 *[LÚ].<sup>r</sup>li<sup>1</sup>-i<sup>1</sup>-it-ta-a* and *LÚ.li-i<sup>1</sup>-it-ta-[a]* respectively for *LÚ.li-i<sup>1</sup>-ta-a-a*. 19.4-5 *LÚ.gam-bu<sup>1</sup>-lum* and *[LÚ.gam-bu]-<sup>r</sup>lum<sup>1</sup>* respectively for *LÚ.gam-bu-lu*.

21.4-5 <sup>r</sup>ú<sup>1</sup> and *ú* respectively for *u*. 21.4-5 KUR.É-<sup>m</sup>da<sup>r</sup>-ku-ri and *[KUR].É-da<sup>r</sup>-ku-ri* respectively for KUR.É-<sup>m</sup>da<sup>r</sup>-ku-ri. 21.3 omits <sup>m</sup> in KUR.É-<sup>m</sup>sa-<sup>r</sup>al-la. 21.5 *u* in *ba-šu-u* not on Botta's copy but visible on squeeze. 23.4 *ša* for *šá*. 23.4-5 *i-na* for *ina*. 23.4-5 *taḥ-ta-a-šú* and *taḥ<sup>1</sup>-ta-a-šú* respectively for *taḥ-ta-šú*. 24.4-5 *i-na* and *i-<sup>r</sup>na<sup>1</sup>* respectively for *ina*. 24 *si-it-tu-ti*; ex. 3 has *si-it-tu-te*; ex. 4 has *si<sup>1</sup>-it-tu-<sup>r</sup>te<sup>1</sup>*; and ex. 5 has *si-<sup>r</sup>it<sup>1</sup>-tu-te*. 24.4-5 *maḥ-ri-i* for *maḥ-re-e*. 25.3-5 LUGAL for MAN. 25.3, 5 URU.<sup>r</sup>ha<sup>1</sup>-zi-te and URU.*[ha]-zi-te* respectively for URU.*ha-zi-ti*. 25.3, 5 <sup>r</sup>LÚ.tur-ta<sup>1</sup>-nu and *[LÚ.tur<sup>1</sup>]-ta-nu* respectively for *LÚ.tar-tan-nu*. 27 *ma-da-at-tu*; ex. 3 has *mad-da<sup>r</sup>-at-tum<sup>1</sup>*; ex. 4 has *mad-da-[at-tum<sup>1</sup>]*; and ex. 5 has *mad-[da]-at-tum*. 27.5 LUGAL for MAN. 27.3, likely 5 (via spacing) omit *a* in <sup>m</sup>it-<sup>r</sup>a-am-a-ra. 28.5 *ik-lu-u* for *ik-lu-ú*. 28 *am-nu-šu*; exs. 3, 5 have *am-nu-šú*; and ex. 4 has <sup>r</sup>am<sup>1</sup>-nu-šú. 29 MAN-ti-šú; exs. 3, 5 have LUGAL-ti-šú; and ex. 4 has <sup>r</sup>LUGAL\*(copy: AD)-[ti-šú]. 29 ANŠE.pa-re-e; exs. 3, 5 have ANŠE.KUNGA.MEŠ; and ex. 4 has ANŠE.<sup>r</sup>KUNGA<sup>1</sup>.MEŠ. 29.3, possibly 4 (via spacing), 5 omit *at* in *man-da-at-ti-šú*. 29.4 adds an extraneous AŠ sign before *maḥ-ri-ti*.

30 *ša* is based on exs. 3 and 5. Winckler's copy has *šá*; this is presumably based on the squeeze of ex. 1, which appears to have <sup>r</sup>šá<sup>1</sup>. 30.3, 5 *mì-šir* for *mì-šir*. 30.3, 5 *ú-<sup>r</sup>ap<sup>1</sup>-pi-šá* and *ú<sup>1</sup>-<sup>r</sup>ap<sup>1</sup>-pi-šá* respectively for *ú-<sup>r</sup>ap-pi-šá*. 31.3-4 KUR.ur-ar-<sup>r</sup>ta-a-a and

KUR.ur-ar-<sup>r</sup>ta-<sup>r</sup>a<sup>1</sup>-[a] respectively for KUR.URI-a-a. 31.1 spacing would suggest this exemplar had *u* not *ù*. 31.3-4 LUGAL and <sup>r</sup>LUGAL\*(copy: MA) respectively for MAN. 31.3 *ša* for *šá*. 31.3-4 KIN for *šip-ri*. 31.3-4 *ni-šu-tim* and <sup>r</sup>ni<sup>1</sup>-<sup>r</sup>šu-tim respectively for *ni-šu-ti*. 32.3 *al-qa-áš-šu* for *al-qa-áš-šú*. 32.3 omits *ut* in *LÚ.šú-ut*. 32.3-4 *bíl-tu* for GUN. 32.3 *man-da-at-tú* for *ma-da-at-tu*. 32.3 <sup>r</sup>UGU<sup>1</sup>-šú-un for *e-li-šú-un*. 33.3 ERIM.MEŠ for *ša-ab*. 33.3 URU.*di-maš-qu* for URU.*di-maš-qa*. 33.3 URU.sa-mir-i-na for URU.sa-me-ri-na. 34.3-4 *[ta-ha]-<sup>r</sup>zu<sup>1</sup>* and <sup>r</sup>ta<sup>1</sup>-<sup>r</sup>ha-zu\*(copy: SU) respectively for *MÈ*. 34.3 <sup>r</sup>aš-šur for <sup>r</sup>a-šur. 34.3-4 *ad-ke-e-ma* and *ad-<sup>r</sup>ke-e<sup>1</sup>-ma\**(copy: GIŠ) respectively for *ad-ke-ma*. 34.3-4 *i-na* for *ina*. 35.3 adds *ni* after URU.MEŠ. 35.3 omits *u* in *su-lum-nu-u*. 35.3-4 add MEŠ after GIŠ.GIGIR. 35 *lum* of ANŠE.pét-<sup>r</sup>hal-lum follows ex. 3. Botta's copy of ex. 1 has ANŠE.pét-AN, possibly for ANŠE.pét-<sup>r</sup>hal-<sup>r</sup>lim<sup>1</sup>/<sup>r</sup>lum<sup>1</sup>; Winckler's copy has simply ANŠE.pét-<sup>r</sup>hal and the squeeze has ANŠE.pét-[x]. 36.3 *ina* for *i-na*. 36.3-4 *<lib>-bi* and *[lib]-bi* respectively for ŠĀ. 36.3-4 *i-na* and *i-[na]* respectively for *ina*. 36.3 *u<sub>r</sub>-mi* for *u<sub>r</sub>-me*. 36.3-4 *ar-du* and *ar\**(copy: ŠŪ-RI)-*du* respectively for ARAD. 38.3 *ú* for *u*. 38.3-4 *i-[na]* and *i-na* respectively for *ina*. 38.3-4 EN-šú-nu for EN-šú-nu. 39.3 omits *ma* in *it-ta-kil-ma* (via spacing).

40.3 *[gap-šá]-a-te* for *gap-šá-a-ti*. 40.1 omits *lu* in <sup>m</sup>ul-lu-su-nu. 40.5 *[KUR].ma-<sup>r</sup>na<sup>1</sup>-[a]* for KUR.man-na-a-a. 41.3 *i-na* for *ina*. 41.3 URU.ar<sup>r</sup>-me-et-ta for URU.ar-me-et. 42.3 *ša* for *šá*. 42.3 KUR.ú-a-a-uš for KUR.ú-a-uš. 42.5 KUR<sup>r</sup>-e for KUR-i. 42.3 <2> ME in Monument de Ninive copy; 2 ME in Institut de France copy. 42.3 LUGAL-<sup>r</sup>ti<sup>1</sup>-[šú] for MAN-ti-šú. 43.3 *ina* ŠU.II for *i-na qa-ti*. 43.3 adds *ni* after URU.MEŠ. 43.3 *ina* for *i-na*. 44.3 *ša* for *šá*. 44.3 *na-<sup>r</sup>gi<sup>1</sup>-i* in Monument de Ninive copy; *na-gi\**(copy: RAD)-*i* in Institut de France copy. 46.3 *e-du-ur-ma* for *e-dúr-ma*. 47.5 adds *ni* after URU.MEŠ. 47.3 *šal-lat<sup>1</sup>-su-un* for *šal-la-su-un*. 48.3 <sup>r</sup>šal<sup>1</sup>-*la-su<sup>1</sup>-nu* for *šal-lat-su-nu*. 49.3 omits the final *a* in KUR.ú-iš-di-iš-a-a. 49.5 *ki-[im-ti-šú]* for *kim-ti-šú*.

50.3, 5 add *i-na* before *qé-reb*. 51 Winckler's copy has *hi-it-ti-šu* for *hi-<sup>r</sup>ta-ti-šú*; no exemplar known has this reading. 51.3 *hi-<sup>r</sup>ta-ti-šú* for *hi-<sup>r</sup>ta-ti-šú*. 52.3 [x]+12: Monument de Ninive has [x]+2, while the Institut de France copy has [x]+12. 52.3 *a-di 2\**(copy: 1) in Monument de Ninive, but 2 in Institut de France copy. 52.3 *ad-din-šu-ma* for *ad-din-šú-ma*. 52.3, 5 *da-li-iḥ-tum* and *da-<sup>r</sup>li-iḥ-tum* respectively for *da-li-iḥ-tu*. 53.5 omits *i* in *li-i-ti*. 53 *be-lí-ia*; ex. 3 has EN-<sup>r</sup>ia<sup>1</sup>; ex. 4 has EN-[ia]; and ex. 5 has EN-ia. 53.3, 5 UGU-šú for UGU-šu. 54.3, 5 LUGAL for MAN. 54.3 *i-na* for *ina*. 55.3, 5 <sup>m</sup>aš-šur-ZU for <sup>m</sup>daš-šur-le-<sup>r</sup>i. 55 Winckler's copy of ex. 1 omits *la* and ex. 3 omits the final *a* in KUR.al-la-ab-ra-a-a. 56.3, 5 omit <sup>d</sup> in <sup>m</sup>daš-šur-ZU. 56.3, 5 *qin-ni-šu* for *qin-ni-šú*. 57 Or URU.zu-uk-ki-a for URU.su-uk-ki-a; ex. 1 has URU.su-uk-ki-a, while exs. 3, 5 have URU.su\*(copy: ZU)-uk-ki-a and URU.su\*(copy: ZU)-uk-ki-<sup>r</sup>a<sup>1</sup> respectively. 57.5 adds an extraneous ŠŪ sign after URU.pa-*ap-pa*. 57.3-5 *i-na* for *ina*. 57.5 <sup>r</sup>ú\*(copy: ŠŪ-LU) for *u*. 58 The Journal Asiatique and Institut de France copies of ex. 3 have <sup>r</sup>ša<sup>1</sup> for *šá*, but there are no traces of the sign on the Monument de Ninive copy; ex. 5 has *ša*. 58.5 omits KUR.ni-ik-sa-am-ma. 58 *ak-šú-ud*; ex. 2 has *ak<sup>1</sup>-šú-ud\**(copy: MUŠ); ex. 3 has *ak\**(copy: KI)-šú-ud; ex. 4 has *[ak]-šú-ud<sup>1</sup>*; and ex. 5 has *ak-šú-ud<sup>1</sup>*. 58.3, 5 *šu-a-tu-nu* for *šú-a-tú-nu*. 59 <sup>m</sup>EN-LUGAL-ú-šur; ex. 2 has <sup>d</sup>EN-<sup>r</sup>LUGAL<sup>1</sup>-[ú]-<sup>r</sup>šur<sup>1</sup>; ex. 3 has <sup>m</sup>dEN\*(copy: HŪ)-LUGAL-ú-šur\*(copy: BI); and ex. 5 has <sup>m</sup>d<sup>r</sup>(copy: E)EN-LUGAL<sup>1</sup>-ú-šur. 59.5

<sup>1</sup>ú-raš-šu for ú-raš-šu.

60.3 DÜ-uš-ma for [e]-<sup>1</sup>pu<sup>1</sup>-uš-ma of ex. 1. Possibly instead <sup>1</sup>DÜ<sup>1</sup>-uš-ma for ex. 1, but the spacing of the copy suggests [e]-<sup>1</sup>pu<sup>1</sup>-uš-ma is more likely. 60.3, 5 i-na for ina. 60.3 pi-ḥa-ti-<sup>1</sup>šu for pi-ḥa-ti-šu. 61.2 ša for ša. 61.2 URU.ḥar\*(copy: ÁŠ)-ḥar\*(copy: ŠA) for URU.ḥar-ḥa-ar. 61.3-4 am-nu-šu for am-nu-šu. 62.3 šu-a-tú for šu-a-tu. 62.3-4 i-na for ina. 62.3-4 lib-bi for ŠA. 63.4 URU.kar-<sup>m</sup>LUGAL-GI.[NA] for URU.kar-<sup>m</sup>MAN-GI.NA. 63.4 pa-ṭi-šu for pa-ṭi-šu. 64.4 ak-šud-ma for ak-šu-ud-ma. 64 URU.É-<sup>m</sup>ba-ga-ia: Winckler's copy of ex. 1 omits <sup>m</sup>; and ex. 4 has URU.<sup>1</sup>É<sup>1</sup>-<sup>m</sup>ba-ga-a-a. 64.4 ak-šud<sup>md</sup> for ak-šu-ud. 66.4 ma-šar<sup>1</sup>-tú for ma-šar-tu. 66.2, 4 <sup>1</sup>na<sup>1</sup>-gi-i and na-gi-i respectively for na-ge-e. 66.5 adds an extraneous AŠ sign before akšudma. 66.4-5 ak-šud-ma for ak-šu-ud-ma. 67.5 <sup>1</sup>URU<sup>1</sup>.e-riš\*(copy: ḤU)-ta-na or <sup>1</sup>URU<sup>1</sup>.e-ri\*(copy: ḤU)-ciš>-ta-na for URU.e-ri-iš-ta-na. 68.5 adds an extraneous AŠ sign before a-di. 68.4 omits ni in URU.MEŠ-ni. 68.2 omits me in li-me-ti-šu. 68.3-4 [ak]-<sup>1</sup>šud<sup>1</sup>(<sup>md</sup>) and ak-šud<sup>md</sup> respectively for KUR-ud.

70.3-4 ina for i-na. 70.3-4 ša for ša. 70.4 pa-ṭi-šu for pa-ṭi-šu. 71.4 ša-a-tu-nu for šu-a-tu-nu. 73.4 i-me-é-šu for i-mi-šu. 73.3-4 ina for i-na; the Monument de Ninive copy of ex. 3 does not have the ina but it is found on the Institut de France copy. 73 <sup>m</sup>tum<sup>1</sup> in ak-tum<sup>1</sup>-ma: exs. 1 and 3-4 omit the Winkelhaken at the upper right of the sign, i.e. ÁB×KÁR-DIŠ; the sign not preserved on exs. 2 and 5. 74.4 KUR-šu for KUR-šú. 74.5 According to Winckler, this exemplar has a-na after ipparšidma, but Botta's copy does not support this. 74.3-4 URU.mu-ša-šir for URU.mu-ša-ši-ri. 76 <sup>1</sup>ba-ag-bar-tum: ex. 3 has <sup>1</sup>ba-ag<sup>1</sup>-bar-tu; ex. 4 has <sup>1</sup>ba-ag<sup>1</sup>-bar<sup>1</sup>-tu; and ex. 5 has [<sup>1</sup>ba]<sup>1</sup>ag<sup>1</sup>-[bar]-tu. 76.3 DINGIR.<sup>1</sup>MEŠ-šu<sup>1</sup> for DINGIR.MEŠ-šu. 76.5 omits <sup>m</sup> in <sup>m</sup>ur-sa-a. 77.4 DINGIR-šú for DINGIR-šu. 77.4-5 <sup>1</sup>rama<sup>1</sup>-[ni-šú] and rama<sup>1</sup>-<ni>-šú respectively for ra-ma-ni-šú. 78 Winckler's copy of ex. 1 has ki-ḥul-lu-ú <i>-šab-ši (haplography by Winckler?); Botta's copy of ex. 4 has ki-ḥul-lu [x] <sup>1</sup>šab<sup>1</sup>-[š] but the squeeze has ki-ḥul-<sup>1</sup>lu-ú <i>-šab<sup>1</sup>-[š]. 78.5 omits MEŠ in UN.MEŠ. 78.5 a-<sup>1</sup>šib<sup>1</sup> for a-ši-ib. 78.4 ŠA-šá for lib-bi-šá. 79.5 URU.<sup>1</sup>me<sup>1</sup>-[lid-da-a-a] for URU.me-lid-da-a-a. 79.4-5 i-bu-uk-<sup>1</sup>ma<sup>1</sup> and i\*(copy: AD)-bu-<sup>1</sup>uk\*(copy: ] UD)-ma respectively for e-bu-uk-ma. 79.4-5 i-na and i-[na] respectively for ina. 79.4 lib\*(copy: UD-A)-bi-ia\*(copy: ] UD) for ŠA-ia.

80.4-5 mal for ma-la. 80.4-5 ba-šu-u and ba-šú-u respectively for ba-šu-ú. 81.1 URU.DU<sup>1</sup>-ga-rim-me: Botta's copy adds an extraneous DIŠ sign between ga and rim, but it is not present on the squeeze. 81.4 am-nu-šú for am-nu-šu. 82.4 <sup>1</sup>ERIM<sup>1</sup>.MEŠ (so squeeze) for ša-ab. 82.4 KUR.kam-ma-an for KUR.kam-ma-nu. 82.1 The reading of šú in si-hir-ti-šú is based on ex. 4. Botta's copy of ex. 1 has <sup>1</sup>šú<sup>1</sup>, while Winckler's copy has šu. The squeeze appears to support Botta's copy with the sign ending with the tops of two vertical wedges next to one another. 82.5 omits ma in ú-šá-aš-bit-ma. 83.4 <sup>1</sup>i-na for ina. 84.4-5 omit as in ú-ra-as-si-bu-šu-ma. 84.4 ina for the second i-na. 84.4 lib-bi-ia\*(copy: AD) for lib-bi-<sup>1</sup>ia<sup>1</sup>. 85.4 adds MEŠ after GIŠ.GIGIR. 85.4-5 ù for u. 85.4-5 ANŠE.pét-ḥal-lum and <sup>1</sup>ANŠE\*(copy: DU).[pét-ḥal]-<sup>1</sup>lum\*(copy: SAL ] ) respectively for ANŠE.pét-ḥal-li-ia. 85.4 sa-al-me for sal-me. 85.4 i-da-a-a for <sup>1</sup>Á.II-a-a. 86.4 <sup>m</sup>mut-tal-lum for <sup>m</sup>mut-tal-lu. 86 KUR.É-<sup>m</sup>pa-<sup>1</sup>a-al-la: ex. 1 has KUR.É-[(<sup>m</sup>)]pa-<sup>1</sup>a-al-la; ex. 4 has É-<sup>m</sup>pa-<sup>1</sup>a-al-<sup>1</sup>la<sup>1</sup>; and ex. 5 has <sup>1</sup>KUR.É<sup>1</sup>.<sup>m</sup>pa-<sup>1</sup>a-al-la. 87.4 Copy suggests šú was omitted in am-nu-šú, but squeeze suggests possibly [šú].

93.4 Winckler's copy indicates that this exemplar has KUR-šú, but the text is not preserved at this point for this exemplar. 96.5 ša for ša. 96.5 šá-šú-nu-ma for šá-a-šú-nu-ma. 96.5 pa<sup>1</sup>-[(x)-la]-<sup>1</sup>aḥ<sup>1</sup> for pa-laḥ. 99.5 ša for ša.

101 <sup>1</sup>al<sup>1</sup>-lik-ma: ex. 1 has <sup>1</sup>al<sup>1</sup>(copy: al<sup>1</sup>); squeeze: <sup>1</sup>al<sup>1</sup>-lik-ma; and ex. 5 has <sup>1</sup>al<sup>1</sup>(copy: DU); squeeze: <sup>1</sup>al<sup>1</sup>-lik-<ma>. 101.5 a-lik for a-lak\*(copy: KID) of ex. 1. 109.1 Botta's copy omits <sup>1</sup>ina<sup>1</sup>, but the beginning of ina is visible on the squeeze.

110.4 Botta's copy has [...] KU [...] approximately where ex. 1 has [...] SU [...]. 113.5 <sup>m</sup>(copy: GIŠ; squeeze: DIŠ)ar-giš-tu for <sup>m</sup>ar-giš-ti. 113.4-5 [mu-še-zi]-bi-šu and [mu]-še-zi-bi-<<AŠ>>-šú

respectively for mu-še-zi-bi-šú. 113.4-5 bil-tum for bil-tu. 113.5 man-da-at-tu for man-da-at-tú. 113.5 ŠA-ia for lib-bi-ia. 114.4-5 ANŠE.pét-ḥal-li-ia and ANŠE.pét-ḥal-li-<sup>1</sup>ia<sup>1</sup> respectively for ANŠE.pit-ḥal-li-ia. 114.4-5 ša for ša. 114.5 šu-a-tú for šú-a-tu. 115 The number 62 is written with six Winkelhaken and two vertical wedges. 115.5 [ak]-šú-ud for ak-šud. 115.1 Winckler's copy for this exemplar has NÍG.GA and áš-lu-lam-ma both fully preserved. 115.4 šu-a-tu for šú-a-tú. 116.4 The copy would suggest that there was only room for one sign between SAG-ia and UGU. 116.4 LÚ.<sup>1</sup>ERIM\*(copy: UD; squeeze: <sup>1</sup>ERIM).MEŠ for ERIM.MEŠ. 117.1 Botta's copy of u GIŠ<sup>1</sup>.<sup>1</sup>az<sup>1</sup> in u GIŠ.<sup>1</sup>az<sup>1</sup>-ma-re-e has the sign UL followed by two parallel horizontal wedges leading into a small damaged area, while Winckler's copy has UL iz; see Fuchs, Khorsabad p. 224. 117.4 u<sub>4</sub>-mi for u<sub>4</sub>-me. 117 KUR.<sup>1</sup>el<sup>1</sup>-li-pi<sup>1</sup>: Botta's copy for pi<sup>1</sup> in ex. 1 has QA, thus likely <sup>1</sup>pi<sup>1</sup>. 118.4 ip-pu-šu for ip-pu-šú. 119.4 e-ṭe-er for e-ṭe-er.

120.4 [te]-me-qi for te-me-qi. 120.4 gi-mil-li-šú for gi-mil-li-šú. 120.4 [e-la]-mé-e for e-la-mi\*(copy: LÍMMU)-i of ex. 1. 121.4 <sup>1</sup>URU<sup>1</sup>.mar-ú-bi-iš-tu for URU.mar-ú-bi-iš-ti. 121.4 da-li-iḥ-tum for da-li-iḥ-tú. 121.4 <sup>1</sup>pa\*(<sup>1</sup>); squeeze: <sup>1</sup>PA<sup>1</sup>)-nu-uš-šú for pa-nu-uš-šú. 122.4 <sup>1</sup>e<sup>1</sup>-bu-uk-ma for i-bu-uk-ma. 123.4 re-eš-šú-ti for re-šú-ti. 123.4 ERIM.MEŠ for ša-ab. 124.4 ŠA for lib-bi. 124.4 ina for i-na. 125.4 [<sup>m</sup>]<sup>1</sup>AMAR.UTU-IBILA\*(copy: RA-UŠ; squeeze: DUMU-<sup>1</sup>UŠ)-SUM.NA for <sup>md</sup>MES-A-SUM.NA. 125.4 ḥa-<sup>1</sup>at<sup>1</sup>-[tu/tú] for ḥat-tu. 125.4 im-qu-su-ma for im-qut-su-ma. 126.4 áš-bu-tu for áš-bu-te. 126.4 1-en for iš-tén. 126.1 Winckler's copy has pu-qu-du fully preserved.

131.1 Winckler's copy indicates LUGAL-ti-<šú>, with space left for the šú, but no indication of damage. 134.1 Winckler's copy omits <sup>d</sup> in <sup>d</sup>GIŠ.BAR. 137.4 omits ú in ba-aṭ-lu-ú-ti. 137.4 KUR.É-<sup>m</sup>ia-ki-ni for KUR.É-<sup>m</sup>ia-kin. 138.4 ù for u. 138.4 KUR.ḥa-at-ti for KUR.ḥat-ti. 139.4 ik-šud-da for ik-šú-da. 139.4 i-na for ina. 139.4 <sup>md</sup>MUATI-SIG<sub>5</sub>-DINGIR.MEŠ for <sup>md</sup>AG-SIG<sub>5</sub>-DINGIR.MEŠ. 139.4 ELAM.MA.KI for KUR.ELAM.MA.KI-i. 139.4 URU.bir-tu for URU.bir-tú.

140.4 ma-a-tú for KUR. 140.4 i-na for ina. 140.4 [ma]-ḥa-zu for ma-ḥa-zi. 140.4 lib-bi for lib-bi. 142.1 Winckler's copy omits NA<sub>4</sub>.AŠ.GÌ.GÌ. 143.4 omits a in KUR.ḥa-ma-a-ni. 143.4 EME.GI, for <sup>1</sup>šú<sup>1</sup>-me-ri of ex. 1. 144.4 NI.TUK.KI for dil-mun.KI. 144.1 Winckler's copy omits <sup>d</sup> in <sup>d</sup>UTU-ši. 145.4 kàd-ra-šú for kàd-ra-šú. 145.4 omits ni in LUGAL.MEŠ-ni. 146.4 <sup>1</sup>ina<sup>1</sup> for i-na. 146.4 UD.MEŠ for u<sub>4</sub>-me. 147.4 i-na for a-na. 147.4 omits ni in LUGAL.MEŠ-ni. 148.4 ina for i-na. 149.1 Winckler's copy omits KUR after dáb-de-e.

151.4 na-gi-šú for na-gi-šú. 154.4 URU.[NINA.(KI)] for NINA.KI. 155.3-4 <sup>1</sup>i<sup>1</sup>-li-<sup>1</sup>im\*(copy: PA; squeeze: <sup>1</sup>IM<sup>1</sup>)-ma and i-li-im-ma respectively for DINGIR-ma. 155.3 bi-bil for bi-bil. 155.3 ŠA-x for lib-bi-ia. 155.5 [URU.BÁD-<sup>m</sup>MAN]-GI.NA for URU.BÁD-<sup>m</sup>MAN-GIN. 157.4 <sup>1</sup>URU\*(copy: GIŠ; squeeze: <sup>1</sup>URU<sup>1</sup>).<sup>1</sup>BÁD\*(copy: LI; squeeze: <sup>1</sup>BÁD<sup>1</sup>)-<sup>m</sup>LUGAL-GI.[NA] for URU.BÁD-<sup>m</sup>MAN-GIN; according to Winckler, the NA is fully preserved. 157.1 Both Botta's and Winckler's copies have AN for ÉŠ in LÚ.NU.ÉŠ.MEŠ. 158.1 Both Botta's and Winckler's copies have ŠEN for BA in AN.GUB.BA.MEŠ; and Winckler's copy omits MEŠ. 158.4 ma-ḥar-šú-un\*(copy: MA-ZA) for ma-ḥar-šú-un. 159.5 ŠIM.<sup>1</sup>LI<sup>1</sup> for GIŠ.LI.

160.1 Botta's and Winckler's copies have DU<sup>1</sup>/UŠ<sup>1</sup>-NU-šin and DU-NU-šin respectively for uš-ši-šin; for the correct reading, see Borger, BiOr 19 (1962) p. 253 sub CAD D p. 185b. No other exemplar preserves the uš, but ši is preserved on ex. 4. 160.4-5 GIŠ.<sup>1</sup>ere-<sup>1</sup>ni and [GIŠ].ere-<sup>1</sup>ni<sup>1</sup> respectively for GIŠ.ere-IGI. 161 me-se-er: exs. 3, 5, have mé-se-er; and ex. 4 has <sup>1</sup>mé<sup>1</sup>?-se-er. 161.3-4 [KUR.ḥa]-at-ti and KUR.ḥa-[at-ti] respectively for KUR.ḥat-ti. 161 li-šá-an: exs. 3 has li-šá-a-ni; ex. 4 has <sup>1</sup>li<sup>1</sup>-šá-a-ni; and ex. 5 has li-šá-ni. 162.4 ḥi-la-a-ni for ḥi-la-an-ni. 162.3 omits ret in mé-ḫ-ret. 162.3-4 omit TA in 50.TA.ĀM. 163.3-4 nam\*(copy: IG)-ri-ri-ri and nam-<sup>1</sup>ri-ri-ri\*(copy: ] ḤA) respectively for nam-ri-ri. 163.3-4 omit GIŠ in GIŠ.tim-me. 163.3 GIŠ.ere-ni for GIŠ.ere-IGI. 163.5 [ku]-bur-šú-[un] for ku-bur-šú-un. 163.3 pirig-gal-le-e for

PIRIG.GAL-*e*. 164.3 KÁ-*ši-in*\* (copy: ŠE-NI) for KÁ.MEŠ-*šin*. 164.1 Both Botta's and Winckler's copies have 𐎠𐎡 for *ša*. 164.3-4 SI.[GAR-*ši*]-*in* and [SI.GAR-*ši*]-*in* respectively for SI.GAR-*šin*. 165.3-4 *še-ru-uš-šin* and *še-ru<sup>1</sup>-uš-šin* respectively for *še-ru-uš-<sup>1</sup>ši<sup>1</sup>-in*. 165.4 *ab<sup>1</sup>-šim<sup>1</sup>-<ma>* for *ab-šim-ma*. 165.3-4 *a-sur-ru-<sup>1</sup>šin*] and *a-sur-ru-šin* respectively for *a-sur-ši-in*. 165.1 Both Botta's and Winckler's copies have UN for *tan in ma-ti-tan*. 167.3-4 *ru-uš-ši-i* for *ru-uš-še<sub>20</sub>-e*. 168.3 *ta*\* (copy: KID)-*mar-tú* for *ta-mar-tu*. 168.3-4 *ú-šam-<sup>1</sup>hir-šú-nu-ti-ma* for *ú-šam-<sup>1</sup>hir-šú-nu-ti-ma*. 169.1 Winckler's copy omits *u*. 169.3-4 *šá* for *ša*.

170.1 *re-še*\* (copy and squeeze: KUR)-*et* for *re-še-et*. 170.3 KUR.MEŠ for KUR.KUR.MEŠ. 171.4 ŠU-*ia<sup>1</sup>* for ŠU.II-*ia*. 176.1 adds an extraneous sign before *ù* in Botta's copy; not present on Winckler's copy. 176.4-5 *u* for *ù*. 176.3 *a-ši-bu-ut* for *a-ši-bu-ti*. 178.1 Winckler's copy omits the sign between LÚ and *pa* in LÚ.EN<sup>7</sup> *pa-<sup>1</sup>ha-ti*. 179.3 *i-na* for *ina*.

186.4 Both Botta's and Winckler's copies have NA for *tu in i-tu-ut*. 188 UD<sup>1</sup>: Only found on ex. 4, where Botta's copy omits the final vertical wedge; possibly <sup>1</sup>UD<sup>1</sup>, but this cannot be confirmed from the squeeze.

194.4 Botta's copy has *lib-bi ŠÚ* [x (x)] *ka<sup>1</sup>-bat-ti*, where ŠÚ could be the first part of *ù* (thus *ka<sup>1</sup>*), while Winckler's copy has *lib-bi-šú na-[mar]* *ka<sup>1</sup>-bat-ti*. The squeeze supports *ka<sup>1</sup>* rather than *na*.

## Text No. 9

30.10 URU.la-*hi-ra* for URU.la-*hi-ri*. 30.4-6, 12, 14, 18, 20 *šá* for *šá*. 30 *ab-šá-an-šú*: exs. 4-5, 10 have *ab-šá-an-šú*; and ex. 6 has *ab*\* (copy: DÚ<sup>1</sup>)-*šá-an-šú<sup>1</sup>*. 30.12, 14 *šá-kin* and *ša-kin* respectively for *šá-kin*. 30.5 BAD<sub>5</sub>.BAD<sub>5</sub> for *dáb-de-e*. 30.10 Botta's copy indicates *dáb<sup>1</sup>-de<sup>1</sup>-e* (basically the first two signs are run together) but collation indicates that there is nothing wrong with the signs. 30 <sup>m</sup>AMAR.UTU-IBILA-SUM.NA: Lyon's copy of ex. 1 omits <sup>d</sup>, but Botta's copy and the original have it present; ex. 6 has <sup>m</sup>[AMAR].UTU-A-SUM.NA; ex. 10 has <sup>m</sup>ŠÚ-A-SUM.NA as per the squeeze though <sup>m</sup> is omitted on Botta's copy; and ex. 20 has <sup>m</sup>AMAR.UTU-A-SUM.NA. 31.10 Despite Botta's copy the *bu* and *lem* in *a-a-bu lem-nu* are written correctly. 31.10, 16 *šá* for *ša*. 31.10 omits *i* in *ki-i*. 31.10 Bezold, Literatur p. 87 indicates that the *la* is missing, but it is in fact present. 31.10 ŠÁ for *lib-bi*. 31 *šar-ru-ut*: ex. 6 has LUGAL<sup>1</sup>-*tu<sup>1</sup>*; and exs. 10, 16 have LUGAL-*ut*. 31 *e-pu-šú-ma*: ex. 6 has *e<sup>1</sup>-pu-uš-ma*; ex. 10 has DÜ-*uš-ma*; and ex. 16 has [x (x)]-*uš<sup>1</sup>-ma*. 31.4, 14 *tak-šú-du* and *tak-šú-da* respectively for *tak-šú-du*. 32 GAL-*tú*: ex. 1 has GAL-*tum*; exs. 6, 12, 18, 20 have GAL-*tu*; and ex. 8 has [ra]-*bi-[x]*. 32.10, 14, 16 ŠU.II-*su* for *qa-as-su*. 32.10, 14, 16 *šu-ru-šú* for *šur-uš*. 32 URU.BAD<sup>m</sup>*ia-ki-in-ni*: ex. 5 omits <sup>m</sup>; and exs. 5, 10, 14, 16 omit *in*. 33.4, 14 *tuk-la-ti-šu* for *tuk-la-ti-šú*. 33.1 *ša*\*: The sign has one extraneous wedge. 33.10 *šá* for *ša*. 34.6, 10, 12, 14 *tam-tim* for *tam-ti*. 34.8 <sup>m</sup>*ú-pe-ri* for <sup>m</sup>*ú-pe-ri*. 34.8 MAN for LUGAL. 34.20 NI.TUK.KI for *dil-mun*.KI. 35.10, 16 *šá* for *ša*. 35.18 *ina* for *i-na*. 35 *šá*: ex. 4 has *šá<sup>7</sup>*; and exs. 5-6, 8, 12, 14, 18, 20 have *ša*. 35 *nu-ú-ni*: exs. 6, 10, 12 have *nu-u-ni*; and ex. 14 omits *ú*. 36.1 *ta-mar-tuš*: The scribe appears to have written two horizontal wedges at the end of the *mar* sign, and then effaced the lower one. 36.5-6, 10, 12, 14, 20 *it-pe-šú* for *it-pe-šu*. 37 *muš-ta-bil*: ex. 8 has *muš<sup>1</sup>-ta\** (copy: IA)-*bil*; and ex. 20 has *muš-ta-bil*. 37 *da-mi-ig-ti*: ex. 12 omits *ig*; and ex. 10 has MUNUS.SIG<sub>7</sub>. 37.10 *šá* for *ša*. 37.8 *šu-šú-ub* for *šu-šú-ub*. 38.18 *u* for *ù*. 38.1 *qi-šub-bé-e* for *ki-šub-bé-e*. 38.18 *šip-pa-a-te* for *šip-pa-a-ti*. 39 *ú-zu-un-šú*: ex. 6 has *ú-zu-un-šú*; ex. 10 has *us-su-un-šú*; and ex. 20 has *ú-zu\** (copy: SI)-*šú-un<sup>7</sup>*. 39.14 *u<sub>4</sub>-me-šú-ma* for *u<sub>4</sub>-me-šú-ma*. 39.5-6, 12, 14, 18, 20 *šá* for *šá*; ex. 1 *šá*\*: The scribe appears to have written BUR, and then effaced the three initial horizontal wedges.

40.6, 10, 20 KUR-*i* for KUR-*e*. 40 *ni-na-a*.KI: ex. 6 has NINA\*(copy: AB×ZA).KI; exs. 8, 10, 12, 20 have NINA.KI; and ex. 18 has NINA\*(copy: AB×ZA).KI<sup>1</sup>. Bezold, Literatur p. 87 indicates that ex. 10 omits the KI, though it is found on Botta's copy.

40.10, 12 DÛ-uš-ma and DÛ-ma respectively for *e-pu-uš-ma*. 40.10 Bezold, Literatur p. 87 indicates that the form of the URU before BÂD has an extra vertical wedge, but this is not the case. 40 URU.BÂD-<sup>m</sup>MAN-GIN: Lyon's copy of ex. 1 omits <sup>m</sup>, but Botta's copy and the original have it present; ex. 5 has [URU.BÂD-<sup>m</sup>]LUGAL-GI.NA; ex. 8 has URU.BÂD-<sup>m</sup>MAN-GI.NA; and exs. 10, 14, 18 have URU.BÂD-<sup>m</sup>LUGAL-GI.NA. 41 GIŠ.KIRI<sub>6</sub>.MAḤ-ḥu: ex. 5 omits ḥu; and for ex. 10, Bezold, Literatur p. 87 indicates PA rather than the GIŠ of Botta's copy, but the following sign simply runs right into the GIŠ. 41 ša: ex. 1 has šá; and ex. 10 omits it. 42.10 KUR.ḥa-at-ti for KUR.ḥat-ti. 42.6, 10, 18 KUR-i for KUR-e. 42.12 DÛ-šu-un for DÛ-šú-un. 42 ḥu-ur-ru-šu: ex. 5 has ḥu-ur<sup>1</sup>-ru-šú; exs. 6, 10 have ḥu-ur-ru-šú-ma; exs. 12, 14 have ḥu-ru-šú-ma; and ex. 18 has ḥu-ur-<sup>1</sup>ru<sup>1</sup>-šú. 43.10 šá for the first ša. 43.6 la-bi-ru-ú-ti for la-bi-ru-ti. 43.10, 18 šá for the second ša. 43.31 omits u in el-la-mu-u-a. 43.6 be-lu-tu for be-lu-ut. 44.1, 10 e-pu-uš-šu-ma and e-pu-uš-ma respectively for e-pu-šú-ma. 45.10 ŠA-šú-nu for lib-bi-šú-nu. 45.13 a-šar-šu for a-šar-šú. 45.18 ú-mas-si-ma for ú-mas-ši-ma. 45.8, 18 šu-šú-ub<sup>1</sup>-šu and šu-šú-<sup>1</sup>ub<sup>1</sup>-šú respectively for šu-šú-ub-šú. 46.8, 10 ÍD-šú\*(copy: MA) and ÍD-šú respectively for ÍD-šú. 46 šip-pa-te-šú: ex. 6 has šip-pa-a-ti-šú; ex. 8 has šip-pa-te-šú; exs. 10, 13, 20 have šip-pa-ti-šú; and ex. 14 has šip-<sup>1</sup>pa<sup>1</sup>-ti-šú. 46.1 omits na in a-na. 47.8 šá-a-ši for šá-a-šú, which is possibly modern copyist error of ŠI for ŠÚ. 47 zuq-qú-ur: The qú of ex. 10 omits the top horizontal. 48.23 omits ia in be-lu-ti-ia. 48 mu-šu: exs. 5, 10, 14 have mu-šú; and ex. 8 has mu-ši, which is possibly modern copyist error of ŠI for ŠÚ. 48.10 aš-rim\*(text: KU)-ma for aš-rim-ma. 49.6, 13, 15 še-me-e for še-mé-e. 49.13, 15 u<sub>4</sub>-me for u<sub>4</sub>-mu.

50.15 ina for i-na. 51.10 Despite Botta's copy, the al in GIŠ.al-lu is fine. 51 ú-šat-ri-ik-ma: The squeeze of ex. 5 indicates šat<sup>1</sup>, not <šat> of Botta's copy. 52 li-bit-tu: exs. 13, 15 have li-bit-tú; ex. 19 has <sup>1</sup>li<sup>1</sup>-bit-ti\*(copy: MEŠ<sup>7</sup>); and for ex. 10, as in Botta's copy, the tu has a slightly anomalous form, omitting one horizontal wedge. 52 a-ra-aḥ: Bezold, Literatur p. 87 indicates a-i-na-aḥ for ex. 10, but the ra is fine. 53.15 šá for ša; and for ex. 10, the sign šá\* (as in Botta's copy) omits the top wedge. 53 SAG.DU: ex. 5 omits SAG; exs. 6, 13 have qaq-qa-di; ex. 9 has qaq\*(copy: BA)-qa-di; and ex. 19 has qaq-<sup>1</sup>qa-di. 54.7 i-na for a-na. 54.10 ri-mi-ti-šú-na for ri-mi-ti-šú-na. Botta's copy has ri-mi-ti-šú-na, but this is not correct. 54.15, 19 i-pat-ta-qa and ú-[pat]-ti-<sup>1</sup>qa<sup>1</sup> respectively for i-pat-ti-qa. 56.3, 9 <sup>1</sup>pe<sup>1</sup>-el-šú and pe-el-šú respectively for pe-el-šú. 56 uš-še-e-šú: ex. 3 has uš-še-e-šú; ex. 5 has <sup>1</sup>uš<sup>1</sup>-še-[e]-šú; and ex. 15 omits e. 57.25 pa-rak-ku for pa-rak-ki. 58.7, 11, 25 šá for ša. 58.9 šur-šú-du for šur-šú-du. 59 <sup>d</sup>30: exs. 3, 7, 9, 13, 15, 19 have <sup>d</sup>EN.ZU; ex. 5 has <sup>d</sup>EN.[ZU]; and ex. 21 has <sup>d</sup>EN.<sup>1</sup>ZU<sup>1</sup>. 59 <sup>d</sup>MAŠ: exs. 3, 25, 27 have <sup>d</sup>nin-urta; and ex. 19 has <sup>d</sup>\* (copy: LA)nin-<sup>1</sup>urta<sup>1</sup>.

60 qer-bu-uš-šú: ex. 3 has qer-bu-<sup>1</sup>uš-šú<sup>1</sup>; and exs. 7, 15, 27 have qer-bu-uš-šú. 60.11 omits MEŠ in É.GALMEŠ. 61 GIŠ.mu-suk-kan-ni: ex. 5 has [GIŠ.MES.MÁ].<sup>d</sup>KAN.NA<sup>1</sup>; exs. 7, 13, 15, 27 have GIŠ.MES.MÁ.KAN.NA; and in ex. 25, suk is missing one interior vertical wedge. 61.11, 25 GIŠ.ere-ni for GIŠ.ere-IGI. 61.15, 25 GIŠ.dáp-ra-ni for GIŠ.dúp-ra-ni. 62 GIŠ.ŠIM.LI: exs. 3, 5, 7, 9, 11, 13, 21, 27 omit GIŠ; the squeeze indicates (with Botta's copy and against Pohl's copy [RPARA 19]) that ex. 11 omits GIŠ; and ex. 25 omits ŠIM. 62 u: ex. 3 has <sup>1</sup>ú<sup>1</sup>; and exs. 9, 13, 19, 21, 25 have ú. 62.1 GIŠ.bu-uṭ-nu for GIŠ.bu-ṭi-ni. 62.27 a-na for i-na. 62.3 qí-bi-ti-šú-nu for qí-bi-ti-šú-nu. 63 šar-ru-ti-ia: exs. 11, 25 have LUGAL-ti-ia; ex. 15 has MAN-ti-ia; ex. 23 has <sup>1</sup>LUGAL-ti-ia<sup>1</sup>; and ex. 27 has <sup>1</sup>MAN-ti-ia<sup>1</sup>. 64 GIŠ.ÜR.MEŠ: exs. 15, 21 have GIŠ.gu-šú-re; and ex. 19 has [GIŠ.gu]<sup>1</sup>-šú<sup>1</sup>-re. 64 GIŠ.ere-IGI: ex. 3 has <GIŠ>.<sup>1</sup>ere-ni<sup>1</sup>; exs. 11, 23, 25 have GIŠ.ere-ni; and ex. 19 has <GIŠ>.<sup>1</sup>ere-IGI<sup>1</sup>. 65.21 omits ni in GIŠ.mu-suk-kan-ni. 65.13, 15, 27 me-ser for mé-se-er. 65.19 <sup>1</sup>nam-ra<sup>1</sup> [(x x)] for nam-ri. 66.25 The ta in ú-rat-ta-a is missing one horizontal wedge. 67.25 omits pa in ap-pa-a-ti. 67.15 KUR.ḥat-te for KUR.ḥat-ti. 67 ša: ex. 3 has <sup>1</sup>šá<sup>1</sup>; and exs. 11, 25 have šá. 67.1, 25 ina for i-na. 67.11, 23, 25 EME for li-šá-an. 68.7 omits KI in MAR.TU.KI. 68 ḥi-la-ni: exs. 4, 7, 9, 11, 13, 21, 25, 27 have ḥi-la-an-ni; ex. 5 has ḥi-la-an-<sup>1</sup>ni<sup>1</sup>; ex. 15 has <sup>1</sup>ḥi<sup>1</sup>-la-a-ni; and

ex. 19 has ḥi\*(copy: ŠÚ)-la-an-ni. 68.7, 11, 15, 25, 27 i-šá-as-šú for i-šá-as-šú. 69.5 mé-eh-<sup>1</sup>ret<sup>1</sup>, not mé-eh-<sup>1</sup>ret- of copy. 69 KÁ.MEŠ-šú-in: ex. 3 has KÁ.MEŠ-<sup>1</sup>šin<sup>1</sup>; ex. 7 has KÁ.MEŠ-šin; ex. 19 omits šú; and ex. 25 has ba-bi-šú-in.

70.3, 5, 7, 9, 13, 19, 25, 27, and probably 21 (restored via spacing) add MEŠ after UR.MAḤ; Winckler's copy has UR.MAḤ-ḥe, but no known exemplar has this reading. 70 tu-<sup>1</sup>a-a-me: exs. 2, 11 have tú-<sup>1</sup>a-a-me; and ex. 3 omits <sup>1</sup>a. 70.2 The GÚ portion of GUN omits the two initial small vertical wedges (as on Botta's copy). 71.25 šá for ša. 71.2 omits i-na. 71.2 omits á in <sup>d</sup>nin-á-gal. 71 ip-pat-qu-ma: exs. 7, 27 have ip-pat-qu-ú-ma; and ex. 19 has ip-pat-qu-[(ú)]-ma. 72.5 (against Botta copy), 25 mal-lu-u for ma-lu-ú. 72.7, 11, 13, 15, 25, 27 add GIŠ before tim-me. 72.11, 26 GIŠ.ere-ni for GIŠ.ere-IGI. 72 šu-ta-ḥu-te: in ex. 2, the Winkelhaken of ḥu has not been cut out fully but is nonetheless visible on the original; ex. 4 has šu-ta-<sup>1</sup>hu<sup>1</sup>-ti; exs. 7, 9, 11, 13, 19, 21, 25, 27 have šu-ta-ḥu-ti; and ex. 15 has šu-ta-ḥu-<sup>1</sup>ti<sup>1</sup>. 72.15, 27 šá for ša. 72.2 omits TA in NINDA.TA.ĀM. 73 ku-bur-šú-nu: ex. 5 has ku-<sup>1</sup>bur<sup>1</sup>-šú-un; exs. 7, 11, 21, 27 have ku-bur-šú-un; and ex. 15 has ku-bur-šú-nu. 74.3, 7, 9, 27 add GIŠ before dáp-pi. 74 ba-bi-šú-in: ex. 3 has ba-bi-šin; ex. 5 has <sup>1</sup>KÁ<sup>1</sup>.MEŠ-šin<sup>1</sup>; ex. 7 has KÁ.MEŠ-šin; exs. 11, 15, 25, 27 have KÁ.MEŠ-šú-in; and ex. 23 has <sup>1</sup>KÁ.MEŠ<sup>1</sup>-šú-in. 75.2 adds an extraneous u (an erasure?) between šad and di of šad-di. 75 šá: exs. 3-4, 7, 13, 15, 21, 25, 27 have ša; and exs. 5, 19 have <sup>1</sup>šá<sup>1</sup>. 75.11, 25 add MEŠ after NA<sub>4</sub>. 75 KUR-i: ex. 9 omits KUR; and ex. 27 has KUR-e. 76.25 The tiq in ap-tiq-ma has only one vertical wedge at the beginning of the sign. 77 SI.GAR-šú-in: ex. 3 has SI.GAR-<sup>1</sup>šin<sup>1</sup>; ex. 5 has SI.GAR-<sup>1</sup>šin<sup>1</sup>; and exs. 9, 15, 25, 27 have SI.GAR-šin. 77 NA<sub>4</sub>.pi-li: ex. 3 has NA<sub>4</sub>.<sup>1</sup>pi<sup>1</sup>-[(i)]-<sup>1</sup>li<sup>1</sup>; and exs. 11, 25 have NA<sub>4</sub>.pe-el. 78 qa-ti-ia: ex. 9 has ŠU-II: ex. 23 has ŠU.II-<sup>1</sup>ia<sup>1</sup>; and exs. 25, 27 have ŠU.II-ia. 78 še-ru-uš-šin: Botta's copy of ex. 5 has še-ru-uš-<<ŠÚ>>-šin and the squeeze suggests še-ru-uš-(x)-šin; exs. 15, 27 have še-ru-uš-šú-in; and in ex. 25, the še omits one horizontal wedge. 78.25 a-sur-ri-šin for a-sur-ru-šú-in. 79.9 omits a in a-na. 79.9 omits U in GĒŠ.U. 79.5 Botta's copy has <1> UŠ\*(copy: MAL), while the squeeze indicates 1 <sup>1</sup>UŠ<sup>1</sup>.

80 mi-še-eh-ti: ex. 21 omits ti; and ex. 25 has [mi]<sup>1</sup>-šú-ṭi-ti. 80.3 adds an extraneous MEŠ after mi-še-eh-ti. 80.3, 15 BÂD-šu for BÂD-šú. 80 e-li: exs. 5, 25 have UGU; and exs. 7, 27 have i-li. 81.27 ú-šar-še-da for ú-šar-šú-da. 81 te-em-me-en-šú: ex. 3 has <sup>1</sup>te-em-me-en<sup>1</sup>-šú; ex. 7 omits em; exs. 9, 13, 15, 27 have te-em-me-en-šú; and ex. 19 has te-em-me-<sup>1</sup>en<sup>1</sup>-šú. 81.3 <<12>> after i-na. 81 ú: exs. 2, 13, 15 omits it; ex. 9 has u; and ex. 11 has [u]/<-ú>. 81.5, 7, 9, 11, 13, 15, 19, 21, 23 omit a in ar-ka-a-ti. 82.4 me-<sup>1</sup>eh<sup>1</sup>-[ret] for mé-eh-ret. 82 ap-te-e-ma: ex. 13 has ap-te<sub>9</sub>-e-ma; and exs. 15, 21 omit e. 83.19 <sup>d</sup>šá-maš for <sup>d</sup>UTU. 84.11, 25 šá for ša. 85.15, 25 mu-di-šá-at and mu-diš-šá-<sup>1</sup>at<sup>1</sup> respectively for mu-di-šá-at. 85.5, 7, 11, 13, 15, 19, 23, 25, 27 <sup>d</sup>EN.LÍL for <sup>d</sup>BAD. 86.9 u for ú. 86.11, 15, 23, 25, 27 šá for ša. 86 <sup>d</sup>a-nu: ex. 7 has <sup>d</sup>a\*(copy: ZA)-num; and exs. 13, 15, 21, 25, 27 have <sup>d</sup>a-num. 87 qa-ti-ia: ex. 5 has ŠU.II-ia; and exs. 7, 11, 13, 15, 25 have ŠU.II-ia. 88 ú: exs. 5, 11, 19, 23 have u; and ex. 9 (via spacing) has <sup>1</sup>u<sup>1</sup>. 88.5, 19 <sup>d</sup>INANNA for <sup>d</sup>iš-tar. 88.11, 15, 21, 23, 25 šá for ša. 88 IM.MAR.TU: in ex. 2, the MAR sign was originally written as copied by Botta, but the extra horizontal wedge at the end of the sign was then erased, resulting in a correct form; and ex. 19 adds an extraneous KUR sign between IM and MAR. 88.21 muš-te-šir\*(copy and squeeze: SAL) for muš-te-šir. 88.19 <sup>1</sup>nag<sup>1</sup>-bi-šú for nag-bi-šú. 89.11, 21 u for ú. 89 ša: exs. 3, 21 have <sup>1</sup>šá<sup>1</sup>; exs. 5, 7, 13, 15, 17, 19, 23 have ša; and ex. 9 has ša\*(copy: UŠ).

90 IM.U<sub>18</sub>.LU: ex. 3 has IM.<sup>1</sup>U<sub>18</sub>.LU<sup>1</sup>; exs. 5, 11, 15, 17, 27 have IM.U<sub>18</sub>.LU; ex. 7 has IM.U<sub>18</sub>.LU; and ex. 19 has IM.U<sub>18</sub>\*(copy: LA).<sup>1</sup>LU<sup>1</sup>. 90 pa-le-e: exs. 11, 23 have BALA-e; and exs. 13, 15, 28 have BALA.MEŠ. 90 e-pi-šú-šú: ex. 5 has e-pi-šú-<sup>1</sup>šú<sup>1</sup>/šú<sup>1</sup>; ex. 7 has e-pi-šú-šú; exs. 13, 15, 27-28 have e-pi-šú-šú; and ex. 25 has e-pi-šú-šú<sup>1</sup>. 91 um-ma-ni-šú: ex. 3 has um-ma-ni-šú<sup>1</sup>; ex. 7 has [ERIM].ḤI.A\*(copy: ZA)-šú; exs. 11, 15, 23, 27-28 have ERIM.ḤI.A-šú; ex. 13 has um-ma-ni-šú; and ex. 21 has [um-ma]-ni-šú. 91 BÂD-šú: ex. 5 has BÂD-šú<sup>1</sup>/šú<sup>1</sup>, though Winckler's copy omits the

šú<sup>1</sup>/šú<sup>1</sup>; and exs. 9, 27 have BĀD-šú. 91.25 *te-em-me-en* for *te-me-en*. 91 *a-li-šu*: exs. 3, 5, 9, 19 have *a-li-šú*; exs. 11, 15, 23, 25, 28 have URU-šú, and exs. 13, 27 have URU-šú. 92.7 omits *la* in *la-bar* (though possibly [*la-bar*]). 92.7, 15, 27, 28 *u-me* for UD.MEŠ. 92 *ru-qu-ú-ti*: exs. 1, 17 omit *ú*; and ex. 5 has SÜ.MEŠ. 92 *šal-ḥu-šú*: exs. 3, 7 have *šal-ḥu-ú-šú*; ex. 4 has [*šal*]-*ḥu-ú-šú*; exs. 5, 9, 11, 17, 21, 23, 25, 27 have *šal-ḥu-ú-šú*; and ex. 19 has *šal-ḥu<sup>1</sup>-ú-šú*. 92 *li-šá-nu*: exs. 5, 11, 13, 15, 23, 25, 27–28 have EME; ex. 7 has 'EME'; and ex. 17 has EME\*(copy: NAG). 93.5, 11, 15, 17, 28 *a-ḥi-tú* for *a-ḥi-tu*. 93 *a-ši-bu-ut*: ex. 7 has [*a-ši*]-*bu<sup>1</sup>-ti*; exs. 13, 15, 28 have *a-ši-bu-ti*; and ex. 27 has *a-ši-bu-tu*. 93.4–5 *u* for *ù*. 93.17 KUR for *ma-a-ti*. 93 *ma-la*: exs. 11, 13, 23, 27–28 have *mal*; and for ex. 15, Botta's copy, which has *mal*, is correct, while Pohl's copy, which indicates *mà-<sup>1</sup>la<sup>1</sup>*, is erroneous. 93.2 *ir-te-u-u*, with *u* omitted on Botta's copy. 94.15, 28 *gi-im-ri* for *gim-ri*. 94.4, 11, 23 *ša* for *ša*. 94 *zi-kir*: ex. 7 has *zik-<sup>1</sup>ri<sup>1</sup>*; exs. 11, 13, 15, 27–28 have *zik-ri*; and ex. 17 has [*zik*]-*ri<sup>1</sup>*. 94 *ina*: exs. 3, 5, 7, 11, 13, 15, 25, 27–28 have *i-na*; ex. 17 has *i-na<sup>1</sup>*; ex. 19 has *i<sup>1</sup>-na<sup>1</sup>*; and ex. 23 has *i<sup>1</sup>-na*. 94.3, 9, 17 *mé-tel* for *me-tel*. 95 *aš-šur*.KI: The copy for ex. 21 has <*aš*>-*šur*.KI, but the squeeze has *aš-šur*.<sup>1</sup>KI<sup>1</sup>; and ex. 28 omits KI. 96.2 The *uz* in *šu-ḥu-uz* has five slanted wedges at the beginning (2+3) rather than four. 96.5 *ši-bit-te* for *ši-bit-ti*. 96.13 adds MEŠ after DINGIR. 97.3, 9, 13 *ú-ma<sup>1</sup>-e-er-šu-nu-ti* for *ú-ma<sup>1</sup>-e-er-šú-nu-ti*. 97 *ul-tu*: ex. 5 has *ul-<sup>1</sup>tú<sup>1</sup>*; and exs. 7, 11, 13, 15, 28 have *ul-tú*. 97 *ši-pir*: exs. 7, 11, 13, 15, 25, 27–28 have *ši-ip-ri*; and ex. 23 has *ši-ip-ri<sup>1</sup>*. 98.28 *ú-qat-tú-ú* for *ú-qat-tu-ú*. 99.11, 13, 15, 27–28 omit *e* in *aq-re-e-ma*. 99.2 omits *ta* in *ta-šil-ta-ši-na*. 99.15 The *kun* in *aš-kun* is perfectly correct (with Botta's copy and against Pohl's copy). 99.5, 11, 15, 23, 28 *ša* for *ša*. 99 first <sup>d</sup>UTU-šú: exs. 13, 15 have <sup>d</sup>šam-šú; and ex. 28 has <sup>d</sup>šam-šú. 99.2 The *ù* is ŠÚ-LU. 99 <sup>d</sup>UTU-šú: exs. 13, 15, 28 have <sup>d</sup>šam-šú; and ex. 19 omits <sup>d</sup>.

100.13 *ša-ti-na* for *šá-ti-na*. 100.2 There are the ends of two horizontal wedges at the end of *mar* in *ta-mar-ta-šú-nu*, rather than one. 100.4 possibly [*ta-mar-ta*]-*šú-[nu]*, but placement not certain. 100 *ka-bit-tú*: ex. 3 has [*ka*]-*bit-tu<sup>1</sup>*; ex. 4 has [*ka-bit*]-*tu<sup>1</sup>*; exs. 5, 19 have *ka-bit-tu<sup>1</sup>*; exs. 7, 13, 27 have *ka-bit-tu*; and ex. 9 has <sup>1</sup>ka\*(copy: ] <sup>1</sup>ḤU)-*bit-tu*. 101 *šá-a-šu*: Winckler's copy omits *a*; exs. 3, 11, 15, 19, 21, 27–28 have *šá-a-šú*, and ex. 23 has [*šá*]-*a<sup>1</sup>-šú*. 101.5 [*qa*]-*ti-[ia]* for ŠU.II-*ia*. 101 *li-im-ma-ḥi-ir-ma*: ex. 3 has <sup>1</sup>lim<sup>1</sup>-*ma-[ḥi]-ir-[ma]*; ex. 7 has [*lim*]-*ma-ḥi-ir-<sup>1</sup>ma*; exs. 9, 21 omit the final *ma*; ex. 11 has *lim-ma-ḥi-ir-<sup>1</sup>ma<sup>1</sup>*; exs. 13, 15, 25, 28 have *lim-ma-ḥi-ir-ma*; ex. 19 has *lim-ma-ḥi-ir-<sup>1</sup>ma*; ex. 23 has *lim-<sup>1</sup>ma<sup>1</sup>-[ḥi-ir-ma]*; and ex. 27 has *lim-<sup>1</sup>ma-<sup>1</sup>ma-ḥi-ir-<sup>1</sup>ma*. 101 *pa-nu-uš-šú-un*: ex. 5 has <sup>1</sup>pa<sup>1</sup>-*nu-uš-šú-un*; ex. 9 has [*pa-nu*]-*uš-šú-un*; and ex. 25 has *pa-nu-uš-šú-un*. 102.13, 15, 28 *a-ši-ib* for *a-šab*. 102.19 omits *iš* in *ki-iš-ši-šú-un*. 102.19 *u* for *ù*. 102 *kun-nu*: exs. 3, 5, 19 have GIN; ex. 7 has <sup>1</sup>ku<sup>1</sup>-*un*; and exs. 11, 13, 15, 27–28 have *ku-un*. 102.25 *pa-li-ia* for BALA.MEŠ-*ia*. 102.19, 21 *liq-bu-u* for *liq-bu-ú*. 102.11 *du-ur* for *du-ri*. 103.11, 15, 21, 23, 28 *ša* for *ša*. 103 *qa-ti-ia*: exs. 3, 28 have ŠU.II-*ia*; ex. 19 has ŠU.II-*ia<sup>1</sup>*; and ex. 23 has <sup>1</sup>ŠU<sup>1</sup>.II-*ia<sup>1</sup>*. 103 *ú-nak-ka-ru-ma*: exs. 13, 27 have *ú-nak-ka-ru-ú-ma*; and ex. 19 has *ú-nak-ka-ru-[(ú)]-<sup>1</sup>ma<sup>1</sup>*. 103.28 The final *ú* in *ú-saḥ-ḥu-ú* is in the form KID. 104.5 Against Botta's copy this exemplar has *ú-šam-sa-[ku]-ma*. 104.3 *si-ma-<sup>1</sup>te-ia<sup>1</sup>* for *si-ma-ti-ia*. 104.2 The *ú* in *ú-pa-áš-šá-tu* is in the form KID. 104 <sup>d</sup>30: ex. 5 has <sup>rd</sup>[EN].<sup>1</sup>ZU<sup>1</sup>; ex. 9 has <sup>d</sup>EN<sup>1</sup>.<sup>1</sup>[ZU]; and ex. 19 has <sup>d</sup>EN.ZU. 104.5 <sup>rd</sup>šá<sup>1</sup>-*maš* for <sup>d</sup>UTU. 105.11 *u* for *ù*. 105.3 Botta's copy has *a-KU-bi-šú* with wide spaces between the signs and no indication of damage; the passage is not clear on the squeeze, but might be *a-šú<sup>1</sup>-ib<sup>1</sup> [(x)] x-<sup>1</sup>bi<sup>1</sup>-šú*. 105.21 *lib-bi-šú* for *lib-bi-šú*. 105.13 MU-šú for MU-šú. 105.9 NUMUN-šú\*(copy: MA) for NUMUN-šú. 105.2 *ina* for *i-na*. 105.27 *ma-a-ti* for KUR. 105 *lil-qu-tú-ma*: ex. 5 has [*lil*]-*qu<sup>1</sup>-tu-ma<sup>1</sup>*, ex. 7 has [*lil*]-*qu-tu-ú-ma*; exs. 9, 19 have *lil-qu-tu-ma*; ex. 13 has *lil-qu-tu-ú-ma*; ex. 21 has [*lil-qu-tu*]-*ma*; ex. 23 has [*lil-qu*]-*tu-<sup>1</sup>ma<sup>1</sup>*; and ex. 27 has *lil-qu-tú-ú-ma*. 106 *i-na*: ex. 3 has <sup>1</sup>ina<sup>1</sup>; ex. 19 has *ina*\*(copy: ḤAL); and ex. 21 has *ina*. 106.13, 15, 28 LÚ.KUR-šú for LÚ.KUR-šú. 106.2, 21 *li-še-ši-bu-šú* for *li-še-ši-bu-uš*.

## Text No. 10

1.3 AŠ for É.GAL; possibly [É].<sup>1</sup>GAL<sup>1</sup> or 'É'.<sup>1</sup>[GAL] but the Monument de Ninive copy would not support this. 1.2 <sup>m</sup>MAN-GI.NA for <sup>m</sup>LUGAL-GI.NA. 1.3 GAL-*ú* for GAL-*u*. 2.2 MAN for LUGAL. 2.3 <LUGAL *kiš*>-*šá-ti* in Monument de Ninive copy, but IdF copy suggests [LUGAL/MAN *kiš*]-*šá-ti*. 2.2–3 *kiš-šá-ti* and <*kiš*>-*šá-ti* respectively for *kiš-šá-tim*. 3.2. **1** Copy of the traces on the squeeze for šu in URU.<sup>a</sup> a-ma-qa-[x]-ru-šu:

### Text No. 41

**1** <sup>m</sup>MAN-GI.NA: exs. 1, 6, 9, 13, 15, 17, 21–22, 40, 42 have <sup>m</sup>MAN-GIN; and exs. 7, 11, 44 have <sup>m</sup>LUGAL-GI.NA. **1** GAR: exs. 11, 44

have šá-ak-ni; and ex. 42 has GAR-nu. **1.11**, 44 <sup>dt</sup>EN.<LÍL> and <sup>dt</sup>EN.LÍL respectively for <sup>dt</sup>BAD. **1.6** omits NU in NU.ÈŠ. **1.28** omits first MAN. **1.7** LUGAL<sup>r</sup> for first and second MAN. **1.3** omits third MAN. **1.2**, 17 omit KI in aš-šur.KI. **2** šá-kin: exs. 1, 3, 8, 10, 13–15, 26–27, 29–30, 44, 46 have šá-ki-in; ex. 11 has šá\* (copy: A)-ki-in; and ex. 45 has šá<sup>r</sup>-ki<sup>r</sup>-in. **2** šu-ba-re-e: ex. 7 has šú-ba-re-e; ex. 15 omits e; and the šu in ex. 17 omits the final vertical wedge. **3.6** ZIMBIR\* (copy: <UD>.KIB.NUN).KI for ZIMBIR.KI. **3.46** The EN sign (as part of NIBRU) has two horizontal wedges. **3** ḥa-a-tin: ex. 2 omits a; and ex. 22 adds an extraneous ti between a and tin. **3** en-šu-te-šú-nu: exs. 1, 11, 45 have en-šu-ti-šú-nu; ex. 2 has [en-šu-ti-šú]-<sup>r</sup>un<sup>r</sup>; exs. 3, 6 have en-šu-te-šú-nu; ex. 8 has en-šu-te-šú-nu; ex. 9 has en-šú-te-šú-nu; ex. 10 has en-šu-ti-šú-nu; ex. 14 has [en]-šú-ti-šú-nu; exs. 29, 31 have en-šú-ti-šú-nu; ex. 35 has en-šú<sup>r</sup>-ti-šú-nu; and ex. 42 has <sup>r</sup>en<sup>r</sup>-šú<sup>r</sup>-ti<sup>r</sup>-[šú-nu]. **4.7** omits a in a-ke-e. **4.1** The li in mu-šal-li-mu appears to omit the final vertical wedge. **4** ḥi-bil-ti-šú-un: The bil in ex. 1 has two superimposed vertical wedges rather than one vertical wedge at end; ex. 2 has ḥi-bil-tú-šú-un; ex. 3 omits šú; exs. 8, 13, 44, 46 have ḥi-bil-ti-šú-un; ex. 11 has ḥi-bil-<ti>-šú-un; the bil in ex. 15 may be an error of modern copyist for bil; ex. 16 omits ti; ex. 22 has ḥi-bil-te-šú\* (text: NU)-un; ex. 26 has [ḥi-bil]-<sup>r</sup>ti<sup>r</sup>-šú-nu; exs. 27, 38 have ḥi-bil-ti-šú-nu; the ti in ex. 28 appears to omit the vertical wedge; ex. 29 has ḥi-bil-ti-šú-nu; ex. 31 has ḥi-bil<sup>r</sup>-ti-šú<sup>r</sup>-<sup>r</sup>un<sup>r</sup>; and ex. 42 has ḥi-bil-ti-šú<sup>r</sup>-<sup>r</sup>un<sup>r</sup>. **4.5** ka-ši-ir for ka-šir. **5** ki-din-nu-ut: ex. 1 has ki-din-nu-tu; exs. 6, 9, 11, 28, 44–45 have ki-din-nu-ti; exs. 8, 46 have ki-din-nu-te; ex. 10 has ki\* (copy: KU)-din<sup>r</sup>-nu-ti; and ex. 22 has ki-din-x\* (erased UD?) -nu-ut. **5** ba-ti-il-tu: ex. 1 has ba-<ti>-il-tú; exs. 3–4, 6–7, 10–11, 14, 17–18, 29, 31, 44, 46 have ba-ti-il-tú; ex. 8 has ba-ti-il<sup>r</sup>-tú; the il in ex. 22 omits vertical wedges at end of sign; ex. 23 has [ba-ti]-<sup>r</sup>il<sup>r</sup>-tú; ex. 27 has ba-<sup>r</sup>ti-il<sup>r</sup>-tú; and ex. 45 has <sup>r</sup>ba-ti-il<sup>r</sup>-tú. **5** mu-šá-áš-ši-ik: ex. 1 omits ší; ex. 6 omits áš; and ex. 17 has mu-šá-áš-ší\* (text: ŠÚ)-ik. **5.12** omits ki in tup-šik-ki. **6** BĀD.AN.KI: ex. 6 adds an extraneous RA between AN and KI; ex. 12 adds URU before it; and AN in ex. 27 has two superimposed vertical wedges instead of one vertical wedge. **6.44** mu-šap-ši-ik\* (two angled wedges added later?) for mu-šap-ši-ḥu. **6** UN.MEŠ-šú-un: exs. 1–2 omit un; exs. 6, 17 omit šú; exs. 8, 10, 13, 15, 29, 46 have UN.MEŠ-šú-un; ex. 31 has UN.II.<sup>r</sup>MEŠ<sup>r</sup>-šú-un; ex. 41 adds an extraneous nu between šú and un; and ex. 42 has UN.<sup>r</sup>MEŠ-šun<sup>r</sup>. **6.27** The a in an-ḥa-a-ti is simply two vertical wedges next to one another. **6.17** le<sup>r</sup>-ú-u for le<sup>r</sup>-i. **6.22** mal\* (text: NI)-ki for mal-ki. **7** URU.ḥar-ra-na: exs. 1, 8 omit ra; ex. 9 has <URU>.ḥar-ra-an; ex. 11 has URU.ḥar\* (copy: ḤI-AN)-<ra>-na; ex. 12 has URU.KASKAL-ni; ex. 27 has <URU>.ḥar-ra-ni; and ex. 35 has URU.KASKAL. **7** AN.DÛL-la-šú: The <sup>r</sup>šú<sup>r</sup> in ex. 1 appears to have two vertical wedges; ex. 3 has AN.DÛL-la-a-šú; and ex. 13 has AN.DÛL-la-šú. **7** it-ru-šu-ma: exs. 10, 44 have it-ru-šu-ú-ma; and ex. 11 has it-ru-šu\* (copy: NIN)-ú-ma. **7.9** omits i in ki-i. **8** iš-tu-ru: ex. 27 has iš-tu-ra; and ex. 35 adds an extraneous ru<sup>r</sup> between tu and ru. **8** za-kut-su: ex. 27 has za-ku-su; the su in ex. 35 only has one vertical wedge; and ex. 45 has za-kut-su-un. **8.1**, **7** LUGAL for MAN. **8** ul-tu: ex. 6 has ul\* (copy: AMAR)-<tu>; exs. 8, 46 have TA; ex. 10 has ul\* (text: TI)-<tu>; and ex. 40 has <sup>r</sup>ul<sup>r</sup>-<tu>. **8.5** be-lu-ti-šú for be-lu-ti-šú. **9** gaba-ra-a-šú: exs. 5, 7–8, 13, 46 have gaba-ra-a-šú; and exs. 9, 28 omit a. **9.22** la <<AŠ>> ib-šú-ma (the AŠ connects the preceding and following signs). **9** ib-šú-ma: exs. 1, 8, 11, 29–31, 45–46 have ib-šú-ú-ma; ex. 2 has <sup>r</sup>ib<sup>r</sup>-<<ŠÚ>>-šú-ma; exs. 6, 12, 27, 34, 39 have ib-šú-ma; ex. 9 has ib-šú-<ma>; ex. 10 has ib-šú<sup>r</sup>-ú<sup>r</sup>-<x>>-ma; exs. 13, 15, 28 have ib-šú-ú-ma; ex. 42 has ib-šú-u-<ma>; and ex. 44 has ib-šú<sup>r</sup>-ú-ma. **9.6**, 18, 27, 40 ina for i-na. **9** ù: exs. 6, 9, 16–18, 22 have u; exs. 8, 40 omit it, and ex. 35 has <sup>r</sup>ú<sup>r</sup>. **9** ta-ḥa-zi: exs. 2, 9–11, 29, 34, 39, 41, 44–46 have ta-ḥa-a-zi; ex. 8 has ta-ḥa-a-zi\* (copy: GI); and the ta in ex. 18 has only two vertical wedges, not three. **9.15** inserts u after ta-ḥa-zi.

**10.17** DÛ-ší\* (text: ŠÚ)-na for DÛ-ší-na. **10** ḥaš-bat-ti: ex. 1 has ḥa-ša-ba-ti; ex. 4 omits bat; ex. 11 has ḥaš-bat-te\* (copy: ŠE); and ex. 44 has ḥaš-bat-te. **10** ú-daq-qi-qu-ma: ex. 7 has ú-daq-<qi>-qu-ma; ex. 9 has ú-daq<sup>r</sup>/dàq<sup>r</sup>-<qi>-qu-ma; exs. 10, 15, 29–30 have ú-

daq-qi-qu-ú-ma; ex. 12 has ú-da<sup>1</sup>-qi-qu-ma; ex. 13 has ú-daq-qi-qu-ú<sup>1</sup>-ma; exs. 17, 42 omit qi; the daq in ex. 22 appears to be three superimposed horizontal wedges with the middle one shorter than the other two; ex. 27 has ú-daq-qi-qu-ma; and ex. 28 has u-daq-qi-qu-ma. 10 ha-am-ma-mi: exs. 3, 6, 8, 15, 29, 31, 34, 40, 46 have ha-ma-am-mi; ex. 9 has [ha]<sup>1</sup>-ma<sup>1</sup>-am-mi; exs. 10–11, 44 have [ha]<sup>1</sup>-ma-am-mi; ex. 13 has ha-ma-am-<sup>1</sup>mi<sup>1</sup>; ex. 30 has ha-ma-am-<sup>1</sup>mi<sup>1</sup>; and ex. 42 omits am. 11.23 ar\*(text: ŠÚ-RI)-ba-<sup>1</sup>i for ar-ba-<sup>1</sup>i. 11.1, 8, 12, 16, 23, 25, 33, 35 id-du-u for id-du-ú. 11 šer-re-e-ti: exs. 1, 11, 17, 27, 30, 44 have šer-re-e-tú; ex. 10 has šer-re-e-tú; ex. 13 has [šer<sup>1</sup>-re-<sup>1</sup>e<sup>1</sup>-tu]; exs. 14, 29 have šer-re-e-<sup>1</sup>tú<sup>1</sup>; ex. 15 has šer-re-e-tu; ex. 25 has [šer-re-e-<sup>1</sup>tú]; and ex. 45 has šer-re-e-te. 11.9–10 omit ut and šu-ut respectively in LÚ.šu-ut. 11.27 omits šú in SAG.MEŠ-šú. 11.41 adds an extraneous šú after SAG.MEŠ-šú. 11 LÚ.GAR-nu-ti: ex. 2 has LÚ.GAR-nu.MEŠ; ex. 7 has LÚ.GAR-nu-<sup>1</sup>te<sup>1</sup>; and ex. 40 has LÚ.GAR-nu-tú. 12 UGU-šú-nu: ex. 1 has UGU-šú-nu; ex. 10 UGU-šú-nu\*(text: TAR?); ex. 13 has [UGU-šú<sup>1</sup>-nu, ex. 25 has [UGU-šú-nu<sup>1</sup>, and ex. 30 has UGU-šú<sup>1</sup>-nu<sup>1</sup>. 12 iš-tak-ka-nu-ma: The iš in exs. 5, 21 omits the final vertical wedge; ex. 9 omits ka; and ex. 10 omits tak-ka. 12 bíl-tu: exs. 1, 9, 11, 13–14, 27, 29, 31, 44–45 have bíl-tú; ex. 8 has bíl-tú\*(copy: QA); and ex. 17 has [bíl<sup>1</sup>-tú. 12 ma-da-at-tú: exs. 3–4, 12, 15–16, 18, 21–22, 31, 39 have ma-da-at-tu; ex. 17 omits at; ex. 32 has ma-da-at-tu; ex. 34 has ma-da-at-<sup>1</sup>tu<sup>1</sup>; exs. 35, 42 have [ma-da-at<sup>1</sup>-tu<sup>1</sup>; ex. 40 has [ma<sup>1</sup>-da-at-tu; and ex. 41 has ma-[da]<sup>1</sup>-at<sup>1</sup>-tu. 12.4 áš-šú-ri for áš-šú-ri. 13 e-mid-su-nu-ti: ex. 2 omits ti; ex. 32 omits su; ex. 34 has e-mid-su-nu\*(text: TAR<sup>2</sup>)-ti; and ex. 39 omits nu. 13.9, 20, 22, 28, 40 ina for i-na. 13 mé-re-ši-ia: ex. 1 has me-re-ši-ia; ex. 39 has mé-re-ši-ia\*(text: ŠI); and ex. 45 has mé-re-ši-ia. 13.12 adds an extraneous sign after mé-re-ši-ia. 13 ú: ex. 5 omits it; exs. 6, 9, 22 have u; and ex. 40 has [-ú>/u]. 13.42 hi-is-<<sa>>-sat for hi-is-sa-at. 13 hi-is-sa-at GEŠTU.II-ia: ex. 14 omits at GEŠTU.II-ia; and ex. 17 has hi-is-sa-at-tú GEŠTU.II-ia, or possibly hi-is-sa-at GEŠTU.GEŠTU.II-ia. 13 GEŠTU.II-ia: exs. 15, 30 have GEŠTU.II.MEŠ-ia; and ex. 22 adds an extraneous sign between II and ia. 14 pal-ka-a-ti: ex. 3 has pal<sup>1</sup>-ka-a-ti\*(copy: BE); exs. 8, 13, 46 have pal-ka-a-te; and ex. 19 has [pal-ka-a]<sup>1</sup>-te<sup>1</sup>. 14.29 <sup>d</sup>e\*(text: KID)-a for <sup>d</sup>e-a. 14.28 omits <sup>d</sup> in <sup>d</sup>be-let-DINGIR.MEŠ. 14.27 UGU\*(text: KA) for UGU. 14 MAN.MEŠ-ni: exs. 5, 12, 23, 27, 34, 43 omit ni; and ex. 7 has LUGAL.MEŠ-ni. 15.9, 18, 40, 42 ina for the first i-na. 15.10, 14 ŠA-ia for lib-bi-ia. 15 second i-na: exs. 1, 5–6, 17–18, 22, 28, 40 have ina; and ex. 13 has a-na. 15.10, likely 31 omit GIR.II. 15 KUR.mu-uš-ri: exs. 5, 41, 44 omit KUR; and ex. 11 has <KUR>.mu\*(copy: ŠE)-uš-ri. 16 i-na: ex. 3 has a-na; exs. 7, 9, 13, 28, 39, 42 have ina; exs. 12, 19 omit i (haplography with i of KUR-i immediately before it); ex. 22 possibly has [ina]; and ex. 40 has [ina<sup>1</sup>. 16.12, 31, 34 add URU before NINA.KI. 16 e-pu-uš-ma: exs. 1, 9, 12–13, 15–16, 18, 22, 29, 31, 34 have DÜ-ma; and ex. 42 has DÜ-<sup>1</sup>ma<sup>1</sup>. 16 URU.BAD<sup>m</sup>-MAN-GIN: The vertical wedge of <sup>m</sup> in ex. 1 runs into an extraneous Winkelhaken; exs. 5–6, 16, 22, 30, 41 omit <sup>m</sup>; ex. 7 has URU.BAD<sup>m</sup>-LUGAL-GI.NA; ex. 8 has URU.BAD<sup>m</sup>-MAN-GI.NA; ex. 10 omits URU; ex. 19 has [URU].BAD<sup>m</sup>-MAN-GI.NA; ex. 25 has URU.BAD<sup>m</sup>-MAN-GI-<sup>1</sup>NA; ex. 28 has [URU].BAD<sup>m</sup>-MAN-GI-<sup>1</sup>NA; ex. 45 has URU.BAD<sup>m</sup>-MAN-GI.NA; and ex. 46 has URU.BAD<sup>m</sup>-MAN-GI<sup>1</sup>. [NA]. 16 MU-šú: ex. 13 has [MU<sup>1</sup>-šú; ex. 28 omits šú; and ex. 45 has MU-šú. 17.4 pa-a-rak-ki for pa-rak-ki. 17 ra-áš-du-ti: exs. 2–3, 8–9, 13, 29, 39, 41, 46 have ra-áš-du-ú-ti; ex. 22 has [ra-áš<sup>1</sup>-du-te; ex. 25 has [ra-áš<sup>1</sup>-du-ú-ti; ex. 30 has ra-áš<sup>1</sup>-du-ú-ti; ex. 43 has [ra-áš-du]-u-<sup>1</sup>ti<sup>1</sup>; and ex. 46 has ra-áš-du-<sup>1</sup>ú<sup>1</sup>-ti. 17.22 omits na in a-na. 17.2 <sup>d</sup>šá-maš for <sup>d</sup>UTU. 17 ú: exs. 6, 42 omit it; and exs. 7, 12, 17–18, 22 have u. 17 <sup>d</sup>nin-urta: exs. 1, 6, 9, 17–18, 22, 29, 40, 43 have <sup>d</sup>MAŠ; ex. 7 adds an extraneous AŠ sign between nin and urta; ex. 16 has <sup>d</sup>MAŠ\*(copy: ŠI); and ex. 44 has <sup>d</sup>nin-urta\*(text: UR). 18 i-na: ex. 6 omits it; exs. 9, 17–18, 21–22, 29 have ina; and exs. 40, 42 have [ina<sup>1</sup>. 18 qer-bi-šú: exs. 1, 3, 8, 11, 13, 15, 44–45 have qer-bé-e-šú; ex. 25 has qer-<sup>1</sup>bé-e-šú; and ex. 46 has qer-<sup>1</sup>bé-e-šú. 18.6, 11 omit liš in nak-liš. 18 ú-šab-ni-ma: ex. 6 has ú-šab-<<ab>>-ni-ma, with ú at the end of one line and the remainder at

the beginning of the next line; and ex. 40 has [ú]<sup>1</sup>-šá<sup>1</sup>-ab-ni-ma. 18.13 omits AM in AM.SI. 19 GIŠ.MES.MÁ.KAN.NA: Photos of ex. 10 indicate GIŠ.MES.MÁ\*.KAN.x, where the lower horizontal of the MÁ is longer than the upper horizontal (with Botta copy); Botta's copy has IZ for the final sign; ex. 14 has GIŠ.mu-suk-kan-na; ex. 42 has [GIŠ<sup>1</sup>.mu-suk-kan<sup>1</sup>-[na]; and ex. 43 adds an extraneous DIŠ sign between KAN and NA. 19.1 The IGI in GIŠ.ere-IGI omits the final horizontal wedge. 19 GIŠ.dáp-ra-ni: ex. 5 has GIŠ.dáp-ra-a-ni; ex. 10 has GIŠ.dáp-ra-a-<sup>1</sup>ni<sup>1</sup>; ex. 28 has GIŠ.dáp-ra-a-nu; and ex. 47 has [GIŠ<sup>1</sup>.dáp-ra<sup>1</sup>-[a]-<sup>1</sup>ni<sup>1</sup> (via spacing). 19.1 ŠIM.LI for GIŠ.LI. 19 GIŠ.bu-ut-ni: ex. 1 has GIŠ.bu-ut-ni; exs. 2, 5, 10, 43 have GIŠ.bu-ut-nu; ex. 6 has GIŠ.bu-ut\*(copy: ŠE)-nu; and ex. 25 has [GIŠ.bu-ut]-<sup>1</sup>nu<sup>1</sup>.

20.11 omits šab in mu-šab. 20 MAN-ti-ia: exs. 7, 44 have LUGAL-ti-ia; and ex. 11 has LUGAL\*(copy: IN)-ti-ia; ex. 17 has MAN-ti-ia\*(text: I-ZA); and ex. 19 omits it. 20.17 The ab in ab-ni-ma omits the final vertical wedge. 20 É Various exemplars have KID. 20.43 omits an in hi-la-an-ni. 20 É.GAL: ex. 5 omits GAL; and ex. 39 has [É].GAL\*(text: MA). 20.25 omits ti in KUR.hat-ti. 21.6, 9, 18, 22, 40, 42 ina for i-na. 21 KÁ.MEŠ-šin: ex. 1 has KÁ.MEŠ-šú-un; and the KÁ sign in ex. 25 appears to have a single vertical wedge at the end, followed by a Winkelhaken. 21.15 omits GIŠ in GIŠ.ÜR.MEŠ. 21 GIŠ.ere-IGI: The first horizontal wedge of ere in ex. 17 is more similar to a Winkelhaken; and ex. 45 has GIŠ.ere-IGI\*(text: MAŠ). 22 še-e-ru-šin: ex. 1, 15, 29 have še-e-ru-uš-šin; exs. 2, 11, 44 have še-e-ru-uš-šin; exs. 3, 17–18, 22, 25, 42–43 omit e; ex. 8 has še-e-ru-uš\*(copy: MAL)-šin; ex. 14 has [šer\*(copy: BU)]-[uš<sup>1</sup>-šin<sup>1</sup>]; ex. 31 has [še-e-ru<sup>1</sup>-uš-šin; ex. 45 has še-e-ru-uš<sup>1</sup>-šin\*; and ex. 47 has [še-e-ru-uš-šin<sup>1</sup>. 22 e-ma-am-mi: ex. 6 omits ma; exs. 8, 39, 46 omit am; exs. 12, 16, 22, 35, 42 omit mi; and ex. 34 has e-am-ma-mi. 22 bi-nu-ut: ex. 7 follows the master line (i.e., not bi-nu-ut> of Botta's copy); and exs. 9, 11, 13, 15, 44 have bi-nu-ti; . 22.22 adds an extraneous DIŠ sign after KUR-i. 22 ú: exs. 6, 16, 22, 33–34, 42, 47 have u; and ex. 31 has [ú<sup>1</sup>. 22 tam-tim: exs. 3, 10–13, 15–16, 25, 29, 31, 33–34, 44–45, 47 have tam-di; ex. 5 omits it; and ex. 22 has KI-tim. 22.5, 17–18 add MEŠ after NA<sub>4</sub>. 23.6, 9, 18, 21, 34, 40–42 ina for i-na. 23 né-re-bé-ti-ši-na: exs. 2–3, 42, 44 omit ti; exs. 4, 7, 18 have né-re-bé-ti-ši-na; ex. 9 has né-re-bé-ti at the end of one line and [ší]<sup>1</sup>-na at the beginning of next; ex. 10 has né-re-be-ti-ši-na; ex. 11 has né-re-bé-ti-ši\*(copy: ŠÚ)-na; ex. 17 has <né>-re-bé-ti(É)-ši-na; ex. 21 has né-re-bit(É)-ti-ši-na; ex. 36 has <né>-re-bit(É)-ti-ši-na; ex. 39 has <né>-re<sup>1</sup>-biti(É)-ši-na; and ex. 41 has <né>-re-[biti(É)-ši-na] (restored via spacing). 23.44 omits ma in ul-ziz-ma, which is also likely in ex. 11 where the copy has [ul<sup>1</sup>-[x]. 23.12 omits MĪN in GIŠ.ŠUR.MĪN. 23 GIŠ.MES.MÁ.KAN.NA: exs. 1, 29 have GIŠ.mu-suk-kan-ni; ex. 8 has [GIŠ.mu<sup>1</sup>-suk<sup>1</sup>]-kan<sup>1</sup>-ni; ex. 25 has GIŠ.mu-suk\*(text: omits upper horizontal wedge)-kan\*(text: I, Babylonian form)-ni; ex. 28 has GIŠ.MES.MÁ.KAN-ni; ex. 33 omits MES; and ex. 42 has [GIŠ.mu<sup>1</sup>-suk-kan-ni. 24 ú-rat-ta-a: The rat in ex. 25 has three vertical wedges; and ex. 43 has u-rat-ta-a. 24 KÁ.MEŠ-šin: ex. 1 has KÁ.MEŠ-šú-un; ex. 9 omits MEŠ; the KÁ in ex. 28 appears to begin with three horizontal wedges. 24.22 [BÁD]-šú<sup>1</sup> (x) for BĀD-šú. 24 ki-ma: The ma in ex. 22 omits the final vertical wedge; and ex. 43 omits ki. 24.1 omits ki in ki-iš-rat. 24.25 The KUR in KUR-i appears to have only two wedges. 25.15 adds an extraneous IZ sign after ú-šar-šid-ma. 25 <sup>d</sup>UTU: exs. 1, 3 have <sup>d</sup>šá-maš; and ex. 12 has <sup>d</sup>šá<sup>1</sup>-maš<sup>1</sup>. 25 ir-te-u-ú: ex. 8 has ir-ti-<sup>1</sup>u\*(copy: MAN-AN)-ú; ex. 22 omits ú; the ú in ex. 41 is at the start of the following line; and exs. 42–43 have ir-te-u-u. 25 ki-šit-ti: The ki in ex. 25 appears to be KU; and ex. 28 has ki-šit-ti. 26 ŠU.II-ia: exs. 10, 30, 32 have ŠU.II.MEŠ-ia; ex. 14 has [ŠU<sup>1</sup>.II.MEŠ-ia; ex. 28 omits ŠU.II; ; ex. 41 has ŠU.II\*(text: DIŠ-U)-ia; and ex. 42 has ŠU.II.<sup>1</sup>MEŠ<sup>1</sup>-ia. 26 i-na: exs. 6, 7, 13, 18, 22, 25, 31, 42, 44 have ina; ex. 11 omits it; ex. 34 has a-na; and ex. 46 has [ina<sup>1</sup>. 26.7, 34 ŠA for lib-bi. 26.13 adds an extraneous DIŠ sign after lib-bi. 26.10 ú-še-šib\*(copy: ŠI) or ú-še-ši-<ib>. 26.15, 17 omit MEŠ in GAL.MEŠ. 26 a-ši-bu-ut: ex.

5 has *a-šib*; ex. 6 omits *bu*; ex. 10 has *a-[šī]-bu-te*; ex. 11 has *a-šī\**(copy: ŠŪ)-*bu-ti*; exs. 15, 25, 45 have *a-šī-bu-te*; and ex. 44 has *a-šī-bu-ti*. 26.22 The *e* in AN-*e* has an extraneous vertical wedge head at the end of the sign. 27 *ū*: exs. 5, 45 omit it; and exs. 6, 42 have *u*. 27 *a-šī-bu-ut*: ex. 2 has *a\**(copy: MIN)-*šī\**(copy: ŠŪ)-*bu-ti*; ex. 6 has *a-šī-bu-ut\**(copy: IZ); ex. 11 has *a-šī\**(copy: ŠŪ)-*bu-ut*; ex. 28 has *[a-šī]-bu-ti*; ex. 44 has *a-šī\**(no horizontal)-*bu-ut*; and ex. 45 has *a-[šī-bu]-te*. 27 *šá-a-šū*: exs. 2, 16 omit *a*; exs. 4, 34 have *šá-a-šū*; and ex. 10 has *šá-a-šī*. 27.41 *e\**(text: GIŠ)-*peš* for *e-peš*. 28 *qer-bi-šū*: 1, 21, 25, 44 have *qer-bé-e-šū*; exs. 7, 36 have *qer-bi-šū*; ex. 11 has *qer-bé-e-šū*; ex. 29 has *qer<sup>1</sup>-bé-e-šū*; ex. 31 has *qer<sup>1</sup>-bé<sup>1</sup>-e-šū*; and ex. 45 has *qer-bé-e-šū<sup>1</sup>*. 28 *iš-ru-ku-in-ni*: ex. 8 adds an extraneous *u* between *in* and *ni*; ex. 15 omits *ni*; and the *iš* in ex. 21 omits the final vertical. 28 *a-na*: exs. 11, 44 have *ana*; and ex. 18 has *ina*.

### Text No. 43

1.17 *šá-ak\**(over erasure)-*nu <<u>>* <sup>d</sup>EN.LÍL NU.ÈŠ\*(over erasure) *ba\**(over erasure)-*i-it*. 1 The copies by Norris (1 R pl. 36), Lyon (Sar. no. 1) and Winckler (Sar. 2 pl. 43) all have NA-*i-it*, but in all preserved cases the sign is BA not NA. 1.43 *u<sup>1</sup>* for *ù*. 2 KIŠ: exs. 3, 16, 57-58 have *kiš-šá-ti*; ex. 47 has *kiš-šá-ti*; and 1 R pl. 36 has *kiš-šat* but no known exemplar has this. 2.1, 47 omit *ba* in *ar-ba-i*. 3 No exemplar has *num* for *nu* in *ke-e-nu* despite the copy in 1 R pl. 36 and Lyon, Sar. no. 1. 3 1 R pl. 36 has <sup>d</sup>AG between <sup>d</sup>*a-šur* and <sup>d</sup>AMAR.UTU, but no known exemplar has this. 3 *ú-šat-li-mu-šū-ma*: ex. 4 has *[ú-šat-li-mu]-šū-ma*; and exs. 17, 58 have *ú-šat-li-mu-šū-ma*. 3 MU-šū: exs. 2, 4, 16-18, 30, 47, 56, 58 have MU-šū; exs. 3, 26 have <sup>1</sup>MU<sup>1</sup>-šū, ex. 37 has [MU]-šū, and ex. 42 has <sup>1</sup>MU-šū<sup>1</sup>. 3 *ú-še-eš-šu-ú*: ex. 19 has *ú-še-eš-šu-ú*; and ex. 37 omits *eš*. 3.19 omits *e* in *re-še-e-te*. 4.1 The copy of *kin* in *šá-kin* by Lyon (Sar. no. 1) indicates an additional horizontal wedge at the beginning of the sign. 5.2-4, 17-18, 39, 48, 58 *ki-din-nu-ut* for *ki-din-nu-tu*. 5.17 *mu-šá-áš\**(text: MA)-*šī-ik* for *mu-šá-áš-šī-ik*. 6.2-4, 48, 58 AN.DŪL-la-šū for AN.DŪL-la-šū. 6.2 *it-ru-šū-ú-ma* for *it-ru-šū-ma*. 6 *u*: exs. 2-3, 16-19, 45-46, 56, 58 have *ù*; and exs. 4, 26, 42, 47 have *u*. 7 *na-mur-ra-ti*: exs. 2-4, 16-17, 58 have *na-mur-ra-a-te*; ex. 18 has [na]-<sup>1</sup>mur<sup>1</sup>-ra-a-te; ex. 42 has <sup>1</sup>na-mur-ra-a-te<sup>1</sup>; ex. 47 has [na-mur]-<sup>1</sup>ra-a-te<sup>1</sup>; ex. 48 has *na<sup>1</sup>-mur-ra<sup>1</sup>-a-te*; and ex. 57 has *na-mur-ra-te*. 7 GIŠ.TUKUL.MEŠ-šū: exs. 2-4, 17-18, 26, 56, 58 have GIŠ.TUKUL.MEŠ-šū; ex. 5 has [GIŠ.TUKUL.MEŠ]-šū; and ex. 32 has GIŠ.TUKUL.MEŠ-šū<sup>1</sup>. 8 *be-lu-ti-šū*: exs. 2-3, 16-17, 19, 42 have *be-lu-ti-šū*; ex. 4 has *be<sup>1</sup>-lu<sup>1</sup>-ti-šū*; ex. 18 has [be-lu-ti]-<sup>1</sup>šū<sup>1</sup>; ex. 47 has *be<sup>1</sup>-lu<sup>1</sup>-ti-šū*; and ex. 48 has *be-lu<sup>1</sup>-[ti]-šū*. 8 *gab-ra-a-šū*: exs. 2, 4, 16-18, 48 have *gab-ra-a-šū*; exs. 3, 47, 58 have *gab-ri-a-šū*; ex. 42 has *gab-ra<sup>1</sup>-a-šū*; and ex. 57 has *gab-ri-a-šū*. 8.2, 4, 17-18 *la-a* for the first *la*. 8.1 omits *ù*. 9.41 adds MEŠ after KUR.KUR. 9 *šer-re-e-tu*: exs. 2, 4, 16-18, 56-58 have *šer-re-e-te*; exs. 3, 47 have <sup>1</sup>šer<sup>1</sup>-re-e-te; ex. 5 has [...] *x-te*; ex. 28 has <sup>1</sup>šer<sup>1</sup>-[re]-e-te; ex. 37 has <sup>1</sup>šer-re<sup>1</sup>-e-te<sup>1</sup>; ex. 42 has *šer-re-e-te*; and 1 R pl. 36 gives the variant *tú* for *tu*, but no known exemplar has this.

10 *hur-šá-a-ni*: exs. 3, 41 have *hur-sa-a-ni*; and ex. 27 omits *a*. 10 *bé-ru-ú-ti*: exs. 2-4, 16-17, 39, 58 have *bé-ru-ú-te*; and ex. 18 has *bé-ru-ú-te<sup>1</sup>*. 10.5 [du-ru-ug]-<sup>1</sup>šū<sup>1</sup>-un for *du-ru-ug-šū-un*. 11 *pa-áš-qa-a-ti*: exs. 2-3, 16-17, 42, 48, 57-58 have *pa-áš-qa-a-te*; exs. 4, 39 have *pa-áš-qa-a-te<sup>1</sup>*; ex. 29 has [pa-áš-qa]-<sup>1</sup>a-te<sup>1</sup>; and ex. 47 has *pa<sup>1</sup>-áš-qa-a-te*. 11 *e-ta-at-ti-qu-ma*: exs. 2, 17 have *e-ta-at-te-qu-ma*; ex. 4 has *e<sup>1</sup>-ta-at-te<sup>1</sup>-qu<sup>1</sup>-ma*; ex. 18 has *e<sup>1</sup>-ta<sup>1</sup>-[at]-te-qu-ma*; and ex. 56 has [e<sup>1</sup>-ta<sup>1</sup>-at-te-qu-ma]. 11 *be-ra-a-ti*: 1 R pl. 36 has *bi-ra-a-te*, but no known exemplar has *bi* for *be*; exs. 2-4, 16-18, 47, 56-58 have *be-ra-a-te*; ex. 5 has [be]-<sup>1</sup>ra<sup>1</sup>-a-te; ex. 28 has [be]-<sup>1</sup>ra-a-te; and ex. 42 has *be<sup>1</sup>-ra<sup>1</sup>-a-te<sup>1</sup>*. 12 KUR.e-lam-ti: exs. 2-3, 16-17, 42, 47-48, 57-58 have KUR.e-lam-te; ex. 4 has KUR.e<sup>1</sup>-lam-te<sup>1</sup>; ex. 18 has <sup>1</sup>KUR.e-lam-te<sup>1</sup>; and ex. 29 has [KUR]<sup>1</sup>.e-lam-te<sup>1</sup>. 12.19 URU.ra-pi-i-qu for URU.ra-pi-qu. 13 1 R pl. 36 has *na-ḫal* TAR, but no known exemplars has TAR after *na-ḫal*. 13 *a-mur-re-e*: exs. 2, 17-18, 42, 45 have *a-mur-ri-i*; and ex. 4 has *a<sup>1</sup>-mur<sup>1</sup>-[ri]-i<sup>1</sup>*. 13 *si-ḫir-ti-šá*: exs. 3, 16, 19, 28, 46, 57-58 have *si-ḫi-ir-ti-šá*; and ex. 56

has <sup>1</sup>si<sup>1</sup>-ḫi-ir-ti-šá. 14.2-4, 10, 16-17, 39, 42, 48, 58 URU instead of KUR before *ši-bar*. 14 *ru-qu-ti*: exs. 2-3, 17-18, 58 have *ru-qu-ú-te*; exs. 16, 19, 42, 57 have *ru-qu-ú-ti*; ex. 46 has [ru]-<sup>1</sup>qu<sup>1</sup>-ú-te; ex. 47 has *ru<sup>1</sup>-qu-ú-ti*; and ex. 48 has *ru-qu-ú<sup>1</sup>-[te/ti]*. 15 *qa-a-su*: exs. 2-3, 5, 17-18, 37, 47, 58 have ŠU-su; ex. 4 has ŠU-<sup>1</sup>su<sup>1</sup>; exs. 16, 57 have *qa-as-su*; and ex. 32 has ŠU-[su]. 16 *šak-nu-ti*: exs. 2-4, 10, 16-19, 39, 42, 48, 57 have LÚ.GAR-nu-ti; and ex. 47 has LÚ<sup>1</sup>.GAR<sup>1</sup>-nu-ti. 16 *ma-da-at-tu*: ex. 58 omits *at*; and 1 R pl. 36 has *te* for *tu*, but all known exemplars have *tu*. 16.2 (contra Fuchs), 17-18, 45 *šá* for *ša*. 17.19 *ina* for *i-na*. 17 KUR.e-lam-ti: exs. 2-3, 16-18, 42, 46, 58 have KUR.e-lam-te; exs. 4, 47 have KUR.e<sup>1</sup>-lam<sup>1</sup>-te; ex. 34 has <sup>1</sup>KUR<sup>1</sup>.e<sup>1</sup>-lam<sup>1</sup>-te<sup>1</sup>; and ex. 57 has <sup>1</sup>KUR<sup>1</sup>.e-lam-te. 17 *taḫ-ta-a-šū*: exs. 2-3, 17, 19, 58 have *taḫ-ta-a-šū*; ex. 4 has <sup>1</sup>taḫ<sup>1</sup>-ta-a-šū; ex. 5 has <sup>1</sup>taḫ-ta<sup>1</sup>-a-šū; ex. 37 has <sup>1</sup>taḫ-ta-a<sup>1</sup>-šū; and 1 R pl. 36 has *taḫ-ta-šū*, but no known exemplar omits the *a*. 18.42 omits KUR in LÚ.KUR.te-sa-a-a. 18 *gu-un-ni-šū*: ex. 2 has *gu-un-ni-šū*; exs. 17, 39, 48 have *gu-un-né-e-šū*; ex. 18 has *gu-un-né<sup>1</sup>-e<sup>1</sup>-šū*; and ex. 47 has *gu-un-ni-šū<sup>1</sup>*. 18.45 It is unclear if one should read <sup>1</sup>šá<sup>1</sup>-[li] or <sup>1</sup>šá<sup>1</sup>-li<sup>1</sup> since the LIL would be right at the join of two fragments. 18 KUR.tu-<sup>1</sup>u-mu-na: exs. 2-4, 16, 19, 27, 39, 42, 47, 57-58 add LÚ before it; exs. 17, 48 have LÚ.KUR.tú-<sup>1</sup>u-mu-na; and ex. 18 has <sup>1</sup>LÚ<sup>1</sup>.KUR.tú-<sup>1</sup>u-mu-<sup>1</sup>na<sup>1</sup>. 18 LÚ.na-sik-šū-nu: ex. 2 adds KUR after LÚ; exs. 16, 57 have LÚ.na-sik-šū-nu; ex. 34 has <sup>1</sup>LÚ.na-sik-šū<sup>1</sup>-nu<sup>1</sup>; ex. 47 has LÚ.na-sik-šū<sup>1</sup>-nu<sup>1</sup>; and ex. 42 has <sup>1</sup>LÚ.na-sik-šū<sup>1</sup>-[nu]. 18 1 R pl. 36 apparently has a variant without *ma* on *i-pi-du-ma*, but all known exemplars have it. 18 *ma-ḫar*: the *ma* in ex. 3 has four horizontal wedges; and ex. 47 omits it. 19 *rap-šī*: 1 R pl. 36 has an abnormal *rap* but no known exemplar has this form. 19.2, 17 URU.ḫa-zi-ti for URU.ḫa-zi-te. 19.4 *ú-še-rib<sup>1</sup>* for *ú-še-ri-ba*.

20.16 omits *i* in LÚ.mar-si-i-ma-ni. 20 1 R pl. 36 has a variant *ši* for *šū* in *si-it-ta-šū-nu*, but no known exemplar has this. 20 *in-né-et-qa-am-ma*: 1 R pl. 36 has LUGAL for *in*, but no known exemplar clearly has this; and ex. 45 omits *am*. 20 *ú-šar-mu-ú*: exs. 2, 25, 45 have *ú-šar-mu-u*; and ex. 42 has *ú-šar<sup>1</sup>-mu-u*. 21.57 *sa-an-da-niš\**(text: KUR) for *sa-an-da-niš*. 21 *i-ba-ru-ma*: exs. 2, 16-17, 47, 57 have *i-ba-ru-ú-ma*; ex. 28 has [...] (x)<sup>1</sup>-ú<sup>1</sup>-ma; ex. 34 has *i-ba<sup>1</sup>-ru-ú-ma<sup>1</sup>*; ex. 35 has <sup>1</sup>i<sup>1</sup>-ba<sup>1</sup>-ru-ú-[ma]; and ex. 42 has *i-ba-ru-ú-ma<sup>1</sup>*. 22 URU.šī-nu-uh-te: exs. 2-3, 16-17, 39, 42, 48, 57-58 have URU.šī-nu-uh-te; ex. 4 has URU.šī-nu-uh-te<sup>1</sup>; and ex. 47 has <sup>1</sup>URU<sup>1</sup>.[šī]-nu<sup>1</sup>-uh-te. 23 <sup>1</sup>am-ba-ri-is: exs. 2, 4, 17-18, 39, 48 have <sup>1</sup>am-ba-ri-is-is; and the *ba* in ex. 3 is slightly abnormal in form. 23 *da-mi-iq-ti*: exs. 2-3, 17, 48 have *da-mi-iq-te*; ex. 4 has *da<sup>1</sup>-mi<sup>1</sup>-iq-te*; and ex. 18 has <sup>1</sup>da<sup>1</sup>-mi-iq-te. 23.2, 4, 17-18, 48 <sup>m</sup>MAN-GIN for <sup>m</sup>LUGAL-GLNA. 23.18 *im-šū-ma* for *im-šū-ma*. 23.1, 45 KUR.ur-ar-<sup>1</sup>tí and KUR.ur-ar-<sup>1</sup>tí respectively for KUR.ur-ar-ti. 23 *u*: ex. 2 omits it; exs. 3, 16-18, 25, 35, 42, 47, 58 have *ù*; and exs. 4, 32 have *u*. 24 *ek-mu-te*: exs. 2-3, 16-18, 28, 57-58 have *ek-mu-ú-te*; ex. 4 has *ek-mu-ú-te<sup>1</sup>*; ex. 35 has *ek-mu-ú-te<sup>1</sup>*; ex. 42 has *ek<sup>1</sup>-mu<sup>1</sup>-ú<sup>1</sup>-te<sup>1</sup>*; and ex. 47 has *ek-mu-ú<sup>1</sup>-te*. 24 *mu-rap-pi-šū*: exs. 2-4, 16-17, 58 have *mu-rap-pi-šū*; ex. 25 has [mu-rap]-<sup>1</sup>pi<sup>1</sup>-šū; ex. 35 has *mu<sup>1</sup>-rap<sup>1</sup>-[pi]-šū<sup>1</sup>*; ex. 42 has <sup>1</sup>mu<sup>1</sup>-rap-pi-šū; and ex. 47 has <sup>1</sup>mu-rap<sup>1</sup>-pi-šū. 24 *pu-lu-un-ge-šū-un*: exs. 2-3, 17-18, 25 have *pu-lu-un-ge-e-šū*; ex. 5 has <sup>1</sup>pu<sup>1</sup>-lu-un-ge-e-šū; exs. 16, 35, 42, 57 have *pu-lu-un-ge-e-šū*; ex. 19 has <sup>1</sup>pu<sup>1</sup>-lu-un-ge-e-šū; ex. 36 has [pu-lu-un]-<sup>1</sup>ge<sup>1</sup>-e-šū<sup>1</sup>; ex. 40 has <sup>1</sup>pu<sup>1</sup>-lu-un-ge-e-šū<sup>1</sup>; ex. 47 has *pu-lu-un-ge-e-šū*; and ex. 58 has *pu-lu-un-ge-e-šū-un*. 25.3, 58 *tuq-ma-ti* for *tuq-ma-te*. 25 <sup>m</sup>i-lu-bi-i<sup>1</sup>-di: exs. 2-3, 16, 28, 57-58 have <sup>m</sup>i-lu-ú-bi-i<sup>1</sup>-di; ex. 47 has <sup>m</sup>i-lu-ú-bi-i<sup>1</sup>-di; and 1 R pl. 36 has <sup>m</sup>i-ib-ú-bi-i<sup>1</sup>-di, but no known exemplar has *ib* for *lu*. 26 *na-bi-i*: exs. 2-3, 16-18, 48, 57-58 have *na-a-bi-i*; and ex. 49 has *na-a-bi-x*. 26.2-3, 7, 16-19, 45, 47-48, 58 URU instead of KUR before *gar-ga-miš*. 26 <sup>m</sup>pi-si-ri: exs. 2, 17, 48 have <sup>m</sup>pi-i-is-si-ri; exs. 3, 19, 45 have <sup>m</sup>pi-i-si-ri-ri; ex. 4 has <sup>m</sup>pi-i-is-<sup>1</sup>ri-ri; ex. 18 has <sup>m</sup>pi-i-is-si-ri; ex. 42 has <sup>m</sup>pi-i-si-<sup>1</sup>ri; ex. 47 has <sup>m</sup>pi-i-si<sup>1</sup>-ri-ri; and ex. 58 has <sup>m</sup>pi-i-si-i-ri<sup>1</sup>. 26.18, 25 *ša-lip-ti* and <sup>1</sup>ša<sup>1</sup>-lip-ti respectively for *ša-lip-te*. 26 *qa-a-su*: exs. 2-3, 5, 16-18, 35-36, 42, 57 have ŠU-su; exs. 4, 25 have <sup>1</sup>ŠU-su<sup>1</sup>; and exs. 40, 47 have <sup>1</sup>ŠU<sup>1</sup>-su. 27.2-4, 7, 16-19, 42, 48, 57-58 URU for KUR before *mu-ša-ši-ri*. 27.16 has NI for *sa* in <sup>m</sup>u-sa-a. 27.2

ʿša<sup>1</sup> for LUGAL. 27 KUR.ur-ar-ti: 1 R pl. 36 has a variant of LÚ for KUR, but no known exemplar has this; and ex. 45 has KUR.ur-ar-ti. 27.19, 42, 45 i-na for the first ina. 27 pu-luḥ-ti-šu: exs. 2, 4, 16-19, 42, 45, 47, 57 have pu-luḥ-ti-šu; exs. 3, 58 have pu-luḥ-te-šu; ex. 28 has [pu]-luḥ-ti-šu; and ex. 48 has pu-luḥ-ti-šu<sup>1</sup>. 27 GAL-ti: exs. 3, 16, 28, 47, 57 have GAL-te; and ex. 19 has ra-bi-ti. 27.25 adds an extraneous ma<sup>2</sup> between ma and ni of ra-ma-ni-šu. 27 ú-qa-ta-a: exs. 2-3, 5, 16-17, 35-36, 42, 57 have ú-qa-ta-a; ex. 4 has ú-qa-ta-a; ex. 18 has ú-qa-ta-ʿa<sup>1</sup>; and ex. 47 has ú-qa-ta-ʿa<sup>1</sup>. 28 1 R pl. 36 appears to put IŠ as a variant for URU in URU.suk-ki-a, but it may instead be the last sign in the line, which the copy would otherwise omit. 28 KUR.ka-ak-me-e: exs. 2-3, 16, 18, 57-58 have KUR.ka-ak-mi-i; ex. 4 has KUR.ka-ak-mi-ʿi<sup>1</sup>; ex. 17 has KUR.ka-ak-mi-ʿi<sup>1</sup>; ex. 25 has [KUR.ka-ak]-mi-ʿi<sup>1</sup>; ex. 28 has KUR.ka-ak-mi-ʿi<sup>1</sup>; ex. 42 has [KUR].[ka]-ak-mi-i; and ex. 47 has KUR.ak<sup>1</sup>-ka-mi-ʿi<sup>1</sup>. 28 1 R pl. 36 may omit iš in na-ba-di-iš at the end of the line, but see the earlier note for this line. 29 1 R pl. 36 has the variant IL for ba in ba-ḥu-la-te-šu-nu, but no known exemplar has this variant. 29 ú-ta-bi-ḥu-ma: ex. 3 has ú-ta-ab-bi-ḥu-ma<sup>\*</sup>, in which the ma has four horizontal wedges; exs. 16, 57 have ú-ta-ab-bi-ḥu-ma; ex. 19 has ú-ta-ab-bi<sup>1</sup>-ḥu-ma; ex. 28 has [ú-ta]-ab<sup>1</sup>-bi-ḥu-ma; ex. 42 has ú-ta<sup>1</sup>-ab-bi-ḥu-ma; and ex. 47 has ú-ta-ab-bi<sup>1</sup>-ḥu-ma<sup>1</sup>. 29 mu-ú-ti: exs. 2-3, 17-18, 25, 40, 45, 58 have mu-ú-te; ex. 4 has mu-ʿú-te<sup>1</sup>; and ex. 5 has mu-ʿú-te.

30.2, 4, 17-18, 48 la-a for la. 30.1 omits MEŠ in UN.MEŠ. 30.2-4, 16-19, 28, 42, 47-48, 57-58 omit KUR in KUR.ḥar-ḥar.KI. 30.40 mi-iš-ri for mi-šir. 30.17 omits KI in aš-šur.KI. 31.7 <ʿmu<sup>1</sup>-ta-ʿḥi<sup>1</sup>>> ʿmu-ta-qi<sup>1</sup>-in<sup>1</sup>. 31.3, 58 KUR.el-li-pi for KUR.el-li-pi. 31 zi-kir-šu: exs. 5, 17, 25, 40 have zi-kir-šu; and ex. 47 has ʿzi-kir-šu<sup>1</sup>. 32 1 R pl. 36 has DA rather than the first ša, but no exemplar has this. 32 KUR-e: exs. 2-3, 16-18, 28, 47-48, 57-58 have KUR-i; and exs. 7, 45 have KUR-ʿi<sup>1</sup>. 32.5 Fuchs, Khorsabad p. 37 indicates that ex. 5 omits the a in ba-ra-a-nu-ú, but this is not the case. 32.2, 17-18 omit eš in ú-še-š-šu-ú. 32.5, 17, 25, 40 URU-uš-šu for URU-uš-šu. 33.3 omits a in ʿa-da-a. 33 aš-šur: exs. 2-3, 16, 18, 28, 35-36, 42, 57-58 have ʿa-šur; ex. 5 has ʿa-šur<sup>1</sup>; ex. 40 has ʿa-šur<sup>1</sup>; and ex. 47 has ʿa-šur<sup>1</sup>. 34.45 ʿit<sup>1</sup>-pe-e-šu for it-pe-e-šu. 34.19 adds an extraneous ša after SIG<sub>5</sub>-tim. 34.42, 45 x-ʿdu-ú<sup>1</sup>-te and na-du-ú<sup>1</sup>-te respectively for na-du-te. 34.19, 45 ú-zu-un<sup>1</sup>-šu and ú-zu-un-šu respectively for ú-zu-un-šu. 35.19 zaq-ru-ú-ti for zaq-ru-ti. 35.42 ʿur<sup>1</sup>-qi<sup>1</sup>-tu for ur-qi-tu. 36.19 omits im in šu-zu-zi-im-ma. 37 The copies by Lyon and Winckler have ŠU for la. 38 The ME of ABGAL sometimes looks more like LAL or LIŠ than ME. 38.1 omits ù. 39.45 ra-pa-áš-tu for ra-pa-áš-tum. 39.42 omits li in ti-il-li-nu-ú.

40 The copies by Lyon and Winckler have ḥa-bal for za-bal, but no known exemplar has ḥa. 40.19, 42 na-ʿḥar<sup>1</sup>-šu-še and na-ʿḥar<sup>1</sup>-NA-še respectively for na-ḥar-šu-še. 41.19, 45 a-me-lu-te for a-me-lu-ti. 42 i-ta-te-e-šu: exs. 19, 45 have i-ta-te-e-šu; and ex. 42 has [...] x-ʿe<sup>1</sup>-šu. 43.19 šá-a-šu for šá-a-šu. 43.19, 42 qer-bu-uš-šu for qer-bu-uš-šu. 44.7 omits ĠIR.II. 44 KUR-e: exs. 2, 4, 16-18, 28, 42, 48, 57-58 have KUR-i; ex. 3 has KUR<sup>\*</sup>-i, in which the KUR looks more like ŠE; ex. 45 has KUR-ʿi<sup>1</sup>; and ex. 47 has ʿKUR<sup>1</sup>-i. 44.2-3, 5, 18, 58 di-im-te for di-im-ti. 44.19 na-du-u for na-du-ú. 45 la-bi-ru-te: exs. 2-3, 16-18, 47, 57-58 have la-bi-ru-ú-te; ex. 7 has la-bi-ru-ú-te<sup>1</sup>; ex. 42 has [la]-bi<sup>1</sup>-ru-ú-te; and ex. 48 has la-bi-ru-ú<sup>1</sup>-te<sup>1</sup>. 45 el-la-mu-u-a: exs. 16, 57 have el-la-mu-ú-a; and ex. 28 has x x x-ʿú-a<sup>1</sup>. 45 1 R pl. 36 has the variant QA for KUR, but no known exemplar has this. 46.2, 17-18, 48 a-šar-šu for a-šar-šu. 46.3 has an erased DIŠ sign after ú-maš-ši-i-ma. 46 šu-šu-ub-šu: exs. 2-3, 16-18, 47-48, 57-58 have šu-šu-ub-šu; and exs. 4, 28, 42 have šu<sup>1</sup>-šu-ub<sup>1</sup>-šu. 46 ID-šu: exs. 2, 18 have ʿID<sup>1</sup>-šu; exs. 3, 16-17, 57-58 have ID-šu; ex. 5 has x-šu; and ex. 25 has ʿID-šu<sup>1</sup>. 46 iz-ku-ur: ex. 5 has ʿiz<sup>1</sup>-kur; and exs. 17-18, 25 have iz-kur. 47 1 R pl. 36 has ZU.AD for ZU.AB, but no known exemplar has this. 47 1 R pl. 36 has né-me-qi for né-me-qi, but no known exemplar has this. 47 su-un-nu-nu-ma: ex. 2, 16-18, 57-58 have su-un-nu-nu-ú-ma; ex. 3 has su<sup>2</sup>-un-nu-nu-ú-ma; ex. 28 has ʿsu<sup>2</sup>-un-[nu]-nu-ú-ma; 1 R pl. 36 has zu for su and Winckler gives this as a variant for ex. 3,

but no exemplar clearly has this although the reading of the sign in exs. 3, 28, 42 is uncertain. 47 nik-la-a-ti: exs. 2-3, 36, 58 have nik-la-a-te; ex. 5 has traces-ʿla<sup>1</sup>-a-te; exs. 25, 28 have ʿnik<sup>1</sup>-la-a-te; and ex. 47 has [nik-la]-a-ʿte<sup>1</sup>. 48.3, 16-18, 28, 42, 48 omit an in ʿnin-men-an-na. 49 šá-a-šu: exs. 7, 19 have šá-a-šu<sup>1</sup>; exs. 16, 28, 45, 57 have šá-a-šu; ex. 42 has [šá-a]-ʿšu<sup>1</sup>; and ex. 47 has ʿšá<sup>1</sup>-a-šu. 49.2 BÁRA-ma-ḥi for BÁRA.MAḤ-ḥi. 49.17-18, 48 be-lu-te-ia for be-lu-ti-ia. 49 1 R pl. 36 has ur-ŠI (not ur-ZI as given in Fuchs, Khorsabad p. 39) with the variant URU for ŠI, but no known exemplar has either ŠI or URU. 49.16 ù for u. 49 e-pe-su: exs. 2-3, 16-18, 28, 36, 57-58 have e-pe-es-su; ex. 42 has ʿe-pe-es<sup>1</sup>-su; ex. 47 has [e-pe]-ʿes<sup>1</sup>-su; and ex. 11 has e-pe-x-su, where the sign for x appears as:

50 kit-ti: exs. 2, 16-18, 57 have kit-te; ex. 4 has [...] x-ʿte<sup>1</sup>; and exs. 47-48 have ʿkit-te<sup>1</sup>. 50 1 R pl. 36 has mi-šá-ri-šú, but no known exemplar adds šú after mi-šá-ri. 50.17 The sign form for la is anomalous, similar to TU<sup>7</sup>. 50.45 en-še for en-ši. 51 šá-a-šu: exs. 2, 16, 28, 47, 57-58 have šá-a-šu; ex. 7 has šá<sup>1</sup>-a-šu; and ex. 42 has [šá]-ʿa<sup>1</sup>-šu. 51 ša-a-a-ma-nu-te: exs. 2 (contra Fuchs), 57 have šá-a-a-ma-nu-te; exs. 3, 11, 16-18 have šá-a-a-ma-nu-ti; ex. 4 has ʿšá<sup>1</sup>-a-a-ma-nu-ʿte<sup>1</sup>; ex. 42 has šá-a-a-ma-ʿnu-te<sup>1</sup>; and ex. 58 has ša-a-a-ma-nu-ti. 51.19 The a in ṭup-pa-a-te has an extraneous wedge. 51.2-3, 16-18, 28, 58 omit MEŠ in ZABAR.MEŠ. 52 ri-ga-a-te: exs. 2, 7, 55 omit a; exs. 3, 11, 58 have ri-ig-ga-a-te; exs. 16-18, 28, 57 have ri-ig-ga-a-te; ex. 47 has ri-ig-ga-[(a)-ti]-te<sup>1</sup>; and ex. 48 has ri-ig-ga-a-ʿte<sup>1</sup>. 52 pa-nu-šú-nu: exs. 3, 11, 58 have pa-nu-šú-nu; and ex. 40 has ʿpa-nu-šú<sup>1</sup>-nu. 52 1 R pl. 36 omits šak-nu, but no known exemplar does this. 52.3, 11, 58 ad-din-šu-nu-ti for ad-din-šú-nu-ti. 53.11 <ba-ni>> ba-ni-i-šu. 53.7 omits i in ba-ni-i-šu. 53 PIRIG: The sign in ex. 2 is NINDA\*ŠE.A<sup>2</sup>.AN<sup>2</sup>; and the sign in ex. 58 is NINDA\*UD-EŠ, in which the NINDA sign lacks the Winkelhaken. 53.2, 4, 17-18, 48 omit ù. 53 te-né-še-te: exs. 2-3, 11, 16-18, 57-58 have <te>-né-še-e-te; ex. 4 has <te>-né-še-ʿe-te<sup>1</sup>; ex. 28 has [<te>-né-še]-ʿe<sup>1</sup>-ti; and ex. 42 has <te>-né-še-e<sup>1</sup>[te/ti]. 53.2-3, 11, 16-18, 28, 36, 47, 58 te-me-qi for te-me-qi. 53.11 u-šaq-qi<sup>1</sup> for ú-šaq-qi-ma. 54 u<sub>4</sub>-me: exs. 2-3, 11, 16-18, 47, 55 have u<sub>4</sub>-mi; ex. 7 has ʿu<sub>4</sub>-mi<sup>1</sup>; exs. 19, 45 have UD.MEŠ; ex. 28 has [u<sub>4</sub>]-ʿmi<sup>1</sup>; and ex. 48 has u<sub>4</sub>-ʿmi<sup>1</sup>. 54 qer-bu-uš-šu: exs. 3, 11, 16, 18-19, 44, 48 have qer-bu-uš-šu; ex. 4 has ʿqer-bu-úš-šu; ex. 28 has ʿqer<sup>1</sup>-bu-uš-šu; ex. 42 has qer<sup>1</sup>-bu-uš-šu<sup>1</sup>; and ex. 58 has qer-bu-uš<sup>1</sup>-šu<sup>1</sup>, in which the uš omits the Winkelhaken and final vertical wedge. 54.19 Fuchs, Khorsabad p. 40 indicates that this exemplar omits a-na, but this is not the case. 54 qa-ti: exs. 2, 11, 18 have qa-a-te; exs. 3, 58 have qa-a-ti; exs. 4, 17 have qa-te; and ex. 47 has ʿqa-a-ti<sup>1</sup>. 55 pi-ia: ex. 2 has pi-i-ia; ex. 7 has ʿpi<sup>1</sup>-i-ia<sup>1</sup>; and ex. 55 has ʿpi<sup>1</sup>-i-ia. 55.7, 19 omit um in ke-e-nu-um. 55 ú-lu: exs. 2-3, 11, 16-19, 44-45, 58 have ú-lu-ú; exs. 4, 28, 42 have ʿú-lu-ú<sup>1</sup>; ex. 35 has [ú]-ʿlu-ú<sup>1</sup>; and ex. 48 has ú-ʿlu-ú<sup>1</sup>. 55.3 The ma in ma-a<sup>2</sup>-diš has four horizontal wedges. 55 iq-bu-u-ni: exs. 2-3, 16, 58 have iq-bu-ú-ni; ex. 4 has ʿiq<sup>1</sup>-bu-ú-ni; ex. 28 has ʿiq<sup>1</sup>-bu-ú-ʿni<sup>1</sup>; ex. 36 has iq-bu-ú<sup>1</sup>-ʿni<sup>1</sup>; and ex. 45 omits u. 56.11 omits šu in na-an-nu-uš-šu-nu. 56 muš-pe-e-lu: exs. 2-3, 11, 16-18, 28, 55, 57-58 have muš-pe-e-lum; ex. 4 has ʿmuš<sup>1</sup>-pe-ʿe-lum<sup>1</sup>; ex. 35 has [muš-pe]-ʿe<sup>1</sup>-lum; ex. 42 has [muš-pe]-ʿe-lum<sup>1</sup>; ex. 44 has [muš]-ʿpe<sup>1</sup>-e-lum; and ex. 48 has x-ʿpe-ʿe<sup>1</sup>-lum. 56 gap-šá-a-te: exs. 2, 17-18, 48 have gap-šá-a-ti; and ex. 4 has ʿgap-šá<sup>1</sup>-a-ti. 56 ad-ke-ma: exs. 3, 11, 16, 57-58 have ad-ke-e-ma; and ex. 45 has ʿad-ke<sup>1</sup>-e-ʿma<sup>1</sup>. 56.3-4 Lyon states that these exemplars have ki for ku in tups-šik-ku, but both have ku. 57.47 omits ši in ITI.ši-i-taš. 57.1 omits e in EŠ.BAR-e. 58.11 inserts an extraneous u after ʿa-nim. 58.1 ʿEN.LÍL<sup>1</sup>(text: É) for ʿEN.LÍL. 58.17 na-bu-u for na-bu-ú. 58.2-4, 11, 17, 58 MU-šu for MU-šu. 59.58 The second EŠ in UD.EŠ.EŠ omits one of the horizontal wedges in the first pair of horizontal wedges. 59 pal-ke-e: exs. 2-3, 11, 16-18, 42, 48, 58 have pal-ki-i; ex. 4 has ʿpal<sup>1</sup>-ki-i; ex. 35 has ʿpal-ki-i<sup>1</sup>; ex. 44 has ʿpal<sup>1</sup>-ki-i; and ex. 47 has pal<sup>1</sup>-ki-i<sup>1</sup>. 59.58 The gim in gim-ri omits Winkelhaken. 59.19 omits as in lib-na-as-su.

60 as-ru-qu-ma: exs. 2, 16-18, 58 have as-ru-uq-ma; ex. 3 has

as<sup>1</sup>-ru-<sup>r</sup>uq<sup>1</sup>-ma; ex. 4 has as-ru-<sup>r</sup>uq<sup>1</sup>-ma<sup>1</sup>; and ex. 42 has as<sup>1</sup>-ru-<sup>r</sup>uq-<sup>r</sup>[ma]. 60 ŠU.İL.KÁM: exs. 2-3, 11, 16-18, 28, 36, 42-43, 57-58 insert LÁ between ÍL and KÁM; ex. 4 has ŠU.ÍL<sup>1</sup>.x.x; and and ex. 31 has ŠU.ÍL<sup>1</sup>.LÁ<sup>1</sup>.KÁM. 61 mu-uš-pel: exs. 2, 4, 11, 16-18, 42, 47-48, 57-58 have mu-uš-pé-él; ex. 3 has mu-uš-pé-<sup>r</sup>él<sup>1</sup>; and ex. 44 has [mu-uš]-<sup>r</sup>pé-él. 61.57 omits te-me-en. 61.19 omits e in uš-še-e-šu. 61 lib-na-su: exs. 2, 11, 16-17, 42, 57-58 have lib-na-as-su; ex. 4 has lib-na-as<sup>1</sup>-su<sup>1</sup>; ex. 18 has lib-na<sup>1</sup>-as<sup>1</sup>-su; ex. 31 has lib-na-as-su<sup>1</sup>; ex. 36 has lib-na-as[su]; and ex. 43 has lib-na-<sup>r</sup>as<sup>1</sup>-su. 62 ra-ás-du-ti: 1 R pl. 36 has the variant BU<sup>1</sup> for du in ra-ás-du-ti; no known exemplar has this variant, but cf. text no. 9 line 57; exs. 2-4, 17-18 have ra-ás-du-ú-te; exs. 11, 16, 45, 57-58 have ra-ás-du-ú-ti; ex. 28 has [ra]-<sup>r</sup>ás-du-ú-ti; ex. 35 has [ra]-<sup>r</sup>ás-du-ú-ti<sup>1</sup>; ex. 47 has [ra<sup>1</sup>]-<sup>r</sup>ás-du-ú-ti; and ex. 48 has ra-ás<sup>\*</sup>-du-ú-te, in which the *ás* is MA. 62.3 The *ma* in *ki-ma* has four horizontal wedges. 62.1 R pl. 36 appears to have a variant omitting the *en* in *ge-en-ni*, but no known exemplar omits this sign. 62.4, 17-18, 48 *ge-né-e* for *ge-en-ni*. 62.4, 17-18, 48 *šur-šú-du* for *šur-šu-du*. 62.11 omits *ú*. 62 *qer-bu-uš-šú*: exs. 2-4, 16 have *qer-bu-uš-šú*; and ex. 19 has *qer-bu<sup>1</sup>-uš-šú*. 63.59 has [...] -<sup>r</sup>ra<sup>1</sup>-nu for *GIŠ.dáp-ra-ni*. 63.38 The *GIŠ* in *GIŠ.bu-ut-ni* is MA. 63 ina: exs. 2-4, 11, 16-18, 27, 33, 59 have *i-na*; ex. 38 has *i-na*<sup>1</sup>; ex. 42 has *i-na*; and ex. 47 has *i-na*<sup>1</sup>. 63 *qí-bi-ti-šú-nu*: exs. 11, 16, 18, 57 have *qí-bi-te-šú-nu*; ex. 27 has *qí-bi-te-šú<sup>1</sup>-[nu]*; and ex. 47 has *qí-bi-te-šú-nu*<sup>1</sup>. 63.2 *šir-ti* for *šir-te*. 64 *ta-an-ši-il*: exs. 2, 4, 17-18, 48 have *ta<sub>5</sub>-an-ši-il*, Fuchs, Khorsabad p. 42 suggests that the writing UD-AN-ši-il is “eine Mischung zwischen *ta-an-ši-il* und *tam-ši-il*”; and ex. 19 omits *ši*. 64.11 *mé-eh-ret* for *mé-eh-ret*. 64.1 R pl. 36 has KÁ.MEŠ-su, but no known exemplar has this. 64.17 omits *ap-tiq-ma*. 65.4 1 <<U>> UŠ. 65 *mi-ši-iḫ-ti*: exs. 2, 4, 11, 16-18, 27, 47-48, 57-58 have *mi-ši-iḫ-te*; ex. 38 has *[mi]-ši-iḫ-te*; ex. 44 has *[mi]-ši<sup>1</sup>-iḫ-te*; and ex. 59 has *[mi]-ši<sup>1</sup>-iḫ<sup>1</sup>-te*. 65 BĀD-šú: exs. 2-3, 16-18, 27, 38, 44, 47-48, 57-58, 59 have BĀD-šú; exs. 4, 11 have BĀD<sup>1</sup>-šú; and ex. 33 has BĀD<sup>1</sup>-šú<sup>1</sup>. 65 KUR-e: exs. 2-4, 16-18, 27, 57-58 have KUR-i; ex. 11 adds an extraneous u between KUR and i; exs. 31, 45 have KUR-i<sup>1</sup>; ex. 36 has [KUR]-i; and ex. 47 has KUR-i<sup>1</sup>. 65 *te-me-en-šú*: exs. 2-3, 12, 19, 57 have *te-me-en-šú*; and ex. 4 has *te<sup>1</sup>-me-en-šú*. 66.2-4, 11, 16-18, 48, 58 omit a in *ar-ka-a-te*. 67 HĒ.GÁL-li-šú: exs. 2-3, 17, 48 have HĒ.GÁL-li-šú; and ex. 4 has HĒ<sup>1</sup>.GÁL-li-šú. 67 *ša*: exs. 2-4, 11, 16-17, 27, 57-58 have *ša*; exs. 8, 12 have *ša<sup>1</sup>*; and exs. 18, 31, 36, 42, 47 have *ša<sup>1</sup>*. 67 *az-kur-ur*: exs. 2-3, 11, 17, 58 have *az-kur*; and exs. 4, 12, 18, 28, 31 have *az<sup>1</sup>-kur*. 68.58 omits <sup>d</sup> in the first <sup>e</sup>EN.LÍL. 68.3 Erased HĪ after *mu-diš-šá-at*. 68.18 *zik-ri* <<zik-ri>>. 68 *ša*: exs. 2-4, 16-17, 27, 31, 47, 57-58 have *ša*; and exs. 8-9, 12, 36, 42 have *ša<sup>1</sup>*. 69.16, 47, 57-58 <sup>d</sup>a-nu-um for <sup>d</sup>a-nu. 69.58 The *šet* in *ep-šet* has four vertical wedges. 69.19 UN<sup>1</sup>.MEŠ-šú for UN.MEŠ-šú. 69 *ša*: exs. 2-3, 16-17, 27, 31, 47, 58 have *ša*; and exs. 4, 8, 36 have *ša<sup>1</sup>*.

70 *mu-uš-te-šir*: exs. 2, 4, 17-19, 45, 48, 57-58 have *muš-te-šir*; ex. 47 has *muš<sup>1</sup>-te-šir*; and ex. 49 has *muš<sup>1</sup>-(x)* [...]. 70.2 (contra Fuchs), 4, 17-18, 48 *nag-bi-šú* for *nag-bi-šú*. 70 *ta-lit-ti-šú*: ex. 19 has *ta-lit-ti-šú<sup>1</sup>*; and contra Fuchs, ex. 2 has *šú*. 70 *ša*: exs. 2-3, 11-12, 16-17, 36, 47, 56, 58 have *ša*; and exs. 4, 9, 27, 31, 42 have *ša<sup>1</sup>*. 70 IM.U<sub>19</sub>.LU: exs. 2, 16, 31, 36, 42 have IM.U<sub>18</sub>.LU; ex. 4 has IM.U<sub>18</sub>.LU<sup>1</sup>; ex. 9 has IM.U<sub>18</sub>/U<sub>19</sub>.LU<sup>1</sup>; ex. 12 has IM<sup>1</sup>.U<sub>18</sub>.LU<sup>1</sup>; exs. 19, 56 have IM<sup>1</sup>.U<sub>18</sub>/U<sub>19</sub>.LU; ex. 26 has [IM].U<sub>18</sub>.LU; and ex. 47 has IM<sup>1</sup>.U<sub>18</sub>.LU. 71.2 adds MEŠ after LUGAL. 71 *e-pi-ši-šú*: exs. 2-4, 11, 16-18, 48 have *e-pi-ši-šú*; and ex. 47 has *e<sup>1</sup>-pi-ši-šú*. 71 BĀD-šú: exs. 2-4, 16-18, 47-48, 58 have BĀD-šú; exs. 8, 11, 19, 27 have BĀD<sup>1</sup>-šú; and exs. 38, 42 have BĀD-šú<sup>1</sup>. 71.11, 19 <sup>d</sup>MAŠ for <sup>d</sup>nin-urta. 71 *šal-ḫu-ú-šú*: exs. 4, 56-58 have *šal-ḫu-ú-šú*; ex. 12 has *šal-ḫu-ú-šú<sup>1</sup>*; exs. 17, 19, 26, 45 have *šal-ḫu-u-šú*; and ex. 18 has [šal]-<sup>r</sup>ḫu<sup>1</sup>-ú-šú. 72.4, 18, 48 *mit-ḫur-te* for *mit-ḫur-ti*. 72 *a-ši-bu-te*: exs. 2-4, 16-18, 47, 57 have *a-ši-bu-ut*; ex. 8 has *a-š<sup>1</sup>i-bu<sup>1</sup>-ut*; and ex. 42 has *a-š<sup>1</sup>i-bu-ut<sup>1</sup>*. 72 KUR-e: exs. 2-4, 11, 16-18, 27, 57-58 have KUR-i; ex. 38 has KUR-i<sup>1</sup>; ex. 42 has KUR-i<sup>1</sup>; and ex. 47 has KUR<sup>\*</sup>-i, in which the KUR appears to have four Winkelhaken. 72.4 UD for ZĀLAG. 73.11 omits 1 in 1-en. 73.11 omits *ma* in *ú-šar-ma-a*. 73 *qé-reb-šú*: exs. 2-4, 17, 26, 56-58 have *qé-reb-šú*; ex. 9

# Concordances of Annals Line Numbers

- Concordance 1: RINAP 2 Text 1 (Annals Room II) Line Numbers to Botta, Winckler and Fuchs Line Numbers  
 Concordance 2: RINAP 2 Text 2 (Annals Room V) Line Numbers to Botta, Winckler and Fuchs Line Numbers  
 Concordance 3: RINAP 2 Text 3 (Annals Room XIII) Line Numbers to Botta, Winckler and Fuchs Line Numbers  
 Concordance 4: RINAP 2 Text 4 (Annals Room XIV) Line Numbers to Botta, Winckler and Fuchs Line Numbers  
 Concordance 5: RINAP 2 Text 5 (Annals Throne Room) Line Numbers to Botta, Winckler and Fuchs Line Numbers  
 Concordance 6: RINAP 2 Text 6 (Annals Unknown Room) Line Numbers to Botta, Winckler and Fuchs Line Numbers  
 Concordance 7: Fuchs, Khorsabad Annals Line Numbers to RINAP 2 Text Nos. 1–6 Line Numbers  
 Concordance 8: Lie, Sar. Line Numbers to RINAP 2 Texts 1–7 Line Numbers  
 Concordance 9: Winckler, Sar. Annals Line Numbers to RINAP 2 Text Nos. 1–6 Line Numbers

## Concordance 1: RINAP 2 Text 1 (Annals Room II) Line Numbers to Botta, Winckler and Fuchs Line Numbers

[Note: Since Fuchs in Khorsabad marks out where a line of text ends, even if not preserved, the line equivalents are more precise for his column. Generally for Winckler the line equivalents only match what is actually preserved in the version in room II.]

**Concordance 2: RINAP 2 Text 2 (Annals Room V) Line Numbers to Botta, Winckler and Fuchs Line Numbers**

[Note: Since Fuchs in Khorsabad marks out where a line of text ends, even if not preserved, the line equivalents are more precise for his column. Generally for Winckler the line equivalents only match what is actually preserved in the version in room V.]

**Concordances 3–6: RINAP 2 Texts 3–6 (Annals Room XIII, Room XIV, Throne Room and Unknown Room)  
Line Numbers to Botta, Winckler and Fuchs Line Numbers**

[Note: Since Winckler may be using a different version of the annals (generally the one from room II or room V) as the master for a line, the line equivalents given here do not at times give the same basic text as the version in the room under consideration.]

**Concordance 3: RINAP 2 Text 3 (Annals Room XIII) Line Numbers to Botta, Winckler and Fuchs Line Numbers**

RINAP 2 text 3 (Annals Room XIII) line nos.	Botta, Monument de Ninive 4 plate, slab, and line nos.	Winckler, Sar. line no.	Fuchs, Khorsabad line no.

**Concordance 7: Fuchs, Khorsabad Annals Line Numbers to RINAP 2 Text Nos. 1-6 Line Numbers**

[Note: Fuchs' line numbers are given in numerical order, even though in his volume this is not always the case for the ordering for additional/supplementary lines. E.g., here lines 83a and 83b follow lines 83, while in his book they are placed in between two lines 84 (pp. 97-98), and here line 220a follows 220, while in his book it is placed after line 221 (p. 128).]

**Concordance 9: Winckler, Sar. Annals Line Numbers to RINAP 2 Text Nos. 1-6 and 8 Line Numbers**

[Note: Since Winckler used at times the text from one room as the main exemplar and at other times a different room, the line equations are sometimes very loose in view of variations in the text between the rooms. At times it is not clear if Winckler actually used a text cited in the right-hand column in making his edition. In addition to omitting certain lines on slabs that he otherwise used (e.g., RINAP text 1 lines 453-454 on II,34 [Winckler copy no. 25] would fit his lines 380-381), Winckler's list on p. IX omits various slabs used in RINAP (text 1 sections 23, 25, 27 and 28; text 2 sections 16, 17, 20 and 21; text 4 sections 2' and 3'; and of course text 5, which was discovered after his time).]

[Note: Contra Winckler, Sar. 1 p. IX, his copy of II,19 (Botta, Monument de Ninive 4 pl. 83<sup>c</sup>) is his no. 16, not no. 24, and his copy of V,1 (Botta, Monument de Ninive 4 pl. 118<sup>c</sup> bottom) is his no. 52, not no. 58.]

[Note: For his lines 436-462, Winckler used text no. 8 (Display Inscription from room XIV) lines 68-87.]

[Note: In this file I have added information on several extra slabs and lines not used by Winckler in his edition.]

**Winckler, Sar.**

[Note: Those texts that are mentioned in the Introduction of volume 1 of Winckler, Sar., and have copies in volume 2, but are not edited, are listed first, via the page and reference number to them in the Introduction to volume 1. For the other texts the page number and reference number in the Introduction are not given as the main reference in the concordance below. Two further texts neither mentioned in the Introduction nor edited in volume 1, but with copies in volume 2, are listed at the end of the chart.]

*Concordance B:*

[Note: This concordance only includes those text copies in Winckler's volume 2 that are found on wall slabs. Those that Winckler indicates were collated from squeezes are indicated with <sup>c</sup> after his copy number. Those that were not collated have not been used in the present volume; however, the equivalent text and section here is cited within square brackets.]
